LIST OF TRADE-MARK APPLICANTS

PUBLISHED FOR OPPOSITION

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907]

Abbott Laboratories, North Chicago, Ill. Orally administered medicaments. Serial No. 397,164; Nov. 2. Class 6.

Abbott Laboratories, North Chicago, Ill. Product for oral administration in the treatment of anemia. Serial No. 397,165; Nov. 2. Class 6.

Abbott Laboratories, North Chicago, Ill. Isotonic aqueous solution. Serial No. 397,166; Nov. 2. Class 6.

Acme Bronze Powder Company, New York, N. Y. Aluminum paint, aluminum paste, bronzing liquids, etc. Serial No. 392,513; Nov. 2. Class 16.

Acme White Lead and Color Works, Detroit, Mich. Ready mixed paints. Serial No. 396,554; Nov. 2. Class 16.

Adelson, Joseph, & Sons, New York, N. Y. Women's undergarments. Serial No. 394,736; Nov. 2. Class 39.

Advertising Publications, Incorporated, Chicago, Ill., and New York, N. Y. Annual publication. Serial No. 395,255; Nov. 2. Class 38.

Albert, Lisa, doing business as L. Albert Co., New York, N. Y. Commode pad. Serial No. 369,903; Nov. 2. Class 32.

Aluminum Cooking Utensil Company, The, New Kensington, Pa. Base metal table and cooking hollow ware. Serial No. 396,020; Nov. 2. Class 13.

American Concrete Expansion Joint Co., Chicago, Ill. Joints for concrete roads and the like. Serial No. 389,595; Nov. 2. Class 12.

American Giese Wire Corporation, New York, N. Y. Steel music wire. Serial No. 382,547; Nov. 2. Class 36.

American Iron & Machine Works Company, Oklahoma City, Okla. Check-valves, float-valves, gate-valves, etc. Serial No. 395,893; Nov. 2. Class 13.

American Oil Company, The, Baltimore, Md. Lubricating oils and greases. Serial No. 395,466; Nov. 2. Class 15.

Anabolic Food Products, Inc., Chicago, Ill. Supplemental food product. Serial Nos. 386,392–4; Nov. 2. Class 46.

Archer Rubber Company, Milford, Mass. Rubberized fabrics. Serial No. 397,017; Nov. 2. Class 50.

Aristopharm A.-G. (Aristopharm S. A.), (Aristopharm Ltd.), Basel, Switzerland. Medical compound or preparation. Serial No. 392,837; Nov. 2. Class 6.

Arnold Sales Corporation, New York, N. Y. Rayon piece goods. Serial No. 396,483; Nov. 2. Class 42.

Autobridge, Inc., New York, N. Y. Game board. Serial No. 397,833; Nov. 2. Class 22.

Bachmann Brothers, Inc., Philadelphia, Pa. Goggles. Serial No. 396,862; Nov. 2. Class 26.

Baron, Nathan, Jamaica, N. Y. Cough mixture and liniments. Serial No. 396,347; Nov. 2. Class 6.

Baryl, Walter G., doing business as Re-Vi-Vo Products, Chicago, Ill. Polishes or sealers for cleaning and polishing painted, varnished or other finished surfaces. Serial No. 392,839; Nov. 2. Class 16.

Bastian-Morley Co. Inc., La Porte, Ind. Electric water supply heaters. Serial No. 396,591; Nov. 2. Class 21.

Battle Creek Food Company, The, Battle Creek, Mich. Remedy for hypoacidity and digestive disorders. Serial No. 397,065; Nov. 2. Class 6.

Bawin, Achille, New York, N. Y. Vanillin sugar. Serial No. 394,161; Nov. 2. Class 46.

Berkshire Knitting Mills, Wyomissing, Pa. Hosiery. Serial No. 396,863; Nov. 2. Class 39.

Berkshire Knitting Mills, Wyomissing, Pa. Hosiery. Serial No. 396,866; Nov. 2. Class 39.

Berry Bros. & Co., London, England. Scotch whiskey. Serial No. 396,296; Nov. 2. Class 49.

Birmingham Paper Co., Birmingham, Ala. School tablets, pads, blank books, etc. Serial No. 395,514; Nov. 2. Class 37.

Blue Ribbon Noodle Company, Inc., Wilkes-Barre, Pa. Noodles, spaghetti, macaroni, etc. Serial No. 395,396; Nov. 2. Class 46.

Bonani, Ricardo, é Hijos, Bell Ville, Cordoba, Argentina. Footballs, basketballs, rugby balls, etc. Serial No. 395,397; Nov. 2. Class 22.

Brownville Board Company, Brownville, N. Y. Solid white paper tagboard. Serial No. 396,444; Nov. 2. Class 37.

Burgess Battery Company, Chicago, Ill. Flashlights and flashlight cases. Serial Nos. 396,908–9; Nov. 2. Class 21.

Byron, Leon Jay, Co., Inc., New York, N. Y. Blouses, pajamas, petticoats, etc. Serial Nos. 396,178–9; Nov. 2. Class 39.

California Conserving Company, Incorporated, San Francisco, Calif. Periodical program skits for radio stations. Serial No. 393,971; Nov. 2. Class 38.

Callahan, L. J., & Co., Inc., New York, N. Y. Wines. Serial No. 395,898; Nov. 2. Class 47.

Caporale, Antonio, doing business as Caporale Brothers Company, Boston, Mass. Cigars. Serial No. 394,659; Nov. 2. Class 17.

Carrel, Chicago. (See Walgreen Co.)

Chefford Master Manufacturing Co., Fairfield, Ill. Diaphragms. Serial No. 395,017; Nov. 2. Class 23.

Cities Service Oil Company, Bartlesville, Okla. Quenching oil. Serial No. 396,593; Nov. 2. Class 15.

Cities Service Oil Company, Bartlesville, Okla. Journal and heavy duty oil. Serial No. 396,594; Nov. 2. Class 15.

Cleveland Chemical Associates, Incorporated, Cleveland, Ohio. Colloidal cream of aluminum hydroxide. Serial No. 396,351; Nov. 2. Class 6.

Clune, Andrew G., doing business as National Fur Institute, Brooklyn, N. Y. Hudson seal fur. Serial No. 397,021; Nov. 2. Class 1.

Cohn-Hall-Marx Co., New York, N. Y. Piece goods. Serial No. 392,088; Nov. 2. Class 42.

Colton Razor Blade Company, Boston, Mass. Safety razor blades. Serial Nos. 396,979–80; Nov. 2. Class 23.

Combination Door Co., The. (See Schmidt, Louis J.)

Commercial Creamery Company, Inc., Spokane, Wash. Modified egg albumen for food purposes. Serial No. 395,637; Nov. 2. Class 46.

Commercial Italiana Società Anonima per il Rayon Cisa-Rayon, Rome, Italy. Artificial textile fibres. Serial No. 394,697; Nov. 2. Class 1.

Coochicos, Spiros, New York, N. Y. Preparation for removal of dandruff, hair tonic, preparation for prevention of falling hair, etc. Serial No. 395,285; Nov. 2. Class 6.

Cornell, Beaumont S., Fort Wayne, Ind. Preparation for the treatment of neoplasms. Serial No. 396,119; Nov. 2. Class 6.

Crutcher, Carlile, Louisville, Ky. Illustrated stories. Serial No. 393,753; Nov. 2. Class 38.

Crystex Laboratories, Inc., Charlton, Iowa. Liquid preparation for the treatment of athlete's foot. Serial No. 393,160; Nov. 2. Class 6.

Davenport, Cornelia W., Philadelphia, Pa. Dry rouges, face powders, body powders, etc. Serial No. 378,481; Nov. 2. Class 6.

Dempster Brothers, Incorporated, Knoxville, Tenn. hoisting units and detachable brackets and containers therefor. Serial No. 392,582; Nov. 2. Class 23.

Di Mauro, Joseph, Ansonia, Conn. Medicinal preparation. Serial No. 396,301; Nov. 2. Class 6.

Dodge, F. W., Corporation, New York, N. Y. Section of a monthly publication. Serial No. 396,226; Nov. 2. Class 38.

Doehler Die Casting Co., New York, N. Y. Castings made from aluminum alloys. Serial No. 397,435; Nov. 2. Class 14.

Dudgeon, Floyd R., doing business as Lyric Beauty Products, Oakland, Calif. Beauty products. Serial No. 388,832; Nov. 2. Class 6.

Dutchman, Ernest, London, England. Preparation to be used on cigarette or pipe tobacco. Serial No. 386,416; Nov. 2. Class 6.

Eastman Kodak Company, Jersey City, N. J., and Rochester, N. Y. Photographic film, sound recording film, etc. Serial No. 396,264; Nov. 2. Class 26.

Economy Paper Products Company, Milwaukee, Wis. Waxed paper. Serial No. 391,857; Nov. 2. Class 37.

Elnhorn, Emil, New York, N. Y. Cleansing cream, lipstick, face powder, etc. Serial No. 383,769; Nov. 2. Class 6.

Electro-Cosmic, Inc., Chicago, Ill. Odorproof containers. Serial No. 397,111; Nov. 2. Class 2.

Electromaster, Inc., Detroit, Mich. Electric ranges and parts thereof. Serial No. 396,983; Nov. 2. Class 21.

Ever-Plastics Corporation, New York, N. Y. Preparation for use in the grafting and dressing of trees and plants. Serial No. 396,532; Nov. 2. Class 6.

Ever-Plastics Corporation, New York, N. Y. Plastic compounds for setting glass, etc. Serial No. 397,505; Nov. 2. Class 12.

Ez-Fire Company, Ludowici, Ga. Kindling blocks. Serial No. 396,457; Nov. 2. Class 1.

Fabergé Inc., New York, N. Y. Perfume, toilet water, face powder, etc. Serial No. 394,832; Nov. 2. Class 6.

Fine Foods, Inc., Seattle, Wash. Malt syrups for food purposes. Serial No. 382,949; Nov. 2. Class 46.

Florex Laboratory, Los Angeles, Calif. Pharmaceutical acidophilus compound. Serial No. 385,274; Nov. 2. Class 6.

Ford Hopkins Company, also doing business as The Laxative Clinic, Chicago, Ill. Laxative in tablet form. Serial No. 395,413; Nov. 2. Class 6.

Garden State Tanning Co., New York, N. Y. Raw hides. Serial No. 396,034; Nov. 2. Class 1.

Globe Photo, Inc., Greenville, S. C. Photographic prints. Serial No. 395,664; Nov. 2. Class 38.

Goetz, Ludwig E., New York, N. Y. Blouses and dresses. Serial No. 396,398; Nov. 2. Class 39.

PUBLISHED FOR OPPOSITION

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907]

Goldwater, Stanford J., New York, N. Y. Pillow protectors, blanket protectors, etc. Serial No. 387,376; Nov. 2. Class 42.

Goodrich, B. F., Company, The, New York, N. Y., and Akron, Ohio. Hot water heaters for automobiles. Serial No. 396,130; Nov. 2. Class 19.

Arnold, Albert W., Miami, Fla. Grease gun. 2,097,612; Nov. 2.
Arnold, Herrick R., Elmhurst, and E. T. Lessig, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Synthesis of alkyl halides. 2,097,750; Nov. 2.
Arp, Leonard D., Sherburne, and W. H. Fischer, Pipestone, Minn. Envelope construction. 2,097,505; Nov. 2.
Arthur, James L., and W. D. Schrope, Anderson, Ind., assignors to General Motors Corporation, Detroit, Mich. Distributor cap. 2,097,426; Nov. 2.
Ashley, Arthur W., Houston, Tex. Bolted joint. 2,097,713; Nov. 2.
Atkinson, Ralph L., Boston, Mass. Process and apparatus for making sausage casings and the like. 2,097,684; Nov. 2.
Atz, Frederick W., Jr., Philadelphia, Pa., assignor to Link-Belt Company, Chicago, Ill. Conveyer control system. 2,097,909; Nov. 2.
Auger, William F., Winnipeg, Manitoba, Canada. Frost shield. 2,098,127; Nov. 2.
Austin, Paul R., and P. L. Salzberg, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Thiophthalide and making the same. 2,097,435; Nov. 2.
Automatic Instrument Company. (See Green, Clifford H., assignor.)
Automatic Unit Corporation. (See Dearing, Lester V., assignor.)
Auty, Frank, Little Neck, N. Y. Play pen. 2,097,506; Nov. 2.
Ayre, Calvin M., Arlington, Va. Rotary compressor or pump. 2,097,714; Nov. 2.
B-L Electric Manufacturing Company. (See Peters, Carl E., assignor.)
Baash-Ross Tool Company. (See Brown, Ora A., assignor.)
Back, Sydney. (See Clayton, W., Back, Morse, and Johnson.)
Bagpak, Inc. (See Cundall, Robert N. and L. A., assignors.)
Bailey, Clarence M., Baton Rouge, La. Rubber oil can spout. 2,098,128; Nov. 2.
Bailey, Lawrence H., assignor to F. J. Stokes Machine Company, Philadelphia, Pa. Vacuum drier with centrifugal dust separator. 2,098,024; Nov. 2.
Baldry, George E., Winnipeg, Manitoba, Canada. Excavating and hoisting machine. 2,098,173; Nov. 2.
Baldwin, Jesse A., Spooner, Wis. Oil filter. 2,097,828; Nov. 2.
Baldwin-Southwark Corporation. (See Essl, Max, assignor.)
Ballou, B. A. & Co. (See Morehouse, Eugene, assignor.)
Baltich, Michael, Cold Spring, N. Y. Body-resting device. 2,097,751; Nov. 2.
Bamford, Harry S., Philadelphia, Pa., assignor to Farnsworth Television Incorporated, San Francisco, Calif. Incandescent screen. 2,097,994; Nov. 2.
Barney, Harold L., St. Louis, Mo., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Control circuit. 2,097,507; Nov. 2.
Bartsch, Henry G., Washington, D. C. Slate supporting clip. 2,097,715; Nov. 2.
Bassler, Carlos J., assignor to American Liquid Meter Company, Alhambra, Calif. Apparatus for measuring oil or the like. 2,097,829; Nov. 2.
Batcheller, Clements, Portsmouth, N. H., assignor to Bemis Industries, Incorporated, Boston, Mass. Process and apparatus for making and coloring cement fiber and the like products. 2,097,613; Nov. 2.
Bates, Harry H., Ridley Park, Pa. Pulverizer. 2,097,910; Nov. 2.
Bates, John B., assignor to Titanite Alloys Corporation, Euclid, Ohio. Aluminum alloy. 2,098,081; Nov. 2.
Beach, William H. (See Wright, W. N., and Beach.)

Beard, Joseph G., Springfield, Mass., assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. System of temperature control. 2,097,808; Nov. 2.
Beck, Koller & Company. (See Jarl, Carl H. B., assignor.)
Becker, George F., Detroit, assignor to Chrysler Corporation, Highland Park, Mich. Vehicle body. 2,097,911; Nov. 2.
Becker, Helmut, assignor to Ernst Leitz G. m. b. H., Wetzlar, Germany. Workshop microscope. 2,097,752; Nov. 2.
Bedford, Bernice D. (See Willis, C. H., Elder, and Bedford.)
Belcher, Clarence F. (See Lulek, R. N., and Belcher.)
Bell Telephone Laboratories, Incorporated. (See Barney, Harold L., assignor.)
Bell Telephone Laboratories, Incorporated. (See Chaffee, Joseph G., assignor.)
Bell Telephone Laboratories, Incorporated. (See Gabriel, J. C., and Rodwin, assignors.)
Bell Telephone Laboratories, Incorporated. (See Kinsley, Thomas G., assignor.)
Bell Telephone Laboratories, Incorporated. (See Mills, Percy E., assignor.)
Bell Telephone Laboratories, Incorporated. (See Prescott, Charles H., Jr., assignor.)
Bell, Wright H., Oneonta, N. Y. Loaded and light car brake. 2,098,129; Nov. 2.
Bemis Industries, Incorporated. (See Batcheller, Clements, assignor.)
Benedek, Elek K., Bucyrus, Ohio. Variable displacement pump or motor. 2,097,830; Nov. 2.
Bennetch, David S., Sheridan, Pa. Transmission. 2,097,436; Nov. 2.
Bennett, Harry, New York, N. Y. Balance. 2,097,753; Nov. 2.
Benz, Cyril C., Long Beach, Calif. Oil testing machine. 2,097,716; Nov. 2.
Bergstein, Edna M., et al, trustees. (See Bergstein, Robert M., assignor.)
Bergstein, Edna M., trustee et al. (See Bergstein, Samuel, assignor.)
Bergstein, Robert M., Cincinnati, Ohio, assignor to E. M. Bergstein and himself, as trustees. Sealing containers. 2,097,427; Nov. 2.
Bergstein, Robert M., trustees, et al. (See Bergstein, Samuel, assignor.)
Bergstein, Samuel, Cincinnati, Ohio, assignor to E. M. and R. M. Bergstein, as trustees. Mechanism for sealing packages hermetically. 2,097,428; Nov. 2.
Berke, Peter L., Duluth, Minn. Cover fastener. 2,097,717; Nov. 2.
Berkshire Knitting Mills. (See Hemmerich, Hugo, assignor.)
Berne Manufacturing Company. (See Habegger, Carl T., assignor.)
Best, Frank C., assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 2,097,437; Nov. 2.
Best, Frank C., assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 2,097,438; Nov. 2.
Beutner, Reinhard, Louisville, Ky. Therapeutic preparation and making the same. 2,097,439; Nov. 2.
Beyrodt, Kurt, Hartford, Conn., assignor to Electric Steam Sterilizing Company, Inc., New York, N. Y. Electric steam generator. 2,097,581; Nov. 2.
Beyrodt, Kurt, Hartford, Conn., assignor to Electric Steam Sterilizing Company, Inc., New York, N. Y. Electric steam generator. 2,097,582; Nov. 2.
Blagosch, Karl. (See Pelseler, Kuno, assignor.)
Bildersback, James L., Newberry, Fla. Rotary pump. 2,097,718; Nov. 2.
Binford, Hugh L., Houston, Tex., and O. W. Putnam, Selma, Ala. Paper roll printing attachment. 2,098,130; Nov. 2.
Bixby, Ralph F., and J. H. Meyer, St. Louis, Mo.; said Meyer assignor to said Bixby. Air conditioning apparatus. 2,097,556; Nov. 2.
Blood, Harold L., assignor to The Heald Machine Company, Worcester, Mass. Grinding machine. 2,097,429; Nov. 2.
Bloch, Howard H., Cleveland, Ohio, assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Anode. 2,097,508; Nov. 2.
Bluestein, Samuel, et al. (See Rivas, Rafael, assignor.)
Bluhm, William, New York, N. Y. Overflow preventing device. 2,098,131; Nov. 2.
Blumer, Manuel, Butler, Pa., assignor to L. Sonneborn Sons, Inc. Purifying mahogany soap. 2,097,440; Nov. 2.
Bodle, David W. (See Swart, L. K., and Bodle.)
Boekelman, Willem A., Bilthoven, and A. Elfers, Harlem, Netherlands. Surface printing plate, more particularly of et-printing plate and printing therewith. 2,097,831; N 2.
Bo John L., Brooklyn, N. Y. Opposed piston internal c bustion engine. 2,097,583; Nov. 2.
Bohn Aluminum and Brass Corporation. (See Eggenweiler, C. W., and Flegel, assignors.)
Bohn Aluminum & Brass Corporation. (See Flegel, William J., assignor.)
Boisselier, Earl D., Glen Ellyn, assignor to American Flyer Manufacturing Company, Chicago, Ill. Toy electric railway. 2,097,961; Nov. 2.
Bollens, Walter F. (See Newton, R. C., Bollens, and Brown.)
Boller, Ernest R., Euclid, Ohio, assignor, by mesne assignments, to E. I. du Pont de Nemours Company, Wilmington, Del. Fireproofing. 2,097,509; Nov. 2.
Bolton, William J., Pittsburgh, Pa. Refrigerating system. 2,097,685; Nov. 2.
Boman, Bernard W. (See Elmore, Charles F., assignor.)
Bonawit, David J. (See Whitelaw, A., and Bonawit.)
Bonney-Floyd Company, The. (See Edmunds, Glenn E., assignor.)
Bonney-Floyd Company, The. (See Edmunds, G. E., and Purkhiser, assignors.)
Booge, James E., Wilmington, I. J. Krchma, Elmhurst, and R. M. McKinney, Roselle, Del., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company. Recovering soluble titanium compounds from titaniferous ores. 2,098,025; Nov. 2.
Booge, James E., Wilmington, I. J. Krchma, Elmhurst, and R. M. McKinney, Roselle, Del., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company. Attacking water insoluble titaniferous material. 2,098,026; Nov. 2.
Borg-Warner Corporation. (See Kilpela, Ano E., assignor.)
Boston Woven Hose and Rubber Company. (See McKay, Hunter, assignor.)
Boussel, Lucien A., Courbevoie, assignor to Societe Anonyme des Anciens Etablissements Hotchkiss & Cie, Seine, France. Remote control for machine guns. 2,097,962; Nov. 2.
Bowden, Richard B. (See Bowden, Frederick S. and R. B.)
Bowden, Frederick S. and R. B. Bowden, Kansas City, Kans., assignors to White Springs Distillery, Inc. Producing distilled alcoholic spirits. 2,097,545; Nov. 2.
Bowen, Albert W., and T. W. Dike, assignors to I. F. Laucks, Inc., Seattle, Wash. Reaction product of cellulosic material. 2,098,082; Nov. 2.
Bowen, Albert H., and T. W. Dike, assignors to I. F. Laucks, Inc., Seattle, Wash. Synthetic resin adhesive. 2,098,083; Nov. 2.
Boyd, Guy S. and S. H., York, Pa. Exterminating device for bugs and insects. 2,098,027; Nov. 2.
Boyd, Stephen H. (See Boyd, Guy S. and S. H.)
Brandt, Allen D. (See Shindel, H. F., and Brandt.)
Bradshaw, George B., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Stencil sheet. 2,097,754; Nov. 2.
Brandt, Francis L., Wakefield, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating upon the heel-portions of shoes. 2,097,558; Nov. 2.
Brenbeck, Howard S., North Manchester, assignor to The Cyclone Manufacturing Co., Urbana, Ind. Float controlled drinking fountain. 2,097,719; Nov. 2.
Brenner, Jack L., Utica, assignor to Sharon Optical Company, Inc., Geneva, N. Y. Lens marker. 2,097,832; Nov. 2.
Breton, Paul. (See Guérin, M., and Breton.)
Brewer, Robert B. (See Roe, William C., assignor.)
Bridgeport Thermostat Company. (See Ward, Marshall H., assignor.)
Bristol, Cyrus J., assignor to Globe Hoist Company, Des Moines, Iowa. Automobile lift. 2,097,853; Nov. 2.
Brock, Margaret B., Muncy, Pa. Garment stretcher. 2,097,809; Nov. 2.
Bronson, Adelbert E., assignor to The Dill Manufacturing Company, Cleveland, Ohio. Valve insides. 2,097,614; Nov. 2.
Brooks, Herbert D. (See Kittredge, T., and Brooks.)
Broquinda, Inc. (See Quinn, Clara E., assignor.)
Brown, Cicero C., Houston, Tex. Liner setting tool. 2,097,755; Nov. 2.
Brown, Harold D., Los Angeles, Calif. Roof covering and roofing member. 2,097,546; Nov. 2.
Brown, Hugh S., Harvey, Ill., assignor to Hubron Company, Inc., Somerville, N. J. Tire remover. 2,097,430; Nov. 2.
Brown, John C., New York, N. Y. Fruit pitter. 2,097,756; Nov. 2.
Brown, John H., and T. B. Clarke, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Fluid-applying machine. 2,097,557; Nov. 2.
Brown, Leo C. (See Newton, R. C., Bollens, and Brown.)
Brown, Ora A., South Gate, assignor to Baash-Ross Tool Company, Los Angeles, Calif. Well tool. 2,097,547; Nov. 2.
Browning, J. M. & M. S., Company. (See Browning, Marriner A., assignor.)
Browning, Marriner A., assignor to J. M. & M. S. Browning Company, Ogden, Utah. Firearm. 2,097,782; Nov. 2.
Brownlee, Robert L., Chicago, Ill. Clutch pulley. 2,097,559; Nov. 2.
Brun, Georges J. P. J. J., St. Etienne, France. Stabilizing device for two-stroke free piston engines. 2,097,431; Nov. 2.
Brün, Willi, Stratford, Conn., assignor to Remington Arms Company, Inc. Priming mixture. 2,097,510; Nov. 2.
Bruson, Herman A., assignor to Röhm & Haas Company, Philadelphia, Pa. Aromatic polyether chlorides. 2,097,441; Nov. 2.
Bruson, Herman A., assignor to Röhm & Haas Company, Philadelphia, Pa. Aromatic polyether chloride. 2,098,203; Nov. 2.

Bruson, Herman A., assignor to Röhm & Haas Company, Philadelphia, Pa. Phenolic chloroethers. 2,098,204; Nov. 2.
Buchhold, Theodor, Mannheim-Neuostheim, Germany, assignor to Aktiengesellschaft Brown Boveri & Cie, Baden, Switzerland. Electric drive system. 2,098,177; Nov. 2.
Büchholz, Erich, Berlin, assignor to H. Lindner, Berlin-Wittenau, Germany. Mechanism for producing accurately pitched cutting on circular work. 2,098,132; Nov. 2.
Budd Wheel Company. (See Eksergian, Carolus L., assignor.)
Burdick, Harry J. McC., Anaheim, Calif. Automatic humidifier. 2,097,548; Nov. 2.
Burnham, Stanley W., Elizabeth, assignor to Merck & Co., Inc., Rahway, N. J. Bottle neck construction. 2,097,912; Nov. 2.
Burkhardt, Chandos, assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 2,098,028; Nov. 2.
Burns, Erwin, Los Angeles, and H. P. Wickersham, Huntington Park, Calif. Casing head. 2,097,615; Nov. 2.
Burpee Can Sealer Company. (See Carson, Robert H., assignor.)
Burrill, Charles M., Haddonfield, N. J., assignor to Radio Corporation of America. Recording and reproducing of sound. 2,097,995; Nov. 2.
Burrows, Robert J., and A. O. Williams, Battle Creek, assignors to Clark Equipment Company, Buchanan, Mich. Brake shoe construction. 2,097,584; Nov. 2.
Butcher, William T., Ilford, assignor to Goodlass Wall & Lead Industries Limited, London, England. Lead and lead alloys. 2,097,560; Nov. 2.
Butler, Arthur G., Eggertsville, N. Y., assignor, by mesne assignments, to Curtiss-Wright Corporation. Auxiliary surface control. 2,097,996; Nov. 2.
C-O-Two Fire Equipment Company. (See Allen, Scott E., assignor.)
Cady, Charles P., and L. E. Johnson, assignors to Westlake Manufacturing Corporation, Canastota, N. Y. Sander. 2,097,963; Nov. 2.
Caestecker, Charles E., assignor to Accurate Spring Mfg. Company, Chicago, Ill. Retaining means for bezels and escutcheon plates. 2,097,511; Nov. 2.
Calco Chemical Company, The. (See Hill, Alfred G. and A. J., assignors.)
Campbell, Charles A., Watertown, N. Y., assignor to The New York Air Brake Company. Air brake. 2,097,964; Nov. 2.
Campbell, John. (See Hanson, D., and Pell-Walpole, assignors.)
Car Devices Company. (See Hannaford, Cleon M., assignor.)
Carborundum Company, The. (See Harris, Earl J., assignor.)
Carborundum Company, The. (See Wooddell, Charles E., assignor.)
Card, William C., Jr., Winthrop, Mass., assignor to Compo Shoe Machinery Corporation, New York, N. Y. Welt holding mechanism. 2,097,869; Nov. 2.
Card, William C., Jr., Winthrop, assignor to Compo Shoe Machinery Corporation, Boston, Mass. Welt support. 2,097,870; Nov. 2.
Cardwell-Westinghouse Company. (See Hedgcock, W. C., and Light, assignors.)
Cardwell-Westinghouse Company. (See Sproul, Donald F., assignor.)
Carlson, Fred C., Lakewood, Ohio, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Inhibitor. 2,097,512; Nov. 2.
Carlson, Gustav W., Cleveland Heights, assignor to Eaton Manufacturing Company, Cleveland, Ohio. Sealing device and assembly. 2,098,084; Nov. 2.
Carnahan, Florence, et al. (See Carnahan, Ralph W., assignor.)
Carnahan, Ralph W., Shaker Heights, assignor of one-fourth to H. and S. Seegel, Cleveland, A. E. Emerman, executor of said R. W. Carnahan, deceased, assignor of three-fourths to F. Carnahan, Cleveland Heights, Ohio. Automatic telephone alarm. 2,098,133; Nov. 2.
Carolina Chemical Company. (See Daughety, Carl O., assignor.)
Carson, Robert H., assignor to Burpee Can Sealer Company, Chicago, Ill. Valve for pressure cookers, sterilizers and the like. 2,097,585; Nov. 2.
Carter Carburetor Corporation. (See Whisler, Ralph H., assignor.)
Carter, Peter G., and R. H. Sennett, Blackley, Manchester, England, and C. Shaw, Grangemouth, Scotland, assignors to Imperial Chemical Industries Limited. Acetate artificial silk dyestuffs. 2,097,432; Nov. 2.
Carver Cotton Gin Company. (See McLean, Robert W., assignor.)
Casey, Irene M., Oakland, Calif. Decorative article. 2,097,513; Nov. 2.
Casey, Ledgeworth G., assignor to The Cincinnati Electrical Tool Company, Cincinnati, Ohio. Grinding machine. 2,097,944; Nov. 2.
Cass, Oliver W., Niagara Falls, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Chlorinating 1,1-dichlorpropene-1. 2,097,442; Nov. 2.
Caulk, Luther W., Jr., Suffolk, Va. Tag fastener. 2,097,965; Nov. 2.

Celanese Corporation of America. (See Gibbs, Bradford C., assignor.)
Celanese Corporation of America. (See Kinsella, Edward, assignor.)
Central National Bank of Cleveland. (See McKee, Willis, assignor.)
Chaffee, Joseph G., Hackensack, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electron discharge system for ultrashort waves. 2,097,514; Nov. 2.
Chambless, Ersyl F., assignor, by mesne assignments, to The Cracker Jack Co., Chicago, Ill. Method of and machine for packaging goods. 2,097,515; Nov. 2.
Chello, John C. (See Gallinant, Raphael C., assignor.)
Chicago Electric Manufacturing Company. (See Preston, Edward S., assignor.)
Chicago Flexible Shaft Company. (See Jepson, Ivar, assignor.)
Childress, William C., Oak Park, assignor to Acme Steel Company, Chicago, Ill. Strap stretching and sealing device. 2,097,443; Nov. 2.
Childress, William C., Oak Park, assignor to Acme Steel Company, Chicago, Ill. Strap stretching device. 2,097,444; Nov. 2.
Childress, William C., Oak Park, assignor to Acme Steel Company, Chicago, Ill. Strap stretching and sealing device. 2,097,945; Nov. 2.
Childress, William C., Oak Park, assignor to Acme Steel Company, Chicago, Ill. Strap sealing apparatus. 2,097,946; Nov. 2.
Choice, Frank C. (See Ricks, F., and Choice.)
Christman, John M., Packard Motor Car Company, Detroit, Mich. Wheel suspension for motor vehicles. 2,097,445; Nov. 2.
Chrysler Corporation. (See Becker, George F., assignor.)
Cincinnati Electrical Tool Company. (See Casey, Ledgeworth G., assignor.)
Citizens Trust Company, trustee. (See Repogle, Daniel B., assignor.)
Claiborne, John T., Jr., New York, N. Y., and P. D. Peterson, New Brunswick, N. J., assignors, by mesne assignments, to Freeport Sulphur Company. Phosphate-sulphur fertilizer and making same. 2,097,446; Nov. 2.
Clark Equipment Company. (See Burrows, R. J., and Williams, assignors.)
Clark, Lloyd G., and M. A. Grogel, assignors to American Box Board Company, Grand Rapids, Mich. Shipping case. 2,097,433; Nov. 2.
Clarke, George. (See Lincham, R. A., and Clarke.)
Clarke, Thomas B. (See Brown, J. H., and Clarke.)
Clayton, William, S. Back, J. F. Morse, and R. I. Johnson, assignors to Crosse & Blackwell Limited, London, England. Treatment of olive oil to prevent stearin coming down at low temperatures. 2,097,720; Nov. 2.
Cledina, Raphael, Liege, Belgium. Roller skate. 2,097,721; Nov. 2.
Cleveland Automatic Machine Company, The. (See Rupple, Harry W., assignor.)
Cleveland, John A. (See Skinner, William F., assignor.)
Cleveland Rock Drill Company, The. (See Curtis, John C., assignor.)
Clifford, Dell G., Chicago, Ill. Apparatus for laying pavement. 2,097,913; Nov. 2.
Cloutier, Arthur N. (See Lawson, R. H., and Cloutier.)
Coddington, Edwin D., Milwaukee, Wis., assignor to Reynolds Corporation, New York, N. Y. Joist. 2,097,722; Nov. 2.
Coe, Mayne R., dedicated to the free use of the public in the United States of America, Washington, D. C. Preserving oils and fats. 2,097,516; Nov. 2.
Coffman, Samuel M. (See Meinhardt, J. H., and Coffman.)
Cohee, Charles C., Indianapolis, Ind. Smoking pipe. 2,097,686; Nov. 2.
Cohen, Meyer C. (See Stangeland, Peder O., assignor.)
Cole, Raymond A., assignor to Norton Company, Worcester, Mass. Grinding machine. 2,097,783; Nov. 2.
Cole, Raymond A., assignor to Norton Company, Worcester, Mass. Callpering apparatus. 2,097,784; Nov. 2.
Collapsible Tube Closures Inc. (See Teas, Charles C., assignor.)
Columbus McKinnon Chain Corporation. (See Stahl, Frank E., assignor.)
Commercial Solvents Corporation. (See Stiles, Hugh R., assignor.)
Compo Shoe Machinery Corporation. (See Card, William C., Jr., assignor.)
Consolidated Car-Heating Company. (See Parsons, Robert J., assignor.)
Consolidated Expanded Metal Companies, The. (See Mack, Wayne E., assignor.)
Consolidated Gas Electric Light and Power Company. (See Karrer, Sebastian, assignor.)
Continental Gin Company. (See Hagler, Clyde E., assignor.
Cook, Bennie, Oklahoma City, Okla., and Edward C. Pfeffer, Corpus Christi, Texas. Bearing cup extracting tool. 2,098,134; Nov. 2.
Cooper, Bert F. (See Madden, E. C., Cooper, and Cuykendall.)
Cooper, Edward, and T. C. Shiels, assignors to Elias Rogers Company Limited, Toronto, Ontario, Canada. Apparatus for treating solid fuel particles. 2,097,914; Nov. 2.
Corcoran-Brown Lamp Company. (See Lewis, Grant H., assignor.)

Corse, Herbert M., near Green Cove Springs, Fla. Fuel control system. 2,098,178; Nov. 2.
Cracker Jack Co., The. (See Chambless, Ersyl F., assignor.)
Crawford, Almond J., Nyack, Mont. Sanitary closet. 2,097,997; Nov. 2.
Crawford, John W. C., Ardrossan, Scotland, assignor to Imperial Chemical Industries, Limited. Production of polymerized unsaturated compounds. 2,097,586; Nov. 2.
Crompton & Knowles Loom Works. (See Holmes, Elbridge, R., assignor.)
Crompton & Knowles Loom Works. (See Wakefield, Walter H., assignor.)
Crosse & Blackwell Limited. (See Clayton, W., Back, Morse, and Johnson, assignors.)
Crossley, Frank S. (See Hartung, W. H., Young, and Crossley.)
Cummins, Norman W., assignor to Adler Manufacturing Co., Incorporated, Louisville, Ky. Carpet sweeper dumping mechanism. 2,097,549; Nov. 2.
Cundall, Lincoln A. (See Cundall, Robert N. and L. A.)
Cundall, Luta L., administratrix. (See Cundall, Robert N. and L. A.)
Cundall, Robert N., Lackawanna, and L. A. Cundall, Buffalo, assignors to Bagpak, Inc., New York, N. Y. Apparatus for filling, sewing, and sealing bags. 2,097,447; Nov. 2.
Cundall, Robert N., Lackawanna, and L. A. Cundall, Buffalo, assignors to Bagpak, Inc., New York, N. Y. Apparatus for closing bags. 2,097,448; Nov. 2.
Cundall, Robert N., Lackawanna, and L. A. Cundall, Buffalo, assignors to Bagpak, Inc., New York, N. Y. Apparatus for filling, sewing, and sealing bags. 2,097,449; Nov. 2.
Cundall, Robert N., deceased, by L. L. Cundall, administratrix, Lackawanna, and L. A. Cundall, Buffalo, assignors to Bagpak, Inc., New York, N. Y. Apparatus for sewing and sealing filled bags. 2,097,450; Nov. 2.
Curtis, David, New York, N. Y. Surface anesthetic. 2,097,687; Nov. 2.
Curtis, John C., Garfield Heights, assignor to The Cleveland Rock Drill Company, Cleveland, Ohio. Feeding mechanism for rock drills. 2,097,561; Nov. 2.
Curtiss-Wright Corporation. (See Butler, Arthur G., assignor.)
Cutler-Hammer, Inc. (See Hodgson, Howard E., assignor.)
Cuykendall, Earl R. (See Madden, E. C., Cooper, and Cuykendall.)
Cyclone Manufacturing Co., The. (See Brembeck, Howard S., assignor.)
Dahlen, Miles A., Wilmington, Del., and M. E. Friedrich, Carney's Point, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Ice color intermediates. 2,097,915; Nov. 2.
Daily, Earl L., Columbus, Ohio. Automobile safety bumper. 2,097,833; Nov. 2.
Dallmann, Herbert, Karlshorst, Germany, assignor to General Electric Company. Electrical instrument. 2,098,029; Nov. 2.
Daniels, Claude H., Wellesley Hills, Mass. Shoe. 2,097,451; Nov. 2.
D'Arcey, John, Chelsea, Mass. Liquid level indicator. 2,098,085; Nov. 2.
Daughety, Carl O., Ayden, N. C., assignor to Carolina Chemical Company. Composition for destroying suckers in tobacco and tomato plants. 2,098,135; Nov. 2.
David, Newcomb, Company, Inc. (See Ludwig, John E., assignor.)
Davis, Ernest W., Oak Park, assignor to Stewart-Warner Corporation, Chicago, Ill. Lubricating apparatus. 2,097,871; Nov. 2.
Davis, Theophilus A., Los Angeles, Calif. Racket. 2,097,616; Nov. 2.
Dawes, Robert T., Hudson, Mass. Shoe gore. 2,097,810; Nov. 2.
Day, Lester S., Hamden, Conn., assignor to American Telephone and Telegraph Company. Portable pole step. 2,097,562; Nov. 2.
Dearborn, Eugene L., Fairfield, Calif. Automatic valve for sprinkler systems. 2,097,452; Nov. 2.
Dearing, Lester V., Milwaukee, Wis., assignor to Automatic Unit Corporation. Sheet feeding device. 2,097,587; Nov. 2.
De Baufre, William L., Lincoln, Nebr. Apparatus for cooling and rectifying mixed gases. 2,097,434; Nov. 2.
Deere & Company. (See Strandlund, Carl G., assignor.)
Deike, Fred. H., Long Beach, assignor of one-fifth to H. Radzinsky, New York, N. Y. Package for electric lamps or similar articles. 2,097,757; Nov. 2.
De Marchi, Artudo, and D. A. Sandin, St. Paul, Minn. Surface grinder. 2,097,655; Nov. 2.
De Motte, Maurice P., Indianapolis, Ind., assignor, by mesne assignments, to Union Carbide and Carbon Corporation. Carbide agitator for acetylene generators. 2,097,617; Nov. 2.
Denesous, Adam J. (See Lustig, Rudolf, assignor.)
Detroit Lubricator Company. (See Dillman, Earnest J., assignor.)
Detroit Lubricator Company. (See Weber, Walter H., assignor.)
Deutsch Erdöl-Aktiengesellschaft. (See Schick, F., and Emilius, assignors.)
Deutsche Gold- und Silber-Scheideanstalt vormals Roessler. (See Kärcher, Alfred, assignor.)
Devenney, Joseph G., Minneapolis, Minn. Combined pasteurizer, churn, and butterworker. 2,098,179; Nov. 2.
Devine, J. P., Manufacturing Co. (See Guyer, Jesse A., assignor.)
Diaz, Ernesto D., Habana, Cuba. Auto transmission. 2,097,656; Nov. 2.
Dickhaut, Charles A., New Brunswick, and S. A. Warner, Somerville, assignors to John Waldron Corporation, New Brunswick, N. J. Vertical unwind device. 2,097,998; Nov. 2.
Dieterle, Walter, Dessau-Ziebigk, Germany, assignor to Agfa Ansco Corporation, Binghamton, N. Y. Photographic desensitizer. 2,098,086; Nov. 2.
Dike, Thedorore W. (See Bowen, A. H., and Dike.)
Dilks, James W., assignor to Moore Electric Corporation, Chicago, Ill. Hair clipper. 2,098,180; Nov. 2.
Dill Manufacturing Company, The. (See Bronson, Adelbert E., assignor.)
Dillman, Earnest J., assignor to Detroit Lubricator Company, Detroit, Mich. Electric switch. 2,098,181; Nov. 2.
Dilthey, Walther, Bonn-on-the-Rhine, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Cyclopentadienone condensation compounds and making them. 2,097,854; Nov. 2.
Dimmick, Glenn L., Audubon, N. J., assignor to Radio Corporation of America. Photographic recording of sound. 2,097,657; Nov. 2.
Dimmick, Glenn L., Haddonfield, N. J., assignor to Radio Corporation of America. Reproduction of sound. 2,097,758; Nov. 2.
Dix, Howard W. (See Myers, Elman B., assignor.)
Dobson, William A., Wethersfield, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 2,097,588; Nov. 2.
Donovan, John F., and G. Illingworth, East Cleveland, Ohio, assignors to General Electric Company. Machine for manufacturing incandescent lamps. 2,098,030; Nov. 2.
Dons, Eddie M. (See Mapes, D. B., and Dons.)
Dons, Eddie M., and D. B. Mapes, assignors to Mid-Continent Petroleum Corporation, Tulsa, Okla. Dewaxing oils. 2,097,999; Nov. 2.
Dorr Company, The. (See Fischer, Anthony J., assignor.)
Dortort, Isadore K., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Motor control system. 2,098,182; Nov. 2.
Douglas, James K. (See Ferris, W., Douglas, and Fobian.)
Dow Chemical Company, The. (See Grether, Ernest F., assignor.)
Dow, George A. (See Lacey, Wilbur E., assignor.)
Drager, Otto H. (See Stampe, Gerhard K. E. H., assignor.)
Drake, Benjamin H., Stockton, Calif. Chair. 2,097,618; Nov. 2.
Dreese, Delbert B., Larned, Kans. Chicken fountain. 2,097,563; Nov. 2.
Dreyfus, Henry, London, England. Treatment of textile materials. 2,097,589; Nov. 2.
Dreyfus, Henry, London, England. Manufacture of vinyl compounds. 2,097,590; Nov. 2.
Dunn, George E. (See Ketcham, F., and Dunn.)
Du Pont, E. I., de Nemours & Company. (See Arnold, H. R., and Lessig, assignors.)
Du Pont, E. I., de Nemours & Company. (See Auston, P. R., and Salzberg, assignors.)
Du Pont, E. I., de Nemours & Company. (See Blouch, Howard H., assignor.)
Du Pont, E. I., de Nemours & Company. (See Boller, Ernest R., assignor.)
Du Pont, E. I., de Nemours & Company. (See Booge, J. E., Krchma, and McKinney, assignors.)
Du Pont, E. I., de Nemours & Company. (See Bradshaw, George B., assignor.)
Du Pont, E. I., de Nemours & Company. (See Carlson, Fred C., assignor.)
Du Pont, E. I., de Nemours & Company. (See Cass, Oliver W., assignor.)
Du Pont, E. I., de Nemours & Company. (See Dahlen, M. A., and Friedrich, assignors.)
Du Pont, E. I., de Nemours & Company. (See Henricks, John A., Jr., assignor.)
Du Pont, E. I., de Nemours & Company. (See Lulek, R. N., and Belcher, assignors.)
Du Pont, E. I., de Nemours & Company. (See Lutz, George, assignor.)
Du Pont, E. I., de Nemours & Company. (See McBerty, Ford H., assignor.)
Du Pont, E. I., de Nemours & Company. (See Wuertz, A. J., and Rintelman, assignors.)
Durand, Joseph J., Minneapolis, Minn. Overfeed stoker. 2,097,564; Nov. 2.
Durgin, Charles B., Anniston, Ala., assignor, by mesne assignments, to Monsanto Chemical Company. Soluble hypochlorite composition. 2,097,517; Nov. 2.
Duro Metal Products Company. (See Hedgpeth, Theron L., assignor.)
Dyckerhoff, Walter, Mainz-Amoeneburg, Germany. Apparatus for use in making cement. 2,098,136; Nov. 2.
Eastman Kodak Company. (See Malm, Carl J., assignor.)
Eaton Manufacturing Company. (See Carlson, Gustav W., assignor.)

Eaton Manufacturing Company. (See Voorhies, Carl, assignor.)
Eberhardt, Ernst, Ludwigshafen-on-the-Rhine, and R. Stadler, Heidelberg, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of chlorbutadiene. 2,098,089; Nov. 2.
Eberts, Edward C., Jeffersonville, assignor to Stokeley Brothers & Company, Indianapolis, Ind. Apparatus for producing tomato products. 2,097,855; Nov. 2.
Eclipse Machine Company. (See Whitney, Maurice P., assignor.)
Edmunds, Glenn E., assignor to The Bonney-Floyd Company, Columbus, Ohio. Mine car. 2,097,966; Nov. 2.
Edmunds, Glenn E., assignor to The Bonney-Floyd Company, Columbus, Ohio. Mine car and the like. 2,097,967; Nov. 2.
Edmunds, Glenn E., assignor to The Bonney-Floyd Company, Columbus, Ohio. Mine car and the like. 2,097,968; Nov. 2.
Edmunds, Glenn E., and R. C. Purkhiser, assignors to The Bonney-Floyd Company, Columbus, Ohio. Wheel mounting. 2,097,969; Nov. 2.
Edmunds, Glenn E., assignor to The Bonney-Floyd Company, Columbus, Ohio. Wheel mounting. 2,097,970; Nov. 2.
Edward Valve & Manufacturing Co., The. (See Mohr, Walter W., assignor.)
Egan, Arthur L. (See Ewing, S. E. T., and Egan.)
Eggenweiler, Charles W., and W. J. Fiegel, assignors to Bohn Aluminum and Brass Corporation, Detroit, Mich. Apparatus for lining tubular members. 2,097,688; Nov. 2.
Eggert, John, Leipzig-Gohlis, and G. Heymer, Wolfen Kreis Bitterfeld, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Producing an embossing roller for manufacturing lenticular film. 2,097,971; Nov. 2.
Ehrlich, Edward, Amsterdam, Netherlands. Corrective sole. 2,097,759; Nov. 2.
Elbert, Fritz, Munich, Germany, assignor to R. Wolff, Basel, Switzerland. Paper carriage escapement device for typewriters. 2,097,834; Nov. 2.
Eltzen, August D., Rockville Centre, assignor to News Projection Corporation, New York, N. Y. Stock quotation projecting machine. 2,097,453; Nov. 2.
Eklind, Carl E., Chicago, Ill., assignor to The Youngstown Steel Door Company, Cleveland, Ohio. House car. 2,098,183; Nov. 2.
Eksergian, Carolus L., Detroit, Mich., assignor to Budd Wheel Company, Philadelphia, Pa. Wheel structure. 2,098,205; Nov. 2.
Elder, Frank R. (See Willis, C. H., Elder, and Bedford.)
Electric Steam Sterilizing Company. (See Beyrodt, Kurt, assignor.)
Elfers, Alberthus. (See Boekelman, W. A., and Elfers.)
Elfstrom, Otto, Valdez, Alaska. Rifle. 2,098,137; Nov. 2.
Ellis, Ray C., Detroit, Mich., assignor to Radio Corporation of America. Combined instrument panel and radio receiver. 2,097,872; Nov. 2.
Elmore, Charles F., Evanston, assignor of one-half to B. W. Boman, Oak Park, Ill. Envelope. 2,097,916; Nov. 2.
Emerman, Adolph E., executor. (See Carnahan, Ralph W.)
Emilius, Eugen. (See Schick, F., and Emilius.)
Engstrom, Birger, assignor of sixty one-hundredths to Spang, Chalfant and Co., Incorporated, Pittsburgh, Pa. Pipe thread protector. 2,098,087; Nov. 2.
Engstrom, Birger, assignor of sixty one-hundredths to Spang, Chalfant and Co., Incorporated, Pittsburgh, Pa. Inside pipe thread protector. 2,098,088; Nov. 2.
Eppensteiner, William F., Rahway, N. J., assignor to The American Metal Company, Limited, New York, N. Y. Apparatus to be used in casting metal. 2,097,658; Nov. 2.
Epps, Frank A., Westfield, N. J., assignor to Gulf Oil Corporation. Fuel oil delivery control indicator. 2,097,835; Nov. 2.
Erban Operating Corporation. (See Madlé, Alain, assignor.)
Erdmann, Konrad, Radenthein, Austria, and F. Hansgirg, Konan, Korea, assignors to American Magnesium Metals Corporation, Pittsburgh, Pa. Conversion of magnesium dust into compact metallic magnesium. 2,097,689; Nov. 2.
Essl, Max, Drexel Hill, Pa., assignor to Baldwin-Southwark Corporation. Internal combustion engine. 2,098,031; Nov. 2.
Evans, Edwin R., Kenilworth, Ill. Reaction type power brake unit. 2,097,873; Nov. 2.
Evans Products Company. (See Fehr, E. J., and Tobin, assignors.)
Ewing, Sydney E. T., and A. L. Egan, Johannesburg, Transvaal, Union of South Africa. Conditioning mine air. 2,097,723; Nov. 2.
Faber, John, Jr., Haledon, N. J. Rope clip. 2,097,550; Nov. 2.
Fahy, Frank P., New Rochelle, N. Y. Method of and apparatus for magnetic testing. 2,097,947; Nov. 2.
Failla, Gioacchino, New York, N. Y. Testing method and apparatus. 2,097,760; Nov. 2.
Fairey Aviation Company Limited, The. (See Youngman, Robert T., assignor.)
Farm Tools, Inc. (See Warne, Frederick C., assignor.)
Farmers Manufacturing Company. (See Lampert, Sadron C., assignor.)
Farnham, Paul O., Boonton, N. J., assignor, by mesne assignments, to Radio Corporation of America. Radio receiver. 2,097,874; Nov. 2.
Farnsworth, Philo T., San Francisco, Calif., and B. C. Gardner, Philadelphia, Pa., assignors to Farnsworth Television Incorporated, San Francisco, Calif. Luminescent screen. 2,098,000; Nov. 2.
Farnsworth Television Incorporated. (See Bamford, Harry S., assignor.)
Farnsworth Television Incorporated. (See Farnsworth, P. T., and Gardner, assignors.)
Favre, John A., Rutledge, Pa., assignor to General Electric Company. Contact mechanism. 2,098,032; Nov. 2.
Fawick, Thomas L., Akron, Ohio, assignor to Industrial Clutch Company. Clutch. 2,097,856; Nov. 2.
Federated Mills, Inc. (See Herz, Sol, assignor.)
Fehr, Eugene J., Hammond, Ind., and K. J. Tobin, Chicago, Ill., assignors, by mesne assignments, to Evans Products Company, Detroit, Mich. Automobile elevating and supporting structure. 2,098,184; Nov. 2.
Ferencl, Lester, Brooklyn, N. Y., assignor to American Machine & Foundry Company. Slicing machine construction. 2,097,875; Nov. 2.
Ferngren, Enoch T., Jackson Heights, N. Y., assignor, by mesne assignments, to Plax Corporation, Hartford, Conn. Transparent container. 2,097,690; Nov. 2.
Ferrari, Arthur M., and G. M. Hoffman, Algoma, Oreg. Saw swage. 2,097,659; Nov. 2.
Ferris, Walter, and J. K. Douglas, Milwaukee, and G. F. Fobian, West Allis, assignors to The Oilgear Company, Milwaukee, Wis. Hydraulic transmission. 2,097,857; Nov. 2.
Fiegel, William J. (See Eggenweiler, C. W., and Fiegel.)
Fiegel, William J., assignor to Bohn Aluminum & Brass Corporation, Detroit, Mich. Method and machine for forming flanged bearing shells. 2,097,691; Nov. 2.
Fiegel, William J., assignor to Bohn Aluminum & Brass Corporation, Detroit, Mich. Method and machine for forming bearing shells. 2,097,692; Nov. 2.
Field, Oscar S., assignor to General Railway Signal Company, Rochester, N. Y. Light signal for railroads. 2,097,785; Nov. 2.
Field, Oscar S., assignor to General Railway Signal Company, Rochester, N. Y. Relay. 2,097,786; Nov. 2.
Fillor Famous Facial Corp. (See Lohr, Haus, assignor.)
Finck, Joseph L., assignor of thirty per cent to I. R. Paris, Washington, D. C. Insulating buildings and like structures. 2,098,138; Nov. 2.
Finley, Sam E., assignor of one-third to R. D. Kneale, Atlanta, Ga. Treating green coffee berries. 2,097,591; Nov. 2.
Fischer, Albert C., Chicago, Ill. Plant covering. 2,097,972; Nov. 2.
Fischer, Anthony J., Jackson Heights, assignor to The Dorr Company, Inc., New York, N. Y. Purification and utilization of sewage sludge digester gas. 2,097,454; Nov. 2.
Fischer, Walter H. (See Arp, L. D., and Fischer.)
Fisher, Alfred, assignor to Universal Oil Products Company, Chicago, Ill. Conversion and coking of hydrocarbons. 2,098,033; Nov. 2.
Fisher, Leonard, San Francisco, Calif. Massage device. 2,097,455; Nov. 2.
Fiveshilling, Albert D., Boston, N. Y. Broom guard or bridle. 2,097,787; Nov. 2.
Fleishhacker Paper Box Company. (See Trost, Gustave A., assignor.)
Fli-Bac Products Corporation. (See Nye, Alvin F., assignor.)
Flint, James A., and A. D. Holt, Columbus, Ohio, assignor to The Traylor Vibrator Company. Vibratory feeder. 2,098,034; Nov. 2.
Florman, Irving, New York, N. Y. Cigarette lighter. 2,097,973; Nov. 2.
Fobian, George H. (See Ferris, W., Douglas, and Fobian.)
Foley, Vernon, and J. J. Henning, Portland, Oreg. Gun and hunting knife combination. 2,098,139; Nov. 2.
Foley, Walter, Los Angeles, Calif. Tire grooving tool. 2,097,811; Nov. 2.
Ford, Luther, & Company. (See Ford, Robert E., assignor.)
Ford, Robert E., assignor to Luther Ford & Company, Minneapolis, Minn. Shipping container for handling goods. 2,098,090; Nov. 2.
Ford, William P., Decatur, Ala. Thread guide and tensioning means for knitting machines. 2,097,565; Nov. 2.
Forney, Cal A., Goshen, Ind. Collapsible ironing table. 2,097,724; Nov. 2.
Foster, Franklin J., trustee. (See Hennecke, E. V., and Kuskin, assignors.)
Foster, Fred L., Lynn, Mass. Combined die and pattern. 2,097,693; Nov. 2.
Frantz, Walter A., Shaker Heights, Ohio. Gas range attachment. 2,097,812; Nov. 2.
Franz, Erwin E., Cranford, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Apparatus for winding material. 2,097,518; Nov. 2.
Frederick, Joseph M., assignor of one-half to J. L. Rosenfield, Baltimore, Md. Metallic end closure for paper cartons. 2,097,917; Nov. 2.
Freedman, Louis. (See Hiemenz, W., and Freedman.)
Freeport Sulphur Company. (See Claiborne, J. T., Jr., and Peterson, assignors.)

Fridolph, Annette, assignor to A. B. A. Specialties Company, New York, N. Y. Tufting and articles therefor. 2,098,140; Nov. 2.
Friedrich, Martin E. (See Dahlen, M. A., and Friedrich.)
Fritz, Karl, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Magnetron detector. 2,097,918; Nov. 2.
Fuel Development Corporation. (See Kimball, Leo B., assignor.)
Fuetterer, Charles T., Akron, Ohio. Water softening method. 2,097,876; Nov. 2.
Fukushima, Komao, Tokyo, Japan, assignor to General Electric Company. Protection of electric systems. 2,098,035; Nov. 2.
Fürrer, Carl, Guggithal, Zug, assignor to Landis & Gyr, A.-G., Zug, Switzerland. Strip dispensing mechanism. 2,097,788; Nov. 2.
Gabriel, John C., New York, and G. Rodwin, Randall Manor, assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Signal transmission system. 2,097,519; Nov. 2.
Gagnier, George E. (See Place, Hion C., assignor.)
Gagnon, Angeline. (See Gagnon, Louis and A.)
Gagnon, Louis and A., New York, N. Y. Rubber band gun. 2,098,001; Nov. 2.
Galbreath, Edward, Auxvasse, Mo. Stirrup. 2,098,141; Nov. 2.
Gallano, Julio A. (See Miñana, V., and Gallano.)
Gallinant, Raphael C., Ridgefield Park, assignor of one-half to J. C. Chello, Ridgefield, N. J. Hedge trimmer. 2,097,761; Nov. 2.
Gamble, John F., Detroit, Mich. Battery terminal protector. 2,098,091; Nov. 2.
Garbell, Max, assignor to Victor Adding Machine Company, Chicago, Ill. Scale. 2,097,919; Nov. 2.
Gardner, Bernard C. (See Farnsworth, P. T., and Gardner.)
Garlinghouse, Leslie H., Los Angeles, Calif. Batching apparatus. 2,097,551; Nov. 2.
Gay, Norman H., Los Angeles, Calif. Separating oil in refrigeration systems. 2,097,725; Nov. 2.
General Aniline Works, Inc. (See Hopff, H., and Weickmann, assignors.)
General Aniline Works, Inc. (See Modersohn, A., and Schleifenbaum, assignors.)
General Aniline Works, Inc. (See Platz, C., and Holsten, assignors.)
General Controls Company. (See Ray, William A., assignor.)
General Electric Company. (See Alexanderson, Ernst F. W., assignor.)
General Electric Company. (See Dallmann, Herbert, assignor.)
General Electric Company. (See Donovan, J. F., and Illingworth, assignors.)
General Electric Company. (See Favre, John A., assignor.)
General Electric Company. (See Fukushima, Komao, assignor.)
General Electric Company. (See Lord, Harold W., assignor.)
General Electric Company. (See Palmer, Robert, assignor.)
General Electric Company. (See Pfaffenberger, Joachim, assignor.)
General Electric Company. (See Stewart, Clyde E., assignor.)
General Electric Company. (See Stimson, Allen G., assignor.)
General Electric Company. (See Warren, Glenn B., assignor.)
General Electric Company. (See Watts, Noble H., assignor.)
General Electric Company. (See Wilkinson, Kenneth J. R., assignor.)
General Electric Company. (See Willis, C. H., Elder, and Bedford, assignors.)
General Electric Company. (See Wright, Daniel K., assignor.)
General Motors Corporation. (See Arthur, J. L., and Schrope, assignors.)
General Motors Corporation. (See Hull, Harry B., assignor.)
General Motors Corporation. (See Koehring, Roland P., assignor.)
General Motors Corporation. (See Tomlinson, Edward J., assignor.)
General Railway Signal Company. (See Field, Oscar S., assignor.)
General Railway Signal Company. (See Halles, William D., assignor.)
General Railway Signal Company. (See Hoppe, Walter H., assignor.)
General Railway Signal Company. (See Judge, Thomas J., assignor.)
General Railway Signal Company. (See Kittredge, T., and Brooks, assignors.)
General Railway Signal Company. (See Moore, Edmund W., assignor.)
General Railway Signal Company. (See Powell, Winfred E., assignor.)
General Railway Signal Company. (See Reichard, Wade H., assignor.)
General Register Corporation. (See Helsel, Reuben H., assignor.)
Getmansky, Samuel, New York, N. Y. Hat fastening device. 2,097,877; Nov. 2.
Gibbs, Bradford C., Cumberland, Md., assignor to Celanese Corporation of America. Dye jig. 2,097,592; Nov. 2.
Giberson, Bernice F., Superior, Wis. Vehicle window screen. 2,098,174; Nov. 2.
Globe Hoist Company. (See Bristol, Cyrus J., assignor.)
Gollings, Archie H., Akron, Ohio. Dispenser. 2,097,813; Nov. 2.
Goodchild, Harry, Chester, Pa. Soldering implement. 2,097,974; Nov. 2.
Goodlass Wall & Lead Industries Limited. (See Butcher, William T., assignor.)
Goodrich, B. F., Company, The. (See Semon, Waldo L., assignor.)
Gordon, Arthur E., West Portal, Colo. Paperhanging machine. 2,097,660; Nov. 2.
Gore, Thomas, Brooklyn, N. Y. Safety razor. 2,098,036; Nov. 2.
Gort, Godfrey, assignor to Western Railroad Supply Company, Chicago, Ill. Reflector type signal for switch stands. 2,097,552; Nov. 2.
Goshen Manufacturing Company, The. (See Weaver, Earl L., assignor.)
Götz, Konrad, Furth, Germany. Mechanical toy. 2,097,814; Nov. 2.
Gould, Herman, et al. (See Schaub, Eugene L., assignor.)
Grabe, Alf G., Stockholm, Sweden. Antifriction bearing and manufacturing the same. 2,097,878; Nov. 2.
Grand Rapids Metalcraft Corporation. (See Visser, John, assignor.)
Grande, Joseph H., Salinas, Calif. Treating lettuce in packing and shipping. 2,098,209; Nov. 2.
Green, Charles A., Hannibal, assignor to International Shoe Company, St. Louis, Mo. Making shoes. 2,098,142; Nov. 2.
Green, Clifford H., assignor to Automatic Instrument Company, Grand Rapids, Mich. Coin receiver. 2,097,456; Nov. 2.
Greene, Thomas C. (See Phillips, Charles E., assignor.)
Grether, Ernest F., assignor to The Dow Chemical Company, Midland, Mich. Nitrogeneous fertilizer and making same. 2,097,457; Nov. 2.
Grey, Hamilton, London, and A. S. Waddington, Crayford, Kent, assignors to Le Vane's Patents, Limited, London, England. Advertising or display device. 2,098,143; Nov. 2.
Grimes, Leon A., Rocky Mount, N. C. Toilet tank lever mounting. 2,097,619; Nov. 2.
Grogel, Merrill A. (See Clark, L. G., and Grogel.)
Grotowsky, Hans, Krefeld-Uerdingen, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of sulphonic acids from aryl ethylenes and the products thereof. 2,097,726; Nov. 2.
Gruenberg, Raoul J., San Francisco, Calif. Display rack. 2,097,553; Nov. 2.
Guérin, Marcel, Paris, and P. Breton, Bellevue, France. Display lighting circuits. 2,098,002; Nov. 2.
Guillow, Paul K. (See Taylor, George M., assignor.)
Gulf Oil Corporation. (See Epps, Frank A., assignor.)
Guyer, August. (See Weber, H. C., and Guyer.)
Guyer, Jesse A., assignor to J. P. Devine Manufacturing Co., Inc., Mount Vernon, Ill. Apparatus for conditioning air. 2,097,520; Nov. 2.
H & B American Machine Company. (See Walsh, Samuel R., assignor.)
Haas, Anna M., Chicago, Ill. Heating device. 2,097,521; Nov. 2.
Habegger, Carl T., assignor to Berne Manufacturing Company, Berne, Ind. Garment pocket. 2,097,975; Nov. 2.
Haberstump, Alfred H., assignor to The Murray Corporation of America, Detroit, Mich. Seat frame construction. 2,097,976; Nov. 2.
Hagler, Clyde E., Birmingham, Ala., assignor to Continental Gin Company. Feed mechanism for cotton hullets and cleaners. 2,098,092; Nov. 2.
Halles, William D., Brighton, assignor to General Railway Signal Company, Rochester, N. Y. Centralized traffic controlling system for railroads. 2,097,789; Nov. 2.
Hall and Lowry Incorporated. (See Lowrey, George A., assignor.)
Hammer, Arthur, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Receiving arrangement. 2,097,879; Nov. 2.
Hammond, David F., Grand Rapids, Mich. Gasoline tank lock. 2,097,661; Nov. 2.
Hanique, Alfred, Paris, France. Simultaneously determining the volume, the weight, and the density of granular and other materials. 2,097,522; Nov. 2.
Hannaford, Cleon M., Petersburg, assignor to Car Devices Company, Incorporated, Richmond, Va. Pin or bolt lock. 2,098,185; Nov. 2.
Hansell, Clarence W., Port Jefferson, N. Y., assignor to Radio Corporation of America. Filter. 2,097,458; Nov. 2.
Hansgirg, Fritz. (See Erdmann, K., and Hansgirg.)
Hanson, Daniel, Haselor, Alcester, and W. T. Pell-Walpole, Tipton, assignors to John Campbell, Kensington, England. Tin alloys. 2,097,727; Nov. 2.
Hanus, John, Appleton, Wis. Air controlling device for blowers. 2,098,144; Nov. 2.

Hardman, Peck and Company. (See Sauerland, Joseph, assignor.)
Hardy, Frank H., Andover, Mass. Raising brush for shearing machines. 2,097,790; Nov. 2.
Harley, Stanley J., Stivichall, Coventry, England. Grinding screw threads in shouldered work. 2,098,145; Nov. 2.
Harris, Earl J., assignor, by mesne assignments, to The Carborundum Company, Niagara Falls, N. Y. Method and apparatus for firing ceramic ware. 2,097,620; Nov. 2.
Harrison, John, Malad City, Idaho. Door holder. 2,098,175; Nov. 2.
Harter, Fred L. (See Snyder, Robert E., assignor.)
Hartford-Empire Company. (See Howard, George E., assignor.)
Hartmann Trunk Company. (See Ritter, Julius, Jr., assignor.)
Hartung, Walter H., Lansdowne, Pa., W. G. Young, Los Angeles, Calif., and F. S. Crossley, assignors to Sharp & Dohme, Incorporated, Philadelphia, Pa. Manufacture of alcohols. 2,098,206; Nov. 2.
Harvey, Herbert C., Camden, N. J. Refrigerating apparatus. 2,097,815; Nov. 2.
Harwood, Harvey G., and B. G. Albee, Oshkosh, Wis. Ink fountain. 2,097,621; Nov. 2.
Hassenfeld, Helal, New York, N. Y. Dial card. 2,098,003; Nov. 2.
Hauck Manufacturing Company. (See Nelson, Seddon C., assignor.)
Hazel-Atlas Glass Company. (See Roberts, J. H., and Achauer, assignors.)
Hazell, Eardley, New York, and S. R. Ogilby, West New Brighton, assignors to United States Rubber Products, Inc., New York, N. Y. Rubber tire. 2,098,037; Nov. 2.
Hazell, Eardley, New York, and S. R. Ogilby, West New Brighton, assignors to United States Rubber Products, Inc., New York, N. Y. Rubber tire. 2,098,038; Nov. 2.
Heald Machine Company, The. (See Blood, Harold L., assignor.)
Hedgcock, William C., Wilmette, and D. M. Light, Evanston, Ill., assignors, by mesne assignments, to Cardwell-Westinghouse Company. Snubber. 2,097,523; Nov. 2.
Hedgpeth, Theron L., Oak Park, assignor to Duro Metal Products Company, Chicago, Ill. Bench saw table. 2,097,920; Nov. 2.
Hedges, Edward G., Newark, and R. Stickles, Union, N. J. Liquid dispensing apparatus. 2,098,093; Nov. 2.
Helne, Hermann, assignor to E. Leitz, Optische Werke, Wetzlar, Germany. Microscope. 2,097,762; Nov. 2.
Heller, Franz, Long Island City, assignor to R. Hoe & Co., Inc., New York, N. Y. Intaglio printing machine. 2,097,791; Nov. 2.
Helsel, Reuben H., Long Island City, assignor to General Register Corporation, Brooklyn, N. Y. Ticket issuing machine. 2,097,485; Nov. 2.
Hemmerich, Hugo, Wyomissing, assignor to Berkshire Knitting Mills, Wyomissing, Pa. Knitted stocking. 2,097,763; Nov. 2.
Hemphill Company. (See Lawson, R. H., and Cloutier, assignors.)
Hennecke, Earle V., and D. Kuskin, Flushing, assignors to F. J. Foster, New York, N. Y., trustee. Universal mounting for windshield wiper motors. 2,097,662; Nov. 2.
Henning, James J. (See Foley, V., and Henning.)
Henricks, John A., Jr., Chicago, Ill., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Fire extinguishing machine. 2,097,486; Nov. 2.
Hensel, Franz R., and E. I. Larsen, assignors to P. R. Mallory & Co., Inc., Indianapolis, Ind. Welding electrode. 2,097,816; Nov. 2.
Hercules Powder Company. (See Pickett, O. A., and Osterhof, assignors.)
Hercules Powder Company. (See Sheffield, Donald H., assignor.)
Hercules Tool & Manufacturing Co. (See Stockel, Hans C., assignor.)
Hermanspann, Paul, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Radio receiving system. 2,097,880; Nov. 2.
Hersey, Henry J., Jr., Seattle, Wash., and D. B. Mikesell, Warsaw, Ind. Noncollapsing flexible pipe. 2,097,663; Nov. 2.
Herz, Sol, assignor to Federated Mills, Inc., New York, N. Y. Box for dispensing tissues. 2,097,858; Nov. 2.
Hess, Jack W., assignor to J. L. Stern, Buffalo, N. Y. Coin counting machine. 2,097,792; Nov. 2.
Hettrick Manufacturing Company, The. (See Smith, Isidore, P., assignor.)
Heymer, Gerd. (See Eggert, J., and Heymer.)
Hilemenz, William, and L. Freedman, Albany, assignors to Winthrop Chemical Company, New York, N. Y. Water-soluble organic iodine compounds. 2,098,094; Nov. 2.
Highway Trailer Company. (See Williams, Roy E., assignor.)
Hill, Alfred G., Bound Brook, N. J., and A. J. Hill, New Haven, Conn., assignors to The Calco Chemical Company, Inc., Bound Brook, N. J. Preparation of secondary aromatic amines. 2,098,039; Nov. 2.
Hill, Arthur J. (See Hill, Alfred G., and A. J.)
Hirschman, Isidor L., Brooklyn, N. Y. Perpetual radio and television schedule. 2,098,004; Nov. 2.
Hite, Ferdinand M., Sherwood, Oreg. Tangle cutter for reapers and similar agricultural implements. 2,097,921; Nov. 2.
Hochstetter, Frederick W., Pittsburgh, Pa. Insulating cellulosic medium. 2,097,694; Nov. 2.
Hodgson, Howard E., Wauwatosa, assignor to Cutler Hammer, Inc., Milwaukee, Wis. Electromagnetic clutch. 2,097,922; Nov. 2.
Hoe, R., & Co. (See Heller, Franz, assignor.)
Hoefler, Edwin L., Detroit, Mich. Fish lure. 2,098,095; Nov. 2.
Hoeh, Albert C., Royal Oak, Mich. Grinding machine for reamers and like tools. 2,097,664; Nov. 2.
Hofferbert, Orrin, Beaver Dam, Wis., assignor to Malleable Iron Range Company. Range. 2,097,977. Nov. 2.
Hoffman, George M. (See Ferrari, A. M., and Hoffman.)
Holladay, Frank, Alton, Ill. Meat hook. 2,097,978; Nov. 2.
Hollis, John H., Lincoln, Mass. Cigarette package. 2,098,096; Nov. 2.
Holmes, Elbridge R., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Spring stand for dobby looms. 2,097,665; Nov. 2.
Holmes, Elbridge R., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Jacquard feeding mechanism. 2,097,666; Nov. 2.
Holsten, Hermann. (See Platz, C., and Holsten.)
Holt, Arthur D. (See Flint, J. A., and Holt.)
Holt, Ralph D., Dumont, N. Y. Painting shield. 2,098,005; Nov. 2.
Holt, Walter L., La Grange, assignor of one-third to W. H. Young, Sr., Muscogee County, Ga. Attachment for looms. 2,097,859; Nov. 2.
Hood, Arthur M., trustee. (See Tomlinson, Fay M., assignor.)
Hooker Electrochemical Company. (See Sconce, James S., assignor.)
Hoover Company, The. (See Burkhardt, Chandos, assignor.)
Hoover Company, The. (See Taylor, Charles H., assignor.)
Hoover Company, The. (See Tucker, Wilmer H., assignor.)
Hoover Company, The. (See White, Harry B., assignor.)
Hopff, Heinrich, and A. Weickmann, Ludwigshafen-on-Rhine, assignors to General Aniline Works, Inc., New York, N. Y. Condensation products of 1,2,3,4-butylene-dioxides and making same. 2,098,097; Nov. 2.
Hopkins, Milton S., Glendale, Calif. Rotary engine. 2,097,881; Nov. 2.
Hoppe, Walter H., assignor to General Railway Signal Company, Rochester, N. Y. Continuous inductive coded type train control system. 2,098,040; Nov. 2.
Hoppe, Walter H., assignor to General Railway Signal Company, Rochester, N. Y. Continuous inductive coded cab signaling system. 2,098,041; Nov. 2.
Horii, Shinjiro, Tokyo, Japan. Stencil sheet. 2,098,042; Nov. 2.
Horii, Shinjiro, Kanda-ku, Tokyo, Japan. Stencil sheet. 2,098,043; Nov. 2.
Horton, George F., Houston, Tex. Making lime. 2,097,979; Nov. 2.
Hosler, Elmer E., Delaware Water Gap, Pa. Mallet. 2,097,459; Nov. 2.
Hondek, Richard R. (See Peddicord, Louis W. C., assignor.)
Howard, George E., Butler, Pa., assignor to Hartford-Empire Company, Hartford, Conn. Method of and apparatus for forming hollow glass articles. 2,098,186; Nov. 2.
Howard, Merton W., assignor to Pope Machinery Corporation, Haverhill, Mass. Automatic edgesetter. 2,097,948; Nov. 2.
Howell, Carter M., Los Angeles, Calif. Cooking. 2,097,793; Nov. 2.
Hubron Company. (See Brown, Hugh S., assignor.)
Hudtwalker, William T., Richmond Hill, N. Y., assignor to Radio Corporation of America. Power supply circuits. 2,097,882; Nov. 2.
Hull, Harry B., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation. Refrigerating apparatus. 2,097,525; Nov. 2.
Hummer, Aubrey E., Washington, D. C., assignor to Packard Motor Car Company, Detroit, Mich. Change speed gearing. 2,097,566; Nov. 2.
Hunker, Martin L., assignor to The Reeves Manufacturing Company, Dover, Ohio. Top for stoves. 2,097,817; Nov. 2.
Hunt, Ernst, Globe, Ariz. Post driver. 2,098,146; Nov. 2.
Hunter, James D., and F. B. Morrill, assignors to The James Hunter Machine Company, North Adams, Mass. Vacuum extractor. 2,098,044; Nov. 2.
Hunter, James, Machine Company, The. (See Hunter, J. D., and Morrill, assignors.)
Hussmann, Ernie L., Seiling, Okla. Grinder attachment. 2,098,147; Nov. 2.
Hutchinson, Charles W., Milwaukee, Wis. Car protector. 2,097,923; Nov. 2.
Hy-Art Novelty Co. Inc. (See Sokoloff, Max, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Dilthey, Walther, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Eberhardt, E., and Stadler, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Eggert, J., and Heymer, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Grotowsky, Hans, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Rabe, H., and Otto, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Reppe, W., and Kuehn, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Schlerenbeck, Julius, assignor.)
Ideal Fastener Corporation. (See Silberman, David, assignor.)
Illingworth, George. (See Donovan, J. F., and Illingworth.)
Imperial Chemical Industries Limited. (See Carter, P. G., Sennett, and Shaw, assignors.)
Imperial Chemical Industries, Limited. (See Crawford, John W. C., assignor.)
Imperial Chemical Industries Limited. (See Lodge, Frank, assignor.)
Imperial Chemical Industries Limited. (See Malan, Jacques and G. G. H., assignors.)
Imperial Chemical Industries Limited. (See Piggott, Henry A., assignor.)
Imperial Chemical Industries Limited. (See Shaw, Cecil, assignor.)
Industrial Clutch Company. (See Fawick, Thomas L., assignor.)
Industrial Patents Corporation. (See Newton, R. C., Bollens, and Brown, assignors.)
Innes, Walter P., Jr., Wichita, Kans. Spark plug. 2,097,460; Nov. 2.
International Shoe Company. (See Green, Charles A., assignor.)
Interstate Bindery Company. (See Moyer, Allen J., assignor.)
Ipatieff, Vladimir, and V. Komarewsky, assignors to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbons. 2,098,045; Nov. 2.
Ipatieff, Vladimir, and V. Komarewsky, assignors to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbons. 2,098,046; Nov. 2.
Jackson, Edward B., Downers Grove, assignor to Stromberg Electric Company, Chicago, Ill. Time controlled system. 2,097,622; Nov. 2.
Jackson, Edward B., Downers Grove, assignor to Stromberg Electric Company, Chicago, Ill. Synchronizing system. 2,097,623; Nov. 2.
Jacob, Marcel, Paris, France, assignor to W. A. Preston, Binghamton, N. Y. Machine for sorting punched cards mechanically and electrically. 2,097,764; Nov. 2.
Jaeger, Alphons O., Greentree, and J. E. Jewett, Pittsburgh, assignors to American Cyanamid & Chemical Corporation, Bridgeville, Pa. Recovering maleic acid from the fume gases containing small amounts thereof. 2,098,047; Nov. 2.
Jarl, Carl H. B., Royal Oak, assignor to Beck, Koller & Company, Inc., Detroit, Mich. Vapor phase catalytic process and apparatus. 2,098,148; Nov. 2.
Jennings, Chester S. (See Perry, H. R., and Jennings.)
Jepson, Ivar, assignor to Chicago Flexible Shaft Company, Chicago, Ill. Food mixer. 2,098,098; Nov. 2.
Jewell, John H., and O. A. McNamee, Worcester, Mass., assignors to The American Steel and Wire Company of New Jersey. Lamp cord. 2,098,149; Nov. 2.
Jewett, Joseph E. (See Jaeger, A. O., and Jewett.)
Johansson, Johan E., assignor to Aktiebolaget Götaverken, Gothenburg, Sweden. Internal combustion power plants. 2,097,883; Nov. 2.
Johnson, Alvin L., assignor to The Logan Gear Company, Toledo, Ohio. Bumper jack. 2,097,949; Nov. 2.
Johnson, Claude R., Hugoton, Kans. Wind motor. 2,097,667; Nov. 2.
Johnson, Edward, Montclair, N. J., assignor to Meinecke & Company, New York, N. Y. Surgical hand brush. 2,097,461; Nov. 2.
Johnson, George A. (See Abbott, Charles W.)
Johnson, Lynn E. (See Cady, C. P., and Johnson.)
Johnson, Orville C., Aurora, Ill. Overhead door. 2,097,950; Nov. 2.
Johnson, Robert I. (See Clayton, W., Back, Morse, and Johnson.)
Johnson, Squire J., Seattle, Wash., assignor to Acme Steel Company, Chicago, Ill. Strap sealing apparatus. 2,097,980; Nov. 2.
Johnstone, Theodore H., Detroit, Mich. Lock. 2,098,150; Nov. 2.
Judge, Thomas J., assignor to General Railway Signal Company, Rochester, N. Y. Centralized traffic controlling system for railroads. 2,097,794; Nov. 2.
Junge, Arthur H., Reedsville, Wis. Veterinary instrument. 2,098,151; Nov. 2.
Junghans, Helmut, Schramberg-Sulgen, Germany. Mechanical time fuse having a centrifugal drive. 2,097,836; Nov. 2.
Kahn, Frank, Philadelphia, Pa. Wind pressure gauge. 2,098,099; Nov. 2.
Kaiser, Lawrence, Milwaukee, Wis. Propeller. 2,098,100; Nov. 2.
Kann, Emil A., Lawrence, N. Y. Chair or analogous article of furniture. 2,097,884; Nov. 2.
Kaplan, Esther, administratrix. (See Kaplan, Jacob, assignor.)
Kaplan, Jacob, deceased, E. Kaplan, administratrix, assignor to E. Kaplan, Washington, D. C. Combined letter opener and postage scale. 2,097,837; Nov. 2.
Kärcher, Alfred, Stuttgart-Cannstatt, assignor to firm Deutsche Gold- und Silber- Scheideanstalt vormals Roessler, Frankfort-on-the-Main, Germany. Immersion heater for salt baths. 2,097,981; Nov. 2.
Karrer, Sebastian, Washington, D. C., assignor to Consolidated Gas Electric Light and Power Company, Baltimore, Md. Safety device for gas burners. 2,097,838; Nov. 2.
Kayler, Frank H., Alliance, Ohio, assignor to American Steel Foundries, Chicago, Ill. Car coupler. 2,098,207; Nov. 2.
Keall, Frank B., Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Lasting machine. 2,097,567; Nov. 2.
Keall, Frank B., and L. Mawbey, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Perforating machine. 2,097,568; Nov. 2.
Kearby, John J., Paterson, N. J. Warp stop motion for looms. 2,097,951; Nov. 2.
Keith, Irving L., Haverhill, Mass. Cementing machine. 2,098,101; Nov. 2.
Keith, Percy C., Jr., Peapack, N. J., assignor to Standard Oil Company, Chicago, Ill. Propene dewaxing. 2,097,728; Nov. 2.
Kell, William S., Upper Darby, Pa. Fly paper. 2,097,924; Nov. 2.
Kellogg, Edward W., Moorestown, N. J., assignor to Radio Corporation of America. Photographic recording of sound. 2,097,668; Nov. 2.
Kelman, David J., Brooklyn, N. Y. Electrical illuminating device. 2,097,795; Nov. 2.
Kemp, Milton H., Oak Park, Ill., assignor to The Kendall Company, Boston, Mass. Adhesive material. 2,098,187; Nov. 2.
Kendall Company, The. (See Kemp, Milton H., assignor.)
Kennedy, James H., Lansdowne, assignor to Magnesium Cement Laboratories, Inc., Philadelphia, Pa. Dwelling assembled from prefabricated units. 2,097,796; Nov. 2.
Kessener, Herman J. N. H., The Hague, Netherlands. Treatment of sewage and other waste liquors. 2,098,152; Nov. 2.
Ketcham, Frank, Dearborn, and G. E. Dunn, Detroit, Mich., assignors to Universal Products Co., Inc. Roller bearing assembling machine. 2,097,669; Nov. 2.
Kettlewerth Mfg. Co. Inc. (See Struble, Minnie G., assignor.)
Kieckhefer Container Company. (See Wells, R., and Kieckhefer, assignors.)
Kieckhefer, Herbert M. (See Wells, R., and Kieckhefer.)
Kilgore, Joseph D., Columbus, Ohio, assignor to St. Louis Pistols & Caps, Inc., St. Louis, Mo. Cap pistol. 2,098,006; Nov. 2.
Kilpela, Aho E., Detroit, Mich., assignor, by mesne assignments, to Borg-Warner Corporation. Automatic transmission. 2,097,569; Nov. 2.
Kimball, Leo B., New Haven, Conn., assignor to Fuel Development Corporation. Automatic fuel mixture adjustment according to temperatures. 2,097,925; Nov. 2.
Kimball, Leo B., New Haven, Conn., assignor to Fuel Development Corporation. Deicing apparatus for airplanes. 2,097,926; Nov. 2.
Kimble Glass Company. (See Moran, James J., assignor.)
King, Frederick H., Detroit, Mich. Marble game. 2,097,670; Nov. 2.
Kingdon, Ralph H., assignor to Square D Company, Detroit, Mich. Cable clamp. 2,097,695; Nov. 2.
Kinmont, Robert F., Los Angeles, Calif. Ball joint. 2,098,188; Nov. 2.
Kinnear, James E., London, England. Alarm clock. 2,097,487; Nov. 2.
Kinsella, Edward, Spondon, near Derby, England, assignor to Celanese Corporation of America. Apparatus for the manufacture of sheet material. 2,097,593; Nov. 2.
Kinsley, Thomas G., Bloomfield, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Piezoelectric device. 2,097,488; Nov. 2.
Kirsch Company. (See Allen, Archie A., assignor.)
Kiss, Stephen A., Brooklyn, N. Y. Gasifying oils and coals. 2,097,489; Nov. 2.
Kist, Michael J. and V. A., Johnstown, Pa. Roll rim head. 2,097,982; Nov. 2.
Kist, Victor A. (See Kist, Michael J. and V. A.)
Kistner, Herman H., assignor to Kistner Lock and Appliance Company, Baltimore, Md. Pin and tumbler mechanism. 2,098,048; Nov. 2.
Kistner, Herman H., assignor to Kistner Lock and Appliance Company, Baltimore, Md. Key actuated locking bolt. 2,098,189; Nov. 2.
Kistner Lock & Appliance Company. (See Kistner, Herman H., assignor.)
Kittredge, Thomas, Rutherford, N. J., and H. D. Brooks, Ocean side, N. Y., assignors to General Railway Signal Company, Rochester, N. Y. Automatic train stop system for railroads. 2,097,624; Nov. 2.
Klemp, William J., Maplewood, assignor to K. Oswald, Newark, N. J. Making bag frames and blanks therefor. 2,097,927; Nov. 2.
Klotz, Ernst, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Regenerative radio receiver. 2,097,765; Nov. 2.
Knaust, Herman and H., West Camp, N. Y. Producing mushrooms. 2,097,766; Nov. 2.

Knaust, Henry. (See Knaust, Herman and H.)
Kneale, Robert D. (See Finley, Sam E., assignor.)
Kobel, Ernst, Ennetbaden, assignor to Aktiengesellschaft Brown Boveri & Cie, Baden, Switzerland. Electron discharge device. 2,097,490; Nov. 2.
Koehring, Roland P., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich. Making a porous bearing material. 2,097,671; Nov. 2.
Komarewsky, Vasili. (See Ipatieff, V., and Komarewsky.)
König, Erwin, Berlin-Neukölln, assignor to Allgemeine Elektricitats Gesellschaft Friedrich Karl, Berlin, Germany. Cord tensioning device for tuning means. 2,097,928; Nov. 2.
Koppe, Gustave E., Providence, R. I. Apparatus for imparting a polish. 2,097,885; Nov. 2.
Koppelman, Morris, Brooklyn, N. Y. Packing for fragile articles. 2,097,886; Nov. 2.
Krakowski, Stanley, Jersey City, N. J. Alarm mechanism for clocks. 2,097,818; Nov. 2.
Kratky, Richard J., Boise, Idaho. Piston and rod assembly. 2,097,983; Nov. 2.
Krehma, Ignac J. (See Booge, J. E., Krehma, and McKinney.)
Kress, Willard C., Kenmore, assignor to J. H. Williams & Co., Buffalo, N. Y. Reversible ratchet wrench. 2,097,594; Nov. 2.
Kuehn, Erich. (See Reppe, W., and Kuehn.)
Kurek, Michael, Crafton, Pa. Time operated switch mechanism. 2,097,984; Nov. 2.
Kuskin, David. (See Hennecke, E. V., and Kuskin.)
Kyrides, Lucas P., Webster Groves, assignor to Monsanto Chemical Company, St. Louis, Mo. Substituted succinic acids and esters thereof and uses therefor. 2,098,190; Nov. 2.
Lacey, Wilbur E., Oakland, Calif., assignor to G. A. Dow. Can filling machine. 2,097,887; Nov. 2.
Lair, Julian J. B., and G. E. M. Perroux, Paris, France, assignors to Western Electric Company, Incorporated, New York, N. Y. Transmission line for electrical signaling systems. 2,097,491; Nov. 2.
Lampert, Sadron C., assignor to Farmers Manufacturing Company, Norfolk, Va. Basket manufacture. 2,098,049; Nov. 2.
Lamson Company, The. (See Perry, H. R., and Jennings, assignors.)
Landis & Gyr, A.-G. (See Fürrer, Carl, assignor.)
Lang, Franz, Munich, Germany, assignor, by mesne assignments, to Lanova Corporation, New York, N. Y. Fuel feed means. 2,097,492; Nov. 2.
Langlotz, Charles L., New York, N. Y. Illuminated sign and push button unit. 2,097,625; Nov. 2.
Lanova Corporation. (See Lang, Franz, assignor.)
Lansing, Louis P., Cleveland, Ohio. Container. 2,097,819; Nov. 2.
La Porte, C. W., et al. (See Schueler, Julian L., assignor.)
Larsen, Earl I. (See Hensel, F. R., and Larsen.)
Laucks, I. F., Inc. (See Bowen, A. H., and Dike, assignors.)
Le Vane's Patents, Limited. (See Grey, H., and Waddington, assignors.)
Lawson, Robert H., Pawtucket, and A. N. Cloutier, Lonsdale, assignors to Hemphill Company, Central Falls, R. I. Knitting machine. 2,098,050; Nov. 2.
Leitz, Ernst, G. m. b. H. (See Becker, Helmut, assignor.)
Leitz, Ernst, G. m. b. H. (See Lihotzky, Erwin, assignor.)
Leitz, Ernst, Optische Werke. (See Heine, Hermann, assignor.)
Lessig, Edward T. (See Arnold, H. R., and Lessig.)
Lesti, Nancy, guardian, et al. (See Lesti, Geno.)
Lesti, Geno, Cleveland, Ohio; A. and N. Lesti, guardians of said G. Lesti, minor, assignors to National Blank Book Company, Holyoke, Mass. Book leaf securing means. 2,097,626; Nov. 2.
Lesti, Nacy, guardian, et al. (See Lesti, Geno.)
Leuck, Gerald J., Evanston, J. Pokorny, Chicago, and F. N. Peters, Jr., Evanston, assignors to The Quaker Oats Company, Chicago, Ill. Preparation of polyhydroxy compounds from furan compounds. 2,097,493; Nov. 2.
Leukhardt, John C., Washington, D. C. Match packet. 2,097,839; Nov. 2.
Leveque, Bernard T., Wenham, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoe sewing machine. 2,097,462; Nov. 2.
Lewis, Grant H., assignor to The Corcoran-Brown Lamp Company, Cincinnati, Ohio. Sealing device for containers. 2,097,820; Nov. 2.
Lewis, Robert P., assignor to Snicer Manufacturing Corporation, Toledo, Ohio. Vibration dampener. 2,097,627; Nov. 2.
Leyerle, Frank J., Mechanicsville, N. Y. Forming books. 2,097,888; Nov. 2.
Liebhardt, Frederick C., San Marino, Calif. Coupling. 2,097,628; Nov. 2.
Light, David M. (See Hedgcock, W. C., and Light.)
Lihotzky, Erwin, assignor to Ernst Leitz G. m. b. H., Wetzlar, Germany. Illuminating device for microscopes. 2,097,494; Nov. 2.
Lindner, Herbert. (See Büchholz, Erich, assignor.)
Lineham, Rowland A., and G. Clarke, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Sewing machine needle. 2,097,495; Nov. 2.
Linen Thread Co. Inc., The. (See Tracy, Homer D., assignor.)
Link Belt Company. (See Atz, Frederick W., Jr., assignor.)
Lodge, Frank, Blackley, Manchester, England, assignor to Imperial Chemical Industries Limited. Anthraquinone derivatives. 2,097,672; Nov. 2.
Logan Gear Company, The. (See Johnson, Alvin L., assignor.)
Lohr, Hans, Jackson Heights, Long Island, assignor to Filtor Famous Facial Corp., Long Island City, N. Y. Facial treatment. 2,097,952; Nov. 2.
Long, Elmer C., Grosse Pointe Park, Mich. Piston for internal combustion motors. 2,097,570; Nov. 2.
Long, Thomas A. (See Mall, A. W., and Long.)
Lord, Harold W., Schenectady, N. Y., assignor to General Electric Company. Oscillator control. 2,098,051; Nov. 2.
Lord, Harold W., Schenectady, N. Y., assignor to General Electric Company. Timing circuit. 2,098,052; Nov. 2.
Lovett, John T., Jr., Little Silver, N. J. Plant ball package and making the same. 2,097,929; Nov. 2.
Lowrey, George A., Pelly, assignor to Hall and Lowrey, Incorporated, Goose Creek, Tex. Pump. 2,097,629; Nov. 2.
Ludwig, John E., assignor to Newcomb David Company, Inc., Detroit, Mich. Spray booth. 2,097,953; Nov. 2.
Lulek, Ralph N., Waukesha, and C. F. Belcher, South Milwaukee, Wis., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Anthraquinone thiophene and selenophene carboxylic acid compounds. 2,097,860; Nov. 2.
Lunzer, Siegfried, London, England. Reservoir marking instrument. 2,097,496; Nov. 2.
Luse, Daniel C. (See Malcolm, James A., assignor.)
Lustig, Emily, administratrix. (See Lustig, Rudolf.)
Lustig, Rudolf, deceased, by E. Lustig, administratrix, assignor to A. J. Deneseus, Milwaukee, Wis. Foot appliance. 2,097,930; Nov. 2.
Lutz, George, Rocky River, Ohio, assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Plating of cadmium. 2,097,630; Nov. 2.
Macdonald, Walter, North Providence, R. I. Self cleaning atomizer. 2,097,696; Nov. 2.
Mack, Wayne, Martins Ferry, Ohio, assignor to The Consolidated Expanded Metal Companies, Wheeling, W. Va. Delivery enclosure. 2,098,053; Nov. 2.
Mackay, Joseph T., Woodbury, Conn., and H. C. Ames, Port Washington, N. Y., assignors to United Fruit Company, Boston, Mass. Checking device. 2,097,861; Nov. 2.
Madden, Ernest C., Rochester, B. F. Cooper, Medina, and E. R. Cuykendall, assignors to Rochester-Ventoilet Company, Rochester, N. Y. Ventilator for toilets. 2,098,208; Nov. 2.
Madlé, Alain, assignor to Erban Operating Corporation, New York, N. Y. Power transmission mechanism. 2,097,631; Nov. 2.
Madlé, Alain, Bristol, Conn., assignor to Erban Operating Corporation, New York, N. Y. Power transmission mechanism. 2,097,632; Nov. 2.
Madlé, Alain, Bristol, Conn., assignor to Erban Operating Corporation, New York, N. Y. Transmission mechanism. 2,097,633; Nov. 2.
Magee, George H., Nutley, N. J. Gas generating system 2,097,463; Nov. 2.
Magnesium Cement Laboratories, Inc. (See Kennedy, James H., assignor.)
Magrath, George H., assignor to The Whitin Machine Works, Whitinsville, Mass. Spinning spindle. 2,097,797; Nov. 2.
Malan, George G. H. (See Malan, Jacques and G. G. H.)
Malan, Jacques and G. G. H., Somerset West, Union of South Africa, assignors to Imperial Chemical Industries Limited. Production of porous silica gel. 2,097,634; Nov. 2.
Malcolm, James A., assignor to D. C. Luse, Chicago, Ill. Insulation material. 2,097,595; Nov. 2.
Mall, Arthur W., Chicago, Ill. Portable power machine. 2,097,729; Nov. 2.
Mall, Arthur W., Chicago, Ill. Terrazzo grinding apparatus. 2,097,730; Nov. 2.
Mall, Arthur W., and T. A. Long, Chicago, Ill., assignors to Mall Tool Company. Clutch mechanism. 2,097,731; Nov. 2.
Mall Tool Company. (See Mall, A. W., and Long, assignors.)
Malleable Iron Range Company. (See Hofferbert, Orrin, assignor.)
Mallory, P. R., & Co. (See Hensel, F. R., and Larsen, assignors.)
Mallory Research Company. (See Phillips, Bernard C., assignor.)
Malm, Carl J., Rochester, N. Y., assignor, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Hazefree cellulose acetate and its preparation. 2,097,464; Nov. 2.
Malm, Carl J., Rochester, N. Y., assignor, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. High viscosity organic esters of cellulose and preparing them. 2,097,954; Nov. 2.
Maniscalco, Pietro, Toledo, Ohio. Charge forming mechanism. 2,097,526; Nov. 2.

Mapes, Dwight B. (See Dons, E. M., and Mapes.)
Mapes, Dwight B., and E. M. Dons, assignors to Mid-Continent Petroleum Corporation, Tulsa, Okla. Dewaxing oils. 2,098,007; Nov. 2.
Markes & Co., Gesellschaft mit beschrankter Haftung. (See Seltner, Sebastian, assignor.)
Marks, Herbert E., Sewickley, Pa. Wall structure. 2,097,697; Nov. 2.
Martin, Eugene, Erie, Pa., assignor, by mesne assignments, to The Standard Stoker Company, Inc., New York, N. Y. Stoker. 2,098,191; Nov. 2.
Martin, Harry C., St. Petersburg, Fla. Fish tail propeller. 2,097,931; Nov. 2.
Maryott, Anson A., Alhambra, Calif. Fountain spraying device. 2,097,985; Nov. 2.
Mathers, Horace C., Van Nuys, Calif. Masonry. 2,097,821; Nov. 2.
Matthews, Birchard L., assignor to The Patrol Valve Company, Cleveland, Ohio. Ignition and control device for oven burners. 2,098,192; Nov. 2.
Mauch, Hans, Berlin-Charlottenburg, assignor to Telephon-Apparat-Fabrik E. Zwietusch & Co., G. m. b. H., Berlin-Germany. Transfer device. 2,098,154; Nov. 2.
Mawbey, Lawrence. (See Keall, F. B., and Mawbey.)
Mayo, Louis H., assignor to The Toledo Show Case Company, Toledo, Ohio. Multiple compartment merchandise display. 2,097,635; Nov. 2.
McAuley, J. E., Mfg. Co. (See McAuley, J. E., and Trevillian, assignors.)
McAuley, John E., and G. R. Trevillian, assignors to J. E. McAuley Mfg. Co., Chicago, Ill. Projector lamp. 2,097,767; Nov. 2.
McBerty, Ford H., Newark, Del., assignor, by mesne assignments, to E. I. du Pont de Nemours and Company. Ball mill attack of titaniferous ores. 2,098,054; Nov. 2.
McBerty, Ford H., Newark, Del., assignor, by mesne assignments, to E. I. du Pont de Nemours and Company. Pug mill attack of titaniferous ores. 2,098,055; Nov. 2.
McBerty, Ford H., Newark, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Utilization of waste products in the manufacture of titanium compounds from titanium ores. 2,098,056; Nov. 2.
McCaffrey, John W., assignor to Universal Oil Products Company, Chicago, Ill. Conversion of hydrocarbon oils. 2,098,057; Nov. 2.
McCoy, John H., et al. (See Smith, Harry, assignor.)
McCurdy, Frederick T., Kokomo, Ind., assignor, by mesne assignments, to Union Carbide and Carbon Corporation. Rolling alloys. 2,097,768; Nov. 2.
McDougall, George F., assignor to Oregon Textile Machines, Inc., Portland, Oreg. Shock absorbing latching device. 2,097,596; Nov. 2.
McEwen, Christopher E., Nashville, Tenn. Fish lure. 2,097,986; Nov. 2.
McKay, Hunter, assignor to Boston Woven Hose and Rubber Company, Cambridge, Mass. Fire hose. 2,097,862; Nov. 2.
McKee, Willis, Cleveland, Ohio, assignor to Central National Bank of Cleveland. Soaking pit. 2,097,932; Nov. 2.
McKinney, Robert M. (See Booge, J. E., Krchma, and McKinney.)
McLay, Gavin S., London, England, assignor, by mesne assignments, to Stewarts and Lloyds, Limited, Glasgow, Scotland. Push bench method and apparatus. 2,098,153; Nov. 2.
McLean, Robert W., Bridgewater, assignor to Carver Cotton Gin Comany, East Bridgewater, Mass. Textile machine. 2,097,673; Nov. 2.
McLean, William A., assignor to C. Schnackel's Son, Inc., Rochester, N. Y. Oil filter. 2,098,102; Nov. 2.
McNamee, Owen A. (See Jewell, J. H., and McNamee.)
McPherren, Glen E., assignor of one-half to P. Taber, San Diego, Calif. Synchronizing apparatus. 2,097,933; Nov. 2.
Mead, Richard R., Queens Village, N. Y., assignor to Mergenthaler Linotype Company. Typographical composing machine. 2,097,732; Nov. 2.
Meinecke & Company. (See Johnson, Edward, assignor.)
Meinhardt, Joseph H., and S. M. Coffman, Kansas City, Mo., said Coffman assignor of one-fourth to said Meinhardt. Watchmaker's tool. 2,098,103; Nov. 2.
Melown, George E., Youngstown, Ohio. Fruit picker. 2,097,527; Nov. 2.
Merck & Co. (See Burnham, Stanley W., assignor.)
Merco Centrifugal Separator Co. Ltd. (See Peltzer, Albert, assignor.)
Mergenthaler Linotype Company. (See Archer, Raymond, assignor.)
Mergenthaler Linotype Company. (See Mead, Richard R., assignor.)
Metalfield Incorporated. (See Sundin, Theodore, assignor.)
Meyer, John H. (See Bixby, R. F., and Meyer.)
Mid-Continent Petroleum Corporation. (See Dons, E. M., and Mapes, assignors.)
Mid-Continent Petroleum Corporation. (See Mapes, D. B., and Dons, assignors.)
Mikesell, Daniel B. (See Hersey, H. J., Jr., and Mikesell.)
Miller, Abraham B. (See Rowe, W., and Miller.)
Miller, Floyd O., Akron, Ohio. Hydraulic braking system. 2,097,889; Nov. 2.
Miller, Louis R., Arcadia, Mo. Hydrant. 2,097,733; Nov. 2.
Mills Company, The. (See Winslow, Edward N., assignor.)
Mills, Percy E., Towaco, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Coin chute for coin collectors. 2,097,497; Nov. 2.
Mills, Percy E., Towaco, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Coin chute for coin collectors. 2,097,498; Nov. 2.
Miñana, Vicente, and J. A. Galiano, Buenos Aires, Argentina. Refrigerated cabinet. 2,098,155; Nov. 2.
Minerals Separation North American Corporation. (See Tucker, Stanley, assignor.)
Mitchell, Harvey V., Bridgeport, Conn. Method of and apparatus for molding articles of paper pulp. 2,098,008; Nov. 2.
Mitscherling, Waldemar O., assignor to The Neon Research Corporation, Bridgeport, Conn. Treatment of hydrocarbons. 2,097,769; Nov. 2.
Modersohn, August, Cologne-Mulheim, and W. Schleifenbaum, Leverkusen-I. G.-Werk, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Pipment azo dyestuffs. 2,097,734; Nov. 2.
Mohr, Walter W., Hammond, assignor to The Edward Valve & Manufacturing Co., Inc., East Chicago, Ind. Valve. 2,097,698; Nov. 2.
Monsanto Chemical Company. (See Durgin, Charles B., assignor.)
Monsanto Chemical Company. (See Kyrides, Lucas P., assignor.)
Moore, Carl E., Gary, Ind., assignor to American Sheet and Tin Plate Company. Cutting device. 2,097,636; Nov. 2.
Moore, Edmund W., assignor to General Railway Signal Company, Rochester, N. Y. Light signal unit. 2,097,798; Nov. 2.
Moore Electric Corporation. (See Dilks, James W., assignor.)
Moran, James J., Drexel Hill, Pa., assignor to Kimble Glass Company, Vineland, N. J. Pipette. 2,097,571; Nov. 2.
Morehouse, Eugene, Providence, R. I., assignor to B. A. Ballou & Co., Inc. Jewelry finding. 2,098,104; Nov. 2.
Morelissé, Jan, Amsterdam, Netherlands. Transformer. 2,097,770; Nov. 2.
Morgan, John D., South Orange, assignor, by mesne assignments, to Power Patents Company, Jersey City, N. J. Apparatus for locating top dead center. 2,098,058; Nov. 2.
Mergenthaler Linotype Company. (See Albrecht, Christian A., assignor.)
Morrell, Carmine, et al. (See Smith, Harry, assignor.)
Morrell, Jacque C., assignor, by mesne assignments, to Universal Oil Products Company, Chicago, Ill. Treatment of hydrocarbon oils. 2,098,059; Nov. 2.
Morrill, Frank B. (See Hunter, J. D., and Morrill.)
Morrison, Simon, New York, N. Y. Toilet article. 2,097,934; Nov. 2.
Morrison, William D., Seattle, Wash. Lockable pin shackle. 2,097,465; Nov. 2.
Morse, James F. (See Clayton, W., Back, Morse, and Johnson.)
Morton, Harold A., assignor to American Anode, Inc., Akron, Ohio. Making rubber articles. 2,097,528; Nov. 2.
Moyer, Allen J., assignor to Interstate Bindery Company, Kansas City, Mo. Mechanism for shaping the backs of book covers. 2,098,060; Nov. 2.
Mrozinski, Eugene J. S., Milwaukee, Wis. Sewing machine tool. 2,097,735; Nov. 2.
Munce, Clifford J., London, Ontario, Canada. Box or carton. 2,097,891; Nov. 2.
Munoz, Gonzalo C., Philadelphia, and D. M. Watson, Ardsley, assignors to The American Pulley Company, Philadelphia, Pa. Motor support. 2,098,061; Nov. 2.
Munters, Carl G., assignor to Aktiebolaget Termisk Isolation, Stockholm, Sweden. Heat insulation. 2,098,193; Nov. 2.
Murray Corporation of America, The. (See Haberstump, Alfred H., assignor.)
Murray Corporation of America, The. (See Northup, A. E., and Widman, assignors.)
Musher Foundation Incorporated. (See Musher, Sidney, assignor.)
Musher, Sidney, assignor to Musher Foundation Incorporated, New York, N. Y. Leguminous food product. 2,097,863; Nov. 2.
Myers, Elman B., Norristown, Pa., assignor of ten per cent to H. W. Dix, New York, N. Y. Rotary grinder. 2,097,890; Nov. 2.
National Aniline & Chemical Company. (See Penny, James P., assignor.)
National Blank Book Company. (See Lesti, Geno, assignor.)
National Cash Register Company, The. (See Williams, Harry W., assignor.)
National Gypsum Company. (See Venzie, Frederick M., assignor.)
Nelson, Seddon C., New York, assignor to Hauck Manufacturing Company, Brooklyn, N. Y. Combined atomizing and vaporizing torch. 2,097,771; Nov. 2.
Neon Research Corporation, The. (See Mitscherling, Waldemar O., assignor.)

Newhall, Carl A., Peabody, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Nozzle for shoe channel cementing machines. 2,097,572; Nov. 2.
Newhall, Carl A., Peabody, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Channel cementing machine. 2,097,573; Nov. 2.
Newhouse, Walter F., Benton Harbor, Mich. Stapling machine. 2,097,499; Nov. 2.
Newman, Max M., and M. Opper, New York, N. Y. Sewing mechanism. 2,098,009; Nov. 2.
News Projection Corporation. (See Eitzen, August D., assignor.)
Newton, Roy C., W. F. Bollens, and L. C. Brown, assignors to Industrial Patents Corporation, Chicago, Ill. Preparation of emulsions. 2,098,010; Nov. 2.
New York Air Brake Company, The. (See Campbell, Charles A., assignor.)
Nielsen, Jens P., Takoma Park, Md. Identifying means for automobiles and the like. 2,098,156; Nov. 2.
Nihon Kogyo Kabushiki Kaisha. (See Suzuki, Kyo, assignor.)
Nilson, Olof G., Chicago, Ill. Combined cap and spout for liquid dispensing containers. 2,097,674; Nov. 2.
Nordell, Carl H., assignor to Advance Engineering Company, Chicago, Ill. Filter. 2,097,529; Nov. 2.
Northup, Amos E., Pleasant Ridge, and C. H. Widman, Detroit, Mich., assignors to The Murray Corporation of America. Constructing vehicle bodies. 2,097,699; Nov. 2.
Norton Company. (See Cole, Raymond A., assignor.)
Norton Company. (See Sanford, Baalis, assignor.)
Norton, Ralph H., assignor to Acme Steel Company, Chicago, Ill. Strap sealing apparatus. 2,097,955; Nov. 2.
Novick, Abraham, Flushing, assignor to F. L. Smithe Machine Co., Inc., New York, N. Y. Envelope or bag making machinery. 2,097,772; Nov. 2.
Nurenberg, George F., Trenton, N. J. Combined table and ironing board. 2,098,157; Nov. 2.
Nye, Alvin F., assignor to Fil-Bac Products Corporation, Rochester, N. Y. Roller screen. 2,098,105; Nov. 2.
O. K. Tool Company, The. (See Severson, Ole, assignor.)
Oermann, Carl H., York, Pa. Chair. 2,097,500; Nov. 2.
Ogilby, Stewart R. (See Hazell, E., and Ogilby.)
Oilgear Company, The. (See Ferris, W., Douglas, and Fobian, assignors.)
Oita, Kenzo, Sumiyoshimura, Mukogun, Hyogoken, assignor to The Toyo Cotton Mills Company, Limited, Osaka, Japan. Skylight. 2,097,738; Nov. 2.
Olmsted, Donald A., Wauneta, Nebr. Tractor guide. 2,097,840; Nov. 2.
O'Neill, Joseph A., Toledo, Ohio. Bank statement sheet and carbon separating apparatus. 2,098,158; Nov. 2.
Opper, Morris. (See Newman, M. M., and Opper.)
Oregon Textile Machines, Inc. (See McDougall, George F., assignor.)
Orelup, John W., East Orange, N. J., assignor, by mesne assignments, to Patent Fuels & Color Corporation, Cincinnati, Ohio. Stabilized colored gasoline. 2,097,773; Nov. 2.
Osolin, Alfred, Shaker Heights, Ohio. Wall subjected to high temperatures. 2,097,637; Nov. 2.
Osterhof, Arthur L. (See Pickett, O. A., and Osterhof.)
Osvold, Helmer J., Thompson, Minn. Game. 2,098,011; Nov. 2.
Oswald, Karl. (See Klemp, William J., assignor.)
Otto, Michael. (See Rabe, H., and Otto.)
Packard Motor Car Company. (See Best, Frank C., assignor.)
Packard Motor Car Company. (See Christman, John M., assignor.)
Packard Motor Car Company. (See Hummer, Aubrey E., assignor.)
Packard Motor Car Company. (See Paton, Clyde R., assignor.)
Packard Motor Car Company. (See Rossmann, Peter F., assignor.)
Palmer, Robert, Niskayunna, N. Y., assignor to General Electric Company. Carbon brush. 2,098,062; Nov. 2.
Papst, Max, Paris, France. Lock and more particularly door lock for automobiles. 2,098,012; Nov. 2.
Paraffine Companies, Inc., The. (See Rowe, W., and Miller, assignors.)
Paris, I. Richard. (See Finck, Joseph L., assignor.)
Park, Elmer W., near Fredericksburg, Va. Tractor plow. 2,097,841; Nov. 2.
Parsons, Robert J., Schenectady, assignor to Consolidated Car-Heating Company, Inc., Albany, N. Y. Heating and ventilating system. 2,098,194; Nov. 2.
Patent Fuels & Color Corporation. (See Orelup, John W., assignor.)
Paton, Clyde R., Birmingham, assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 2,097,466; Nov. 2.
Patrol Valve Company, The. (See Matthews, Birchard L., assignor.)
Pavitt, William H., Bronxville, assignor to A. J. Wilputte, New Rochelle, N. Y. Combination regenerative coke oven. 2,098,013; Nov. 2.
Pavlecka, John, Detroit, Mich. Cellular structure. 2,097,597; Nov. 2.
Pavlecka, John, Detroit, Mich. Cellular structure. 2,097,598; Nov. 2.
Pavlecka, John, Detroit, Mich. Cellular structure. 2,097,599; Nov. 2.
Pavlecka, John, Detroit, Mich. Column structure. 2,097,600; Nov. 2.
Paxton, Gerald C., Santa Ana, Calif., assignor to Acme Steel Company, Chicago, Ill. Box feeding device for strapping machines. 2,097,774; Nov. 2.
Peddicord, Louis W. C., assignor of one-half to R. R. Houdek, Topeka, Kans. Refrigerator food display case. 2,097,530; Nov. 2.
Pedigo, C. A. (See Williams, Elmer E., assignor.)
Peiseler, Kuno, assignor to K. Biagosch, Leipzig, Germany. Cutting device. 2,098,159; Nov. 2.
Pell-Walpole, William T. (See Hanson, D., and Pell-Walpole.)
Peltzer, Albert, Palo Alto, assignor to Merco Centrifugal Separator Co. Ltd., San Francisco, Calif. Process applicable to starch manufacture. 2,097,531; Nov. 2.
Penny, James P., Buffalo, assignor to National Aniline & Chemical Company, Inc., New York, N. Y. Azo compounds and their production. 2,097,638; Nov. 2.
Perkins, Julian L., West Springfield, Mass. Wringer. 2,097,532; Nov. 2.
Perreton, Arnold, Durham, N. H. Machine for cutting comb honey. 2,097,639; Nov. 2.
Perrin, René, assignor to Société d'Electrochimie d'Electrometallurgie et des Aciéries Electriques d'Ugine, Paris, France. Deoxidation of copper. 2,098,063; Nov. 2.
Perritt, Palmer L., San Francisco, Calif. Dispensing device. 2,098,160; Nov. 2.
Perroux, Georges E. M. (See Lair, J. J. B., and Perroux.)
Perry, Harold R., Swarthmore, Pa., and C. S. Jennings, Syracuse, assignors to The Lamson Company, Syracuse, N. Y. Manufacture of shoes. 2,097,799; Nov. 2.
Peters, Carl E., assignor to B-L Electric Manufacturing Company, St. Louis, Mo. Rectifier and producing the same. 2,097,700; Nov. 2.
Peters, Fredus N., Jr. (See Leuck, G. J., Pokorny, and Peters.)
Peterson, Paul D. (See Clairborne, J. T., and Peterson.)
Pfaffenberger, Joachim, Berlin-Marienedorf, Germany, assignor to General Electric Company. Magnetic testing device. 2,098,064; Nov. 2.
Pfeffer, Edward C. (See Cook, B., and Pfeffer.)
Pfeiffer, Henry P., East Orange, N. J. Machine for conditioning false teeth. 2,097,701; Nov. 2.
Pflasterer, George R., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling. 2,07,822; Nov. 2.
Phelps, George T., Forbes, N. Dak. Container. 2,097,736; Nov. 2.
Philadelphia Drying Machinery Company, The. (See Sibson, Walter W., Jr., assignor.)
Phillips, Bernard C., assignor, by mesne assignments, to The Mallory Research Company, Detroit, Mich. Ignition control device. 2,097,842; Nov. 2.
Phillips, Charles E., assignor of one-fourth to T. C. Greene, Fresno, Calif. Tooth brush. 2,097,987; Nov. 2.
Pickett, Oscar A., and A. L. Osterhof, assignors to Hercules Powder Company, Wilmington, Del. Detergent composition. 2,097,737; Nov. 2.
Pieck, Carl E., Covington, Ky. Syringe. 2,098,106; Nov. 2.
Piggott, Henry A., Blackley, Manchester, England, assignor to Imperial Chemical Industries Limited. Quaternary ammonium compounds. 2,097,640; Nov. 2.
Pilant, Frederick, Granby, Mo. Tobacco pipe. 2,098,161; Nov. 2.
Pittman, Ralph R., and C. H. Walsh, Pine Bluff, Ark. Circuit breaker. 2,097,775; Nov. 2.
Place, Bion C., assignor of one-half to G. E. Gagnier, Detroit, Mich. Spring fastener. 2,097,641; Nov. 2.
Platz, Carl, Frankfort-on-the-Main, and H. Holsten, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Preparing amino-carboxylic acids and products obtainable thereby. 2,097,864; Nov. 2.
Plax Corporation. (See Ferngren, Enoch T., assignor.)
Pokorny, Joseph. (See Leuck, G. J., Pokorny, and Peters.)
Polston, John R., assignor to Stanolind Pipe Line Company, Tulsa, Okla. Pipe line system and valve therefor. 2,098,014; Nov. 2.
Pope Machinery Corporation. (See Howard, Merton W., assignor.)
Potdevin, Adolph, Garden City, assignor to Potdevin Machine Company, Brooklyn, N. Y. Method and apparatus for coating paper and the like. 2,097,601; Nov. 2.
Potdevin Machine Company. (See Potdevin, Adolph, assignor.)
Powell, Edward R., Alexandria, Ind. Insulated tile unit and structure. 2,097,892; Nov. 2.
Powell, Winfred T., assignor to General Railway Signal Company, Rochester, N. Y. Interlocking system for railroads. 2,097,800; Nov. 2.
Powell, Winfred T., assignor to General Railway Signal Company, Rochester, N. Y. Centralized traffic controlling system for railroads. 2,097,801; Nov. 2.
Power Patents Company. (See Morgan, John D., assignor.)

Prentice, Carlyle L., New York, N. Y. Ignition control device. 2,097,776; Nov. 2.
Prescott, Charles H., Jr., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Photoelectric tube. 2,097,467; Nov. 2.
Preston, Edward S., assignor to Chicago Electric Manufacturing Company, Chicago, Ill. Fan with rubber blades. 2,098,107; Nov. 2.
Preston, William A. (See Jacob, Marcel, assignor.)
Procter & Gamble Company, The. (See Suter, Chester M., assignor.)
Propello Inventions Limited. (See Yoxall, Joseph, assignor.)
Public in the United States of America, Free use of the. (See Coe, Mayne R., assignor.)
Purkhiser, Roy C. (See Edmunds, G. E., and Purkhiser.)
Putnam, John P., assignor to The Reece Button-Hole Machine Company, Boston, Mass. Electrical connecter. 2,097,642; Nov. 2.
Putnam, Odie W. (See Binford, H. L., and Putnam.)
Quaker Oats Company, The. (See Leuck, G. J., Pokorny, and Peters, assignors.)
Quinn, Clara E., Mount Vernon, Ill., assignor to Broquinda, Inc., Wilmington, Del. Refrigerator. 2,097,935; Nov. 2.
Rabe, Hans, Mannheim, and M. Otto, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of hydrocarbons of high molecular weight. 2,097,468; Nov. 2.
Radio Corporation of America. (See Burrill, Charles M., assignor.)
Radio Corporation of America. (See Dimmick, Glenn L., assignor.)
Radio Corporation of America. (See Ellis, Ray C., assignor.)
Radio Corporation of America. (See Farnham, Paul O., assignor.)
Radio Corporation of America. (See Hansell, Clarence W., assignor.)
Radio Corporation of America. (See Hudtwalker, William T., assignor.)
Radio Corporation of America. (See Kellogg, Edward W., assignor.)
Radio Corporation of America. (See Rust, Noël M., assignor.)
Radio Corporation of America. (See Salzberg, Bernard, assignor.)
Radio Corporation of America. (See Thomas, Adolph A., assignor.)
Radzinsky, Harry. (See Delke, Fred. H., assignor.)
Raggio, Frank, San Francisco, Calif. Adjustable pitch propeller. 2,097,643; Nov. 2.
Ray Engineering Company. (See Rayfield, Charles L., assignor.)
Ray, William A., San Francisco, Calif., assignor to General Controls Company. Solenoid. 2,098,195; Nov. 2.
Ray, William A., San Francisco, Calif., assignor to General Controls Company. Solenoid. 2,098,196; Nov. 2.
Ray, William A., San Francisco, Calif., assignor to General Controls Company. Solenoid. 2,098,197; Nov. 2.
Raybestos-Manhattan, Inc. (See White, William L., assignor.)
Raybestos-Manhattan, Inc. (See Whitelaw, A., and Bonawit, assignors.)
Rayfield, Charles L., assignor to Ray Engineering Company, Chicago, Ill. Compressor. 2,098,065; Nov. 2.
Redford, John E., St. Louis, Mo. Slack adjuster for air brakes. 2,097,533; Nov. 2.
Reece Button-Hole Machine Company, The. (See Putnam, John P., assignor.)
Reed, Malcolm W., Cleveland, Ohio, assignor to The American Steel and Wire Company of New Jersey. Electrical cable. 2,098,162; Nov. 2.
Reed, Malcolm W., Shaker Heights, Ohio, assignor to The American Steel and Wire Company of New Jersey. Electrical cable. 2,098,163; Nov. 2.
Reeves Manufacturing Company, The. (See Hunker, Martin L., assignor.)
Reich, Samuel, New York, N. Y. Container. 2,097,893; Nov. 2.
Reichard, Wade H., assignor to General Railway Signal Company, Rochester, N. Y. Railway signaling system. 2,097,843; Nov. 2.
Reichelt, Lester O., Cranford, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrical cable and making the same. 2,097,501; Nov. 2.
Remington Arms Company. (See Brün, Willi, assignor.)
Replogle, Daniel B., Berkeley, Calif., assignor to Citizens Trust Company, as trustee, Toledo, Ohio. Air flow control in an air-method cleaner. 2,097,469; Nov. 2.
Reppe, Walter, Ludwigshafen-on-the-Rhine, and E. Kuehn, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of polymerization products of vinyl ethers. 2,098,108; Nov. 2.
Reynolds Corporation. (See Coddington, Edwin D., assignor.)
Rice, William A., Richmond, Va. Parcel check. 2,098,164; Nov. 2.
Richardson, James C., Brooklyn, assignor to Royal Switchboard Co., Inc., New York, N. Y. Electrical connecter. 2,097,470; Nov. 2.
Ricks, Fred, and F. C. Choice, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Shoe-treating machine. 2,097,574; Nov. 2.
Riddle, Harvey W., Worcester, Mass., assignor to The American Steel and Wire Company of New Jersey. Die. 2,097,644; Nov. 2.
Riggenbach, John W., Fall River, Mass. Printing and cutting machine. 2,098,165; Nov. 2.
Rilling-Arnao Company. (See Rilling, Paul C., assignor.)
Rilling, Paul C., assignor to Rilling Arnao Company, Minneapolis, Minn. Permanent wave apparatus and method. 2,097,702; Nov. 2.
Rintelman, William L. (See Wuertz, A. J., and Rintelman.)
Ritter, John H., Seattle, Wash. Sea water filter. 2,097,645; Nov. 2.
Ritter, Julius, Jr., assignor to Hartmann Trunk Company, Racine, Wis. Revolving trunk. 2,098,109; Nov. 2.
Rivas, Rafael, assignor of one-third to S. Weinryh and one-third to S. Bluestein, New York, N. Y. Locking device. 2,097,802; Nov. 2.
Roberson, Junius D., Cleburne, Tex. Device for sifting and fluffing flour. 2,097,936; Nov. 2.
Roberts, James H., and C. V. Achauer, Zanesville, Ohio, assignors to Hazel-Atlas Glass Company, Wheeling, W. Va. Glass stopper and bottle grinding machine. 2,097,575; Nov. 2.
Roberts, William T. B., Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating on shoes. 2,097,576; Nov. 2.
Robinson, Guilford D., Eden, N. Y. Automatic can filler. 2,097,844; Nov. 2.
Roche, John, Battle Creek, Mich. Balancing device for grinding or polishing wheels. 2,097,894; Nov. 2.
Rochester-Ventollet Company. (See Madden, E. C., Cooper, and Cuykendall, assignors.)
Rodwin, George. (See Gabriel, J. C., and Rodwin.)
Roe, William C., Elyria, assignor to R. B. Brewer, Cleveland, Ohio. Electromagnetic device. 2,097,823; Nov. 2.
Rogers, Ellas, Company, Limited. (See Cooper, E., and Shiels, assignors.)
Rohlin, Karl W., Merchantville, assignor to Warren Webster & Company, Camden, N. J. Radiator. 2,097,602; Nov. 2.
Röhm & Haas Company. (See Bruson, Herman A., assignor.)
Rollins, Irving L. (See Tasso, Giuseppe, assignor.)
Ronning, Adolph, Minneapolis, Minn. Combination tractor-elevator and power transmission. 2,097,703; Nov. 2.
Rosenfield, Jacob L. (See Frederick, Joseph M., assignor.)
Ross, David E., and L. M. Alt, assignors to Rostone, Incorporated, La Fayette, Ind. Interior wall construction for buildings. 2,097,988; Nov. 2.
Rossiter, Edmund C., London, England, assignor, by mesne assignments, to American Cyanamid Company. Manufacture of artificial resins and the like. 2,097,895; Nov. 2.
Rossman, Allen M., Wilmette, assignor to Rossman Engineering Company, Chicago, Ill. Mechanical power transmission. 2,097,534; Nov. 2.
Rossman Engineering Company. (See Rossman, Allen M., assignor.)
Rossman, Peter F., assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 2,097,739; Nov. 2.
Rostone, Incorporated. (See Ross, D. E., and Alt, assignors.)
Rothman, Emanuel M., Philadelphia, Pa. Bathing costume. 2,097,777; Nov. 2.
Rowe, William, Oakland, and A. B. Miller, Berkeley, assignors to The Paraffine Companies, Inc., San Francisco, Calif. Making inlaid linoleum. 2,098,015; Nov. 2.
Royal Switchboard Co. (See Richardson, James C., assignor.)
Rubenstein, Henry, New York, N. Y. Toy eye-blinking and tail-wagging device. 2,098,166; Nov. 2.
Rugel, Lena M. and P. F., Dallas, Tex. Liquid flow indicator. 2,097,535; Nov. 2.
Rugel, Paul F. (See Rugel, Lena M., and P. F.)
Rupple, Harry W., Shaker Heights, assignor to The Cleveland Automatic Machine Company, Cleveland, Ohio. Metalworking machine. 2,097,046; Nov. 2.
Rust, Noël M., Chelmsford, Essex, England, assignor to Radio Corporation of America. High frequency oscillating circuit. 2,097,937; Nov. 2.
Ruth, John H., Brooklyn, N. Y. Electrical connecter cap. 2,097,603; Nov. 2.
S. & S. Corrugated Paper Machinery Co. (See Shields, Frank S., assignor.)
Sächsische Textilmaschinenfabrik vorm. Rich. Hartmann Aktiengesellschaft. (See Schmitt, Karl J., assignor.)
Saigen, Boku, assignor to Toho Kagakukogyo Kabushi-ki-Kaisha, Keijo, Japan. Emergency stopping device for motor cars. 2,097,740; Nov. 2.
St. Louis Pistols & Caps, Inc. (See Kilgore, Joseph D., assignor.)
Salzberg, Bernard, New York, N. Y., assignor to Radio Corporation of America. Amplifying arrangement. 2,097,896; Nov. 2.
Salzberg, Paul L. (See Austin, P. R., and Salzberg.)
Sandin, David A. (See De Marchi, A., and Sandin.)
Sanford, Baalis, assignor to Norton Company, Worcester, Mass. Grinding wheel. 2,097,803; Nov. 2.

Sauerland, Joseph, West New York, assignor to Hardman, Peck and Company, New York, N. Y. Piano case construction. 2,097,604; Nov. 2.
Schafer, Charles W., Galena, Kans. Carbide lamp. 2,098,167; Nov. 2.
Scharsch, Walter R., Portland, Oreg. Machine and method for cooking a complete meal. 2,097,471; Nov. 2.
Schaub, Eugene L., Middle Village, Long Island, assignor to F. Ackerman and H. Gould, New York, N. Y. Film reel construction. 2,097,778; Nov. 2.
Schertz, Frank M., and R. H. Van Sant, Washington, D. C. Extracting chloroplast pigments. 2,098,110; Nov. 2.
Schick, Friedrich, and E. Emilius, Berlin-Mariendorf, assignors to firm Deutsche Erdöl-Aktiengesellschaft, Berlin-Schoneberg, Germany. Cracking hydrocarbons by means of catalysts. 2,097,989; Nov. 2.
Schlerenbeck, Julius, Heidelberg assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Apparatus for the fine dispersion of gases in liquids. 2,097,605; Nov. 2.
Schleifenbaum, Werner. (See Modersohn, A., and Schleifenbaum.)
Schlesinger, Kurt, Berlin, Germany. Amplitude filter circuit for television receivers. 2,097,804; Nov. 2.
Schmid, Ernst, Annecy, Haute-Savoie, France. Valve mechanism in internal combustion engines of the opposed piston type. 2,097,741; Nov. 2.
Schmitt, Karl J., assignor to Sächsische Textil-maschinenfabrik vorm. Rich. Hartmann Aktiengesellschaft, Chemnitz, Germany. Combing machine for wool, cotton, and the like. 2,097,824; Nov. 2.
Schnackel's, C., Son, Inc. (See McLean, William A., assignor.)
Schreiber, John H., St. Louis, Mo. Ice vending machine. 2,097,807; Nov. 2.
Schrope, William D. (See Arthur, J. L., and Schrope.)
Schueler, J. L., et al. (See Schueler, Julian L., assignor.)
Schueler, Julian L., Kokomo, Ind., assignor, by mesne assignments, to C. W. La Porte, Peoria, Ill., and J. L. Schueler, Kokomo, Ind. Flame treating coated materials. 2,097,472; Nov. 2.
Schuetz, Frank A., Elkhart, Ind., assignor to The Adlake Company, Chicago, Ill. Curtain construction. 2,098,016; Nov. 2.
Schulse, Herman E., Jersey City, N. J. Dispensing container. 2,098,210; Nov. 2.
Schulse, Herman E., East Orange, N. J. Brew cooling. 2,098,211; Nov. 2.
Sconce, James S., Niagara Falls, assignor to Hooker Electrochemical Company, New York, N. Y. Treatment of vegetable fiber. 2,098,111; Nov. 2.
Scott, Audrey K., Toledo, Ohio. Closure for paper containers. 2,097,647; Nov. 2.
Scott, Bateman D., Camp Miserden, near Stroud, England. Accessory drive mechanism. 2,097,742; Nov. 2.
Seegel, Hyman, et al. (See Carnahan, Ralph W., assignor.)
Seegel, Samuel, et al. (See Carnahan, Ralph W., assignor.)
Seltner, Sebastian, Alzey, assignor to firm: Markes & Co., Gesellschaft mit beschrankter Haftung, Ludensceid, Germany. Single phase alternating current motor. 2,097,577; Nov. 2.
Semon, Waldo L., Cuyahoga Falls, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Rubber composition and preserving rubber. 2,097,473; Nov. 2.
Semon, Waldo L., Silver Lake Village, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Rubber composition and preserving rubber. 2,097,474; Nov. 2.
Sennett, Reginald H. (See Carter, P. G., Sennett, and Shaw.)
Severson, Ole, Shelton, Conn., assignor to The O. K. Tool Company, Inc., New York, N. Y. Adjustable hollow mill. 2,097,898; Nov. 2.
Seyfarth, William J., Phoenix, Ariz. Snap-on spur retainer. 2,098,017; Nov. 2.
Sharp & Dohme, Incorporated. (See Hartung, W. H., Young, and Crossley, assignors.)
Shaw, Cecil. (See Carter, P. G., Sennett, and Shaw.)
Shaw, Cecil, Grangemouth, Scotland, assignor to Imperial Chemical Industries Limited. Coloring acetate artificial silk. 2,097,675; Nov. 2.
Shaw, Harry F., Clairton, Pa. Continuous blow-off for steam boilers. 2,097,648; Nov. 2.
Sheffield, Donald H., Brunswick, Ga., assignor to Hercules Powder Company, Wilmington, Del. Method for the recovery of terpenes from mixtures containing the same. 2,097,743; Nov. 2.
Sheffield, Donald H., Brunswick, Ga., assignor to Hercules Powder Company, Wilmington, Del. Isomerization of pinene. 2,097,744; Nov. 2.
Shepard, David C. (See Smith, Swan, assignor.)
Shields, Frank S., Jamaica, assignor to S. & S. Corrugated Paper Machinery Co., Inc., Brooklyn, N. Y. Running register. 2,098,112; Nov. 2.
Shiels, Thomas C. (See Cooper, E., and Shiels.)
Shindel, Harry F., Reading, and A. D. Brandt, Wyomissing, assignors to Willson Products, Inc., Reading, Pa. Head band attachment for respirators. 2,097,676; Nov. 2.
Shirk, Carl I., Modesto, Calif. Retriever for fish lures. 2,097,536; Nov. 2.
Shook, Charles H., Dayton, Ohio. Purifying polluted liquids. 2,097,779; Nov. 2.
Shuron Optical Company. (See Brenner, Jack L., assignor.)
Sibson, Walter W., Jr., assignor to The Philadelphia Drying Machinery Company, Philadelphia, Pa. Treating apparatus. 2,098,066; Nov. 2.
Sikorsky, Igor I., Trumbull, assignor to United Aircraft Corporation, East Hartford, Conn. Adjusting means for control surfaces. 2,097,990; Nov. 2.
Sikorsky, Igor I., Trumbull, assignor to United Aircraft Corporation, East Hartford, Conn. Mechanic's platform for airplanes. 2,097,991; Nov. 2.
Silberman, David, assignor to Ideal Fastener Corporation, New York, N. Y. Tape for slide fasteners. 2,097,475; Nov. 2.
Silex Company, The. (See Wolcott, Frank E., assignor.)
Silver, Benjamin J., New York, N. Y. Insert sole for shoes. 2,097,476; Nov. 2.
Silver, Herman, East Orange, N. J. Slow burning match. 2,097,780; Nov. 2.
Simonsson, Ludvig H., Stockholm, Sweden. Artificial foot, joint, and ankle. 2,098,067; Nov. 2.
Sindelar, Thomas A., Cleveland, assignor to Truscon Steel Company, Youngstown, Ohio. Sliding shelf. 2,098,198; Nov. 2.
Skinner, William F., assignor to J. A. Cleveland, Miami, Fla. Toy cartridge. 2,098,068; Nov. 2.
Smith, Harry, assignor of one-third to J. H. McCoy, and four percent to C. Morrell, Los Angeles, Calif. Apparatus for making moving pictures in depth. 2,097,745; Nov. 2.
Smith, Isidore P., Perrysburg, assignor to The Hettrick Manufacturing Company, Toledo, Ohio. Awning. 2,097,704; Nov. 2.
Smith, Swan, White Bear, assignor to D. C. Shepard, St. Paul, Minn. Forming containers. 2,097,899; Nov. 2.
Smithe, F. L., Machine Co. (See Novick, Abraham, assignor.)
Smittle, Walter R., St. Louis, Mo. Mounting for propeller shafts. 2,097,606; Nov. 2.
Snow, Lancy, Noroton, Conn. Roofing. 2,097,845; Nov. 2.
Snyder, Robert E., Pasadena, assignor of one-half to F. L. Harter, Los Angeles, Calif. Remotely controlled spotlight. 2,097,537; Nov. 2.
Societe Anonyme des Anciens Etablissements Hotchkiss & Cie. (See Boussel, Lucien A., assignor.)
Société d'Electrochimie d'Electrometallurgie et des Aciéries Electriques d'Ugine. (See Perrin, Rene, assignor.)
Sokoloff, Max, Brooklyn, assignor to Hy-Art Novelty Co. Inc., New York, N. Y. Making ornamental material. 2,097,677; Nov. 2.
Solberg, Thorvald A., United States Navy. Method of and material for treating boiler water. 2,097,649; Nov. 2.
Stampe, Gerhard K. E. H., assignor to O. H. Drager, Lubeck, Germany. Device for detecting the presence of foreign gases or suspensions in air or gaseous medium. 2,097,650; Nov. 2.
Sonneborn, L., Sons, Inc. (See Blumer, Manuel, assignor.)
Southern Steel Company. (See White, Loyd J., assignor.)
Southgate, George T., Forest Hills, N. Y., assignor, by mesne assignments, to Union Carbide and Carbon Corporation. Method of and apparatus for producing rods and the like of comminuted material. 2,097,502; Nov. 2.
Spaeth, Charles, Flushing, N. Y. Lamp and operating same. 2,098,113; Nov. 2.
Spang, Chalfant and Co. (See Engstrom, Birger, assignor.)
Spencer Manufacturing Corporation. (See Lewis, Robert P., assignor.)
Sperry, Edgar J., Atlanta, Ga. Spinning toy. 2,098,168; Nov. 2.
Spira, Henry, New York, N. Y. Pocket with pull-matches. 2,097,607; Nov. 2.
Sproul, Donald F., Chicago, Ill., assignor to Cardwell-Westinghouse Company. Spring unit. 2,097,524; Nov. 2.
Square D Company. (See Kingdon, Ralph H., assignor.)
Stadler, Robert. (See Eberhardt, E., and Stadler.)
Stahl, Frank E., assignor to Columbus McKinnon Chain Corporation, Tonawanda, N. Y. Hoist. 2,097,956; Nov. 2.
Stahl, Frank E., Tonawanda, N. Y. Suspension bracket for hoists. 2,097,957; Nov. 2.
Standard Oil Company. (See Keith, Percy C., Jr., assignor.)
Standard Stoker Company, The. (See Martin, Eugene, assignor.)
Stanolind Pipe Line Company. (See Polston, John R., assignor.)
Stangeland, Peder O., assignor of one-half to M. C. Cohen, Los Angeles, Calif. Ratchet hinge. 2,097,651; Nov. 2.
Steerup, Godfrey, Maywood, Ill., assignor to American Can Company, New York, N. Y. Producing electrical disruptive discharges. 2,097,477; Nov. 2.
Stern, Jacob L. (See Hess, Jack W., assignor.)
Stewart, Clyde E., Upper Darby, Pa., assignor to General Electric Company. Remote control system. 2,098,069; Nov. 2.
Stewart, Daniel C., Astoria, Long Island, N. Y. Soda siphon. 2,098,169; Nov. 2.
Stewart-Warner Corporation. (See Davis, Ernest W., assignor.)
Stewarts and Lloyds, Limited. (See McLay, Gavin S., assignor.)

Stickles, Robert. (See Hedges, Edward G., assignor.)
Stiles, Hugh R., assignor to Commercial Solvents Corporation, Terre Haute, Ind. Fermentation of amylaceous materials. 2,098,199; Nov. 2.
Stiles, Hugh R., assignor to Commercial Solvents Corporation, Terre Haute, Ind. Butyl-acetonic fermentation process. 2,098,200; Nov. 2.
Stimson, Allen G., Niskayuna, N. Y., assignor to General Electric Company. Electromagnetic relay. 2,098,070; Nov. 2.
Stockel, Hans C., assignor to Hercules Tool & Manufacturing Co., Chicago, Ill. Stapling device. 2,097,865; Nov. 2.
Stokely Brothers & Company. (See Eberts, Edward C., assignor.)
Stokes, F. J., Machine Company. (See Bailey, Lawrence H., assignor.)
Strandlund, Carl G., assignor to Deere & Company, Moline, Ill. Cultivator and planter. 2,097,678; Nov. 2.
Stranch, Clauss B., New York, N. Y. Nasal inhaler. 2,097,846; Nov. 2.
Stranch, Clauss B., New York, N. Y. Preventing erosions and perforations in metal containers. 2,097,847; Nov. 2.
Strauss, Joseph B., Chicago, Ill. Automatic road direction sign. 2,097,900; Nov. 2.
Strobridge, William, Syracuse, assignor to United States Hoffman Machinery Corporation, New York, N. Y. Garment pressing machine. 2,097,746; Nov. 2.
Stromberg Electric Company. (See Jackson, Edward B., assignor.)
Struble, Minnie G., Kenmore, assignor to Kettleworth Mfg. Co. Inc., Buffalo, N. Y. Cooking utensil. 2,097,478; Nov. 2.
Stuck, Everett Fayetteville, N. Y. Electric water heater. 2,097,705; Nov. 2.
Suter, Chester M., Evanston, Ill., assignor of twenty-five per cent to The Procter & Gamble Company. Sulphonating alcohols. 2,098,114; Nov. 2.
Sullivan Machinery Company. (See Wineman, Wade H., assignor.)
Sundin, Theodore, New York, assignor to Metalfield Incorporated, Long Island City, N. Y., Toilet article. 2,097,938; Nov. 2.
Suzuki, Kyo, Hitachi-Machi, Tagagun, Ibarakiken, assignor to Nihon Kogyo Kabushiki Kaisha, Tokyo, Japan. Reciprocating scraping machine. 2,097,747; Nov. 2.
Swanson, Harold, Cleveland, Ohio. Electric incandescent high pressure gas lamp. 2,097,679; Nov. 2.
Swart, Leland K., Mountain Lakes, and D. W. Bodle, Pequannock, N. J., assignors to American Telephone and Telegraph Company. Apparatus for recording steep wave front voltages of short duration. 2,097,578; Nov. 2.
Symington, Edith R., et al., executors. (See Symington, Thomas H.)
Symington-Gould Corporation, The. (See Symington, Thomas H., assignor.)
Symington, Thomas H., deceased, Baltimore, by E. R. Symington, Lutherville, and T. R. Symington, Reisterstown, Md., executors, assignors, by mesne assignments, to The Symington-Gould Corporation, Rochester, N. Y. Truck side frame. 2,097,579; Nov. 2.
Symington, Thomas R., et al., executors. (See Symington, Thomas H.)
Taber, Philip. (See McPherren, Glen E., assignor.)
Tarbell, Charles E., White Plains, N. Y. Building construction. 2,097,580; Nov. 2.
Tasso, Giuseppe, assignor of one-half to I. L. Rollins, Brooklyn, N. Y. Motor vehicle drive. 2,098,071; Nov. 2.
Taylor, Charles H., assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 2,098,072; Nov. 2.
Taylor, George M., assignor to P. K. Gullow, Wakefield, Mass. Kite. 2,097,538; Nov. 2.
Taylor, Robert B., near Knoxville, Tenn. Removing skin from fruits. 2,097,479; Nov. 2.
Teas, Charles C., Dallas, Iowa, assignor to Collapsible Tube Closures Inc., Olympia, Wash. Closure for containers. 2,098,170; Nov. 2.
Telephon-Apparat Fabrik E. Zwietusch & Co. G. m. b. H. (See Mauch, Hans, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Fritz, Karl, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Hammer, Arthur, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Hermanspann, Paul, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Klotz, Ernst, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Urtel, Rudolf, assignor.)
Thomas, Adolph A., assignor to Radio Corporation of America, New York, N. Y. Radio tuning apparatus. 2,097,901; Nov. 2.
Thomas, Richard, Los Angeles, Calif. Method of and apparatus for multicolor photography. 2,097,706; Nov. 2.
Tichenor, Carl M., Detroit, Mich. Antenna for motor vehicles. 2,097,707; Nov. 2.
Timm, William H., Appleton, Wis. Machine gun rack. 2,097,939; Nov. 2.
Titanite Alloys Corporation. (See Bates, John B., assignor.)
Tobin, Kenneth J. (See Fehr, E. J., and Tobin.)
Toho Kagakukogyo Kabushiki-Kaisha. (See Saigen, Boku, assignor.)
Toledo Show Case Company, The. (See Mayo, Louis H., assignor.)
Tomlinson, Edward J., assignor to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,097,539; Nov. 2.
Tomlinson, Fay M., Lebanon, assignor to Arthur M. Hood, trustee, Indianapolis, Ind. Air gun. 2,097,866; Nov. 2.
Torbert, John E., Jr., National City, Calif. Level and support therefor. 2,097,848; Nov. 2.
Torbert, John E., Jr., National City, Calif. Adjustable level. 2,097,849; Nov. 2.
Toyo Cotton Mills Company Limited, The. (See Oita, Kenzo, assignor.)
Tracy, Homer D., Ridgewood, N. J., assignor to The Linen Thread Co. Inc., New York, N. Y. Treating composite strands. 2,097,540; Nov. 2.
Traylor Vibrator Company, The. (See Flint, J. A., and Holt, assignors.)
Trevillian, Guy R. (See McAuley, J. E., and Trevillian.)
Trost, Gustave A., assignor to Fleishhacker Paper Box Company, San Francisco, Calif. Collapsible container. 2,097,708; Nov. 2.
Truscon Steel Company. (See Sindelair, Thomas A., assignor.)
Tucker, Stanley, London, England, assignor to Minerals Separation North American Corporation, New York, N. Y. Concentration of gold bearing materials. 2,097,608; Nov. 2.
Tucker, Stanley, London, England, assignor to Minerals Separation North American Corporation, New York, N. Y. Concentration of gold bearing materials. 2,097,609; Nov. 2.
Tucker, Wilmer H., Canton, assignor to The Hoover Company, North Canton, Ohio. Electric motor. 2,098,073; Nov. 2.
Turner, John, Contoocook, N. H. Chair or seat. 2,097,541; Nov. 2.
Tyler, W. S., Company, The. (See Wettlaufer, William L., assignor.)
Udy, Marvin J., Niagara Falls, N. Y. Manufacture of chrome ore preparations. 2,098,176; Nov. 2.
Uger, Aron, Hamilton, Ontario, Canada. Arch support for shoes. 2,097,958; Nov. 2.
Underwood Elliott Fisher Company. (See Dobson, William A., assignor.)
Union Carbide and Carbon Corporation. (See De Motte, Maurice P., assignor.)
Union Carbide and Carbon Corporation. (See McCurdy, Frederick T., assignor.)
Union Carbide and Carbon Corporation. (See Southgate, George T., assignor.)
Union Carbide and Carbon Corporation. (See Walters, Clyde H., assignor.)
Union Switch & Signal Company, The. (See Pflasterer, George R., assignor.)
Union Switch & Signal Company, The. (See Young, Henry S., assignor.)
United Aircraft Corporation. (See Sikorsky, Igor I., assignor.)
United Engineering & Foundry Company. (See Walters, Harry E., assignor.)
United Fruit Company. (See Mackay, J. T., and Ames, assignors.)
United Shoe Machinery Corporation. (See Brandt, Francis L., assignor.)
United Shoe Machinery Corporation. (See Keall, Frank B., assignor.)
United Shoe Machinery Corporation. (See Brown, J. H., and Clarke, assignors.)
United Shoe Machinery Corporation. (See Keall, F. B., and Mawbey, assignors.)
United Shoe Machinery Corporation. (See Leveque, Bernard T., assignor.)
United Shoe Machinery Corporation. (See Lineham, R. A., and Clarke, assignors.)
United Shoe Machinery Corporation. (See Newhall, Carl A., assignor.)
United Shoe Machinery Corporation. (See Ricks, F., and Choice, assignors.)
United Shoe Machinery Corporation. (See Roberts, William T. B., assignor.)
United States Hoffman Machinery Corporation. (See Strobridge, William, assignor.)
United States Rubber Products, Inc. (See Hazell, E., and Ogilby, assignors.)
Universal Oil Products Company. (See Fisher, Alfred, assignor.)
Universal Oil Products Company. (See Ipatieff, V., and Komarewsky, assignors.)
Universal Oil Products Company. (See McCaffrey, John W., assignor.)
Universal Oil Products Company. (See Morrell, Jacque C., assignor.)
Universal Products Co. (See Ketchem, F., and Dunn, assignors.)
Urtel, Rudolf, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Detector circuit. 2,097,902; Nov. 2.

Van de Voorde, Eugen, Bremen, Germany. Impregnating and freshing-up device for dry ink ribbons of typewriting machines. 2,098,171; Nov. 2.
Van Sant, Robert H. (See Schertz, F. M., and Van Sant.)
Vater, Willy, Leipzig, Germany. Ball and cup game. 2,097,652; Nov. 2.
Venzie, Frederick M., Philadelphia, Pa., assignor to National Gypsum Company, Buffalo, N. Y. Building construction. 2,097,781; Nov. 2.
Victor Adding Machine Company. (See Garbell, Max, assignor.)
Visser, John, assignor to Grand Rapids Metalcraft Corporation, Grand Rapids, Mich. Ash receiver. 2,097,480; Nov. 2.
Von Bon Horst, Earl, San Clemente, Calif. Air-cooled safety tire. 2,097,748; Nov. 2.
Voorhees, Daniel W., Jr., Peru, Ill. Steel tongue for farm trucks. 2,098,018; Nov. 2.
Voorhies, Carl, Detroit, Mich., assignor, by mesne assignments, to Eaton Manufacturing Company, Cleveland, Ohio. Hydraulic valve lifter. 2,098,115; Nov. 2.
Waddington, Arthur S. (See Grey, H., and Waddington.)
Wade, James T., Ogden, Utah, assignor of one-third to S. E. Ward, Green River, Wyo. Toy machine gun. 2,097,749; Nov. 2.
Wakefield, Walter H., assignor to Crompton-Knowles Loom Works, Worcester, Mass. Bobbin release for weft replenishing looms. 2,097,680; Nov. 2.
Waldron, John, Corporation. (See Dickhaut, C. A., and Warner, assignors.)
Walker, Frank R., Glencoe, Ill. Metal supporting device for building construction. 2,098,172; Nov. 2.
Wallace & Tiernan Products, Inc. (See Wallace, Charles F., assignor.)
Wallace, Charles F., Westfield, assignor to Wallace & Tiernan Products Inc., Belleville, N. J. Sealing joint and making the same. 2,097,850; Nov. 2.
Wallerstein, Leo, New York, N. Y. Rubber. 2,097,481; Nov. 2.
Wallaert, André, Lille, France. Carding machine. 2,097,992; Nov. 2.
Wallin, Karl V. G., Hedensberg, Sweden. Self-inflating life belt. 2,097,542; Nov. 2.
Wallis, Clarissia, Chicago, Ill. Diaper. 2,097,903; Nov. 2.
Walsh, Carroll H. (See Pittman, R. R., and Walsh.)
Walsh, Samuel R., Valley Falls, R. I., assignor to H & B American Machine Company. Apparatus for making bunch-yarn. 2,097,543; Nov. 2.
Walsh, William H., Pasadena, Calif. Portable sign. 2,097,805; Nov. 2.
Walters, Clyde H., South Charleston, W. Va., assignor, by mesne assignments, to Union Carbide & Carbon Corporation. Production of maleic acid. 2,097,904; Nov. 2.
Walters, Harry E., assignor to United Engineering & Foundry Company, Pittsburgh, Pa. Making rolls. 2,097,709; Nov. 2.
Ward, Marshall H., Fairfield, assignor, by mesne assignments, to Bridgeport Thermostat Company, Inc., Bridgeport, Conn. Water-control thermostat construction. 2,098,201; Nov. 2.
Ward, Samuel E. (See Wade, James T., assignor.)
Warne, Frederick C., assignor to Farm Tools, Inc, Mansfield, Ohio. Disk harrow. 2,098,116; Nov. 2.
Warner, Sterling A. (See Dickhaut, C. A., and Warner.)
Warren, Glenn B., Schenectady, N. Y., assignor to General Electric Company. Locomotive turbine drive. 2,098,074; Nov. 2.
Warren, William F., Ardmore, Okla. Can roller. 2,098,117; Nov. 2.
Watson, David M. (See Munoz, G. C., and Watson.)
Watts, Felix J., assignor to American Electric Switch Corporation, Minerva, Ohio. Switch. 2,097,940; Nov. 2.
Watts, Noble H., Bridgeport, Conn., assignor to General Electric Company. Washing machine. 2,098,075; Nov. 2.
Weaver, Earl L., assignor to The Goshen Manufacturing Company, Goshen, Ind. Swing. 2,097,905; Nov. 2.
Weber, Harold C., Milton, Mass., and A. Guyer, Zurich, Switzerland. Process for the production of boron trichloride. 2,097,482; Nov. 2.
Weber, Walter H., assignor to Detroit Lubricator Company, Detroit, Mich. Carburetor. 2,098,202; Nov. 2.
Webster Warren & Company. (See Rohlin, Karl W., assignor.)
Weeg, Herman T., assignor to Western Research & Development Co., San Francisco, Calif. Liquid dispenser. 2,097,503; Nov. 2.
Weickmann, August. (See Hopff, H., and Weickmann.)
Weidrich, Orrin, Kenmore, N. Y. Surfacing device. 2,097,806; Nov. 2.
Weimerskirch, Louis, Pittsburgh, Pa. Mechanical automatic pilot. 2,098,019; Nov. 2.
Weinryb, Sidney, et al. (See Rivas, Rafael, assignor.)
Wells, Milton H., Scarsdale, N. Y. Lock latch. 2,097,504; Nov. 2.
Wells, Raymond, Bridgeboro, and H. M. Kieckhefer, Riverton, assignors, by mesne assignments, to Kieckhefer Container Company, Delair, N. J. Bottle carrier carton. 2,097,941; Nov. 2.
Wenzl, Richard, Freiburg, Germany. Air cooler. 2,097,851; Nov. 2.
Western Electric Company. (See Franz, Erwin E., assignor.)
Western Electric Company. (See Lair, J. J. B., and Perroux, assignors.)
Western Electric Company. (See Reichelt, Lester O., assignor.)
Western Railroad Supply Company. (See Gort, Godfrey, assignor.)
Western Research & Development Co. (See Weeg, Herman T., assignor.)
Westinghouse Electric & Mfg. Company. (See Beard, Joseph G., assignor.)
Westlake Manufacturing Corporation. (See Cady, C. P., and Johnson, assignors.)
Wettlaufer, William L., Buffalo, N. Y., assignor to The W. S. Tyler Company, Cleveland, Ohio. Crusher for stone and like materials. 2,097,906; Nov. 2.
Weydell, Jarl M., Chicago, Ill. Electrical heating system. 2,097,483; Nov. 2.
Wheeler, James S., Phoenix, Ariz. Copy holder for use in connection with typewriting machines. 2,098,020; Nov. 2.
Wheeler, Phillip R., Alexandria, Va. Control system for transmissions. 2,098,021; Nov. 2.
Wheelwright, J. S., Limited. (See Wheelwright, John S., assignor.)
Wheelwright, John S., Tonbridge, England, assignor to J. S. Wheelwright Limited, London, England. Printing upon porous sheet material. 2,098,118; Nov. 2.
Whisler, Ralph H., St. Clair Shores, Mich., assignor, by mesne assignments, to Carter Carburetor Corporation, St. Louis, Mo. Clutch control. 2,098,076; Nov. 2.
White, Harry B., Canton, assignor to The Hoover Company, North Canton, Ohio. Electric switch. 2,098,077; Nov. 2.
White, Loyd J., San Antonio, Tex., assignor to Southern Steel Company. Combination fitting for gas dispensing systems. 2,098,119; Nov. 2.
White Springs Distillery, Inc. (See Bowden, Frederick S. and R. B. assignors.)
White, William L., Clifton, assignor to Raybestos-Manhattan, Inc., Passaic, N. J. Friction material. 2,098,078; Nov. 2.
Whitelaw, Albert, Passaic, and D. J. Bonawit, Glen Park, assignors to Raybestos-Manhattan, Inc., Passaic, N. J. Flexible clutch facing. 2,097,710; Nov. 2.
Whitin Machine Works, The. (See Magrath, George H., assignor.)
Whitman, Hyman L., Bridgewater, Mass. Arch support. 2,097,959; Nov. 2.
Whitney, Maurice P., assignor to Eclipse Machine Company, Elmira, N. Y. Brake mechanism. 2,097,942; Nov. 2.
Wickersham, Harry P. (See Burns, E., and Wickersham.)
Widman, Charles H. (See Northup, A. E., and Widman.)
Wilkinson, Cuthbert G., Kuala Sawah, Federated Malay State of Negri Sembilan. Bearing. 2,098,121; Nov. 2.
Wilkinson, Kenneth J. R., Rugby, England, assignor to General Electric Company. Testing of electrical circuits. 2,098,212; Nov. 2.
Williams, Alfred O. (See Burrows, R. J., and Williams.)
Williams, Elmer E., assignor of thirty-three and a third per cent to C. A. Pedigo, Hull, Tex. Stabilizer for motor vehicles. 2,098,120; Nov. 2.
Williams, Harry W., assignor to The National Cash Register Company, Dayton, Ohio. Nibbling machine. 2,098,022; Nov. 2.
Williams, J. H., & Co. (See Kress, Willard C., assignor.)
Williams, John H., Providence, R. I. Chain for tenter machines. 2,097,960; Nov. 2.
Williams, Roy E., assignor to Highway Trailer Company, Edgerton, Wis. Door holder. 2,097,653; Nov. 2.
Willis, Clodius H., Princeton, N. J., and F. R. Elder and B. D. Bedford, Schenectady, N. Y., assignors to General Electric Company. Electric power transmission system. 2,098,079; Nov. 2.
Willson Products, Inc. (See Shindel, H. F., and Brandt, assignors.)
Wilputte, Adele J. (See Pavitt, William H., assignor.)
Wilsey, Irven H., Chicago, Ill. Coin or token dispenser. 2,097,610; Nov. 2.
Wineman, Wade H., assignor to Sullivan Machinery Company, Michigan City, Ind. Motor. 2,098,122; Nov. 2.
Winslow, Edward N., Shaker Heights, Ohio, assignor to The Mills Company. Structural assembly. 2,097,484; Nov. 2.
Winthrop Chemical Company. (See Hiemenz, W., and Freedman.)
Wolcott, Frank E., West Hartford, Conn., assignor, by mesne assignments, to The Silex Company. Coffee maker. 2,097,681; Nov. 2.
Wolcott, Frank E., West Hartford, Conn., assignor, by mesne assignments, to The Silex Company. Coffee maker stove. 2,097,825; Nov. 2.
Wolff, Robert. (See Eibert, Fritz, assignor.)
Wood, John T., West Asheville, assignor to American Enka Corporation, Enka, N. C. Device for stripping strandular material from circular holders. 2,098,123; Nov. 2.
Woodell, Charles E., assignor, by mesne assignments, to The Carborundum Company, Niagara Falls, N. Y. Polishing article. 2,097,654; Nov. 2.
Wright, Daniel K., Cleveland Heights, Ohio, assignor to General Electric Company. Incandescent lamp and the like. 2,098,080; Nov. 2.

Wright, William N., Washington, D. C., and W. H. Beach, Alexandria, Va. Sand trap. 2,097,852; Nov. 2.
Wuertz, Alexander J., and W. L. Rintelman, Carrollville, Wis., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Preparation of anthraquinone dithiazoles. 2,097,867; Nov. 2.
Yancey, William O., San Francisco, Calif. Block toy. 2,098,124; Nov. 2.
Young, Henry S., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway switch controlling apparatus. 2,097,826; Nov. 2.
Young, Henry S., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Apparatus for the control of highway crossing signals. 2,097,827; Nov. 2.
Young, William G. (See Hartung, W. H., Young, and Crossley.)
Youngstown Steel Door Company, The. (See Eklind, Carl E., assignor.)
Young, W. H., Sr. (See Holt, Walter L., assignor.)
Youngman, Robert T., Aldershot, assignor to The Fairey Aviation Company Limited, Hayes, England. Mechanism for actuating the control surfaces of aircraft. 2,097,807; Nov. 2.
Yoxall, Joseph, Deganwy, North Wales, assignor to Propello Inventions Limited, London, England. Band-brake adjusting mechanism. 2,098,125; Nov. 2.
Zagorski, Johann, Berlin, Germany. Valve. 2,097,943; Nov. 2.
Zaltz, Julius E., Hammond, Ind. Bus door safety lock bar. 2,098,126; Nov. 2.
Zoberg, Joseph, West New York, N. J. Scalp air cooling system for permanent hair waving. 2,097,808; Nov. 2.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 2D DAY OF NOVEMBER, 1937

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Alumina and a product containing the same, Making crystalline. R. R. Ridgway. 20,547; Nov. 2.
Electron tube. K. W. Jarvis and R. M. Blair. 20,545; Nov. 2.
Gallery, Shooting. C. W. Griffith. 20,544; Nov. 2.
Separator. J. Crites. 20,543; Nov. 2.
Tool, Well. H. C. Otis. 20,546; Nov. 2.

LIST OF DESIGN INVENTIONS

Aerial, Automobile radio. C. M. Tichenor. 106,853–4; Nov. 2.
Alphabet for forming monograms for wearing apparel or similar article, Embroidered decorative. C. Emmey. 106,760; Nov. 2.
Alphabet for forming monograms for wearing apparel or similar article, Embroidered decorative. C. Emmey. 106,786; Nov. 2.
Ashtray. H. A. Fuld. 106,762; Nov. 2.
Bookend. W. E. Mackelfresh, Jr. 106,804–5; Nov. 2.
Bowl or similar article, Deep. C. B. Ilgenfritz and E. E. Slick, Jr. 106,795; Nov. 2.
Bowl or similar article, Sugar. C. B. Ilgenfritz and E. E. Slick, Jr. 106,791; Nov. 2.
Box and display stand, Combined. G. T. Gibson. 106,827; Nov. 2.
Box, Cake. M. H. Connor. 106,759; Nov. 2.
Box, Cigarette. R. R. Hutcheson. 106,770–1; Nov. 2.
Bracket for electric fans, Supporting. A. O. Samuels. 106,822; Nov. 2.
Brush. F. R. Rapids. 106,819; Nov. 2.
Buckle. S. Dorée. 106,783–5; Nov. 2.
Button or similar article. T. J. Flynn and C. G. McClintock. 106,761; Nov. 2.
Cap, Container. E. T. Reynolds. 106,820; Nov. 2.
Carton. R. Guerlain. 106,790; Nov. 2.
Carton for transparent drinking straws. O. W. Dieffenbach. 106,826; Nov. 2.
Case, Kit. W. E. and E. W. Voigt. 106,777; Nov. 2.
Casing and container unit, Combined refrigerator. K. Speck. 106,811; Nov. 2.
Chair or similar article, Upholstered. S. Kaufman. 106,798; Nov. 2.
Charm. H. Krupp. 106,799; Nov. 2.
Coffee maker. O. M. Anderson. 106,778; Nov. 2.
Cooler and dispenser, Combined water. G. J. Wiggenhorn. 106,812; Nov. 2.
Cover for a coffee brewer or similar article, Upper bowl. E. Perlman. 106,808; Nov. 2.
Dispenser, Coffee. F. M. Boyles. 106,781; Nov. 2.
Dress. P. Cohen. 106,839–41; Nov. 2.
Dress. T. Coleman. 106,842–3; Nov. 2.
Dress. B. Fried. 106,815; Nov. 2.
Dress. C. Jaccarino. 106,829–32; Nov. 2.
Dress. I. Kalmis. 106,844; Nov. 2.
Dress. M. P. Kranz. 106,845–9; Nov. 2.
Dress. S. J. Poster. 106,850; Nov. 2.
Dress. P. Schlessel. 106,851; Nov. 2.
Dress. H. M. Sterngold. 106,852; Nov. 2.
Dress. S. J. Velardi. 106,855; Nov. 2.
Dress. H. Zinn. 106,856–7; Nov. 2.
Dress ensemble. E. M. Ciccone. 106,825; Nov. 2.
Dress or similar article. A. Morris. 106,834; Nov. 2.
Extractor, Juice. T. L. Hand. 106,766; Nov. 2.
Fabric or similar article, Textile. A. Stone. 106,776; Nov. 2.
Fabric, Textile. B. R. Levy. 106,802; Nov. 2.
Fabric, Textile. J. E. Maisch. 106,806–7; Nov. 2.
Handle, Door. F. C. Ruppel. 106,821; Nov. 2.
Hearing aid amplifier casing. S. G. Sears. 106,823; Nov. 2.
Holder, Combined tray and beverage container. J. D. de Benque. 106,782; Nov. 2.
Holder, Pen and pencil. F. M. Aimes. 106,752–3 Nov. 2.
Holder, Pipe. E. A. S. Langslow. 106,800; Nov. 2.
Jar. I. Cordy. 106,814; Nov. 2.
Lamp for ranges and the like, Electric. L. Ludwig. 106,803; Nov. 2.
Lamp or similar article. L. L. Stewart. 106,835; Nov. 2.
Lamp or similar article, Reading. L. L. Stewart. 106,836; Nov. 2.
Lighter and cigarette container, Combined pyrophoric. L. V. Aronson. 106,756; Nov. 2.
Lighting fixture. P. D. Phillips. 106,774; Nov. 2.
Medallion or similar article, Display. B. Puclioski. 106,810; Nov. 2.
Nappy or similar article. C. B. Ilgenfritz and E. E. Slick, Jr. 106,796; Nov. 2.
Negligee. J. N. Jebaily. 106,772; Nov. 2.
Ornament, Artificial tree. I. M. Casey. 106,751; Nov. 2.
Pan or similar article. W. Andre. 106,779; Nov. 2.
Patch, Pan. C. Fischer. 106,788; Nov. 2.
Pencil. H. F. Gade. 106,789; Nov. 2.
Pinking machine. H. C. Herschman. 106,816; Nov. 2.
Pitcher or similar article, Milk. C. B. Ilgenfritz and E. E. Slick, Jr. 106,792; Nov. 2.
Plate or similar article. W. T. Johnson. 106,773; Nov. 2.
Protector and marker, Combined grave. O. Sullivan. 106,837; Nov. 2.
Reel, Fishing. L. and S. Gurrieri. 106,828; Nov. 2.
Rug. R. F. Bemporad. 106,757; Nov. 2.
Shoe. D. Gilbert. 106,763–5; Nov. 2.
Shoe. H. J. Heiser. 106,767–8; Nov. 2.
Shoe. A. Hurzeler. 106,769; Nov. 2.
Shoe or similar article. L. Sholtz. 106,775; Nov. 2.
Smock. L. M. Cascardo. 106,824; Nov. 2.
Stand, Display. C. E. Lehman. 106,833; Nov. 2.
Stand or similar article, Telescopic viewing. C. A. Brewer. 106,758; Nov. 2.
Stand, Smoking. H. L. MacCowan. 106,817; Nov. 2.
Stoker or the like. J. J. McGlone. 106,818; Nov. 2.
Stool, Bathroom. G. B. Bentz. 106,780; Nov. 2.
Store front. H. V. Lederer and F. Stanton. 106,801; Nov. 2.
Sweeper, Carpet. C. A. Anderson. 106,754–5; Nov. 2.
Thermometer. R. C. Wappner. 106,838; Nov. 2.
Tile. W. O. Prouty. 106,809; Nov. 2.
Tray or similar article, Oval relish. C. B. Ilgenfritz and E. E. Slick, Jr. 106,797; Nov. 2.
Tub or similar article, Combined butter and almond. C. B. Ilgenfritz and E. E. Slick, Jr. 106,794; Nov. 2.
Tumbler or similar article. C. B. Ilgenfritz and E. E. Slick, Jr. 106,793; Nov. 2.
Vase. M. Exelmans. 106,787; Nov. 2.
Vehicle, Motor. J. Barofsky. 106,813; Nov. 2.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 2D DAY OF NOVEMBER, 1937

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Acid compounds. Anthraquinone thiophene and selenophene carboxylic. R. N. Lulek and C. F. Belcher. 2,097,860; Nov. 2.
Acid from the fume gases containing small amounts thereof, Recovering maleic. A. O. Jaeger and J. E. Jewett. 2,098,047; Nov. 2.
Acid, Production of maleic. C. H. Walters. 2,097,904; Nov. 2.
Acids and esters thereof and uses therefor, Substituted succinic. L. P. Kyrides. 2,098,190; Nov. 2.
Acids and products obtainable thereby, Preparing aminocarboxylic. C. Platz and H. Holsten. 2,097,864; Nov. 2.
Acids from aryl ethylenes and the products thereof, Manufacture of sulphonic. H. Grotowsky. 2,097,726; Nov. 2.
Adhesive material. M. H. Kemp. 2,098,187; Nov. 2.
Adhesive, Synthetic resin. A. H. Bowen and T. W. Dike. 2,098,083; Nov. 2.
Adjusting means for control surfaces. I. I. Sikorsky. 2,097,990; Nov. 2.
Advertising or display device. H. Grey and A. S. Waddington. 2,098,143; Nov. 2.
Agitator for acetylene generators, Carbide. M. P. De Motte. 2,097,617; Nov. 2.
Air, Apparatus for conditioning. J. A. Guyer. 2,097,520; Nov. 2.
Air brake. C. A. Campbell. 2,097,964; Nov. 2.
Air conditioning apparatus. R. F. Bixby and J. H. Meyer. 2,097,556; Nov. 2.
Air, Conditioning mine. S. E. T. Ewing and A. L. Egan. 2,097,723; Nov. 2.
Air cooler. R. Wenzl. 2,097,851; Nov. 2.
Air flow control in an air-method cleaner. D. B. Replogle. 2,097,469; Nov. 2.
Alarm, Automatic telephone. R. W. Carnahan. 2,098,133; Nov. 2.
Alarm mechanism for clocks. S. Krakowski. 2,097,818; Nov. 2.
Alcoholic spirits, Producing distilled. F. S. and R. B. Bowden. 2,097,545; Nov. 2.
Alcohols, Manufacture of. W. H. Hartung, W. G. Young, and F. S. Crossley. 2,098,206; Nov. 2.
Alcohols, Sulphonating. C. M. Suter. 2,098,114; Nov. 2.
Alkyl halides, Synthesis of. H. R. Arnold and E. T. Lessig. 2,097,750; Nov. 2.
Alloys, Rolling. F. T. McCurdy. 2,097,768; Nov. 2.
Alloys, Tin. D. Hanson and W. T. Tell-Walpole. 2,097,727; Nov. 2.
Alternating current motor, Single phase. S. Seltner. 2,097,577; Nov. 2.
Aluminum alloy. J. B. Bates. 2,098,081; Nov. 2.
Amines, Preparation of secondary aromatic. A. G. and A. J. Hill. 2,098,039; Nov. 2.
Ammonium compounds, Quaternary. H. A. Piggott. 2,097,640; Nov. 2.
Amplifying arrangement. B. Salzberg. 2,097,896; Nov. 2.
Amylaceous materials, Fermentation of. H. R. Stiles. 2,098,199; Nov. 2.
Anesthetic, Surface. D. Curtis. 2,097,687; Nov. 2.
Anode. H. H. Blouch. 2,097,508; Nov. 2.
Antenna for motor vehicles. C. M. Tichenor. 2,097,707; Nov. 2.
Anthraquinone derivatives. F. Lodge. 2,097,672; Nov. 2.
Anthraquinone dithiazoles, Preparation of. A. J. Wuertz and W. L. Rintelman. 2,097,867; Nov. 2.
Arch support. H. L. Whitman. 2,097,959; Nov. 2.
Arch support for shoes. A. Uger. 2,097,958; Nov. 2.
Articles of paper pulp, Method of and apparatus for molding. H. V. Mitchell. 2,098,008; Nov. 2.
Ash receiver. J. Visser. 2,097,480; Nov. 2.
Atomizer, Self cleaning. W. MacDonald. 2,097,696; Nov. 2.
Automobile elevating and supporting structure. E. J. Fehr and K. J. Tobin. 2,098,184; Nov. 2.
Awning. I. P. Smith. 2,097,704; Nov. 2.
Azo compounds and their production. J. P. Penny. 2,097,638; Nov. 2.
Backs of book covers, Mechanism for shaping the. A. J. Moyer. 2,098,060; Nov. 2.
Bag frames and blanks therefor, Making. W. J. Klemp. 2,097,927; Nov. 2.
Bags, Apparatus for closing. R. N. and L. A. Cundall. 2,097,448; Nov. 2.
Bags, Apparatus for filling, sewing, and sealing. R. N. and L. A. Cundall. 2,097,447; Nov. 2.
Bags, Apparatus for filling, sewing, and sealing. R. N. and L. A. Cundall. 2,097,449; Nov. 2.
Bags, Apparatus for sewing and sealing filled. R. N. and L. A. Cundall. 2,097,450; Nov. 2.
Balance. H. Bennett. 2,097,753; Nov. 2.
Balancing device for grinding or polishing wheels. J. Roche. 2,097,894; Nov. 2.
Ball joint. R. F. Kimmont. 2,098,188; Nov. 2.
Band-brake adjusting mechanism. J. Yoxall. 2,098,125; Nov. 2.
Bar: *See*—
Lock bar.
Basket manufacture. S. C. Lampert. 2,098,049; Nov. 2.
Batching apparatus. L. H. Garlinghouse. 2,097,551; Nov. 2.
Battery terminal protector. J. F. Gamble. 2,098,091; Nov. 2.
Bearing. C. G. Wilkinson. 2,098,121; Nov. 2.
Bearing and manufacturing the same, Anti-friction. A. G. Grabe. 2,097,878; Nov. 2.
Bearing assembling machine, Roller. F. Ketcham and G. E. Dunn. 2,097,669; Nov. 2.
Bearing cup extracting tool. B. Cook and E. C. Pfeffer. 2,098,134; Nov. 2.
Bearing material, Making a porous. R. P. Koehring. 2,097,671; Nov. 2.
Bearing shells, Method and machine for forming. W. J. Fiegel. 2,097,692; Nov. 2.
Bearing shells, Method and machine for forming flanged. W. J. Fiegel. 2,097,691; Nov. 2.
Belt, Self-inflating life. K. V. G. Wallin. 2,097,542; Nov. 2.
Bench method and apparatus, Push. G. S. McLay 2,098,153; Nov. 2.
Bench saw table. T. L. Hedgpeth. 2,097,920; Nov. 2.
Bezels and escutcheon plates, Retaining means for. C. E. Caestecker. 2,097,511; Nov. 2.
Blowers, Air controlling device for. J. Hanus. 2,098,144; Nov. 2.
Blow-off for steam boilers, Continuous. H. F. Shaw. 2,097,648; Nov. 2.
Bobbin release for weft replenishing looms. W. H. Wakefield. 2,097,680; Nov. 2.
Body-resting device. M. Baltich. 2,097,751; Nov. 2.
Bolt, Key actuated locking. H. H. Kistner. 2,098,189; Nov. 2.
Bolted joint. A. W. Ashley. 2,097,713; Nov. 2.
Book leaf securing means. G. A., and N. Lestl. 2,097,626; Nov. 2.
Books, Forming. F. J. Leyerle. 2,097,888; Nov. 2.
Booth, Spray. J. E. Ludwig. 2,097,953; Nov. 2.
Boron trichloride, Production of. H. C. Weber and A. Guyer. 2,097,482; Nov. 2.
Bottle neck construction. S. W. Burnham. 2,097,912; Nov. 2.
Box feeding device for strapping machines. G. C. Paxton. 2,097,774; Nov. 2.
Box for dispensing tissues. S. Herz. 2,097,858; Nov. 2.
Box or carton. C. J. Munce. 2,097,891; Nov. 2.
Bracket for hoists, Suspension. F. E. Stahl. 2,097,957; Nov. 2.
Brake: *See*—
Air brake. Car brake.
Brake mechanism. M. P. Whitney. 2,097,942; Nov. 2.
Brake shoe construction. R. J. Burrows and A. O. Williams. 2,097,584; Nov. 2.
Brake unit, Reaction type power. E. R. Evans. 2,097,873; Nov. 2.
Braking system, Hydraulic. F. O. Miller. 2,097,889; Nov. 2.
Brew cooling. H. E. Schulse. 2,098,211; Nov. 2.
Brush, Carbon. R. Palmer. 2,098,062; Nov. 2.
Brush for shearing machines, Raising. F. H. Hardy. 2,097,790; Nov. 2.
Brush, Surgical hand. E. Johnson. 2,097,461; Nov. 2.
Building construction. C. E. Tarbell. 2,097,580; Nov. 2.
Building construction. F. M. Venzie. 2,097,781; Nov. 2.
Buildings and like structures, Insulating. J. L. Finck. 2,098,138; Nov. 2.
Bumper, Automobile safety. E. L. Daily. 2,097,833; Nov. 2.
Bumper jack. A. L. Johnson. 2,097,949; Nov. 2.
Bunch-yarn, Apparatus for making. S. R. Walsh. 2,097,543; Nov. 2.
Butyl-acetonic fermentation process. H. R. Stiles. 2,098,200; Nov. 2.
Cabinet, Refrigerated. V. Miñana and J. A. Gallano. 2,098,155; Nov. 2.
Cable and making the same, Electrical. L. O. Reichelt. 2,097,501; Nov. 2.
Cable clamp. R. H. Kingdon. 2,097,695; Nov. 2.
Cable, Electrical. M. W. Reed. 2,098,162-3; Nov. 2.
Cadmium, Plating of. G. Lutz. 2,097,630; Nov. 2.
Calipering apparatus. R. A. Cole. 2,097,784; Nov. 2.

Can filler, Automatic. G. D. Robinson. 2,097,844; Nov. 2.
Can filling machine. W. E. Lacey. 2,097,887; Nov. 2.
Can roller. W. F. Warren. 2,098,117; Nov. 2.
Cap and spout for liquid dispensing containers, Combined. O. G. Nilson. 2,097,674; Nov. 2.
Cap, Distributor. J. L. Arthur and W. D. Schrope. 2,097,426; Nov. 2.
Cap, Electrical connecter. J. H. Ruth. 2,097,603; Nov. 2.
Car and the like, Mine. G. E. Edmunds. 2,097,967-8; Nov. 2.
Car brake, Loaded and light. W. H. Bell. 2,098,129; Nov. 2.
Car, House. C. E. Eklind. 2,098,183; Nov. 2.
Car, Mine. G. E. Edmunds. 2,097,966; Nov. 2.
Car protector. C. W. Hutchinson. 2,097,923; Nov. 2.
Carbide lamp. C. W. Schafer. 2,098,167; Nov. 2.
Carburetor. W. H. Weber. 2,098,202; Nov. 2.
Card. Dial. H. Hassenfeld. 2,098,003; Nov. 2.
Carding machine. A. Wallaert. 2,097,992; Nov. 2.
Carton, Bottle carrier. R. Wells and H. M. Kieckhafer. 2,097,941; Nov. 2.
Case: *See*—
Food display case. Shipping case
Casing head. E. Burns and H. P. Wickersham. 2,097,615; Nov. 2.
Casings and the like, Process and apparatus for making sausage. R. L. Atkinson. 2,097,684; Nov. 2.
Cellular structure. J. Pavlecka. 2,097,597-9; Nov. 2.
Cellulose acetate and its preparation, Haze free. C. J. Malm. 2,097,464; Nov. 2.
Cement, Apparatus for use in making. W. Dyckerhoff. 2,098,136; Nov. 2.
Cement fiber and the like products, Process and apparatus for making and coloring. C. Batcheller. 2,097,613; Nov. 2.
Cementing machine. I. L. Keith. 2,098,101; Nov. 2.
Ceramic ware, Method and apparatus for firing. E. J. Harris. 2,097,620; Nov. 2.
Chain for tenter machines. J. H. Williams. 2,097,960; Nov. 2.
Chair. B. H. Drake. 2,097,618; Nov. 2.
Chair. C. H. Oermann. 2,097,500; Nov. 2.
Chair or analogous article of furniture. E. A. Kann. 2,097,884; Nov. 2.
Chair or seat. J. Turner. 2,097,541; Nov. 2.
Channel cementing machine. C. A. Newhall. 2,097,573; Nov. 2.
Charge forming mechanism. P. Maniscalco. 2,097,526; Nov. 2.
Check, Parcel. W. A. Rice. 2,098,164; Nov. 2.
Checking device. J. T. Mackay and H. C. Ames. 2,097,861; Nov. 2.
Chicken fountain. D. B. Dreese. 2,097,563; Nov. 2.
Chlorbutadiene, Production of. E. Eberhardt and R. Stadler. 2,098,089; Nov. 2.
Chlorides, Aromatic polyether. H. A. Bruson. 2,097,441; Nov. 2.
Chloroethers, Phenolic. H. A. Bruson. 2,098,204; Nov. 2.
Chute for coin collectors, Coin. P. E. Mille. 2,097,497-8; Nov. 2.
Circuit breaker. R. R. Pittman and C. H. Walsh. 2,097,775; Nov. 2.
Circuit, Control. H. L. Barney. 2,097,507; Nov. 2.
Circuit, Detector. R. Urtel. 2,097,902; Nov. 2.
Circuit for television receivers, Amplitude filter. K. Schlesinger. 2,097,804; Nov. 2.
Circuit, High frequency oscillating. N. M. Rust. 2,097,937; Nov. 2.
Circuit, Timing. H. W. Lord. 2,098,052; Nov. 2.
Circuits, Display lighting. M. Guérin and P. Breton. 2,098,002; Nov. 2.
Circuits, Electric valve translating. E. F. W. Alexanderson. 2,098,023; Nov. 2.
Circuits, Power supply. W. T. Hudtwalker. 2,097,882; Nov. 2.
Circuits, Testing of electrical. K. J. R. Wilkinson. 2,098,212; Nov. 2.

Gun, Grease. A. W. Arnold. 2,097,612; Nov. 2.
Gun, Rubber band. L. and A. Gagnon. 2,098,001; Nov. 2.
Hat fastening device. S. Getmansky. 2,097,877; Nov. 2.
Head band attachment for respirators. H. F. Shindel and A. D. Brandt. 2,097,676; Nov. 2.
Hearing aid. F. L. Alloway. 2,097,554; Nov. 2.
Heater: *See*—
Radiant orchard heater. Water heater.
Heater for salt baths, Immersion. A. Kärcher. 2,097,981; Nov. 2.
Heating and ventilating system. R. J. Parsons. 2,098,194; Nov. 2.
Heating device. A. M. Haas. 2,097,521; Nov. 2.
Hinge: *See*—
Ratchet hinge.
Hoist. F. E. Stahl. 2,097,956; Nov. 2.
Holder: *See*—
Door holder.
Holder for use in connection with typewriting machines, Copy. J. S. Wheeler. 2,098,020; Nov. 2.
Hollow mill, Adjustable. O. Severson. 2,097,808; Nov. 2.
Hook: *See*—
Meat hook.
Hose, Fire. H. McKay. 2,097,862; Nov. 2.
Humidifier, Automatic. H. J. M. Burdick. 2,097,548; Nov. 2.
Hydrant. L. R. Miller. 2,097,733; Nov. 2.
Hydraulic valve lifter. C. Voorhies. 2,098,115; Nov. 2.
Hydrocarbons by means of catalysts, Cracking. F. Schick and E. Emilius. 2,097,989; Nov. 2.
Hydrocarbons, Conversion and coking of. A. Fisher. 2,098,033; Nov. 2.
Hydrocarbons of high molecular weight, Production of. H. Rabe and M. Otto. 2,097,468; Nov. 2.
Hydrocarbons, Treatment of. V. Ipatieff and V. Komarewsky. 2,098,045–6; Nov. 2.
Hydrocarbons, Treatment of. W. O. Mitscherling. 2,097,769; Nov. 2.
Hypochlorite composition, , Soluble. C. B. Durgin. 2,097,517; Nov. 2.
Ice vending machine. J. H. Schreiber. 2,097,897; Nov. 2.
Identifying means for automobiles and the like. J. P. Nielsen. 2,098,156; Nov. 2.
Ignition and control device for oven burners. B. L. Matthews. 2,098,192; Nov. 2.
Ignition control device. B. C. Phillips. 2,097,842; Nov. 2.
Ignition control device. C. L. Prentice. 2,097,776; Nov. 2.
Illuminating device for microscopes. E. Lihotzky. 2,097,494; Nov. 2.

Impregnating and freshing-up device for dry ink ribbons of typewriting machines. E. van de Voorde. 2,098,171; Nov. 2.
Incandescent screen. H. S. Bamford. 2,097,994; Nov. 2.
Indicator: *See*—
Liquid flow indicator. Oil delivery control indicator.
Liquid level indicator.
Inhaler, Nasal. C. B. Strauch. 2,097,846; Nov. 2.
Inhibitor. F. C. Carlson. 2,097,512; Nov. 2.
Ink fountain. H. G. Harwood and B. G. Albee. 2,097,621; Nov. 2.
Instrument panel and radio receiver, Combined. R. C. Ellis. 2,097,872; Nov. 2.
Insulating, cellulosic medium. F. W. Hochstetter. 2,097,694; Nov. 2.
Insulation, Heat. C. G. Munters. 2,098,193; Nov. 2.
Insulation material. J. A. Malcolm. 2,097,595; Nov. 2.
Intaglio printing machine. F. Heller. 2,097,791; Nov. 2.
Interlocking system for railroads. W. T. Powell. 2,097,800; Nov. 2.
Internal combustion engine. M. Essl. 2,098,031; Nov. 2.
Internal combustion engine, Opposed piston. J. L. Bogert. 2,097,583; Nov. 2.
Iodine compounds, Water-soluble organic. W. Hilemenz and L. Freedman. 2,098,094; Nov. 2.
Ironing table, Collapsible. C. A. Forney. 2,097,724; Nov. 2.
Jack: *See*—
Bumper jack.
Jacquard feeding mechanism. E. R. Holmes. 2,097,666; Nov. 2.
Jewelry finding. E. Morehouse. 2,098,104; Nov. 2.
Jig, Dye. B. C. Gibbs. 2,097,592; Nov. 2.
Joint: *See*—
Ball joint. Bolted joint.
Joint and making the same, Sealing. C. F. Wallace. 2,097,850; Nov. 2.
Joist. E. D. Coddington. 2,097,722; Nov. 2.
Kite. G. M. Taylor. 2,097,538; Nov. 2.
Knitting machine. R. H. Lawson and A. N. Cloutier. 2,098,050; Nov. 2.
Knitting machines, Thread guide and tensioning means for. W. P. Ford. 2,097,565; Nov. 2.
Lamp: *See*—
Carbide lamp. Projector lamp.
Gas lamp.
Lamp and operating same. C. Spaeth. 2,098,113; Nov. 2.
Lamp and the like, Incandescent. D. K. Wright. 2,098,080; Nov. 2.
Lasting machine. F. B. Keall. 2,097,567; Nov. 2.
Latch: *See*—
Lock latch.
Latching device, Shock absorbing. G. F. McDougall. 2,097,596; Nov. 2.
Lead and lead alloys. W. T. Butcher. 2,097,560; Nov. 2.
Lettuce in packing and shipping, Treating. J. H. Grande. 2,098,209; Nov. 2.
Level, Adjustable. J. E. Torbert, Jr. 2,097,849; Nov. 2.
Level and support therefor. J. E. Torbert, Jr. 2,097,848; Nov. 2.
Lift, Automobile. C. J. Bristol. 2,097,853; Nov. 2.
Lifter: *See*—
Hydraulic valve lifter.
Lighter, Cigarette. I. Florman. 2,097,973; Nov. 2.
Lime, Making. G. F. Horton. 2,097,979; Nov. 2.
Liner setting tool. C. C. Brown. 2,097,755; Nov. 2.
Linoleum, Making inlaid. W. Rowe and A. B. Miller. 2,098,015; Nov. 2.
Liquid dispenser. H. T. Weeg. 2,097,503; Nov. 2.
Liquid dispensing apparatus. E. G. Hedges and R. Stickles. 2,098,093; Nov. 2.
Liquid flow indicator. L. M. Rugel and P. F. Rugel. 2,097,535; Nov. 2.
Liquid level indicator. J. D'Arcey. 2,098,085; Nov. 2.
Liquids, Purifying polluted. C. H. Shook. 2,097,779; Nov. 2.
Lock: *See*—
Gasoline tank lock. Pin or bolt lock.
Lock. T. H. Johnstone. 2,098,150; Nov. 2.
Lock and more particularly door locks for automobiles. M. Papst. 2,098,012; Nov. 2.
Lock bar, Bus door safety. J. E. Zaltz. 2,098,126; Nov. 2.
Lock latch. M. H. Wells. 2,097,504; Nov. 2.
Locking device. R. Rivas. 2,097,802; Nov. 2.
Looms, Attachment for. W. L. Holt. 2,097,859; Nov. 2.
Looms, Warp stop motion for. J. J. Kearby. 2,097,951; Nov. 2.
Lubricating apparatus. E. W. Davis. 2,097,871; Nov. 2.
Luminescent screen. P. T. Farnsworth and B. C. Gardiner. 2,098,000; Nov. 2.
Machine and method for cooking a complete meal. W. R. Scharsch. 2,097,471; Nov. 2.
Machine for conditioning false teeth. H. P. Pfeiffer. 2,097,701; Nov. 2.
Machine for cutting comb honey. A. Perreton. 2,097,639; Nov. 2.
Machine for manufacturing incandescent lamps. J. F. Donovan and G. Illingworth. 2,098,030; Nov. 2.
Machine for sorting punched cards mechanically and electrically. M. Jacob. 2,097,764; Nov. 2.
Machine gun rack. W. H. Timm. 2,097,939; Nov. 2.
Magnesium dust into compact metallic magnesium, Conversion of. K. Erdmann and F. Hansgirg. 2,097,689; Nov. 2.
Magnetic testing device. J. Pfaffenberger. 2,098,064; Nov. 2.
Magnetic testing, Method of and apparatus for. F. P. Fahy. 2,097,947; Nov. 2.
Magnetron detector. K. Fritz. 2,097,918; Nov. 2.
Mallet. E. E. Hosier. 2,097,459; Nov. 2.
Marker, Lens. J. L. Brenner. 2,097,832; Nov. 2.
Masonry. H. C. Mathers. 2,097,821; Nov. 2.
Massage device. L. Fisher. 2,097,455; Nov. 2.
Match. H. Silver. 2,097,780; Nov. 2.
Match packet. J. C. Leukhardt. 2,097,839; Nov. 2.
Material, Apparatus for winding. E. E. Franz. 2,097,518; Nov. 2.
Material, Friction. W. L. White. 2,098,078; Nov. 2.
Material from circular holders, Device for stripping strandular. J. T. Wood. 2,098,123; Nov. 2.
Material, Making ornamental. M. Sokoloff. 2,097,677; Nov. 2.
Materials, Flame treating coated. J. L. Schueler. 2,097,472; Nov. 2.
Matrix composing and line casting machine. C. A. Albrecht. 2,097,711; Nov. 2.
Meat hook. F. Holladay. 2,097,978; Nov. 2.
Mechanism for actuating the control surfaces of aircraft. R. T. Youngman. 2,097,807; Nov. 2.
Mechanism for producing accurate pitched cutting on circular work. E. Bilchholz. 2,098,132; Nov. 2.
Mechanism for sealing packages hermetically. S. Bergstein. 2,097,428; Nov. 2.
Metal, Apparatus to be used in casting. W. F. Eppensteiner. 2,097,658; Nov. 2.
Metalworking machine. H. W. Rupple. 2,097,646; Nov. 2.
Microscope. H. Heine. 2,097,762; Nov. 2.
Microscope, Workshop. H. Becker. 2,097,752; Nov. 2.
Mill: *See*—
Adjustable hollow mill.
Mixer: *See*—
Food mixer.
Motor: *See*—
Alternating current motor. Wind motor.
Electric motor.

Incandescent screen. Window screen.
Roller screen.
Screw threads in shouldered work, Grinding. S. J. Harley. 2,098,145; Nov. 2.
Sea water filter. J. H. Ritter. 2,097,645; Nov. 2.
Sealing device and assembly. G. W. Carlson. 2,098,084; Nov. 2.
Sealing device for containers. G. H. Lewis. 2,097,820; Nov. 2.
Seat frame construction. A. H. Haberstump. 2,097,976; Nov. 2.
Sewage and other waste liquors, Treatment of. H. J. N. H. Kessener. 2,098,152; Nov. 2.
Sewing machine, Shoe. B. T. Leveque. 2,097,462; Nov. 2.
Sewing machine tool. E. J. S. Mrozinski. 2,097,735; Nov. 2.
Sewing mechanism. M. M. Newman and M. Opper. 2,098,009; Nov. 2.

Sheet and carbon separating apparatus, Bank statement. J. A. O'Neill. 2,098,158; Nov. 2.
Sheet feeding device. L. V. Dearing. 2,097,587; Nov. 2.
Sheet material, Apparatus for the manufacture of. E. Kinsella. 2,097,593; Nov. 2.
Shelf, Sliding. T. A. Sindelar. 2,098,198; Nov. 2.
Shield, Frost. W. F. Auger. 2,098,127; Nov. 2.
Shield, Painting. R. D. Holt. 2,098,005; Nov. 2.
Shipping case. L. G. Clark and M. A. Grogel. 2,097,433; Nov. 2.
Shoe. C. H. Daniels. 2,097,451; Nov. 2.
Shoe gore. R. T. Dawes. 2,097,810; Nov. 2.
Shoe-treating machine. F. Ricks and F. C. Choice. 2,097,574; Nov. 2.
Shoes, Machine for operating on. W. T. B. Roberts. 2,097,576; Nov. 2.
Shoes, Machine for operating upon the heel-portions of. F. L. Brandt. 2,097,558; Nov. 2.
Shoes, Making. C. A. Green. 2,098,142; Nov. 2.
Shoes, Manufacture of. H. R. Perry and C. S. Jennings. 2,097,799; Nov. 2.
Sign: *See*—
Portable sign. Road direction sign.
Sign and push button unit, Illuminated. C. L. Langlotz. 2,097,625; Nov. 2.
Signal for railroads, Light. O. S. Field. 2,097,785; Nov. 2.
Signal for switch stands, Reflector type. G. Gort. 2,097,552; Nov. 2.
Signal transmission system. J. C. Gabriel and G. Rodwin. 2,097,519; Nov. 2.
Signal unit, Light. E. W. Moore. 2,097,798; Nov. 2.
Signals, Apparatus for the control of highway crossing. H. S. Young. 2,097,827; Nov. 2.
Signaling, Railway. G. R. Pflasterer. 2,097,822; Nov. 2.
Signaling system, Continuous inductive coded cab. W. H. Hoppe. 2,098,041; Nov. 2.
Signaling system, Railway. W. H. Reichard. 2,097,843; Nov. 2.
Silica gel, Production of porous. J. and G. G. H. Malan. 2,097,634; Nov. 2.
Silk, Coloring acetate artificial. C. Shaw. 2,097,675; Nov. 2.
Siphon, Soda. D. C. Stewart. 2,098,169; Nov. 2.
Skate, Roller. R. Cledina. 2,097,721; Nov. 2.
Skin from fruits, Removing. R. B. Taylor. 2,097,479; Nov. 2.
Skylight. K. Oita. 2,097,738; Nov. 2.
Slack adjuster for air brakes. J. E. Redford. 2,097,533; Nov. 2.
Slate supporting clip. H. G. Bartsch. 2,097,715; Nov. 2.
Slicing machine construction. L. Ferenci. 2,097,875; Nov. 2.
Slug casting machine. R. Archer. 2,097,712; Nov. 2.
Smoking pipe. C. C. Cohee. 2,097,686; Nov. 2.
Snubber. W. C. Hedgcock and D. M. Light. 2,097,523; Nov. 2.
Soap, Purifying mahogany. M. Blumer. 2,097,440; Nov. 2.
Soldering implement. H. Goodchild. 2,097,974; Nov. 2.
Sole, Corrective. E. Ehrlich. 2,097,759; Nov. 2.
Sole for shoes, Insert. B. J. Silver. 2,097,476; Nov. 2.
Solenoid. W. A. Ray. 2,098,195–7; Nov. 2.
Sound, Photographic recording of. G. L. Dimmick. 2,097,657; Nov. 2.
Sound, Photographic recording of. E. W. Kellogg. 2,097,668; Nov. 2.
Sound, Recording and reproducing of. C. M. Burrill. 2,097,995; Nov. 2.
Sound, Reproduction of. G. L. Dimmick. 2,097,758; Nov. 2.
Spark plug. W. P. Innes, Jr. 2,097,460; Nov. 2.
Spindle, Spinning. G. H. Magrath. 2,097,797; Nov. 2.
Spotlight, Remotely controlled. R. E. Snyder. 2,097,537; Nov. 2.
Spout, Rubber oil can. C. M. Bailey. 2,098,128; Nov. 2.
Spring fastener. B. C. Place. 2,097,641; Nov. 2.
Spring unit. D. F. Sproul. 2,097,524; Nov. 2.
Spur retainer, Snap-on. W. J. Seyfarth. 2,098,017; Nov. 2.
Stabilizer for motor vehicles. E. E. Williams. 2,098,120; Nov. 2.
Stabilizing device for two-stroke free piston engines. G. J. P. J. J. Brun. 2,097,431; Nov. 2.
Stand for dobby looms, Spring. E. R. Holmes. 2,097,665; Nov. 2.
Stapling device. H. C. Stockel. 2,097,865; Nov. 2.

Wrench: *See*—
Reversible ratchet wrench.
Wringer. J. L. Perkins. 2,097,532; Nov. 2.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 2, 1937

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number=class, second number=subclass, third number=patent number

1— 3: 2,097,865

Mihalyi, Joseph, assignor to Eastman Kodak Company, Rochester, N. Y. Camera. 106,927; Nov. 9.
Miller, Thomas E., Nashville, Tenn. Safety device for pedestrians. 106,869; Nov. 9.
Minoff, Jack, Newark, N. J. Knitted fabric. 106,896; Nov. 9.
Minoff, Jack, Newark, N. J. Knitted fabric. 106,897; Nov. 9.
Moody, Morris R., assignor to The Troy Sunshade Company, Troy, Ohio. Chair or the like. 106,898; Nov. 9.
Morimura Bros. Inc. (See Buma, Yukio, assignor.)
Motor Wheel Corporation. (See Cotes, M. F., and Schneider, assignors.)
New England Lace Mills, Inc. (See Edson, Bert, assignor.)
Newmaker, Floyd H., Warren, Pa. Combined bureau and wardrobe. 106,899; Nov. 9.
Nuckols, Walter, Summit, N. J., assignor to Helena Rubinstein, Inc., New York, N. Y. Bottle. 106,900; Nov. 9.
Otter, William D. (See Hamilton, H. L., Dilworth, Blomberg, Otter, Knickerbocker, and Klein.)
Palmer, Carl R. (See Anderson, C. E., and Palmer.)
Pecker, Joseph S., Philadelphia, Pa., assignor to American Centrifugal Corporation, New York, N. Y. Scraper for centrifugal separating machines and analogous articles. 106,870; Nov. 9.
Pena, Howard, Chicago, Ill. Combined comb support and razor blade depository. 106,901; Nov. 9.
Perez, Thomas S., Berkeley, Calif. Flower vase holder. 106,902; Nov. 9.
Perfex Corporation. (See Hess, Clarence R. T., assignor.)
Pickands, Alexander B. (See Baumgardner, D., and Pickands.)
Poster, Sidney J., New York, N. Y. Dress. 106,948; Nov. 9.
Quaranto, Tellie, New York, N. Y. Dress. 106,903; Nov. 9.
Ramos, Candido M., Delano, Calif. Crib-fan. 106,904; Nov. 9.
Roberson, Willard D., assignor to Yale Fabrics Corp., New York, N. Y. Textile fabric or similar article. 106,905; Nov. 9.
Rosen, Sydelle, New York, N. Y. Scarf or similar article. 106,950; Nov. 9.
Rosen, Sydelle, New York, N. Y. Scarf or similar article. 106,951; Nov. 9.
Rosen, Sydelle, New York, N. Y. Scarf or similar article. 106,952; Nov. 9.
Rosen, Sydelle, New York, N. Y. Scarf or similar article. 106,953; Nov. 9.
Rosenblatt, Samuel, New York, N. Y. Coat. 106,949; Nov. 9.
Rosenthal, David, New York, N. Y. Dress. 106,928; Nov. 9.
Rosenthal, David, New York, N. Y. Dress. 106,929; Nov. 9.
Rubinstein, Helena, Inc. (See Nuckols, Walter, assignor.)
Rumely, Vincent P., assignor to Crane Co., Chicago, Ill. Handwheel. 106,930; Nov. 9.
Schneider, Walter C. (See Cotes, M. F., and Schneider.)
Sheindelman, Frank, New York, N. Y. Sweater. 106,931; Nov. 9.
Sholtz, Leo, New York, N. Y. Shoe or similar article. 106,932; Nov. 9.
Sholtz, Leo, New York, N. Y. Shoe or similar article. 106,933; Nov. 9.
Sholtz, Leo, New York, N. Y. Shoe or similar article. 106,934; Nov. 9.
Sholtz, Leo, New York, N. Y. Shoe or similar article. 106,935; Nov. 9.
Sobo, Leslie M., New York, N. Y. Knitted sweater. 106,937; Nov. 9.
Spangler, Carl D., Oklahoma City, Okla. Playground apparatus. 106,871; Nov. 9.
Spence, James E., assignor to Hazel-Atlas Glass Company, Wheeling, W. Va. Ashtray. 106,872; Nov. 9.
Stafford, S. S., Inc. (See Deppermann, William F., assignor.)
Stewart, Lemuel L., Chicago, Ill., assignor to The Adlake Company. Lighting fixture or similar article. 106,873; Nov. 9.
Stewart, Lemuel L., Chicago, Ill., assignor to The Adlake Company. Lighting fixture or similar article. 106,874; Nov. 9.
Stricker, Ethel E., New York, N. Y. Negligee. 106,936; Nov. 9.
Stricker, Ethel E., New York, N. Y. Negligee. 106,954; Nov. 9.
Troy Sunshade Company, The. (See Moody, Morris R., assignor.)
U. S. Bobbin & Shuttle Company. (See McGeough, William J., assignor.)
U. S. Expansion Bolt Company. (See Dellinger, Paul C., assignor.)
Van Doren, Harold, Toledo, Ohio, assignor to Ex-Cell-O Corporation. Machine tool base. 106,875; Nov. 9.
Vaughan, David A., Woodstock, N. Y. Aerial for automobiles. 106,938; Nov. 9.
Ward Products Corporation, The. (See Kopanski, Roman, assignor.)
Waterman, Waldo D., Santa Monica, Calif. Airplane. 106,939; Nov. 9.
Weisman, Harry, New York, N. Y. Gown pajama. 106,940; Nov. 9.
Wenett, Philip, New York, N. Y. Dress. 106,941; Nov. 9.
Yale Fabrics Corp. (See Roberson, Willard D., assignor.)
Yardley, Ralph O., Stockton, assignor to The Association of 20-30 Clubs, Sacramento, Calif. Badge. 106,876; Nov. 9.
Ziringer, Roscoe C., Pittsburgh, Pa. Advertising display band. 106,906; Nov. 9.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 9TH DAY OF NOVEMBER, 1937

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

A. B. T. Manufacturing Company. (See Slezak, Vincent F., assignor.)
Aerovox Corporation. (See Georgiev, Alexander, assignor.)
Affel, Herman A., Ridgewood, N. J., assignor to American Telephone and Telegraph Company. Maintenance of program transmission circuits. 2,098,329; Nov. 9.
Agfa Ansco Corporation. (See Schneider, W., and Wilmanns, assignors.)
Aguinek, Harry, assignor to S. Mishcon, doing business as Supreme Knitting Machine Co., Brooklyn, N. Y. Knitting machine. 2,098,446; Nov. 9.
Air Devices Corporation. (See Child, Lachlan W., assignor.)
Air Devices Corporation. (See Smith, Marshall A., Jr., assignor.)
Air-O-Cel Industries Inc. (See Reinke, Floyd C., assignor.)
Allen-Bradley Company. (See Bradley, H. L., and Haas, assignors.)
Allen, Clarence W., San Francisco, Calif. Lifeboat propelling mechanism. 2,098,606; Nov. 9.
Allen, Lowell C., and B. B. Doughty, Belleville, Ill. Cleaning and polishing composition. 2,098,607; Nov. 9.
Allis-Chalmers Manufacturing Company. (See Frudden, Conrad E., assignor.)
Allison, Leslie R., Forest Hills, assignor to The Union Switch & Signal Company, Swissvale, Pa. Control system. 2,098,819; Nov. 9.
Allmänna Svenska Elektriska Aktiebolaget. (See Hansson, Bror, assignor.)
Ambruster, Cornelius, Glenside, assignor to The Electric Storage Battery Company, Philadelphia, Pa. Storage battery. 2,098,908; Nov. 9.
American Can Company. (See Smith, William R., assignor.)
American Character Doll Co. (See Schaeffer, Edward G., assignor.)
American Engineering Company. (See Landenberger, Henry W., assignor.)
American Engineering Company. (See Myers, Charles L., assignor.)
American Fork & Hoe Company, The. (See Cowdery, Robert H., assignor.)
American Hoist and Derrick Company. (See Ljungkull, Rolf E., assignor.)
American Optical Company. (See Gagnon, Louis L., assignor.)
American Optical Company. (See Wrighton, William J., assignor.)
American Rayon Company. (See Furness, William H., assignor.)
American Seating Company. (See Leader, H. S., and Nordmark, assignors.)
American Smelting and Refining Company. (See Marble, Earl R., assignor.)
American Stay Company. (See Merrick, Frank W., assignor.)
American Steel Foundries. (See Hedgcock, William C., assignor.)
American Telephone and Telegraph Company. (See Affel, Herman A., assignor.)
American Telephone and Telegraph Company. (See Mitchell, Doren, assignor.)
American Thermos Bottle Company, The. (See Payson, Arthur H., assignor.)
American Thread Company, The. (See Baker, Dickerson G., assignor.)
Ammon, Charles D., Lincoln, Nebr. Automatic choking device. 2,098,479; Nov. 9.
Ammon, Charles D., Lincoln, Nebr. Grinder. 2,098,480; Nov. 9.
Amsler, Max, Biel, Switzerland. Dry safety razor. 2,098,849; Nov. 9.
Anderson, Samuel M., and R. T. Palmer, Sharon, assignors to B. F. Sturtevant Company, Inc., Boston, Mass. Air conditioning system utilizing refrigeration. 2,098,558; Nov. 9.
Anderson, William, Bromley, Ky., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Safety switch. 2,098,559; Nov. 9.
Anderson, Sven W. E., Evansville, Ind., assignor, by mesne assignments, to Servel, Inc., Dover, Del. Ice tray release mechanism. 2,098,850; Nov. 9.
Andres, Lloyd J., Chicago, Ill., assignor to Automatic Instrument Company, Grand Rapids, Mich. Robot phonograph. 2,098,216; Nov. 9.
Andrews, Anatol N., Los Angeles, Calif. Fountain pen valve. 2,098,528; Nov. 9.
Andrews, Champe S., North Chattanooga, Tenn. Sealed container. 2,098,818; Nov. 9.
Angier, Edward H., assignor to E. H. Angier, Framingham, Mass., as trustee. Box stay. 2,098,909; Nov. 9.
Angier, Edward H., trustee. (See Angier, Edward H., assignor.)
Appleford Paper Products Limited. (See Lawson, A. R., and Huffman, assignors.)
Applicator Products Corporation. (See Goltman, J. T., and Robbins, assignors.)
Arkell, Bartlett. (See Jarrier, René, assignor.)
Armour and Company. (See Mertz, Edwin T., assignor.)
Armstrong Cork Company. (See Tucker, William B., assignor.)
Armstrong, Edwin H., New York, N. Y. Radio transmitting system. 2,098,698; Nov. 9.
Armstrong, Frank H., assignor to Safety Mining Company, Chicago, Ill. Method and apparatus for charging blasting cartridges. 2,098,529; Nov. 9.
Arnold Print Works. (See de Goencz, D., and Tarnuzzer, assignors.)
Ash, Charles S., Birmingham, assignor, by mesne assignments, to The Kelsey-Hayes Wheel Company, Detroit, Mich. Vehicle wheel. 2,098,851; Nov. 9.
Ashton, Ralph. (See Riley, R. H. J., Ashton, and Livesey.)
Askania-Werke A. G., vormals Centralwerkstatt-Dessau und Carl Bamberg-Friedenau. (See Günther, Wolfgang, assignor.)
Associated Spring Corporation of Delaware. (See Cook, Raymond W., assignor.)
Athletic Shoe Company, The. (See Shapiro, Isadore, assignor.)
Atlas Powder Company. (See Bashford, Raymond I., assignor.)
Atwood Machine Company, The. (See Rowe, I. R., and Bradley, assignors.)
Aubert, Fred B., and J. Rossetti, Chicago, Ill., assignors to Super Sensitive Controls Corp. Electronic apparatus. 2,098,217; Nov. 9.
Autogas Corporation. (See Furlong, Francis A., assignor.)
Autogiro Company of America. (See de la Cierva, Juan, assignor.)
Autographic Register Company. (See Johnson, Arthur A., assignor.)
Automatic Instrument Company. (See Andres, Lloyd J., assignor.)
Awbrey, Samuel C., Kansas City, Mo. Dividing bar. 2,098,714; Nov. 9.
Awbrey, Samuel C., Kansas City, Mo. Toggery rack. 2,098,715; Nov. 9.
Ayers, Frank J., Piedmont, S. C. Flue oven cleaner. 2,098,898; Nov. 9.
Baash, Lawrence F., Los Angeles, Calif. Pipe handling tool. 2,098,369; Nov. 9.
Bailey, Charles M., Company. (See Sparrow, Arthur J., assignor.)
Bailey Meter Company. (See Dickey, Paul S., assignor.)
Bailey Meter Company. (See Gorrie, Harvard H., assignor.)
Bailey Meter Company. (See Weaver, Harry E., assignor.)
Baird, Frank C., Detroit, Mich. Brake control. 2,098,481; Nov. 9.
Baker, Dickerson G., Holyoke, Mass., assignor to The American Thread Company, New York, N. Y. Bobbin and producing the same. 2,098,218; Nov. 9.
Baker, Dickerson G., Holyoke, Mass., assignor to The American Thread Company, New York, N. Y. Making wound bobbins. 2,098,219; Nov. 9.
Bannon, Joseph F., and C. W. Bigler, Crafton, Pa. Automatic brake control. 2,098,736; Nov. 9.
Bares, Ovide, Sulphur, and R. I. Bares, Vinton, La. Device for orienting whipstocks. 2,098,271; Nov. 9.
Bares, Roy I. (See Bares, Ovide and R. I.)
Barnes, George L., Terre Haute, Ind. Block or slab molding means and method. 2,098,929; Nov. 9.
Barnes, J. Bailey. (See Elliott, Richard D., assignor.)
Barnes, John S., P. R. Guirl, and G. C. Johnson, assignors to W. F. & John Barnes Company, Rockford, Ill. Material working apparatus. 2,098,220; Nov. 9.
Barnes, W. F. & John, Company. (See Barnes, J. S., Guirl, and Johnson, assignors.)
Barnhart, Philip S., Westfield, assignor to Westfield River Paper Company, Russell, Mass. Cement or binder material. 2,098,221; Nov. 9.

Barnhart, Philip S., Westfield, assignor to Westfield River Paper Company, Russell, Mass. Making cement or bonding material. 2,098,222; Nov. 9.

Barnhart, Philip S., Westfield, assignor to Westfield River Paper Company, Russell, Mass. Laminated sheet of paper or like material. 2,098,223; Nov. 9.

Barrett, Edwin W., Barrington, assignor to Warren Textile and Machinery Supply Co., Warren, R. I. Warp stop motion for looms. 2,098,560; Nov. 9.

Barry, Robert E., et al. (See Mann, William B. W., assignor.)

Bartels, Hans, Berlin-Spandau, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Automatic control of amplification. 2,098,370; Nov. 9.

Bashford, Raymond L., Philadelphia, Pa., assignor to Atlas Powder Company, Wilmington, Del. Preventing the formation of sleet on mobile bodies. 2,098,482; Nov. 9.

Batsel, Cecil N., Haddonfield, N. J., assignor to Radio Corporation of America. Combined sound and picture apparatus. 2,098,699; Nov. 9.

Batsel, Cecil N., Haddon Heights, N. J., assignor to Radio Corporation of America. Combined sound and picture apparatus. 2,098,700; Nov. 9.

Battelle Memorial Institute, The. (See Sullivan, John D., assignor.)

Bartocchi, Silvio, Bronx, N. Y. Sharpening device. 2,098,530; Nov. 9.

Bax, Lionel D., Denver, Colo. Piston expander. 2,098,447; Nov. 9.

Bay State Optical Company. (See Nerney, George E., assignor.)

Bazé, William L., Paris, France. Stabilization of ships. 2,098,531; Nov. 9.

Beale, William F. (See Exline, M. P., and Beale.)

Becker, Oskar W., Hamburg, assignor to firm Naturin Gesellschaft mit beschränkter Haftung, Weinheim-B, Germany. Device for hardening structures produced from hide substance. 2,098,852; Nov. 9.

Bedford, Alda V., Collingswood, N. J., assignor to Radio Corporation of America. Printer. 2,098,371; Nov. 9.

Beers, George L., Collingswood, N. J., assignor to Radio Corporation of America. System for producing stereosonic effects. 2,098,561; Nov. 9.

Bell Telephone Laboratories, Incorporated. (See Carpenter, W. W., and Myers, assignors.)

Bell Telephone Laboratories, Incorporated. (See Garfield, Owen R., assignor.)

Bell Telephone Laboratories, Incorporated. (See Gent, Edgar W., assignor.)

Bell Telephone Laboratories, Incorporated. (See Hopkins, Harris F., assignor.)

Bell Telephone Laboratories, Incorporated. (See May, David T., assignor.)

Bell Telephone Laboratories, Incorporated. (See Mendenhall, Hallam E., assignor.)

Bell Telephone Laboratories, Incorporated. (See Rockwood, George H., Jr., assignor.)

Bell Telephone Laboratories, Incorporated. (See Treptow, Frederick W., assignor.)

Bell Telephone Laboratories, Incorporated. (See Wente, Edward C., assignor.)

Belloch, Morris, Brooklyn, N. Y. Brooch. 2,098,820; Nov. 9.

Benander, George B., Yalesville, Conn., assignor to General Electric Company. Connecter. 2,098,800; Nov. 9.

Bendix Aviation Corporation. (See La Brie, Ludger E., assignor.)

Bendix Aviation Corporation. (See Price, Harold W., and E. R., assignors.)

Bendix Brake Company. (See Carroll, Eugene G., assignor.)

Bendix Products Corporation. (See Goepfrich, Rudolph A., assignor.)

Bendix Products Corporation. (See Kliesrath, Victor W., assignor.)

Bendix Products Corporation. (See Miller, Richard B., assignor.)

Bendix Products Corporation. (See Tatter, John W., assignor.)

Benedek, Elek K., Bucyrus, Ohio. Hydraulic motor for rotary spindle machines. 2,098,213; Nov. 9.

Benedek, Elek K., Bucyrus, Ohio. Hydraulic motor for rotary spindle machines. 2,098,214; Nov. 9.

Benson, Simon, Chicago, Ill. Therapeutic apparatus. 2,098,272; Nov. 9.

Bergès, André, Lorp, France. Apparatus for the purification of miscellaneous liquid mixtures. 2,098,608; Nov. 9.

Best, Frank C., assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 2,098,224; Nov. 9.

Bigelow-Sanford Carpet Co. Inc. (See Cook, Jerome E., assignor.)

Bigler, Clarence W. (See Bannon, J. F., and Bigler.)

Billingsley, John A., Dayton, Ohio. Clothes drier. 2,098,853; Nov. 9.

Binder, Herbert E., Milwaukee, Wis. Coat and hat hook. 2,098,330; Nov. 9.

Bishop, Harry Z., Lyons, N. Y. Shovel with adjustable handle. 2,098,609; Nov. 9.

Black, William A., Montclair, N. J., assignor to United Research Corporation, Burbank, Calif. Film driving apparatus. 2,098,215; Nov. 9.

Blake, Eli J., deceased, Haddonfield, N. J., E. A. Blake, executrix. Remote control system. 2,098,910; Nov. 9.

Blake, Elsie A., executrix. (See Blake, Eli J.)

Blaney, William H., Dallas, Tex. Automobile theft preventer. 2,098,854; Nov. 9.

Bluhm, Charles E., Rochester, N. Y. Dental floss holder. 2,098,610; Nov. 9.

Blumlein, Alan D., West Ealing, London, assignor to Electric & Musical Industries, Limited, Blyth Road, Hayes, England. Sound-transmission, sound-recording, and sound-reproducing system. 2,098,372; Nov. 9.

Bogue, William, Chicago, Ill. Circuit control device. 2,098,771; Nov. 9.

Bonham, Byron D., Los Angeles, Calif. Plaster mixer. 2,098,483; Nov. 9.

Boone, Pearley, B., San Francisco, Calif. Switch plug connecter. 2,098,225; Nov. 9.

Borchert, William, assignor to The Tagit Company, Rochford, Ill. Tag package. 2,098,611; Nov. 9.

Bornfriend, Louis, Brooklyn, N. Y. Self-winding timepiece. 2,098,737; Nov. 9.

Bossler, Robert B. (See Brundred, W. J., Crowley, and Bossler.)

Bovay, Norman E., Naugatuck, Conn., assignor to United States Rubber Products, Inc., New York, N. Y. Rubber soled footwear. 2,098,412; Nov. 9.

Bowman, William J., Kitchener, Ontario, Canada. Automatic station selector for radio receivers. 2,098,331; Nov. 9.

Brackett, Fred M. (See Daneke, Dietrich, assignor.)

Bradley, Edward E. (See Rowe, I. R., and Bradley.)

Bradley, Harry L., and F. J. Haas, assignors to Allen-Bradley Company, Milwaukee, Wis. Rheostat. 2,098,273; Nov. 9.

Bramigk, Fritz W., Detroit, Mich. Complex compounds of cinchophen and its derivatives. 2,098,448; Nov. 9.

Brandjord, Iver M., Helena, Mont. House roof construction. 2,098,855; Nov. 9.

Breitenstein, Charles J. (See Nicolaus, F. G., and Breitenstein.)

Brewster, Oswald C., M. G. Paulus, and A. E. Thompson, Casper, Wyo., assignors to Standard Oil Company, Whiting, Ind. Continuous pressure distillation process. 2,098,772; Nov. 9.

Bridges, Joseph E., Independence, Mo. Meat tenderer. 2,098,856; Nov. 9.

Briggs & Stratton Corporation. (See Fitz Gerald, John W., assignor.)

Brodie, Ralph N., Company. (See Ward, H. E., and Brown, assignors.)

Bronson, Franklin F., Richmond, Va. Floating piston structure. 2,098,612; Nov. 9.

Bronson Reel Company. (See Schafer, John V., assignor.)

Broughton, Winn E. (See McLaughlin, G. E., and Broughton.)

Brouwer, Rodger D. (See Murden, W. T., and Brouwer.)

Brown, George H., Haddonfield, N. J., assignor to Radio Corporation of America. Antenna circuit modulation. 2,098,373; Nov. 9.

Brown Instrument Company, The. (See Harrison, Thomas R., assignor.)

Brown, Walter W. (See Ward, H. E., and Brown.)

Brown, William, assignor to McAdoo & Allen Welting Company, Quakertown, Pa. Goodyear welt. 2,098,911; Nov. 9.

Browning, John, assignor to J. M. & M. S. Browning Company, Ogden, Utah. Firearm. 2,098,562; Nov. 9.

Browning, J. M. & M. S., Company. (See Browning, John, assignor.)

Brubaker, Merlin M. (See Charch, W. H., Brubaker, and Meigs.)

Brundred Oil Corporation. (See Brundred, W. J., Crowley, and Bossler, assignors.)

Brundred, William J., W. E. Crowley, and R. B. Bossler, assignors to Brundred Oil Corporation, Oil City, Pa. Packer. 2,098,484; Nov. 9.

Bryan, William J., Jr. (See Thomas, Richard, assignor.)

Buckbee, John C., Los Angeles, Calif. Rotary pump. 2,098,652; Nov. 9.

Buckingham, Harold S., Bala-Cynwyd, assignor to Silver Seal Dairy Products Company, Philadelphia, Pa. Adhesive applying mechanism. 2,098,857; Nov. 9.

Budlong, Simeon, Chicago, Ill. Transmission mechanism. 2,098,716; Nov. 9.

Bukolt, Roman B., Stevens Point, Wis. Fire alarm-actuating means. 2,098,532; Nov. 9.

Bullock, Charles H., Evanston, Ill. Sink strainer bracket. 2,098,374; Nov. 9.

Bur, Arnold G. (See Krippner, P. G., Heins, and Bur.)

Burgess, C. F., Laboratories, Inc. (See Slidell, Kemper, assignor.)

Burgess, Henry A., Los Angeles, Calif., assignor of one-half to S. A. Morehouse. Automatic parachute. 2,098,613; Nov. 9.

Busson, James W., and G. C. Thompson, Los Angeles, Calif. Receptacle. 2,098,858; Nov. 9.

Caldwell, James A., San Antonio, Tex. Head bumper for animals. 2,098,614; Nov. 9.

Calkins, Raymond M., Deerfield, and J. W. Swank, Chicago, Ill. Building construction. 2,098,717; Nov. 9.

Calvert, William C. (See Winkelmann, H. A., and Calvert.)

Cambosco Scientific Company. (See Lewis, Ervin H., assignor.)

Cambridge Trust Company, executor. (See Troland, Leonard T.)

Caminez, Harold, and N. H. Gilman, Indianapolis, Ind., assignors to General Motors Corporation, Detroit, Mich. Supercharger mechanism for internal combustion engines. 2,098,718; Nov. 9.

Campbell, George, Aurora, Nebr. Attachment for lister planters. 2,098,738; Nov. 9.

Card, William C., Jr., Winthrop, assignor to Compo Shoe Machinery Corporation, Boston, Mass. Apparatus for making welt units. 2,098,563; Nov. 9.

Card, William C., Jr., Winthrop, Mass., assignor to Compo Shoe Machinery Corporation, New York, N. Y. Pressing shoes. 2,098,773; Nov. 9.

Carew, Herman, Easton, Pa., assignor, by mesne assignments, to Dixie-Vortex Company, Chicago, Ill. Treating paper. 2,098,533; Nov. 9.

Carey-McFall Co. (See Stuber, Walter J., assignor.)

Carlson, Eric, Chicago, Ill. Joist support. 2,098,485; Nov. 9.

Carpenter, Warren W., Garden City, and O. Myers, Brooklyn, assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 2,098,274; Nov. 9.

Carrier Corporation. (See Lewis, Leo L., assignor.)

Carroll, Eugene G., Los Angeles, Calif., assignor, by mesne assignments, to Bendix Brake Company, South Bend, Ind. Hydraulic brake apparatus. 2,098,653; Nov. 9.

Carrollton Metal Products Company, The. (See Pfefferkorn, F. F., and Stevens, assignors.)

Carter, Leslie F., and C. A. Frische, Leonia, N. J., assignors to Sperry Gyroscope Company, Inc., Brooklyn, N. Y. Magnetic directional gyroscope. 2,098,564; Nov. 9.

Carter, Wilbur A., Detroit, Mich. Load allocating device. 2,098,654; Nov. 9.

Cary, Beecher B., assignor to Hayes Industries, Inc., Jackson, Mich. Fan construction. 2,098,640; Nov. 9.

Cassen, Benedict, Detroit, Mich., assignor to Westinghouse X-Ray Company Inc. X-ray measuring system. 2,098,275; Nov. 9.

Celanese Corporation of America. (See Dreyfus, C., and Whitehead, assignors.)

Celanese Corporation of America. (See Riley, R. H. J., Ashton, and Livesey, assignors.)

Charch, William H., Buffalo, N. Y.; M. M. Brubaker, and F. M. Meigs, assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Moistureproof article. 2,098,534; Nov. 9.

Charch, William H., Buffalo, N. Y.; M. M. Brubaker, and F. M. Meigs, assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Moistureproof article. 2,098,535; Nov. 9.

Charch, William H., Buffalo, N. Y.; M. M. Brubaker, and F. M. Meigs, assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Moistureproof article. 2,098,536; Nov. 9.

Charch, William H., Buffalo, N. Y.; M. M. Brubaker, and F. M. Meigs, assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Moistureproof article. 2,098,537; Nov. 9.

Charch, William H., Buffalo, N. Y.; M. M. Brubaker, and F. M. Meigs, assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Moistureproof article. 2,098,538; Nov. 9.

Charch, William H., Buffalo, N. Y.; M. M. Brubaker, and F. M. Meigs, assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Moistureproof article. 2,098,539; Nov. 9.

Charch, William H., Buffalo, N. Y.; M. M. Brubaker, and F. M. Meigs, assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Moistureproof article. 2,098,540; Nov. 9.

Charch, William H., Buffalo, N. Y.; M. M. Brubaker, and F. M. Meigs, assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Moistureproof article. 2,098,541; Nov. 9.

Charch, William H., Buffalo, N. Y.; M. M. Brubaker, and F. M. Meigs, assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Moistureproof article. 2,098,542; Nov. 9.

Charter Automatic Starter Inc. (See Charter, James A., assignor.)

Charter, James A., assignor to Charter Automatic Starter Inc., Chicago, Ill. Engine starting apparatus. 2,098,226; Nov. 9.

Chauveau, Louis L. E., Paris, France, assignor to Compagnie Generale de Telegraphie Sans Fil. Telegraphy system with position indicators. 2,098,227; Nov. 9.

Chiason, Placid N., Griggsville, Ill. Combined felly, rim, and dual pneumatic tire structure. 2,098,859; Nov. 9.

Chicago Pneumatic Tool Company. (See Reed, Clarence E., assignor.)

Child, Lachlan W., South Bend, Ind., assignor, by mesne assignments, to Air Devices Corporation, Chicago, Ill. Space conditioner. 2,098,375; Nov. 9.

Chilton, Roland, Ridgewood, N. J., assignor, by mesne assignments, to The Reed Propeller Co., Inc., Garden City, N. Y. Engine cooling and cowling. 2,098,565; Nov. 9.

Chilton, Roland, Ridgewood, N. J., assignor, by mesne assignments, to The Reed Propeller Co., Inc., Garden City, N. Y. De-icing means for aircraft. 2,098,566; Nov. 9.

Chipman, John S., Easton, Pa., assignor to Chipman Knitting Mills. Manufacture of full-fashioned hosiery on flat knitting machines. 2,098,739; Nov. 9.

Chipman, John S., Easton, Pa., assignor to Chipman Knitting Mills. Knitting of inside-out hosiery. 2,098,740; Nov. 9.

Chipman Knitting Mills. (See Chipman, John S., assignor.)

Chittenden, Fayette D. (See Keen, A. W., and Chittenden.)

Christian, Manfred, Berlin-Reinickendorf, Germany. Air-cooled cylinder head. 2,098,741; Nov. 9.

Church, Walter L., Houston, Tex. Overshot. 2,098,332; Nov. 9.

Churchill, David C., Berea, Ky. Hand operated loom. 2,098,449; Nov. 9.

Citterio, Siro, and P. Vacchina, Turin, Italy. Railway signaling system and apparatus. 2,098,719; Nov. 9.

Clark, Harold W., assignor to The McCaskey Register Company, Alliance, Ohio. Cash register. 2,098,486; Nov. 9.

Clarke, Hans T., New York, and C. J. Malm, Rochester, N. Y., assignors, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Artificial silk. 2,098,228; Nov. 9.

Coffey, Samuel, M. Lapworth, and W. A. Sexton, Blackley, Manchester, England, assignors to Imperial Chemical Industries Limited. Azo dyes and their preparation. 2,098,276; Nov. 9.

Compagnie Generale de Telegraphie Sans Fil. (See Chauveau, Louis L. E., assignor.)

Compo Shoe Machinery Corporation. (See Card, William C., Jr., assignor.)

Comstock, George F., and V. V. Efimoff, Niagara Falls, assignors to The Titanium Alloy Manufacturing Company, New York, N. Y. Incorporating nitrogen in alloy steels. 2,098,567; Nov. 9.

Cone, Hayes, assignor to United Specialties Sales Corporation, New York, N. Y. Advertising device. 2,098,568; Nov. 9.

Conn, C. G., Ltd. (See Loomis, Allen, assignor.)

Connecticut Telephone and Electric Corporation. (See Curtiss, William R., assignor.)

Conticchio, Rocco, assignor of one-half to J. W. Guzzetta, Mount Vernon, N. Y. Rubber heel. 2,098,277; Nov. 9.

Continental Scale Corporation. (See Weber, M. J., and Vanderhoff, assignors.)

Cook, Calvin C. (See McCullough, N. M., and Cook.)

Cook, Jerome E., Larchmont, N. Y., assignor to Bigelow-Sanford Carpet Co. Inc., Thompsonville, Conn. Strip cutter. 2,098,641; Nov. 9.

Cook, Raymond W., assignor, by mesne assignments, to Associated Spring Corporation of Delaware, Bristol, Conn. Clasp. 2,098,821; Nov. 9.

Cooper, Edward, and T. C. Shiels, assignors to Elias Rogers Co. Limited, Toronto, Ontario, Canada. Spray nozzle. 2,098,487; Nov. 9.

Coupland, Richard C., U. S. Army, Norfolk, Va. Discharger for projectiles. 2,098,229; Nov. 9.

Coursey, Philip R., Surrey, England, and C. H. Marcus, New York, N. Y., assignors to Dubilier Condenser Corporation, New York, N. Y. Electrolytic condenser. 2,098,774; Nov. 9.

Cowdery, Robert H., Geneva, assignor to The American Fork & Hoe Company, Cleveland, Ohio. Shaft or rod for golf clubs or other sporting implements. 2,098,615; Nov. 9.

Cox, Anthony G., Honolulu, Hawaii. Ukulele. 2,098,701; Nov. 9.

Creech, Everette, Camden, Ohio. Harvester attachment for tractors. 2,098,860; Nov. 9.

Crewdson, Sarah M., assignor of one-third to R. H. Goodhart, Chicago, Ill. Operating seam cutter. 2,098,899; Nov. 9.

Crowley, William E. (See Brundred, W. J., Crowley, and Bossler.)

Cude, Agnes H., administratrix. (See Cude, Harold E.)

Cude, Harold E., deceased, A. H. Cude, Manchester, Conn., administratrix. Forming articles from paper. 2,098,642; Nov. 9.

Cunneen, James M., Jersey City, N. J., assignor to The Lubrication Corporation, Chicago, Ill. Chocking device for vehicle lifts. 2,098,376; Nov. 9.

Curley, Franklin C., Hamburg, N. Y. Bottle. 2,098,823; Nov. 9.

Curtis, Clement N., Weymouth, Mass. Fastener for closures. 2,098,569; Nov. 9.

Curtiss, William R., assignor to Connecticut Telephone and Electric Corporation, Meriden, Conn. Signal device. 2,098,742; Nov. 9.

Cutting, Richard H., Cleveland, Ohio. Drafting instrument. 2,098,616; Nov. 9.

Cutts, Richard M., Jr., Quantico, Va. Spreader tube. 2,098,617; Nov. 9.

Dahlen, Miles A., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Nitrogen containing organic compounds. 2,098,861; Nov. 9.

Dahlstrom, Roy, East Orange, and L. W. Ryan, Westfield, N. J., assignors, by mesne assignments, to National Lead Company, New York, N. Y. Manufacture of titanium pigments. 2,098,278; Nov. 9.

Dalton, Frederick C., Portland, Oreg. Fuel line clearing and vapor lock removing device. 2,098,720; Nov. 9.
Daneke, Dietrich, assignor to F. M. Brackett, Topeka, Kans. Stripping machine. 2,098,413; Nov. 9.
Davis, Ernest W., Oak Park, assignor, by mesne assignments, to Stewart-Warner Corporation, Chicago, Ill. Combined pump and reservoir for centralized lubricating systems. 2,098,570; Nov. 9.
Deere & Company. (See Strandlund, Carl G., assignor.)
De Goencz, Denis, and E. C. Tarnuzzer, assignors to Arnold Print Works, North Adams, Mass. Treating cellulosic materials. 2,098,775; Nov. 9.
De la Cierva, Juan, Madrid, Spain, assignor to Autogiro Company of America, Philadelphia, Pa. Aircraft with freely rotative wings. 2,098,230; Nov. 9.
De Lisle, Harold L., Two Rivers, Wis. Work equipment. 2,098,655; Nov. 9.
De Luxe Products Corporation, The. (See Hurn, James E., assignor.)
Demarest, Daniel D., Little Neck, N. Y. Resilient fastener. 2,098,721; Nov. 9.
De Mask, Martin J., Pittsfield, Mass. Electrical contact member for conduits. 2,098,414; Nov. 9.
De Pew, Chester C., Bloomfield, N. J., assignor to Wright Aeronautical Corporation. Link type dynamic damper. 2,098,571; Nov. 9.
Depovsek, Ludwig, Maspeth, N. Y. Interchangeable duplex roller unit. 2,098,722; Nov. 9.
Depue, Harry K., Somerton, Pa. Rake. 2,098,572; Nov. 9.
Detroit Lubricator Company. (See Dillman, Earnest J., assignor.)
Deutsch, Fritz A., Berlin, Germany, assignor to F. Liebhold, Brussels, Belgium. Fluid shock absorber. 2,098,415; Nov. 9.
Deutsch, Fritz A., Berlin, Germany, assignor to F. Liebhold, Brussels, Belgium. Hydraulic shock absorber. 2,098,416; Nov. 9.
Deutsche Gold- und Silber Scheideanstalt vormals Roessler. (See Walter, Hans, assignor.)
Devine, Julius, New York, N. Y. Spark plug. 2,098,934; Nov. 9.
Dicalite Company, The. (See Schmidt, Richard W., assignor.)
Dickey, Paul S., Cleveland, Ohio, assignor to Bailey Meter Company. Control system. 2,098,913; Nov. 9.
Dickinson, Albert, Company, The. (See Hendrickson, Adolph A., assignor.)
Dillman, Earnest J., assignor to Detroit Lubricator Company, Detroit, Mich. Control device for heating systems. 2,098,912; Nov. 9.
Dimmick, Glenn L. (See Reifsteck, C. N., and Dimmick.)
Dingle, Howard, Kurralta Park, assignor to "McMahons" Limited, Adelaide, Australia. Stapling machine. 2,098,573; Nov. 9.
Disston, Henry, & Son, Incorporated. (See Freas, Samuel T., assignor.)
Ditto, Incorporated. (See Hoskins, William, Jr., assignor.)
Dixie-Vortex Company. (See Carew, Herman, assignor.)
Dodge, Adiel Y., South Bend, Ind. Air-circulating equipment. 2,098,378; Nov. 9.
Dodge, Adiel Y., South Bend, Ind., assignor to The Lubrication Corporation, Chicago, Ill. Lubricating device and manufacture. 2,098,379; Nov. 9.
Dodge, Adiel Y., South Bend, Ind., and H. R. Tear, Evanston, Ill., assignors to The Lubrication Corporation, South Bend, Ind. Lubricating device. 2,098,377; Nov. 9.
Dole Valve Company, The. (See Lund, James K., assignor.)
Donaghy, Albert, Sr. (See Westin, C. J., and Donaghy.)
Donahue, John V., Anderson, Ind. Lock type shingle. 2,098,488; Nov. 9.
Dorman, Alfred, assignor to E. D. Jones & Sons Company, Pittsfield, Mass. Bandless Jordan plug. 2,098,279; Nov. 9.
Dornself, Hugo, Radevormwald, Germany. Spirometer. 2,098,280; Nov. 9.
Dostert, John H., Crookston, Minn. Machine for treating seed grain. 2,098,618; Nov. 9.
Doughty, Bryan B. (See Allen, L. C., and Doughty.)
Dowsett, Harry M., Winchmore Hill, London, and L. E. O. Walker, Maida Vale, London, England, assignors to Radio Corporation of America. Wireless direction finding system. 2,098,281; Nov. 9.
Doyle, Edgar D., assignor to Leeds and Northrup Company, Philadelphia, Pa. Electrical measuring system. 2,098,574; Nov. 9.
Draper Corporation. (See Webster, Samuel L., assignor.)
Dreyfus, Camille, New York, N. Y., and W. Whitehead, Cumberland, Md., assignors to Celanese Corporation of America. Treatment of textile material. 2,098,333; Nov. 9.
Dreyfus, Henry, London, England. Manufacture of aliphatic anhydrides. 2,098,334; Nov. 9.
Dreyfus, Henry, London, England. Manufacture of derivatives of polyhydroxy compounds. 2,098,335; Nov. 9.
Dreyfus, Henry, London, England. Manufacture of cellulose dervatives and products obtained therefrom. 2,098,336; Nov. 9.
Driggs, Frank H., Highland Park, Ill., assignor, by mesne assignments, to Westinghouse Electric and Manufacturing Company, East Pittsburgh, Pa. Clad metal body. 2,098,282; Nov. 9.
Dubilier Condenser Corporation. (See Coursey, P. R., and Marcus, assignors.)
Dufay-Chromex Limited. (See Threadgold, Stanley D., assignor.)
Du Mont, Allen B., assignor to Allen B. Du Mont Laboratories, Inc., Upper Montclair, N. J. Cathode ray device. 2,098,231; Nov. 9.
Du Mont, Allen B., Laboratories, Inc. (See Du Mont, Allen B., assignor.)
Du Pont, E. I., de Nemours & Company. (See Charch, W. H., Brubaker, and Meigs, assignors.)
Du Pont, E. I., de Nemours & Company. (See Dahlen, Miles A., assignor.)
Du Pont, E. I., de Nemours & Company. (See Fonda, J. S., and Filson, assignors.)
Du Pont, E. I., de Nemours & Company. (See Greenewalt, Crawford H., assignor.)
Du Pont, E. I., de Nemours & Company. (See Harmon, J., and Meigs, assignors.)
Du Pont, E. I., de Nemours & Company. (See Jennings, Alfred J., assignor.)
Du Pont, E. I., de Nemours & Company. (See Karns, George M., assignor.)
Du Pont, E. I., de Nemours & Company. (See Morgan, Russell, assignor.)
Du Pont, E. I., de Nemours & Company. (See Nickowitz, Max N., assignor.)
Du Pont, E. I., de Nemours & Company. (See Petrescu, Ovid S., assignor.)
Du Pont, E. I., de Nemours & Company. (See Read, B. K., Godard, and Hall, assignors.)
Du Pont, E. I., de Nemours & Company. (See Ressler, Ivan L., assignor.)
Eagle Pencil Company. (See Herstein, Karl M., assignor.)
Eastman Kodak Company. (See Clarke, H. T., and Maim, assignors.)
Eaton, Stanley. (See Ward, T. O., and Eaton.)
Eaton Manufacturing Company. (See Zeder, Henry H., assignor.)
Ebert, Erich. (See Ebert, Fritz and E.)
Ebert, Fritz and E., Koln-Vingst, Germany. Safety razor with resilient detachable support. 2,098,862; Nov. 9.
Edison, Thomas A., Incorporated. (See Somers, Richard M., assignor.)
Edwards, Harry D., Los Angeles, Calif. Cigarette extinguisher. 2,098,337; Nov. 9.
Edwards, William S., Hamden, assignor to Sargent & Company, New Haven, Conn. Bolt cushioning means for locks. 2,098,776; Nov. 9.
Efimoff, Vlatcheslav V. (See Comstock, G. F., and Efimoff.)
Ehrhardt, Alfred. (See Nawiasky, P., Ehrhardt, and Saftlen.)
Eldco Inc. (See Hokanson, Martin, assignor.)
Electric Auto-Lite Company, The. (See Schneider, William G., assignor.)
Electric & Musical Industries, Limited. (See Blumlein, Alan D., assignor.)
Electric Storage Battery Company, The. (See Ambruster, Cornelius, assignor.)
Electrolux Corporation. (See Stevens, Clarence E., assignor.)
Elliott, Richard D., assignor of one-third to J. H. Barnes, Anoskie, N. C. Combined cutter and advertising device. 2,098,863; Nov. 9.
Elmendorf, Armin, Chicago, Ill. Flexible board wood floor covering. 2,098,777; Nov. 9.
Emily, Anthony. (See Myers, O. T., and Emily.)
Engelmann, Alfred, and G. Wolf, assignors to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Gas discharge device. 2,098,380; Nov. 9.
Erben, Henry V., Philadelphia, Pa., assignor to General Electric Company. High voltage electric circuit interrupter. 2,098,801; Nov. 9.
Ericson, Philip E. G., assignor to The Howell Company, St. Charles, Ill. Chair. 2,098,743; Nov. 9.
Ern, Carl F., Jr., Solingen-Wald, Germany. Apparatus for polishing razors and other articles. 2,098,283; Nov. 9.
Evans Case Company. (See Reilly, Alfred F., assignor.)
Everhard, Harry H., Canton, Ohio. Hot water heater. 2,098,489; Nov. 9.
Excel Curtain Company. (See Levan, John F., assignor.)
Exline, Katherine M., et al. (See Exline, M. F., assignor, and Beale.)
Exline, Marcus F., and W. F. Beale, Dallas, Tex., assignors of one-third to D. J. Lyons, St. Louis, Mo., and said Exline assignor of one-third to K. M. Exline, Dallas, Tex. Display device. 2,098,450; Nov. 9.
Felgner, Rudolf. (See Küppenbender, H., Winzenburg, Felgner, Fischer, and Kaden.)
Fellows Gear Shaper Company, The. (See Miller, Edward W., assignor.)
Fidler, Harry E. (See Maker, D. L., and Fidler.)
Fife, Harvey R., Pittsburgh, Pa. Coating coal. 2,098,232; Nov. 9.
Filson, George W. (See Fonda, J. S., and Filson.)

Finch, William G. H., New York, N. Y. Telepicture synchronizing system. 2,098,802; Nov. 9.
Fine, Harry A., Flushing, assignor to I. B. Kleinert Rubber Company, New York, N. Y. Safety device. 2,098,381; Nov. 9.
Finnell, Charles S., El Paso, Tex. Cigarette. 2,098,619; Nov. 9.
Fischer, Erich, Bad Soden-on-Taunus, and R. Huss, Frankfort-on-the-Main, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Water-soluble azo-dyestuffs. 2,098,643; Nov. 9.
Fischer, Oscar. (See Küppenbender, H., Winzenburg, Felgner, Fischer, and Kaden.)
Fish, Percy C., Kalamazoo, Mich. Mold for manufacturing composite vitreous tile and concrete staves. 2,098,382; Nov. 9.
Fisher, Barney L., Oklahoma City, Okla. Game. 2,098,417; Nov. 9.
Fiske, Augustus H., Warren, assignor to Rumford Chemical Works, Rumford, R. I. Inhibitive compound. 2,098,744; Nov. 9.
Fitz Gerald, John W., assignor to Briggs & Stratton Corporation, Milwaukee, Wis. Engine starter. 2,098,866; Nov. 9.
Fitzpatrick, Walter G., Houston, and S. W. Webster, Dallas, Tex. Water-cooled brake drum. 2,098,490; Nov. 9.
Flamini, Francisco, Buenos Aires, Argentina. System for feeding fuels to internal combustion machines. 2,098,575; Nov. 9.
Fleetwings, Inc. (See Miller, Roy G., assignor.)
Florence-Wehrle Stove Co. (See Pickup, George E., assignor.)
Focht, Irvine J. (See Smith, W. E., and Focht.)
Fonda, John S., Kenmore, N. Y., and G. W. Filson, Richmond, Va., assignors, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Artificial thread treatment. 2,098,620; Nov. 9.
Foner, Newton F., Pittsburgh, Pa. Automatic machine for tie-plates. 2,098,576; Nov. 9.
Foner, Newton F., Pittsburgh, Pa. Tie-plate assembly. 2,098,935; Nov. 9.
Forster, Albert, Milanino, Italy. Spur gear. 2,098,864; Nov. 9.
Foster, Walter L., Whittier, and J. J. Santiago, assignors to J. Grant, Los Angeles, Calif. Rotary jar. 2,098,491; Nov. 9.
Foukal, Anthony, Cleveland, assignor to Truscon Steel Company, Youngstown, Ohio. Tunnel lining. 2,098,915; Nov. 9.
Francis, Raymond S., Rumford, R. I., assignor to United States Rubber Products, Inc., New York, N. Y. Apparatus for equalizing the tension of threads. 2,098,418; Nov. 9.
Frans, Erick. (See Mattson, A., Smith, and Frans.)
Fraser, James H., Louisville, Ky. Gate construction. 2,098,284; Nov. 9.
Freas, Samuel T., Trenton, N. J., assignor to Henry Disston & Sons, Incorporated, Tacony, Pa. Rotary file. 2,098,865; Nov. 9.
Freeport Sulphur Company. (See Peterson, Paul D., assignor.)
Frei, Max, assignor to firm Schweizerische Industrie-Gesellschaft, Neuhausen, Switzerland. Rail-guided vehicle. 2,098,723; Nov. 9.
Freund, Herman R., assignor to Intertype Corporation, Brooklyn, N. Y. Typographical matrix. 2,098,916; Nov. 9.
Frische, Carl A. (See Carter, L. F., and Frische.)
Frudden, Conrad E., Wauwatosa, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Pulley attachment for tractors. 2,098,492; Nov. 9.
Fry, Walter L., Bloomfield Hills, Mich. Slip cover. 2,098,684; Nov. 9.
Furlong, Francis A., assignor to Autogas Corporation, Chicago, Ill. Heating system. 2,098,383; Nov. 9.
Furness, William H., assignor to American Rayon Company, Inc., Riverton, N. J. Steering device for automobiles. 2,098,778; Nov. 9.
Gabrielson, Carl, and E. G. Moshier, assignors to L C Smith & Corona Typewriters Inc., Syracuse, N. Y. Typewriting machine. 2,098,285; Nov. 9.
Gagnon, Louis L., assignor to American Optical Company, Southbridge, Mass. Diagnostic instrument. 2,098,702; Nov. 9.
Garand, John C., Springfield, Mass., assignor to The Government of the United States of America, as represented by the Secretary of War. Cartridge clip for firearms. 2,098,234; Nov. 9.
Garfield, Owen R., Floral Park, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Transmission control in signaling systems. 2,098,286; Nov. 9.
Gearty William P., assignor to M. Smoler, Chicago, Ill. Trimming mechanism attachment. 2,098,493; Nov. 9.
General Aniline Works, Inc. (See Fischer, E., and Huss, assignors.)
General Aniline Works, Inc. (See Hopff, H., and Weickmann, assignors.)
General Aniline Works, Inc. (See Nawiasky, P., Ehrhardt, and Saftlen, assignors.)

General Motors Corporation. (See Newill, Edward B., assignor.)
General Motors Corporation. (See Paulus, Charles L., assignor.)
General Motors Corporation. (See Phillippi, D. M., and Wilson, assignors.)
General Motors Corporation. (See Reynolds, Harold A., assignor.)
General Motors Corporation. (See Sittler, Edwin C., assignor.)
General Steel Castings Corporation. (See Pflager, Harry M., assignor.)
Gent, Edgar W., Morristown, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. System of indicating distance. 2,098,287; Nov. 9.
Genung, George J. (See Parker, W. H., Seibert, and Genung.)
Georgiev, Alexander, Brooklyn, N. Y., assignor to Acrovox Corporation. Electrolytic condenser. 2,098,745; Nov. 9.
Gericke, Paul H., P. Herold, H. Kratz, and E. Vogt, Leuna, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Purification of aqueous liquids from phenols and other accompanying substances. 2,098,779; Nov. 9.
Gerling, Arthur A., New York, N. Y. Toy animal nose piece. 2,098,656; Nov. 9.
Gerrard Company, The. (See Rowe, Martin L., assignor.)
Geyer, Harvey D., Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich. Universal joint. 2,098,703; Nov. 9.
Giles, Norman S., Glen Iris, Australia. Extension table. 2,098,233; Nov. 9.
Gilkerson, Francis M., assignor of one-half to P. H. Gilkerson, St. Louis, Mo. Cushion shoe. 2,098,235; Nov. 9.
Gilkerson, Paul H. (See Gilkerson, Francis M., assignor.)
Gilman, Norman H. (See Caminez, H., and Gilman.)
Gilmore, Harry, Camden, N. J. Strengthening crank cases. 2,098,451; Nov. 9.
Gilmore, William L., Meadville, Pa., assignor to Hookless Fastener Company. Separable fastener. 2,098,338; Nov. 9.
Glison, Robert M., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling apparatus. 2,098,822; Nov. 9.
Glacy, Edward W., Bristol, Conn., assignor to General Motors Corporation, Detroit, Mich. Coaster brake and mounting. 2,098,704; Nov. 9.
Gleason, James M., assignor to M. B. Sachs, Chicago, Ill. Switch. 2,098,644; Nov. 9.
Glidden Company, The. (See White, Bernard S., assignor.)
Glisson, William B., Trenton, Tenn. Device for overcoming stuttering. 2,098,867; Nov. 9.
Godard, John S. (See Read, B. K., Godard, and Hall.)
Goepfrich, Rudolph A., assignor to Bendix Products Corporation, South Bend, Ind. Brake. 2,098,657; Nov. 9.
Golay, Marcel J. E., Oceanport, N. J. Television transmission system. 2,098,236; Nov. 9.
Gollnick, Leonard E., Vero Beach, Fla. Sump pump mounting. 2,098,621; Nov. 9.
Goltman, John T., Clinton, and J. W. Robbins, Davenport, assignors to Applicator Products Corporation, Clinton, Iowa. Syringe. 2,098,658; Nov. 9.
Goodhart, Robert H. (See Crewdson, Sarah M., assignor.)
Goodrich, Robert R., Camden, N. J., assignor to Radio Corporation of America. Protective system. 2,098,384; Nov. 9.
Gordon, Hiram, and A. C. Rogge, Columbus, Ohio, assignors to Perma Corporation, Chicago, Ill. Heel drilling fixture. 2,098,288; Nov. 9.

Göritz, Friedrich. (See Wiegand, K., and Göritz.)
Gorrie, Harvard H., Cleveland Heights, Ohio, assignor to Bailey Meter Company. Control system. 2,098,914; Nov. 9.
Gould, Edwin J., Oakland, assignor to C. G. Harvey, Alameda County, Calif. Power drive for motor vehicle axles. 2,098,845; Nov. 9.
Government of United States of America, as represented by the Secretary of War. (See Garand, John C., assignor.)
Graham-Paige Motors Corporation. (See Kishline, Floyd F., assignor.)
Grant, John. (See Foster, W. L., and Santiago, assignors.)
Grant, John. (See Santiago, James J., assignor.)
Grant, John, Los Angeles, Calif. Apparatus for cleaning wells. 2,098,494; Nov. 9.
Gray, Alvin E., Flushing, assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Accounting machine. 2,098,339; Nov. 9.
Gredell, Otto N., Kansas City, assignor to Standard Steel Works, North Kansas City, Mo. Tank. 2,098,577; Nov. 9.
Greenberg, Harry D., New York, N. Y., assignor to Industrial Hammer Development Corporation. Mechanical mallet. 2,098,495; Nov. 9.
Greenewalt, Crawford H., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Catalytic synthesis of amines. 2,098,289; Nov. 9.
Grimmond, Robert, Voorburg, The Hague, Netherlands. Door handle and like fastening. 2,098,868; Nov. 9.
Gronvold, George B., Seattle, Wash. Gynecological calculating device. 2,098,622; Nov. 9.
Guirl, Paul R. (See Barnes, J. S., Guirl, and Johnson.)
Günther, Wolfgang, Berlin-Friedenau, Germany, assignor to Askania-Werke A. G. vormals Centralwerkstatt-Dessau und Carl Bamberg-Friedenau. Optical instrument. 2,098,917; Nov. 9.
Guzzetta, John W. (See Conticchio, Rocco, assignor.)
Haas, Ferdinand J. (See Bradley, H. L., and Haas.)
Hailey, James, Tulsa, Okla. Full circle boom crane. 2,098,237; Nov. 9.
Hall, Fred W., Nutley, and N. R. Wilson, Belleville, assignors, by mesne assignments, to The Stamford Rubber Supply Company, Stamford, Conn. Reclaiming method. 2,098,385; Nov. 9.
Hall Laboratories, Inc. (See Partridge, Everett P., assignor.)
Hall, Wilfred N. (See Read, B. K., Godard, and Hall.)
Halpine, Charles G., United States Navy. Bitt-chock. 2,098,238; Nov. 9.
Hammerly, Herman J., New Britain, assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Safety switch. 2,098,578; Nov. 9.
Hammond, John, Jr. (See Purington, Ellison S., assignor.)
Handler, Arthur C., and M. H. Wansky, Akron, Ohio, said Wansky assignor to said Handler. Display holder. 2,098,543; Nov. 9.
Handley, Joseph D., Liverpool, England. Motor vehicle hoist. 2,098,419; Nov. 9.
Hanny, Charles E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Enclosed switch. 2,098,579; Nov. 9.
Hansell, Clarence W., Port Jefferson, Long Island, N. Y., assignor to Radio Corporation of America. Oscillation generator. 2,098,386; Nov. 9.
Hansson, Bror, Stockholm, assignor to Allmänna Svenska Elektriska Aktiebolaget, Vasteras, Sweden. Arrangement in condensers. 2,098,746; Nov. 9.
Hard, Merrill W., Los Angeles, Calif. Theater chair. 2,098,623; Nov. 9.
Harding, William G., North Acton, London, England, assignor to Sperry Gyroscope Company, Inc., Brooklyn, N. Y. Angular motion indicator. 2,098,580; Nov. 9.
Harmon, Jesse, and F. M. Meigs, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Artificial resins and making. 2,098,869; Nov. 9.
Harper, Philip S., Chicago, Ill. Gas burner. 2,098,659; Nov. 9.
Harris, Eugene E., Watervliet, N. Y., assignor to General Electric Company. Elastic fluid turbine arrangement. 2,098,803; Nov. 9.
Harrison, Ray F. (See Robinson, H. J., and Harrison.)
Harrison, Thomas R., Wyncote, assignor to The Brown Instrument Company, Philadelphia, Pa. Measuring apparatus. 2,098,685; Nov. 9.
Hartford-Empire Company. (See Honiss, William T., assignor.)
Harvel Corporation, The. (See Harvey, Mortimer T., assignor.)
Harvey, Cora G. (See Gould, Edwin J., assignor.)
Harvey, Mortimer T., East Orange, N. J., assignor to The Harvel Corporation. Destructively distilling cashew nut shell liquid. 2,098,824; Nov. 9.
Hass, Henry B., and G. E. Hinds, assignors to Purdue Research Foundation, West Lafayette, Ind. Synthesis of cyclopropane. 2,098,239; Nov. 9.
Hathaway, Chester A., Davenport, Iowa. Rotatable information finder. 2,098,933; Nov. 9.
Haub, George R., Zanesville, Ohio, assignor to Hazel-Atlas Glass Company, Wheeling, W. Va. Glass transfer mechanism. 2,098,624; Nov. 9.
Hawley, Jesse G., Painted Post, assignor to Hawley-Jones Corporation, Riverside, N. Y. Brake. 2,098,660; Nov. 9.
Hawley-Jones Corporation. (See Hawley, Jesse G., assignor.)
Hayes, Harvey C., Washington, D. C. Navigation of aircraft. 2,098,240; Nov. 9.
Hayes Industries, Inc. (See Cary, Beecher B., assignor.)
Hazel-Atlas Glass Company. (See Haub, George R., assignor.)
Hedgcock, William C., assignor to American Steel Foundries, Chicago, Ill. Truck. 2,098,661; Nov. 9.
Heffelfinger, Paul E. (See Jung, O. H., and Heffelfinger.)
Hegenberger, Albert F., and M. Isaacson, Dayton, Ohio. Compass. 2,098,241; Nov. 9.
Heil Co., The. (See Verloop, Hendrik N. F., assignor.)
Heine, Adolf, Berlin-Zehlendorf, assignor to Klangfilm G. m. b. H., Berlin, Germany. Film drive mechanism. 2,098,387; Nov. 9.
Heins, Rudolf J. (See Krippner, P. G., Heins, and Bur.)
Helmond, William F., West Hartford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 2,098,780; Nov. 9.
Heltzel, John N., Warren, Ohio. Road joint machine. 2,098,870; Nov. 9.
Hemphill Company. (See Lawson, John and R. H., assignors.)
Henahan, Joseph P., Cleveland, Ohio. Oral airway dam. 2,098,340; Nov. 9.
Hendrickson, Adolph A., Oak Park, assignor to The Albert Dickinson Company, Chicago, Ill. Bacteria culture and production thereof. 2,098,918; Nov. 9.
Henning, Warren K., Plano, Ill. Socket. 2,098,747; Nov. 9.
Herold, Paul. (See Gericke, P. H., Herold, Kratz, and Vogt.)
Herstein, Karl M., assignor to Eagle Pencil Company, New York, N. Y. Lead pencil manufacture. 2,098,452; Nov. 9.
Heywood-Wakefield Company. (See McDonald, Sterling B., assignor.)
Hill, James R., Battle Creek, Mich., assignor to Ralston Purina Company, St. Louis, Mo. Manufacture of shredded grain product. 2,098,544; Nov. 9.
Hills, Ernest E., assignor of one-third to A. J. Ihrke, Oshkosh, Wis. Bed supporting structure for trailers or automobiles. 2,098,825; Nov. 9.
Hinde and Dauch Paper Company, The. (See Walther, Edwin A., assignor.)
Hinds, George E. (See Hass, H. B., and Hinds.)
Hinkle, James C., and F. E. Scheider, Los Angeles, Calif., said Scheider assignor to said Hinkle. Sucker rod impulse and impact dampener. 2,098,290; Nov. 9.
Hirsch, Samuel, New York, N. Y. X-ray apparatus. 2,098,900; Nov. 9.
Hoe, R., & Co. (See Krahmer, Richard A., assignor.)
Hokanson, Martin, assignor to Eldeo Inc., Duluth, Minn. Refrigerator. 2,098,724; Nov. 9.
Holdsworth, Willie, Seekonk, Mass. Gill-drawing frame. 2,098,781; Nov. 9.
Holm, Jenus F., Alhambra, Calif. Combination clamp and gauge. 2,098,686; Nov. 9.
Holmes, Charles I., assignor of one-fourth to R. Sebring and one-fourth to E. W. Soper, Chino, Calif. Rural mail box. 2,098,242; Nov. 9.
Hommel, Ernest M. (See McQuiston, F. B., and Hommel.)
Hommel, O., Company, The. (See McQuiston, F. B., and Hommel, assignors.)
Honiss, William T., West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Controlling the temperature and condition of glass in a forehearth. 2,098,625; Nov. 9.
Hood, Charles E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoe beating machine. 2,098,243; Nov. 9.
Hood Rubber Company. (See Olson, Frederick F., assignor.)
Hookless Fastener Company. (See Gilmore, William L., assignor.)
Hookless Fastener Company. (See Sundback, Gideon, assignor.)
Hootz, Herbert, Berlin, Germany, assignor to General Electric Company. Control system. 2,098,804; Nov. 9.
Hopfensberger, Georg, Heidenheim-on-the-Brenz, Germany. Rotating machine. 2,098,244; Nov. 9.
Hopff, Heinrich, and A. Weickmann, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Azo dyestuffs. 2,098,782; Nov. 9.
Hopkins, Harris F., Bogota, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Sound translating apparatus. 2,098,291; Nov. 9.
Hopper, Basil, and K. Kingman, Palos Verdes Estates, assignors to Union Oil Company of California, Los Angeles, Calif. Filtering wax from oils. 2,098,545; Nov. 9.
Hornung, Ralph, Detroit, Mich. Door holder. 2,098,783; Nov. 9.
Hoskins, William, Jr., La Grange, assignor to Ditto, Incorporated, Chicago, Ill. Copying pad and preparing same. 2,098,662; Nov. 9.
Hough, Frederic A., Pasadena, Calif. Odorizing apparatus and method for gas lines. 2,098,626; Nov. 9.

Houseman, George A., Shreveport, La. Awning. 2,098,705; Nov. 9.
Howell Company, The. (See Ericson, Philip E. G., assignor.)
Hruska, Leo J., Merchantville, N. J., assignor to Radio Corporation of America. Deflectable antenna. 2,098,388; Nov. 9.
Huffman, Louis. (See Lawson, A. R., and Huffman.)
Hummel-Ross Fibre Corporation. (See Sale, John W., assignor.)
Huntington, Sidney O., Schenectady, N. Y., assignor to General Electric Company. Safety device. 2,098,805; Nov. 9.
Hurn, James E., Saugerties, N. Y., assignor to The De Luxe Products Corporation, La Porte, Ind. Oil filter. 2,098,725; Nov. 9.
Huss, Richard. (See Fischer, E., and Huss.)
Hutchison, J Howard, Enfield, Pa. Adjustable pipe sleeve with floor and ceiling plate. 2,098,389; Nov. 9.
Hygienic Tube & Container Company. (See Lermer, Herman B.)
Hygrade Sylvania Corporation. (See Zabel, Rolland M., assignor.)
Iams, Harley, East Orange, N. J., assignor to Radio Corporation of America. Television transmitting apparatus. 2,098,390; Nov. 9.
I. G. Farbenindustrie Aktiengesellschaft. (See Gericke, P. H., Herold, Kratz, and Vogt, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Reppe, W., and Ufer, assignors.)
Ihrke, Albert J. (See Hills, Ernest E., assignor.)
Imperial Chemical Industries Limited. (See Coffey, S., Lapworth, and Sexton, assignors.)
Industrial Hammer Development Corporation. (See Greenberg, Harry D., assignor.)
Ingalls, Gerry G., Newport, Minn. Brake operating mechanism. 2,098,546; Nov. 9.
International Business Machines Corporation. (See Gray, Alvin E., assignor.)
International Business Machines Corporation. (See Nichols, Harry J., assignor.)
International Business Machines Corporation. (See Page, Ralph E., assignor.)
International Business Machines Corporation. (See Reynolds, Lynus C., assignor.)
International Business Machines Corporation. (See Thompson, Russell G., assignor.)
International Mutoscope Reel Co. (See Traver, Harry G., assignor.)
International Patents Development Company. (See Jefferies, Frederick L., assignor.)
Intertype Corporation. (See Freund, Herman R., assignor.)
Irvin, Ward M., Battle Creek, Mich. Gasoline saver. 2,098,391; Nov. 9.
Isaacson, Max. (See Hegenberger, A. J., and Isaacson.)
Jackson, Edward B., Downers Grove, assignor to Stromberg Electric Company, Chicago, Ill. Time controlled system. 2,098,547; Nov. 9.
Jackson, Francis E., deceased, by M. E. Jackson, administratrix, Los Angeles, Calif. Holder for cable rings. 2,098,420; Nov. 9.
Jackson, Mildred E., administratrix. (See Jackson, Francis E.)
Jackson, Thomas G., Deptford, London, assignor to Molins Machine Company, Limited, London, England. Wrapping machine. 2,098,245; Nov. 9.
Jacobson, James H., Chicago, Ill. Expansion joint. 2,098,292; Nov. 9.
Janes, Leslie S., J. G. Raben, and J. Nielsen, assignors to Sears, Roebuck and Co., Chicago, Ill. Merchandise display table. 2,098,453; Nov. 9.
Jarrier, René, Saint-Quentin, France, assignor to B. Arkell, New York, N. Y. Automatic bag-filling and weighing machine. 2,098,246; Nov. 9.
Jarrier, René, Saint-Quentin, France, assignor to B. Arkell, New York, N. Y. Automatic bag-filling and weighing machine. 2,098,247; Nov. 9.
Jeanis, Eugene, Beaumont, Tex. Aerial shell. 2,098,627; Nov. 9.
Jefferies, Frederick L., La Grange, Ill., assignor to International Patents Development Company, Wilmington, Del. Dustless grits, and making same. 2,098,293; Nov. 9.
Jennings, Alfred J., Bridgeport, Conn., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Article of manufacture. 2,098,748; Nov. 9.
Johanson, Karl G., West Concord, Mass. Folding table. 2,098,826; Nov. 9.
Johnson, Arthur A., Bridgeport, Conn., assignor to Autographic Register Company, Hoboken, N. J. Manifolding machine. 2,098,496; Nov. 9.
Johnson, Austin C., and T. M. Wroble, Chicago, Ill. Watchman's time recorder. 2,098,497; Nov. 9.
Johnson, Ben F., Cambridge City, assignor to National Metal Products Co. Inc., Connersville, Ind. Handle mechanism. 2,098,421; Nov. 9.
Johnson, George C. (See Barnes, J. S., Guirl, and Johnson.)
Johnson, Matthey & Company. (See Powell, Alan R., assignor.)
Johnston, William J., assignor to A. S. Lashbrook, London, Ontario, Canada. Gauge for measuring the alignment of vehicle wheels. 2,098,749; Nov. 9.
Jones, Chester D., Carnegie, assignor to The Pittsburg Water Heater Corporation, Pittsburgh, Pa. Fluid heater. 2,098,498; Nov. 9.
Jones, David J., Elmhurst, Ill., assignor to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn. System of control for air circulating means. 2,098,806; Nov. 9.
Jones, E. D., & Sons Company. (See Dorman, Alfred, assignor.)
Jones, James P., East St. Louis, Ill. Automobile door lock operating means. 2,098,871; Nov. 9.
Jones, Samuel J., New York, N. Y. Coupling. 2,098,581; Nov. 9.
Jonker, Johan L. H., and K. M. Van Gessel, Eindhoven, Netherlands, assignors to Radio Corporation of America. Electrical discharge apparatus. 2,098,807; Nov. 9.
Juhasz, Andrew B., Norwalk, Conn. Liquid pasteurizing apparatus. 2,098,663; Nov. 9.
Jung, Oscar H., and P. E. Heffelfinger, assignors to Trico Fuse Mfg. Co., Milwaukee, Wis. Electrical fuse link. 2,098,664; Nov. 9.
Kaden, Kurt. (See Küppenbender, H., Winzenburg, Feigner, Fischer, and Kaden.)
Kälber, Albert, Pforzheim, Germany. Flashlight powder. 2,098,341; Nov. 9.
Kallus, Frederick, Hoboken, N. J. Treating lamps. 2,098,582; Nov. 9.
Kammerer, Ernst, Berlin-Tempelhof, assignor to Klangfilm G. m. b. H., Berlin, Germany. Sound transmitting system. 2,098,392; Nov. 9.
Karns, George M., Kenmore, N. Y., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Artificial thread and producing same. 2,098,628; Nov. 9.
Kauffman, Walter L., II, assignor to Lovell Manufacturing Company, Erie, Pa. Wringer. 2,098,919; Nov. 9.
Kauffman, Walter L., II, assignor to Lovell Manufacturing Company, Erie, Pa. Wringer. 2,098,920; Nov. 9.
Keefe, Lincoln M., Springfield, Mass. Master control unit. 2,098,248; Nov. 9.
Keen, Alexis W., Passaic, N. J., and F. D. Chittenden, Providence, R. I., assignors to United States Rubber Products, Inc., New York, N. Y. Constant tension control for elastic filaments. 2,098,422; Nov. 9.
Keillor, Joseph D., Aylmer, Ontario, Canada. Deodorizer. 2,098,294; Nov. 9.
Kelley, Isaac D., Jr., St. Louis, Mo. Compressed air gun. 2,098,454; Nov. 9.
Kelsey-Hayes Wheel Company, The. (See Ash, Charles S., assignor.)
Kennedy, Chester B., Junction City, Kans. Coupling device. 2,098,423; Nov. 9.
Kenyon, Elton R., Geneseo, Kans. Cultivator. 2,098,726; Nov. 9.
Keppler, Helmut. (See Orthner, L., and Keppler.)
Kettering, Charles F., and E. C. Sittler, Dayton, Ohio, assignors, by mesne assignments, to General Motors Corporation. Method of and apparatus for creating an artificial fever. 2,098,295; Nov. 9.
Kick, Louis J., Union City, N. J. Hose jack. 2,098,548; Nov. 9.
Kingman, Kenneth. (See Hopper, B., and Kingman.)
Kinsfather, George C., Inglewood, Calif. Centering guide for flush valves. 2,098,687; Nov. 9.
Kishline, Floyd F., assignor to Graham-Paige Motors Corporation, Detroit, Mich. Supercharger. 2,098,499; Nov. 9.
Kistner, Herman H., assignor to Kistner Lock and Appliance Company, Baltimore, Md. Universal bolt lock. 2,098,249; Nov. 9.
Kistner Lock and Appliance Company. (See Kistner, Herman H., assignor.)
Klangfilm G. m. b. H. (See Heine, Adolf, assignor.)
Klangfilm G. m. b. H. (See Kammerer, Ernst, assignor.)
Kleinert, I. B., Rubber Company. (See Fine, Harry A., assignor.)
Kleinsmith, John J., Cleveland, Ohio. Valve. 2,098,583; Nov. 9.
Klesrath, Victor W., assignor to Bendix Products Corporation, South Bend, Ind. Brake. 2,098,665; Nov. 9.
Klotz, Ernst, and E. Zepler, assignors to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Coupling arrangement. 2,098,393; Nov. 9.
Knight, James S., Chicago, Ill. Device for handling frozen material. 2,098,250; Nov. 9.
Knowlton, Archer E., Short Beach, Conn. Production of gas and combustion thereof. 2,098,629; Nov. 9.
Knutzen, Max T., Toronto, Ontario, Canada, assignor to Nordberg Manufacturing Company, Milwaukee, Wis. Hoist brake. 2,098,342; Nov. 9.
Koenigkramer, Frank and F., Cincinnati, Ohio. Treatment chair. 2,098,500; Nov. 9.
Koenigkramer, Frederick. (See Koenigkramer, Frank and F.)
Kolimbat, Peter, Portland, Oreg. Fuel equalizing manifold. 2,098,424; Nov. 9.
Krahmer, Richard A., Yonkers, assignor to R. Hoe & Co., Inc., New York, N. Y. Inking mechanism for rotary intaglio printing machines. 2,098,750; Nov. 9.
Kratz, Helmut. (See Gericke, P. H., Herold, Kratz, and Vogt.)

Krause, Herbert J., Huntington, and P. R. Simmons, Marion, assignors to Simmons Paper Products, Inc., Warsaw, Ind. Baking utensil. 2,098,784; Nov. 9.

Krippner, Philip G., R. J. Heins, and A. G. Bur, Green Bay, Wis. Electrically controlled counting mechanism. 2,098,872; Nov. 9.

Kroenig, Walter. (See Pier, M., Simon, and Koenig.)

Küppenbender, Heinz, W. Winzenburg, R. Felgner, O. Fischer, and K. Kaden, assignors to Zeiss Ikon Aktiengesellschaft, Dresden, Germany. Target practicing device. 2,098,873; Nov. 9.

La Brie, Ludger E., Detroit, Mich., assignor to Bendix Aviation Corporation, South Bend, Ind. Brake. 2,098,666; Nov. 9.

La Grasse, Benjamin A., Brooklyn, N. Y. Planetarium. 2,098,298; Nov. 9.

Lahti, Aimo J., Jyvaskyla, Finland. Lock mechanism for automatic guns. 2,098,727; Nov. 9.

Landenberger, Henry W., assignor to American Engineering Company, Philadelphia, Pa. Control mechanism for pumps. 2,098,425; Nov. 9.

Lane, Herbert G., assignor to Oxford Filing Supply Co., New York, N. Y. Recipe file. 2,098,394; Nov. 9.

Lanyon, Robert M., Los Angeles, Calif. Tire mold. 2,098,688; Nov. 9.

Lapworth, Morvan. (See Coffey, S. Lapworth, and Sexton.)

Lashbrook, Albert S. (See Johnston, William J., assignor.)

Lasier, David R., assignor to Norton-Lasier Company, Chicago, Ill. Door closing and checking device. 2,098,501; Nov. 9.

Lattner, Emert J., Cedar Rapids, Iowa. Fluid fuel burner. 2,098,455; Nov. 9.

Law, James A., Kensington, Victoria, Australia. Process of and apparatus for molding hollow rubber articles. 2,098,395; Nov. 9.

Lawson, Albert R., Hamilton, and L. Huffman, Toronto, assignors to Appleford Paper Products Limited, Hamilton, Ontario, Canada. Manifolding form. 2,098,706; Nov. 9.

Lawson, John and R. H., Pawtucket, assignors to Hemphill Company, Central Falls, R. I. Mechanism and process for effecting reverse plating by needle deflection. 2,098,297; Nov. 9.

Lawson, Robert H. (See Lawson, John and R. H.)

Lawton, Lon, Stevenson, Wash. Skeleton pole. 2,098,343; Nov. 9.

Leader, Hubert S., and H. P. Nordmark, assignors to American Seating Company, Grand Rapids, Mich. Seat back. 2,098,456; Nov. 9.

Le Boeuf, Hartford, Conn. Dispenser. 2,098,344; Nov. 9.

Leeds and Northrup Company. (See Doyle, Edgar D., assignor.)

Leeds & Northrup Company. (See Stein, Irving M., assignor.)

Lehner, Robert M., Lynn, Mass. Inner-sole. 2,098,502; Nov. 9.

Leighton, John W., Port Huron, Mich. Individual suspension. 2,098,874; Nov. 9.

Lentz, Lawrence E., assignor to Underwood Elliott Fisher Company, New York, N. Y. Control card. 2,098,345; Nov. 9.

Lerner, Herman B., Newark, N. J., assignor, by mesne assignments, to J. Lerner, H. B. Lerner, and I. S. Lerner, copartners, doing business as Hygienic Tube & Container Company. Container. 2,098,751; Nov. 9.

Lerner, Irving S., et al. (See Lerner, Herman B., assignor.)

Lerner, Joseph, et al. (See Lerner, Herman B., assignor.)

Levin, John F., assignor to Excel Curtain Company, Elkhart, Ind. Curtain fixture. 2,098,827; Nov. 9.

Leveque, Bernard T., Wenham, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoe sewing machine. 2,098,251; Nov. 9.

Leveque, Bernard T., Wenham, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoe sewing machine. 2,098,298; Nov. 9.

Lever Brothers Company. (See Mattill, H. A., and Olcott, assignors.)

Lewis, Ervin H., Boston, assignor to Cambosco Scientific Company, Waverley, Mass. Educational apparatus. 2,098,646; Nov. 9.

Lewis, Leo L., Plainfield, assignor, by mesne assignments, to Carrier Corporation, Newark, N. J. Air conditioning method and apparatus for passenger cars. 2,098,396; Nov. 9.

Liebhold, Francisco. (See Deutsch, Fritz A., assignor.)

Lincoln, Benjamin A., assignor to Universal Dental Company, Philadelphia, Pa. Interchangeable teeth. 2,098,584; Nov. 9.

Lindsley, Edward A., assignor to National Electric Screen Co., Chicago, Ill. Electrocuting trap. 2,098,647; Nov. 9.

Line Material Company. (See Schultz, William O., assignor.)

Link-Belt Company. (See Morehead, George L., assignor.)

Link-Belt Company. (See Sayers, W. W., and Watson, assignors.)

Livesey, Harold. (See Riley, R. H. J., Ashton, and Livesey.)

Ljungkull, Rolf E., assignor to American Hoist and Derrick Company, St. Paul, Minn. Crane. 2,098,299; Nov. 9.

Loftus, Fred H., Mount Lebanon, Pa. Reversing furnace control. 2,098,585; Nov. 9.

Loomis, Allen, assignor to C. G. Conn, Ltd., Elkhart, Ind. Musical instrument. 2,098,457; Nov. 9.

Lovell Manufacturing Company. (See Kauffman, Walter L., II, assignor.)

Lubrication Corporation, The. (See Cunneen, James M., assignor.)

Lubrication Corporation, The. (See Dodge, Adiel Y., assignor.)

Lubrication Corporation, The. (See Dodge, A. Y., and Tear, assignors.)

Lubrication Corporation, The. (See Watson, John A., assignor.)

Ludwick, Arthur H., Danville, Ill. Display rack. 2,098,828; Nov. 9.

Luke, George E., Syracuse, N. Y. Emergency alarm and motor starting system. 2,098,549; Nov. 9.

Lund, Arthur D., Minneapolis, Minn. Sizing machine for battery grid plates. 2,098,808; Nov. 9.

Lund, James K., assignor to The Dole Valve Company, Chicago, Ill. Thermostat controlled valve. 2,098,252; Nov. 9.

Luthy, Fredrick A., Jackson, Mich. Piston ring. 2,098,901; Nov. 9.

Luthy, Frederick A., Jackson, Mich. Piston ring. 2,098,902; Nov. 9.

Lyons, Daniel J., et al. (See Exline, M. P., and Beale, assignors.)

MacDonald, Robert D., Grosse Pointe Park, Mich. Shoe heel construction. 2,098,346; Nov. 9.

MacGregor, Roderick M., and D. G. Shipp, London, England, assignors, by mesne assignments, to The Union Switch & Signal Company, Swissvale, Pa. Electric control and indication of point operating mechanisms for railways and the like. 2,098,707; Nov. 9.

Machovec, Fred J., Monterey, Calif. Trailer brake apparatus. 2,098,458; Nov. 9.

MacKenzie, Wilbur L., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Channel cementing machine. 2,098,253; Nov. 9.

MacKenzie, Wilbur L., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Nozzle for shoe channel cementing machines. 2,098,347; Nov. 9.

Maker, Dewey L., and H. E. Fidler, assignors to General Motors Corporation, Detroit, Mich. Gear shift mechanism. 2,098,708; Nov. 9.

Mallory, Marion, Detroit, Mich. Internal combustion engine. 2,098,875; Nov. 9.

Malm, Carl J. (See Clarke, H. T., and Malm.)

Mandaville, Gurney L., Fort Pierce, Fla. Spectacle joint. 2,098,921; Nov. 9.

Mann, William B. W., Towson, Md., assignor of one-fourth to R. E. Barry and one-fourth to S. G. Nottingham, Washington, D. C. Dispensing receptacle. 2,098,550; Nov. 9.

Marble, Earl R., El Paso, Tex., assignor to American Smelting and Refining Company, New York, N. Y. Reverberatory furnace. 2,098,586; Nov. 9.

Marbon Corporation. (See Winkelmann, H. A., and Calvert, assignors.)

Marcus, Clifford H. (See Coursey, P. R., and Marcus.)

Markowitz, Jesse, New York, N. Y. Automatic operation of plurality of radio receivers. 2,098,587; Nov. 9.

Marshall, William R., Upper Darby, assignor to The Resinous Products & Chemical Company, Philadelphia, Pa. Incorporating metallic driers in drying oil alkydnitrocellulose blends. 2,098,503; Nov. 9.

Mason, Charles F. and H. C. L., Caversham, Reading, England. Handle adjustment for brooms and similar implements. 2,098,348; Nov. 9.

Mason, Hugh C. L. (See Mason, C. F.)

Masson, Emile, St. Maurice, France. Apparatus for automatically recording unusual or accidental occurrences. 2,098,689; Nov. 9.

Mathewson, Wilfred B., North Weymouth, assignor to United Mattress Machinery Company, Quincy, Mass. Tufting machine. 2,098,785; Nov. 9.

Mathewson, Wilfred B., North Weymouth, assignor to United Mattress Machinery Company, Inc., Quincy, Mass. Tufting button. 2,098,786; Nov. 9.

Mathieson Alkali Works, Inc., The. (See Munson, Horace D., assignor.)

Mattill, Henry A., and H. S. Olcott, Iowa City, Iowa, assignors to Lever Brothers Company. Method and material for retarding oxidation and rancidity in food substances. 2,098,254; Nov. 9.

Mattson, August, J. I. Smith, and E. Frans, Algona, Wash. Motor driven razor. 2,098,504; Nov. 9.

May, David T., Port Washington, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electric welding. 2,098,300; Nov. 9.

McAdoo & Allen Welting Company. (See Brown, William, assignor.)

McCabe, Ira E., Chicago, Ill. Electrical control. 2,098,397; Nov. 9.

McCann, Ronald A., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling. 2,098,829; Nov. 9.

McCaskey Register Company, The. (See Clark, Harold W., assignor.)

McCullough, Neel M., and C. C. Cook, assignors to Pierce Governor Company, Anderson, Ind. Governor. 2,098,505; Nov. 9.

McDonald, Sterling B., Chicago, Ill., assignor to Heywood-Wakefield Company, Gardner, Mass. Tray for recliner-back chairs. 2,098,426; Nov. 9.

McElgin, John, assignor to John J. Nesbitt, Inc., Philadelphia, Pa. Apparatus for the heating of air. 2,098,830; Nov. 9.

McGaha, William P., assignor of one-half to J. W. Sanders, Greenville, S. C. Self-aligning sand roller bearing. 2,098,630; Nov. 9.

McGowan, Kenneth J. J., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway switch operating apparatus. 2,098,831; Nov. 9.

McKnight, Edgar W., Bayonne, N. J., assignor to General Cable Corporation, New York, N. Y. Apparatus for making cable. 2,098,922; Nov. 9.

McLaughlin, George E., Salem, and W. E. Broughton, Peabody, Mass., assignors to The Turner Tanning Machinery Company, Portland, Maine. Buffing machine. 2,098,506; Nov. 9.

"McMahons" Limited. (See Dingle, Howard, assignor.)

McNeish, Arthur W., Detroit, Mich. Fabricating an automobile heater. 2,098,787; Nov. 9.

McPhee, Seth A., Denver, Colo. Key cutting machine. 2,098,728; Nov. 9.

McQuiston, Frederick B., Crafton, and E. M. Hommel, Pittsburgh, Pa., assignors to The O. Hommel Company. Stenciling apparatus. 2,098,588; Nov. 9.

McWhirter, John S., Southport, Conn. Car truck. 2,098,459; Nov. 9.

McWhirter, John S., Southport, Conn. Vehicle. 2,098,460; Nov. 9.

Megathlin, Ralph S., Wollaston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Attaching heels to shoes. 2,098,349; Nov. 9.

Meginniss, Francis R., Albany, N. Y. Flash lamp. 2,098,507; Nov. 9.

Meigs, Frederick M. (See Charch, W. H., Brubaker, and Meigs.)

Meigs, Frederick M. (See Harmon, J., and Meigs.)

Mendenhall, Hallam E., Summit, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Glow discharge device. 2,098,301; Nov. 9.

Menschner, Johannes, Rosswein, Germany. Web folding method and apparatus. 2,098,427; Nov. 9.

Mercier, Jean, Neuilly-sur-Seine, France. Shock absorber. 2,098,398; Nov. 9.

Merrick, Frank W., Boston, assignor to American Stay Company, East Boston, Mass. Loom picker. 2,098,589; Nov. 9.

Mertz, Edwin T., assignor to Armour and Company, Chicago, Ill. Preparing aminoacetic acid. 2,098,923; Nov. 9.

Metzger, Alfred R., White Bear Lake, Minn. Container. 2,098,690; Nov. 9.

Micallef, Arthur, Cranston, R. I. Catch for use in detachably securing the ends of bracelets, chains, and other articles together. 2,098,461; Nov. 9.

Milk Processes, Inc. (See Sharpless, Caspar P., assignor.)

Miller, Edward W., assignor to The Fellows Gear Shaper Company, Springfield, Vt. Machine for generating throated gear elements. 2,098,428; Nov. 9.

Miller, Fred M., Bala-Cynwyd, Pa. Drip point grid tile. 2,098,667; Nov. 9.

Miller, Richard B., Brooklyn, N. Y., assignor to Bendix Products Corporation, South Bend, Ind. Vehicle wheel. 2,098,668; Nov. 9.

Miller, Roy G., Langhorne, assignor to Fleetwings, Inc., Bristol, Pa. Structural section for aircraft. 2,098,752; Nov. 9.

Miller, Samuel P., Chicago, Ill. Self regulated heat transfer system. 2,098,462; Nov. 9.

Mills, Bert E., Oak Park, assignor to Mills Novelty Company, Chicago, Ill. Ball control mechanism for pinball games. 2,098,648; Nov. 9.

Mills Novelty Company. (See Mills, Bert E., assignor.)

Minneapolis-Honeywell Regulator Company. (See Jones, David J., assignor.)

Mishcon, Samuel. See Aguinek, Harry, assignor.)

Mitchell, Doren, Bound Brook, N. J., assignor to American Telephone and Telegraph Company. Control of signaling circuits. 2,098,350; Nov. 9.

Moffitt, Walter S., Warwick, R. I. Pipe union. 2,098,669; Nov. 9.

Molins Machine Company. (See Jackson, Thomas G., assignor.)

Moloney, Raymond T. (See Nicolaus, F. G., and Breitenstein, assignors.)

Moloney, Raymond T., Chicago, Ill. Ticket severing means. 2,098,351; Nov. 9.

Moore, Edmund L., Springfield, Mass. Cardboard box. 2,098,508; Nov. 9.

Morehead, George L., Philadelphia, Pa., assignor to Link-Belt Company, Chicago, Ill. Sludge collector. 2,098,463; Nov. 9.

Morehouse, Silas A. (See Burgess, Henry A., assignor.)

Morgan, John R., Oak Park, assignor to Sears, Roebuck and Co., Chicago, Ill. Handlebar grip. 2,098,509; Nov. 9.

Morgan, John R., Oak Park, assignor to Sears, Roebuck and Co., Chicago, Ill. Wheel and chain guard for bicycles. 2,098,510; Nov. 9.

Morgan, Russell, Drexel Hill, Pa., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Leather substitute. 2,098,788; Nov. 9.

Morgan, Russell, Drexel Hill, Pa., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Leather substitute. 2,098,789; Nov. 9.

Morris, Joseph C., Chicago, Ill. Combination clock and calendar. 2,098,302; Nov. 9.

Morrison, Willard L., Lake Forrest, Ill. Air deflecting device. 2,098,255; Nov. 9.

Morron, John D., Detroit, Mich., assignor to United States Rubber Products, Inc., New York, N. Y. Rubber compound. 2,098,429; Nov. 9.

Moses, Charles, New York, N. Y. Knitting fabric. 2,098,303; Nov. 9.

Moshier, Edson G. (See Gabrielson, C., and Moshier.)

Mosler Safe Company, The. (See Robinson, H. J., and Harrison, assignors.)

Mulch, Balthazar H. T., Westwood, N. J. Apparatus for producing individual masses of ice. 2,098,753; Nov. 9.

Müller, Eduard, assignor to Rheinmetall-Borsig Aktiengesellschaft, Dusseldorf, Germany. Guns having means for horizon-adjustment. 2,098,352; Nov. 9.

Munson, Horace D., Niagara Falls, assignor to The Mathieson Alkali Works, Inc., New York, N. Y. Chemical manufacture. 2,098,399; Nov. 9.

Murden, William T., and R. D. Brouwer, Bristol, Conn., assignors to General Motors Corporation, Detroit, Mich. Antifriction bearing. 2,098,709; Nov. 9.

Murphy, Harold J., et al. (See Simning, Roy B., assignor.)

Musser, Clarence W., Kansas City, Mo. Racing amusement device. 2,098,809; Nov. 9.

Myers, Charles L., Overbrook, assignor to American Engineering Company, Philadelphia, Pa. Furnace wall. 2,098,430; Nov. 9.

Myers, Oren T., De Soto, and A. Emily, Richwoods, Mo. Oven. 2,098,729; Nov. 9.

Myers, Oscar. (See Carpenter, W. W., and Myers.)

Nakich, Louis G., Kansas City, Mo. Swivel connecter. 2,098,304; Nov. 9.

Naupa, Sulo M., Detroit, Mich., assignor to The Worth Company. Hoisting device. 2,098,511; Nov. 9.

Nash, John M., Lakeland, Fla. Hydraulic power plant. 2,098,876; Nov. 9.

Nash-Kelvinator Corporation. (See Philipp, Lawrence A., assignor.)

National Aniline and Chemical Company. (See Thornton, Irving T., assignor.)

National Battery Company. (See Young, John W., assignor.)

National Electric Screen Co. (See Lindsley, Edward A., assignor.)

National Lead Company. (See Dahlstrom, R., and Ryan, assignors.)

National Metal Products Co. Inc. (See Johnson, Ben F., assignor.)

National Sugar Refining Company of New Jersey, The. (See Whymper, Robert, assignor.)

Naturin Gesellschaft mit beschränkter Haftung. (See Becker, Oskar W., assignor.)

Nawiasky, Paul, A. Ehrhardt, and K. Saftien, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Vat dyestuffs of the anthraquinone series. 2,098,590; Nov. 9.

Neff, Paul W., Cincinnati, Ohio. Transmission. 2,098,691; Nov. 9.

Nerney, George E., assignor to Bay State Optical Company, Attleboro, Mass. Eyeglass construction. 2,098,512; Nov. 9.

Nerney, George E., assignor to Bay State Optical Company, Attleboro, Mass. Eyeglass construction. 2,098,513; Nov. 9.

Nesbitt, John J., Inc. (See McElgin, John, assignor.)

Neuman, Jacob J., Jamaica, N. Y. Automatic control. 2,098,591; Nov. 9.

Neville Company, The. (See Rivkin, Joseph, assignor.)

Newill, Edward B., assignor to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus 2,098,924; Nov. 9.

Newton, Robert S., Watertown, assignor to The New York Air Brake Company, New York, N. Y. Making piston rings. 2,098,790; Nov. 9.

New York Air Brake Company, The. (See Newton, Robert S., assignor.)

New York Air Brake Company, The. (See Safford, Lewis A., assignor.)

Nichols, Harry J., Binghamton, assignor to International Business Machines Corporation, New York, N. Y. Communication system. 2,098,305; Nov. 9.

Nickowitz, Max N., Bridgeport, Conn., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Auto top material. 2,098,754; Nov. 9.

Nicolaus, Frank G., and C. J. Breitenstein, assignors to R. T. Moloney, Chicago, Ill. Selector. 2,098,353; Nov. 9.

Nielsen, John. (See Janes, L. S., Raben, and Nielsen.)

Niles-Bement-Pond Company. (See Rusnak, John M., assignor.)

Nord, Walter G., Amherst, Ohio, assignor, by mesne assignments, to Stewart-Warner Corporation, Chicago, Ill. Coupling for lubricators. 2,098,514; Nov. 9.
Nordberg Manufacturing Company. (See Knutzen, Max T., assignor.)
Nordmark, Henry P. (See Leader, H. S., and Nordmark.)
Norton Company. (See Stubbs, Everard, assignor.)
Norton-Lasier Company. (See Lasier, David R., assignor.)
Nottingham, Summerfield G., et al. (See Mann, William B. W., assignor.)
Oehmichen, Etienne E., Valentigney, France. Stabilizing device for aerial navigation machines. 2,098,877; Nov. 9.
Olcott, Harold S. (See Mattill, H. A., and Olcott.)
Olson, Frederick F., Belmont, assignor to Hood Rubber Company, Inc., Watertown, Mass. Making footwear. 2,098,354; Nov. 9.
Orthner, Ludwig, Leverkusen, I. G. Werk, and H. Keppler, Leverkusen-Schlebusch, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Reaction product of an ester-like wax and a base. 2,098,551; Nov. 9.
Osman, Ralph T., Milwaukee, Wis. Dump body. 2,098,670; Nov. 9.
Otis Elevator Company. (See Pinto, Anthony, assignor.)
Owens-Illinois Glass Company. (See Soubier, Leonard D., assignor.)
Owens-Illinois Glass Company. (See Tassick, John A., assignor.)
Oxford Filing Supply Co. (See Lane, Herbert G., assignor.)
Pace Manufacturing Company. (See Williams, Homer S., assignor.)
Packard Motor Car Company. (See Best, Frank C., assignor.)
Packard Motor Car Company. (See Van Ranst, Cornelius W., assignor.)
Page, Ralph E., Binghamton, assignor to International Business Machines Corporation, New York, N. Y. Record controlled machine. 2,098,355; Nov. 9.
Paget, Win W., Michigan City, Ind., assignor to Sullivan Machinery Company. Heat exchange device. 2,098,671; Nov. 9.
Palmer, Robert T. (See Anderson, S. M., and Palmer.)
Paper Service Company, The. (See Rowe, William W., assignor.)
Pardieck, Frank J., Indianapolis, Ind. Valve handle. 2,098,515; Nov. 9.
Parissi, Anthony J., Cohoes, N. Y. Electric lighting fixture. 2,098,631; Nov. 9.
Parker, Arthur H. (See Sebell, Harry, assignor.)
Parker, Arthur L., Cleveland, Ohio. Preventing contact seizure of metal parts. 2,098,256; Nov. 9.
Parker, Walter H., Pittsburgh, N. J. Seibert, Wilkinsburg, and G. J. Genung, assignors to Pittsburgh Equitable Meter Company, Pittsburgh, Pa. Register setback crank. 2,098,730; Nov. 9.
Parks, Lee N., Caro, Mich. Dust bag for vacuum cleaners. 2,098,632; Nov. 9.
Partridge, Everett P., Brookside Farms, Bethel Township, assignor to Hall Laboratories, Inc., Pittsburgh, Pa. Water treating composition. 2,098,431; Nov. 9.
Paulus, Charles L., assignor to General Motors Corporation, Dayton, Ohio. Transmission belt and joint therefor. 2,098,755; Nov. 9.
Paulus, Max G. (See Brewster, O. C., Paulus, and Thompson.)
Payne, William H., La Grange, Ill. Automatic electric arc furnace electrode control. 2,098,672; Nov. 9.
Payson, Arthur H., assignor to The American Thermos Bottle Company, Norwich, Conn. Saltcellar. 2,098,832; Nov. 9.
Penn Metal Company. (See Spinosa, Arthur V., assignor.)
Perazzoli, Henry J., assignor to Railway Trackwork Company, Philadelphia, Pa. Rail lubricator. 2,098,791; Nov. 9.
Perkins, Granville A., and W. J. Toussaint, Charleston, W. Va., assignors, by mesne assignments, to Union Carbide and Carbon Corporation. Preparation of dimethylfurane. 2,098,592; Nov. 9.
Perma Corporation. (See Gordon, H., and Rogge, assignors.)
Permutit Company, The. (See Staegemann, Eugene, assignor.)
Peter, Leslie H., London, England, assignor, by mesne assignments, to The Union Switch & Signal Company, Swissvale, Pa. Track circuit signaling system for railways and the like. 2,098,833; Nov. 9.
Peters, Charles C., State College, Pa. Variable spacing mechanism for typewriting machines. 2,098,878; Nov. 9.
Petersen, Martin J., Canyon, Minn. Agricultural implement. 2,098,552; Nov. 9.
Peterson, Henry J., Webster City, Iowa. Clothespin or like article. 2,098,834; Nov. 9.
Peterson, Paul D., Newark, Del., assignor to Freeport Sulphur Company, New York, N. Y. Fungicidal and insecticidal compositions. 2,098,257; Nov. 9.
Petresen, Ovid S., Nashville, Tenn., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Apparatus for the production of artificial thread. 2,098,633; Nov. 9.
Petroleum Processes Corporation, The. (See Tears, Claude F., assignor.)
Pfefferkorn, Frederick F., and C. A. Stevens, Carrollton, Ohio, assignors to The Carrollton Metal Products Company. Combination food container. 2,098,356; Nov. 9.
Pflager, Harry M., St. Louis, Mo., assignor to General Steel Castings Corporation, Granite City, Ill. Railway car construction. 2,098,516; Nov. 9.
Pflager, Harry M., St. Louis, Mo., assignor to General Steel Castings Corporation, Granite City, Ill. Railway truck structure. 2,098,517; Nov. 9.
Phillipp, Lawrence A., assignor, by mesne assignments, to Nash-Kelvinator Corporation, Detroit, Mich. Refrigerating apparatus. 2,098,731; Nov. 9.
Phillippi, Dale M., and J. E. Wilson, Dayton, Ohio, assignors to General Motors Corporation, Detroit, Mich. Making colloidal lead. 2,098,710; Nov. 9.
Pickup, George E., assignor, by mesne assignments, to Florence-Wehrle Stove Co., Newark, Ohio. Kitchen range. 2,098,464; Nov. 9.
Pieper, Alphonse F., et al. (See Saffir, Jacob A., assignor.)
Pieper, Oscar H., et al. (See Saffir, Jacob A., assignor.)
Pier, Mathias, Heidelberg, and W. Simon and W. Kroenig, Ludwigshafen-on-the-Rhine, Germany, assignors to Standard-I. G. Company, Linden, N. J. Hydrogenating distillable carbonaceous materials. 2,098,400; Nov. 9.
Pierce Governor Company. (See McCullough, N. M., and Cook, assignors.)
Pierce, Selda K., Brookline, Mass. Divided skirt. 2,098,810; Nov. 9.
Pinto, Anthony, New Rochelle, assignor to Otis Elevator Company, New York, N. Y. Control system for elevators. 2,098,792; Nov. 9.
Pinto, Anthony, New Rochelle, assignor to Otis Elevator Company, New York, N. Y. Alternating current motor control. 2,098,793; Nov. 9.
Piroumoff, George S., New York, N. Y. Delivery vehicle chassis. 2,098,357; Nov. 9.
Pittman, Ralph R., and C. H. Walsh, Pine Bluff, Ark. High voltage switching device. 2,098,692; Nov. 9.
Pittsburg Water Heater Corporation, The. (See Jones, Chester D., assignor.)
Pittsburgh Equitable Meter Company. (See Parker, W. H., Seibert, and Genung, assignors.)
Pivoto, Felix L., Liberty, Tex. Wire line swivel. 2,098,518; Nov. 9.
Plebanski, Jozef, Warsaw, Poland, assignor to Radio Patents Corporation, New York, N. Y. Directive wireless system. 2,098,756; Nov. 9.
Plebanski, Jozef, Warsaw, Poland, assignor to Radio Patents Corporation, New York, N. Y. Electric circuit. 2,098,757; Nov. 9.
Poirette Corsets, Inc. (See Robbins, Philip H., assignor.)
Polillo, Joseph, Ridgefield, Wash. Combination safety razor and sharpener. 2,098,465; Nov. 9.
Pollock, James C., Lansdale, Pa. Surgical basin. 2,098,673; Nov. 9.
Porter, Joseph S., New Haven, assignor to D. & H. Scovil, Incorporated, Higganum, Conn. Apparatus for applying abrasive to polishing wheels, belts, or the like. 2,098,306; Nov. 9.
Powell, Alan R., London, assignor to Johnson, Matthey & Company, Limited, Hatton Garden, London County, England. Alloy for dental plates. 2,098,379; Nov. 9.
Prather, Thomas F., Wasco, Calif. Dental apparatus. 2,098,732; Nov. 9.
Prescott, Charles W. W., Pymble, Australia. Automatic railroad signaling and control system. 2,098,401; Nov. 9.
Price, Earl R. (See Price, Harold W., and E. R.)
Price, Harold W. and E. R., assignors to Bendix Aviation Corporation, South Bend, Ind. Clutch control mechanism. 2,098,674; Nov. 9.
Procunier, Harry G., assignor to Procunier Safety Chuck Company, Chicago, Ill. Tool-holding chuck and collet therefor. 2,098,675; Nov. 9.
Procunier Safety Chuck Company. (See Procunier, Harry G., assignor.)
Pulfrich, Hans, Berlin-Wilmersdorf, Germany, assignor to General Electric Company. Composite body. 2,098,811; Nov. 9.
Pulfrich, Hans, Berlin-Wilmersdorf, Germany, assignor to General Electric Company. Ceramic material. 2,098,812; Nov. 9.
Purdue Research Foundation. (See Hass, H. B., and Hinds, assignors.)
Purington, Ellison S., Gloucester, Mass., assignor to J. H. Hammond, Jr. Single side band transmission. 2,098,307; Nov. 9.
Pym, Arthur F., Swampscott, Mass., assignor to United States Shoe Machinery Corporation, Paterson, N. J. Lasting machine. 2,098,358; Nov. 9.
Quinio, Louis, Tarentum, Pa. Hair waving appliance. 2,098,593; Nov. 9.
Raben, John G. (See Janes, L. S., Raben, and Nielsen.)
Rabinof, Abraham M., New Rochelle, N. Y. Loose-leaf device. 2,098,794; Nov. 9.
Radio Corporation of America. (See Batsel, Cecil N., assignor.)
Radio Corporation of America. (See Bedford, Alda V., assignor.)
Radio Corporation of America. (See Beers, George L., assignor.)
Radio Corporation of America. (See Brown, George H., assignor.)
Radio Corporation of America. (See Dowsett, H. M., and Walker, assignors.)

Radio Corporation of America. (See Goodrich, Robert R., assignor.)
Radio Corporation of America. (See Hansell, Clarence W., assignor.)
Radio Corporation of America. (See Hruska, Leo J., assignor.)
Radio Corporation of America. (See Iams, Harley, assignor.)
Radio Corporation of America. (See Jonker, J. L. H., and Van Gessel, assignors.)
Radio Corporation of America. (See Reifsteck, C. N., and Dimmick, assignors.)
Radio Corporation of America. (See Rinia, H., and Spoor, assignors.)
Radio Corporation of America. (See Rust, N. M., and Tweed, assignors.)
Radio Corporation of America. (See Sinnett, Chester M., assignor.)
Radio Corporation of America. (See Teaf, John H., assignor.)
Radio Corporation of America. (See Wood, Remsen V., assignor.)
Radio Patents Corporation. (See Plebanski, Jozef, assignor.)
Rafter, Albert, Glen Ridge, assignor to Rafter Machine Company, Belleville, N. J. Beam and the like for building construction. 2,098,676; Nov. 9.
Rafter Machine Company. (See Rafter, Albert, assignor.)
Railway Track-work Company. (See Perazzoli, Henry J., assignor.)
Ralston Purina Company. (See Hill, James R., assignor.)
Ramsey, Frank R., Portland, Oreg. Hoist. 2,098,308; Nov. 9.
Rastetter, William C., Fort Wayne, Ind. Folding chair. 2,098,711; Nov. 9.
Read, Barclay K., J. S. Godard, and W. N. Hall, Toronto, Ontario, Canada, assignors to E. I. du Pont de Nemours & Company, Inc., Wilmington, Del. Extracting gold and/or silver from ores, etc. 2,098,835; Nov. 9.
Reed, Clarence E., Wichita, Kans., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Roller bit. 2,098,758; Nov. 9.
Reed, Lawrence E., York, Nebr. Sled. 2,098,880; Nov. 9.
Reed Propeller Co., The. (See Chilton, Roland, assignor.)
Reifsteck, Carl N., Haddonfield, and G. L. Dimmick, Oakiyn, N. J., assignors to Radio Corporation of America, New York, N. Y. Telephone apparatus. 2,098,402; Nov. 9.
Reilly, Alfred F., assignor to Evans Case Company, North Attleboro, Mass. Cigarette case construction. 2,098,930; Nov. 9.
Reiner, Otto, Rheinhausen/Niederrhein, Germany. Regenerative furnace. 2,098,553; Nov. 9.
Reinke, Floyd C., assignor to Air-O-Cel Industries Inc., Detroit, Mich. Heat insulating wall. 2,098,554; Nov. 9.
Reliance Manufacturing Company. (See Wenzel, Alvin J., assignor.)
Reppe, Walter, and H. Ufer, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of thioethers. 2,098,759; Nov. 9.
Resinous Products & Chemical Company, The. (See Marshall, William R., assignor.)
Ressler, Ivan L., Niagara Falls, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Insecticide. 2,098,836; Nov. 9.
Reutter, Frederick R., assignor to Scoville Manufacturing Company, Waterbury, Conn. Lamp socket. 2,098,594; Nov. 9.
Reynolds, Harold A., Lockport, N. Y., assignor to General Motors Corporation, Detroit, Mich. By-pass arrangement. 2,098,712; Nov. 9.
Reynolds, Lynus C., Sweetwater, Tenn., assignor, by mesne assignments, to International Business Machines Corporation, New York, N. Y. Tabulating machine. 2,098,359; Nov. 9.
Reynolds Spring Company. (See Sargent, Donald E., assignor.)
Rheinmetall-Borsig Aktiengesellschaft. (See Müller, Eduard, assignor.)
Rice, Walter A., and F. G. Shinn, Yonkers, N. Y. Pile fabric. 2,098,595; Nov. 9.
Richmond, William S., Hamilton, Ontario, Canada. Door closer. 2,098,837; Nov. 9.
Riley, Reginald H. J., R. Ashton, and H. Livesey, Spondon, near Derby, England, assignors to Celanese Corporation of America. Textile apparatus. 2,098,360; Nov. 9.
Rinia, Herre, and T. A. Spoor, Eindhoven, Netherlands, assignors to Radio Corporation of America. High frequency coupling element. 2,098,403; Nov. 9.
Rivkin, Joseph, Pittsburgh, Pa., assignor to The Neville Company. Resin production. 2,098,361; Nov. 9.
Rivkin, Joseph, Pittsburgh, Pa., assignor to The Neville Company. Cellulose acetate composition. 2,098,362; Nov. 9.
Robbins, John W. (See Goltman, J. T., and Robbins.)
Robbins, Philip H., assignor to Poirette Corsets, Inc., New York, N. Y. Under-garment. 2,098,881; Nov. 9.
Robbins, Philip H., assignor to Poirette Corsets, Inc., New York, N. Y. Under-garment. 2,098,882; Nov. 9.
Robinson, Harry J., Needham, and R. F. Harrison, Stoughton, assignors to The Mosler Safe Company, Boston, Mass. Protective system. 2,098,309; Nov. 9.
Rockwood, George H., Jr., Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Circuit for space discharge devices. 2,098,310; Nov. 9.
Rodenbach, Ernst, Bloomfield, N. J. Safety hook. 2,098,466; Nov. 9.
Rogers, Elias, Co. Limited. (See Cooper, E., and Shiels, assignors.)
Rogge, Albert C. (See Gordon, H., and Rogge.)
Romp, Hendrik A., Voorburg, Netherlands, assignor to Shell Development Company, San Francisco, Calif. Liquid fuel burning installation. 2,098,760; Nov. 9.
Rook, Clay H. (See Rook, James A., and C. H.)
Rook, James A., and C. H., East Palestine, Ohio. Synchronized oil level control. 2,098,883; Nov. 9.
Roose, Clyde O., Elyria, Ohio. System and means for automobile identification. 2,098,432; Nov. 9.
Rosenthal, David, Ellenville, N. Y. Sash balance. 2,098,634; Nov. 9.
Rosseau, Leon B., Lower Merion Township, Montgomery County, Pa., assignor to General Electric Company. Heat treating apparatus. 2,098,813; Nov. 9.
Rossetti, Jerome. (See Aubert, F. B., and Rossetti.)
Rousseau, Albert B., Nashville, Tenn. Electric rat trap. 2,098,884; Nov. 9.
Rowe, Irving R., and E. E. Bradley, assignors to The Atwood Machine Company, Stonington, Conn. Twisting machine. 2,098,931; Nov. 9.
Rowe, Martin L., assignor to The Gerrard Company, Inc., Chicago, Ill. Wire cutter. 2,098,795; Nov. 9.
Rowe, William W., Cincinnati, assignor to The Paper Service Company, Lockland, Ohio. Making adhesively-secured seamed structures. 2,098,258; Nov. 9.
Ruben, Samuel, New Rochelle, N. Y., assignor to Sirian Lamp Company, Newark, N. J. Display device. 2,098,519; Nov. 9.
Rumford Chemical Works. (See Fiske, Augustus H., assignor.)
Rusnak, John M., West Hartford, Conn., assignor, by mesne assignments, to Niles-Bement-Pond Company, New York, N. Y. Work locating indicator for jig boring machines. 2,098,838; Nov. 9.
Rust, Noël M., and C. J. F. Tweed, Essex, England, assignors to Radio Corporation of America. Telegraphone and like apparatus. 2,098,596; Nov. 9.
Ryan, Lennie W. (See Dahlstrom, R., and Ryan.)
Saar, Franz, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Variable condenser. 2,098,597; Nov. 9.
Saballus, Erwin J., and J. H. O. Saballus, assignors to J. Weidenhoff, Inc., Chicago, Ill. Pump testing apparatus. 2,098,677; Nov. 9.
Saballus, John H. O. (See Saballus, Erwin J., and J. H. O.)
Sachs, Morris B. (See Gleason, James M., assignor.)
Safety Mining Company. (See Armstrong, Frank H., assignor.)
Saffir, Jacob A., Rockford, Ill., assignor of one-half to O. H. Pieper and one-half to A. F. Pieper, Rochester, N. Y. Dental cuspidor. 2,098,932; Nov. 9.
Safford, Lewis A., Watertown, N. Y., assignor to The New York Air Brake Company. Exhaust port protector for air brakes. 2,098,885; Nov. 9.
Safford, Lewis A., Watertown, N. Y., assignor to The New York Air Brake Company. Exhaust port protector for air brakes. 2,098,886; Nov. 9.
Saftien, Karl. (See Nawiasky, P., Ehrhardt, and Saftien.)
Sale, John W., assignor to Hummel-Ross Fibre Corporation, Hopewell, Va. Plyboard. 2,098,733; Nov. 9.
Sanders, J. W. (See McGaha, William P., assignor.)
Santiago, James J. (See Foster, W. L., and Santiago.)
Santiago, James J., assignor to J. Grant, Los Angeles, Calif. Well cleaning device. 2,098,520; Nov. 9.
Sargent & Company. (See Edwards, William S., assignor.)
Sargent, Donald E., assignor to Reynolds Spring Company, Jackson, Mich. Bottom strip seat frame connection. 2,098,649; Nov. 9.
Satterlee, Henry Y., Morristown, N. J., assignor to Swan-Finch Oil Corporation, New York, N. Y. Distributing material. 2,098,887; Nov. 9.
Sayers, William W., Chicago, Ill., and H. F. Watson, Philadelphia, Pa., assignors to Link-Belt Company, Chicago, Ill. Settling tank. 2,098,467; Nov. 9.
Schädler, Friedrich A., Arbon, Switzerland. Chair capable of being piled up in a vertical direction. 2,098,888; Nov. 9.
Schaeffer, Edward G., Brooklyn, assignor to American Character Doll Co., Inc., New York, N. Y. Doll. 2,098,925; Nov. 9.
Schafer, John V., assignor to Bronson Reel Company, Bronson, Mich. Level wind mechanism for fishing reels. 2,098,693; Nov. 9.
Schattschneider, Edwin C., West Allis, Wis. Projecting apparatus. 2,098,311; Nov. 9.
Scheider, Frederick E. (See Hinkle, J. C., and Scheider.)
Schifter, Joseph, New York, N. Y. Embroidered fabric. 2,098,259; Nov. 9.
Schläpfer, Oskar, assignor to Sulzer Freres, Societe Anonyme, Winterthur, Switzerland. Regulating device for a combustion power engine coupled to an electric generator for vehicles. 2,098,761; Nov. 9.

Schmidt, Richard W., Redondo Beach, assignor to The Dicalite Company, Los Angeles, Calif. Method of hard burning diatomaceous earth. 2,098,762; Nov. 9.
Schmitz, Carl, Oelde, Germany. Separator with discharge of the centrifuged substance through a hollow spindle. 2,098,880; Nov. 9.
Schmitz, Joseph, Jr., Philadelphia, Pa. Dyeing machine. 2,098,890; Nov. 9.
Schneider, Wilhelm, Dessau-in-Anhalt, and G. Wilmanns, Wolfen Kreis, Bitterfeld, Germany, assignors to Agfa Ansco Corporation, Binghamton, N. Y. Photographic material. 2,098,891; Nov. 9.
Schneider, William G., Maumee, assignor to The Electric Auto-Lite Company, Toledo, Ohio. Electromagnet. 2,098,926; Nov. 9.
Scholl, William M., Chicago, Ill. Foot pad. 2,098,312; Nov. 9.
Schörnig, Ludwig, Frankfort-on-the-Main, Germany, assignor to General Aniline Works, Inc., New York, N. Y. 3-amino-quinaldine derivatives and preparing them. 2,098,927; Nov. 9.
Schrade, George, Bridgeport, Conn. Pocket knife. 2,098,678; Nov. 9.
Schraysshuen, Carl, assignor to Speidel Corporation, Providence, R. I. Key holder structure. 2,098,094; Nov. 9.
Schröter, Fritz, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Synchronizing system. 2,098,598; Nov. 9.
Schubert, Max, Frankfort-on-the-Main-Fechenheim, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Yellow substantive dyestuff for cotton. 2,098,599; Nov. 9.
Schultz, Fred M., Detroit, Mich. Closure alarm. 2,098,635; Nov. 9.
Schultz, William O., assignor to Line Material Company, South Milwaukee, Wis. Fuse. 2,098,433; Nov. 9.
Schweizerische Industrie-Gesellschaft. (See Frei, Max, assignor.)
Scovil, D. & H., Incorporated. (See Porter, Joseph S., assignor.)
Scovill Manufacturing Company. (See Reutter, Frederick R., assignor.)
Scovill Manufacturing Company. (See Spender, Sydney L., assignor.)
Sears, Roebuck and Co. (See Janes, L. S., Raben, and Nielsen, assignors.)
Sears, Roebuck and Co. (See Morgan, John R., assignor.)
Sebell, Harry, Boston, assignor of one-half to A. H. Parker, Lexington, Mass. Can or container. 2,098,763; Nov. 9.
Sebring, Roy, et al. (See Holmes, Charles I., assignor.)
Selbert, Nelson J. (See Parker, W. H., Selbert, and Geming.)
Seitz-Werke G. m. b. H. (See Stegemann, Friedrich, assignor.)
Servel, Inc. (See Andersson, Sven W. E., assignor.)
Sexton, Wilfred A. (See Coffey, S., Lapworth, and Sexton.)
Seymour, William A., Leavenworth, Kans. Apparatus for processing grain. 2,098,521; Nov. 9.
Shakespeare Company. (See Shakespeare, William, Jr., assignor.)
Shakespeare, William, Jr., assignor to Shakespeare Company, Kalamazoo, Mich. Fishing reel. 2,098,404; Nov. 9.
Shalomith, Israel H., Brooklyn, N. Y. Ornamental wreath. 2,098,314; Nov. 9.
Shapiro, Isadore, assignor to The Athletic Shoe Company, Chicago, Ill. Athletic shoe. 2,098,468; Nov. 9.
Sharp, David G., Bloomfield, N. J., assignor, by mesne assignments, to Westinghouse Electric and Manufacturing Company, East Pittsburgh, Pa. X-ray tube. 2,098,315; Nov. 9.
Sharpless, Caspar P., Swarthmore, assignor to Milk Processes, Inc., Philadelphia, Pa. Manufacturing cream cheese. 2,098,764; Nov. 9.
Sharpless, Caspar P., Swarthmore, assignor to Milk Processes, Inc., Philadelphia, Pa. Manufacturing cream cheese products. 2,098,765; Nov. 9.
Shell Development Company. (See Romp, Hendrik A., assignor.)
Shiels, Thomas C. (See Cooper, E., and Shiels.)
Shinn, Frank G. (See Rice, W. A., and Shinn.)
Shipp, Douglas G. (See MacGregor, R. M., and Shipp.)
Shirley, Albert E., Toronto, Ontario, Canada. Switch lock for railways. 2,098,796; Nov. 9.
Silver Seal Dairy Products Company. (See Buckingham, Harold S., assignor.)
Simmons Paper Products, Inc. (See Krause, H. J., and Simmons, assignors.)
Simmons, Paul R. (See Krause, H. J., and Simmons.)
Simning, Roy B., Minneapolis, assignor, by mesne assignments to himself, and H. J. Murphy, St. Louis Park, Minneapolis, and G. V. Watson, Minneapolis, Minn. Tank vehicle. 2,098,522; Nov. 9.
Simning, Roy B., Minneapolis, assignor, by mesne assignments to himself, and H. J. Murphy, St. Louis Park, Minneapolis, and G. V. Watson, Minneapolis, Minn. Spray device. 2,098,523; Nov. 9.
Simon, Walter. (See Pier, M., Simon, and Kroenig.)
Singer Manufacturing Company, The. (See Waterman, Max L., assignor.)
Singer Manufacturing Company, The. (See Wood, Alfred R., assignor.)
Singer Manufacturing Company, The. (See Zonis, Sydney, assignor.)
Sinnett, Chester M., Westmont, N. J., assignor to Radio Corporation of America. Dynamic amplifier. 2,098,405; Nov. 9.
Sintz, Claude, Detroit, Mich. Tap bush and forming the same. 2,098,892; Nov. 9.
Sirian Lamp Company. (See Ruben, Samuel, assignor.)
Sittler, Edwin C. (See Kettering, C. F., and Sittler.)
Sittler, Edwin C., assignor to General Motors Corporation, Dayton, Ohio. Method of and apparatus for creating an artificial fever. 2,098,316; Nov. 9.
Skov, Henry A., Frederiksberg, near Copenhagen, Denmark. Tearable closure. 2,098,555; Nov. 9.
Slezak, Vincent F., assignor to A. B. T. Manufacturing Company, Chicago, Ill. Game apparatus. 2,098,406; Nov. 9.
Slidell, Kemper, assignor to C. F. Burgess Laboratories, Inc., Madison, Wis. Retaining means for loose aggregates. 2,098,903; Nov. 9.
Smith, Arthur E., Los Angeles, Calif. Syringe. 2,098,524; Nov. 9.
Smith, Clarence C., Atlantic City, N. J. Beer pipe cleaning apparatus. 2,098,525; Nov. 9.
Smith, Herman L., Grifton, N. C. Punchboard game apparatus. 2,098,434; Nov. 9.
Smith, John I. (See Mattson, A., Smith, and Frans.)
Smith, John W., Norwalk, Conn. Foldable enclosure. 2,098,469; Nov. 9.
Smith, L. C. & Corona Typewriters Inc. (See Gabrielson, C., and Moshier, assignors.)
Smith, Marshall A., Jr., South Bend, Ind., assignor, by mesne assignments, to Air Devices Corporation, Chicago, Ill. Ventilating fan. 2,098,407; Nov. 9.
Smith, William E., and I. J. Focht, Welisboro, Pa. Fish and tackle basket. 2,098,636; Nov. 9.
Smith, William R., Portland, Oreg., assignor to American Can Company, New York, N. Y. Filled can weighing and sorting apparatus. 2,098,260; Nov. 9.
Smoler, Maurice. (See Gearty, William P., assignor.)
Société Auxiliaire d'Etudes Electrotechniques. (See Tuot, Raymond A., assignor.)
Solosko, Abraham, Chicago, Ill. Pulling die. 2,098,470; Nov. 9.
Somers, Richard M., Orange, assignor to Thomas A. Edison, Incorporated, West Orange, N. J. Gaseous discharge device. 2,098,679; Nov. 9.
Soper, Ernest W., et al. (See Holmes, Charles I., assignor.)
Sottile, John F., Kingston, N. Y. Shoe gluing stand. 2,098,313; Nov. 9.
Soubier, Leonard D., Toledo, Ohio, assignor to Owens-Illinois Glass Company. Glassware forming machine. 2,098,435; Nov. 9.
Southwick, Laurence F., Meriden, Conn. Electrocardiograph apparatus. 2,098,695; Nov. 9.
Sparrow, Arthur J., Oakland, assignor to C. M. Bailey Company, Inc., San Francisco, Calif. Water reducing valve. 2,098,696; Nov. 9.
Speidel Corporation. (See Schraysshuen, Carl, assignor.)
Spender, Sydney I., assignor to Scovill Manufacturing Company, Waterbury, Conn. Lamp socket. 2,098,660; Nov. 9.
Sperry Gyroscope Company. (See Carter, L. F., and Frische, assignors.)
Sperry Gyroscope Company. (See Harding, William G., assignor.)
Spinosa, Arthur V., assignor to Penn Metal Company, Parkersburg, W. Va. Plaster base. 2,098,261; Nov. 9.
Spoor, Theodorus A. (See Rinia, H., and Spoor.)
Staegemann, Eugene, deceased, by J. L. Staegemann, administratrix, Allendale, N. J., assignor to The Permutit Company, New York, N. Y. Automatic multiple valve control. 2,098,893; Nov. 9.
Staegemann, Jessie L., administratrix. (See Staegemann, Eugene.)
Stahlecker, Wilhelm, assignor to Vereinigte Kugellagerfabriken Aktiengesellschaft, Stuttgart-Bad-Cannstatt, Germany. Top roll. 2,098,436; Nov. 9.
Stamford Rubber Supply Company, The. (See Hall, F. W., and Wilson, assignors.)
Standard-I. G. Company. (See Pier, M., Simon, and Kroenig, assignors.)
Standard Oil Company. (See Brewster, O. C., Paulus, and Thompson, assignors.)
Standard Oil Company of California. (See Webster, Hugh B., assignor.)
Standard Steel Works. (See Gredell, Otto N., assignor.)
Starks, Henry H., Tacoma, Wash. Door indicating device. 2,098,471; Nov. 9, 1937.
States Batteries Ltd. (See Thomas, A. W., assignor.)
Stauffer, Glen D., Nappanee, Ind. Fusible coupling for fire alarm circuits. 2,098,680; Nov. 9.
Staunt, Martin, Chicago, Ill. Dental appliance. 2,098,317; Nov. 9.
Stegemann, Friedrich, assignor to Seitz-Werke G. m. b. H., Bad Kreuznach, Germany. Machine for cleaning vessels, particularly bottles. 2,098,526; Nov. 9.
Stein, Irving M., assignor to Leeds & Northrup Company, Philadelphia, Pa. Temperature measuring system. 2,098,650; Nov. 9.
Steinbach, Theodore, Millburn, N. J. Hair clipping implement. 2,098,437; Nov. 9.
Stevens, Carl A. (See Pfefferkorn, F. F., and Stevens.)

Stevens, Clarence E., Old Greenwich, Conn., assignor to Electrolux Corporation, Dover, Del. Forming a suction cleaning device. 2,098,797; Nov. 9.
Stewart-Warner Corporation. (See Davis, Ernest W., assignor.)
Stewart-Warner Corporation. (See Nord, Walter G., assignor.)
Stickdorn, Kurt, Rosslau/Anhalt, Germany, assignor, by mesne assignments, to "Unichem" Chemikalien Handels A.-G., Zurich, Switzerland. Cleaning fibrous materials. 2,098,527; Nov. 9.
Stokes, F. J., Machine Company. (See Westin, C. J., and Donaghy, assignors.)
Strandlund, Carl G., assignor to Deere & Company, Moline, Ill. Plow. 2,098,472; Nov. 9.
Stromberg Electric Company. (See Jackson, Edward B., assignor.)
Stubbs, Everard, Springfield, Vt., assignor to Norton Company, Worcester, Mass. Grinding machine for grinding non-circular shapes. 2,098,438; Nov. 9.
Stuber, Walter J., assignor to Carey-McFall Co., Philadelphia, Pa. Sheet metal worm. 2,098,439; Nov. 9.
Sturtevant, B. F., Company. (See Anderson, S. M., and Palmer, assignors.)
Sullivan, John D., assignor to The Battelle Memorial Institute, Columbus, Ohio. Refractory material. 2,098,839; Nov. 9.
Sullivan Machinery Company. (See Paget, Win W., assignor.)
Sulzer Freres Societe Anonyme. (See Schläpfer, Oskar, assignor.)
Sundback, Gideon, assignor to Hookless Fastener Company, Meadville, Pa. Making separable fasteners. 2,098,651; Nov. 9.
Super Sensitive Controls Corp. (See Aubert, F. B., and Rossetti, assignors.)
Supreme Knitting Machine Co. (See Agulnek, Harry.)
Swan-Finch Oil Corporation. (See Satterlee, Henry Y., assignor.)
Swank, James W. (See Calkins, R. M., and Swank.)
Swanson, Charles A., Chicago, Ill. Stamp holder. 2,098,814; Nov. 9.
Tagit Company, The. (See Borchert, William, assignor.)
Tamada, Eizo, Itoigawa-cho, Nishikubiki-gun, Niigata-ken, Japan. Leakage-stopper for a hose. 2,098,556; Nov. 9.
Tarnuzzer, Edmund C. (See de Goencz, D., and Tarnuzzer.)
Tassick, John A., Streator, Ill., assignor to Owens-Illinois Glass Company. Glass melting furnace. 2,098,440; Nov. 9.
Tatter, John W., Detroit, Mich., assignor to Bendix Products Corporation, South Bend, Ind. Brake. 2,098,681; Nov. 2.
Taylor, James H., Oak Park, Ill. Making a flanged valve housing. 2,098,318; Nov. 9.
Teaf, John H., Camden, N. J., assignor to Radio Corporation of America. Record transfer device for automatic phonographs. 2,098,601; Nov. 9.
Tear, Harry R. (See Dodge, A. Y., and Tear.)
Tears, Claude F., Warren, Pa., assignor to The Petroleum Processes Corporation, Wichita, Kans. Recharging a pressure filter. 2,098,766; Nov. 9.
Technicolor Motion Picture Corporation. (See Troland, Leonard T., assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Bartels, Hans, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Engelmann, A., and Wolf, assignors.)

Van Ranst, Cornelius W., assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 2,098,265; Nov. 9.
Van Veen, Anton, West Hartford, Conn. Self-actuating valve. 2,098,815; Nov. 9.
Velten, Wilhelm L., Neustadt a. d. Haardt, Germany. Tamping machine. 2,098,895; Nov. 9.
Vereinigte Kugellagerfabriken Aktiengesellschaft. (See Stahlecker, Wilhelm, assignor.)
Verloop, Hendrik N. F., Amsterdam, Netherlands, assignor to The Heil Co., Milwaukee, Wis. Steam generator. 2,098,841; Nov. 9.
Vogt, Eberhard. (See Gericke, P. H., Herold, Kratz, and Vogt.)
Wadsworth, Harry L., Los Angeles, Calif. Gauge for counting typewritten characters. 2,098,323; Nov. 9.
Wagner, Theodor C., Chemnitz, Germany. Mechanical warp stop motion. 2,098,444; Nov. 9.
Wait, Wesley, Newburgh, N. Y. Metallic frame for building construction. 2,098,734; Nov. 9.
Walker, Louis E. Q. (See Dowsett, H. M., and Walker.)
Walker, William L., New York, N. Y. Distance finder. 2,098,266; Nov. 9.
Wallace, Herbert A., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway traffic controlling apparatus. 2,098,638; Nov. 9.
Walma, Theodore K., Iowa City, Iowa. Spacing mechanism. 2,098,816; Nov. 9.
Walsh, Carroll H. (See Pittman, R. R., and Walsh.)
Walter, Hans, assignor to Deutsche Gold- und Silber Scheideanstalt vormals Roessler, Frankfort-on-the-Main, Germany. Preparation of acetaldehyde and a catalyst therefor. 2,098,842; Nov. 9.
Walther, Edwin A., assignor to The Hinde and Dauch Paper Company, Sandusky, Ohio. Carton. 2,098,639; Nov. 9.
Wansky, Morris H. (See Handler, A. C., and Wansky.)
Ward, Howard E., Berkeley, Calif., and W. W. Brown, Tuckahoe, N. Y., assignors to Ralph N. Brodie Company, Oakland, Calif. Selective valve manifold for gasoline tank trucks and the like. 2,098,682; Nov. 9.
Ward, Thomas O., Roby, and S. Eaton, Mossley Hill, Liverpool, England. Apparatus for delivering and weighing predetermined quantities of material. 2,098,324; Nov. 9.
Warner, Boyd W., assignor to The Warner Brooder & Appliance Corporation, North Manchester, Ind. Brooder. 2,098,475; Nov. 9.
Warner Brooder & Appliance Corporation, The. (See Warner, Boyd W., assignor.)
Warren Textile and Machinery Supply Co. (See Barrett, Edwin W., assignor.)
Waterman, Max L., Fairfield, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Lubricating means for sewing machines. 2,098,904; Nov. 9.
Watrous, Charles A., New Haven, Conn. Light-shield for cameras, etc. 2,098,813; Nov. 9.
Watson, George V., et al. (See Slinning, Roy B., assignor.)
Watson, Harold F. (See Sayers, W. W., and Watson.)
Watson, John A., Hinsdale, assignor to The Lubrication Corporation, Chicago, Ill. Lubricating device. 2,098,108; Nov. 9.
Waxgiser, William V., Brooklyn, N. Y. Article projection apparatus for shelves. 2,098,844; Nov. 9.
Weaver, Harry E., South Euclid, Ohio, assignor to Bailey Meter Company. Measuring apparatus. 2,098,325; Nov. 9.
Weber, Mathias J., and R. E. Vanderhoff, assignors to Continental Scale Corporation, Chicago, Ill. Weighing scale. 2,098,845; Nov. 9.
Weber, Mathias J., and R. E. Vanderhoff, assignors to Continental Scale Company, Chicago, Ill. Weighing scale. 2,098,846; Nov. 9.
Webster, Hugh R., Oakland, assignor to Standard Oil Company of California, San Francisco, Calif. Directional inclination recorder. 2,098,476; Nov. 9.
Webster, Samuel L., assignor to Draper Corporation, Hopedale, Mass. Reed holder for looms. 2,098,769; Nov. 9.
Webster, Samuel W. (See Fitzpatrick, W. G., and Webster.)
Weickmann, August. (See Hopf, H., and Weickmann.)
Weidenhoff, Joseph, Inc. (See Saballus, Erwin J. and J. H. O., assignors.)
Weishampel, Robert C., Paterson, N. J. Drill grinding machine. 2,098,267; Nov. 9.
Welsh, John, St. Paul, Minn. Dispensing device. 2,098,477; Nov. 9.
Wenczler, Lajos, Augsburg, Germany, assignor to Uhertype Aktiengesellschaft, Glarus, Switzerland. Justification of lines of type matter in phototype composing. 2,098,928; Nov. 9.
Wente, Edward C., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Calculating device. 2,098,326; Nov. 9.
Wenzel, Alvin J., Michigan City, Ind., assignor to Reliance Manufacturing Company, Chicago, Ill. Shirt sleeve. 2,098,847; Nov. 9.
Wesselmann, Louis E., Buffalo, N. Y. Apparatus for treating cleaning solvents. 2,098,713; Nov. 9.
Westfield River Paper Company. (See Barnhart, Philip S., assignor.)
Westin, Charles J., and A. Donaghy, Sr., assignors to F. J. Stokes Machine Company, Philadelphia, Pa. Powder filling machine. 2,098,905; Nov. 9.
Westinghouse Electric and Manufacturing Company. (See Driggs, Frank H., assignor.)
Westinghouse Electric and Manufacturing Company. (See Sharp, David G., assignor.)
Westinghouse X-Ray Company Inc. (See Cassen, Benedict, assignor.)
Wettlaufer, William L., Buffalo, N. Y. Golf club. 2,098,445; Nov. 9.
Whitacre, Charles H., Morgantown, W. Va. Sales tax register. 2,098,896; Nov. 9.
White, Bernard S., Hammond, Ind., assignor to The Glidden Company, Cleveland, Ohio. Making sublimed litharge. 2,098,268; Nov. 9.
White Cap Company. (See White, William P., assignor.)
White, William P., Glencoe, assignor to White Cap Company, Chicago, Ill. Making closure caps. 2,098,906; Nov. 9.
Whitehead, William. (See Dreyfus, C., and Whitehead.)
Whittingham, Richard A., Perryville, Md. Vehicle brake. 2,098,409; Nov. 9.
Whymper, Robert, New York, N. Y., assignor to The National Sugar Refining Company of New Jersey, Edgewater, N. J. Sugar manufacture. 2,098,604; Nov. 9.
Wiegand, Kurt, Hohenneuendorf, near Berlin, and F. Göritz, Berlin, Germany, assignors to General Electric Company. Insulated support for lamps. 2,098,817; Nov. 9.
Williams, Homer S., Youngstown, Ohio, assignor to Pace Manufacturing Company, Inc., Chicago, Ill. Mechanical game apparatus. 2,098,410; Nov. 9.
Wilmanns, Gustav. (See Schneider, W., and Wilmanns.)
Wilson, James E. (See Phillippi, D. M., and Wilson.)
Wilson, Norman R. (See Hall, F. W., and Wilson.)
Wilson, Ralph W., New York, N. Y. Closure for containers. 2,098,799; Nov. 9.
Winkelmann, Herbert A., Chicago, and W. C. Calvert, Oak Park, Ill., assignors to Marbon Corporation. Porous halogen containing rubber derivatives. 2,098,365; Nov. 9.
Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Lockstitch sewing machine. 2,098,327; Nov. 9.
Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Leveling machine. 2,098,366; Nov. 9.
Winship, Ralph B., Montreal, Quebec, Canada. Spring plank. 2,098,328; Nov. 9.
Winston, Norman K. (See Yentis, Louis, assignor.)
Winzenburg, Wilhelm. (See Küppenbender, H., Winzenburg, Felgner, Fischer, and Kaden.)
Wise, Harry E., Canton, Ohio. Bearing. 2,098,683; Nov. 9.
Witmer, Harold G., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway track circuits. 2,098,818; Nov. 9.
Wohlgemuth, Adolph J., Brooklyn, assignor to Thomas Electric Company, West New York, N. Y. Telautograph receiver. 2,098,605; Nov. 9.
Wolf, Gfhuller. (See Engelmann, A., and Wolf.)
Wood, Alfred R., Bridgeport, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Sewing machine shuttle. 2,098,269; Nov. 9.
Wood, Alfred R., Bridgeport, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Bobbin-thread case for sewing machines. 2,098,270; Nov. 9.
Wood, Remsen V., Rochester, assignor to Radio Corporation of America, New York, N. Y. Moving picture film printing machine. 2,098,367; Nov. 9.
Worth Company, The. (See Nampa, Sulo M., assignor.)
Wright Aeronautical Corporation. (See De Pew, Chester C., assignor.)
Wrighton, William J., assignor to American Optical Company, Southbridge, Mass. Plated article. 2,098,411; Nov. 9.
Wroble, Theodore M. (See Johnson, A. C., and Wroble.)
Yentis, Louis, assignor to N. K. Winston, New York, N. Y. Shoe heating. 2,098,735; Nov. 9.
Young, John W., assignor to National Battery Company, St. Paul, Minn. Battery container. 2,098,478; Nov. 9.

Zabel, Rolland M., Lynnfield, assignor to Hygrade Sylvania Corporation, Salem, Mass. Incandescent electric lamp and manufacture thereof. 2,098,907; Nov. 9.
Zeder, Henry H., assignor, by mesne assignments, to Eaton Manufacturing Company, Detroit, Mich. Valve tappet. 2,098,897; Nov. 9.
Zeiss Ikon Aktiengesellschaft. (See Küppenbender, H., Winzenburg, Felgner, Fischer, and Kaden, assignors.)
Zepler, Erich. (See Klotz, E., and Zepler.)
Ziegler, Hans, Zollikon-Zurich, Switzerland. Manifolding attachment for writing machines. 2,098,368; Nov. 9.
Zonis, Sydney, Bridgeport, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Sewing machine. 2,098,770; Nov. 9.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 9TH DAY OF NOVEMBER, 1937

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Grinding machine, Two slide automatic. C. T. Raule. 20,549; Nov. 9.
Load distribution, Apparatus for controlling. E. D. Doyle. 20,548; Nov. 9.
Mooring and hoisting apparatus. W. E. Rouse. 20,551; Nov. 9.
Sanding drum. A. W. Walker. 20,550; Nov. 9.

LIST OF DESIGN INVENTIONS

Aerial, Automobile roof. R. Kopanski. 106,922; Nov. 9.
Aerial for automobiles. D. A. Vaughan. 106,938; Nov. 9.
Air conditioning control. C. R. T. Hess. 106,885–90; Nov. 9.
Airplane. W. D. Waterman. 106,930; Nov. 9.
Anchor, Nail drive. P. C. Dellinger. 106,861; Nov. 9.
Ashtray. J. E. Spence. 106,872; Nov. 9.
Badge. R. O. Yardley. 106,876; Nov. 9.
Band, Advertising display. R. C. Ziringer. 106,906; Nov. 9.
Base, Machine tool. H. Van Doren. 106,875; Nov. 9.
Bobbin for loom shuttles or similar articles. W. J. McGeough. 106,982; Nov. 9.
Book end or similar article. L. V. Aronson. 106,878; Nov. 9.
Bottle. W. Nuckols. 106,900; Nov. 9.
Bottle and cup, Combined. H. Dreyfuss. 106,862; Nov. 9.
Brace for screen doors and the like. E. R. Erickson. 106,863; Nov. 9.
Bureau and wardrobe, Combined. F. H. Newmaker. 106,899; Nov. 9.
Cal'met, Heater. M. F. Cotes and W. C. Schneider. 106,910; Nov. 9.
Cabinet, Refrigerator display. G. J. Hopkins. 106,891; Nov. 9.
Camera. J. Milmlyi. 106,927; Nov. 9.
Car or similar article, Articulated railway. I. C. Barlow, E. D. Campbell, and O. Kubler. 106,907; Nov. 9.
Cart, Hostess. J. C. Gridley. 106,884; Nov. 9.
Chair or the like. M. R. Moody. 106,898; Nov. 9.
Chair rung. R. F. McMahan. 106,893–4; Nov. 9.
Character bearing unit. J. B. Federico. 106,864–7; Nov. 9.
Closure, Lamp. H. C. Mead. 106,925; Nov. 9.
Coat. S. Rosenblatt. 106,949; Nov. 9.
Comb support and razor blade desitory, Combined. H. Pena. 106,901; Nov. 9.
Crib-fan. C. M. Ramos. 106,904; Nov. 9.
Dental flask attachment. D. Bumgardner and A. B. Pickands. 106,880; Nov. 9.
Dish or similar article, Covered. M. S. Cornell, Jr. 106,858; Nov. 9.
Dish or similar article, Covered. M. S. Cornell, Jr. 106,859; Nov. 9.
Dish or similar article, Covered. M. S. Cornell, Jr. 106,860; Nov. 9.
Dispenser for lubricants or the like. G. W. Ginter. 106,883; Nov. 9.
Dress. E. Blavet. 106,908; Nov. 9.
Dress. R. Echtuck. 106,912; Nov. 9.
Dress. P. Fracchia. 106,942–4; Nov. 9.
Dress. J. Kirschner. 106,921; Nov. 9.
Dress. J. J. Kushner. 106,946–7; Nov. 9.
Dress. F. Laye. 106,923; Nov. 9.
Dress. M. Michelson. 106,895; Nov. 9.
Dress. S. J. Poster. 106,948; Nov. 9.
Dress. T. Quaranto. 106,903; Nov. 9.
Dress. D. Rosenthal. 106,928–9; Nov. 9.
Dress. P. Wenett. 106,941; Nov. 9.
Dress ensemble. M. Michelson. 106,926; Nov. 9.
Fabric, Knitted. J. Minoff. 106,896–7; Nov. 9.
Fabric or similar article of manufacture, Textile. B. Haertel. 106,917; Nov. 9.
Fabric or similar article, Shoe. J. A. Fogarty. 106,882; Nov. 9.
Fabric or similar article, Textile. W. D. Roberson. 106,905; Nov. 9.
Gear case Busher or similar article. C. W. Ginter. 106,914; Nov. 9.
Glove. J. E. Fuchs. 106,913; Nov. 9.
Gocart. W. G. Carlson. 106,909; Nov. 9.
Handwheel. V. P. Rumely. 106,930; Nov. 9.
Holder, Flower vase. T. S. Perez. 106,902; Nov. 9.
Jacket, Bolero. C. Lewis. 106,924; Nov. 9.
Lace. B. Edson. 106,881; Nov. 9.
Lace. A. A. Goldstein. 106,915–16; Nov. 9.
Lighting fixture or similar article. L. L. Stewart. 106,873–4; Nov. 9.
Locomotive body. H. L. Hamilton, R. M. Dilworth, M. P. Blomberg, L. A. Knickerbocker, and C. J. Klein. 106,918; Nov. 9.
Locomotive body. H. L. Hamilton, R. M. Dilworth, M. P. Blomberg, W. D. Otter, L. A. Knickerbocker, and C. J. Klein. 106,919–20; Nov. 9.
Negligee. E. E. Stricker. 106,936; Nov. 9.
Negligee. E. E. Stricker. 106,954; Nov. 9.
Pajama, Gown. H. Welsman. 106,940; Nov. 9.
Pen and ink desk-stand. W. F. Deppermann. 106,911; Nov. 9.
Plate or similar article. Y. Buma. 106,879; Nov. 9.
Playground apparatus. C. D. Spangler. 106,871; Nov. 9.
Range. R. Hoffman. 106,868; Nov. 9.
Reflector, Hollow double-wall glass. C. E. Anderson and C. R. Palmer. 106,877; Nov. 9.
Safety device for pedestrians. T. E. Miller. 106,869; Nov. 9.
Scarf or similar article. S. Rosen. 106,950–3; Nov. 9.
Scraper for centrifugal separating machines and analogous articles. J. S. Pecker. 106,870; Nov. 9.
Shoe or similar article. L. Sholtz. 106,932–5; Nov. 9.
Stamp, Trading. C. J. and G. D. Hays. 106,945; Nov. 9.
Sweater. F. Sheindelman. 106,931; Nov. 9.
Sweater, Knitted. L. M. Sobo. 106,937; Nov. 9.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 9TH DAY OF NOVEMBER, 1937

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abrasive to polishing wheels, belts, or the like, Apparatus for applying. J. S. Porter. 2,098,306; Nov. 9.
Accounting machine. A. E. Gray. 2,098,339; Nov. 9.
Acetaldehyde and a catalyst therefor, Preparation of. H. Walter. 2,098,842; Nov. 9.
Acid, Preparing aminoacetic. E. T. Mertz. 2,098,923; Nov. 9.
Adhesive applying mechanism. H. S. Buckingham. 2,098,857; Nov. 9.
Advertising device. H. Cone. 2,098,568; Nov. 9.
Agricultural implement. M. J. Petersen. 2,098,552; Nov. 9.
Air, Apparatus for the heating of. J. McElgin. 2,098,830; Nov. 9.
Air-circulating equipment. A. Y. Dodge. 2,098,378; Nov. 9.
Air conditioning apparatus. B. R. Vancott. 2,098,443; Nov. 9.
Air conditioning method and apparatus for passenger cars. L. L. Lewis. 2,098,396; Nov. 9.
Air conditioning system utilizing refrigeration. S. M. Anderson and R. T. Palmer. 2,098,558; Nov. 27.
Air deflecting device. W. L. Morrison. 2,098,255; Nov. 9.
Aircraft, Navigation of. H. C. Hayes. 2,098,240; Nov. 9.
Aircraft, Structural section for. R. G. Miller. 2,098,752; Nov. 9.
Aircraft with freely rotative wings. J. de la Cierva. 2,098,230; Nov. 9.
Alarm-actuating means, Fire. R. B. Bukolt. 2,098,532; Nov. 9.
Alarm and motor starting system, Emergency. G. E. Lake. 2,098,549; Nov. 9.
Alarm, Closure. F. M. Schultz. 2,098,635; Nov. 9.
Alloy for dental plates. A. R. Powell. 2,098,879; Nov. 9.
Amines, Catalytic synthesis of. C. H. Greenewalt. 2,098,289; Nov. 9.
Amplifier, Dynamic. C. M. Sinnett. 2,098,405; Nov. 9.
Amusement device, Racing. C. W. Musser. 2,098,809; Nov. 9.
Angular motion indicator. W. G. Harding. 2,098,580; Nov. 9.
Anhydrides, Manufacture of aliphatic. H. Dreyfus. 2,098,334; Nov. 9.
Antenna circuit modulation. G. H. Brown. 2,098,373; Nov. 9.
Antenna, Deflectable. L. J. Hruska. 2,098,388; Nov. 9.
Antifriction bearing. W. T. Murden and R. D. Brouwer. 2,098,709; Nov. 9.
Article of manufacture. A. J. Jennings. 2,098,748; Nov. 9.
Article projection apparatus for shelves. W. V. Waxgiser. 2,098,844; Nov. 9.
Articles from paper, Forming. H. E. Cude. 2,098,642; Nov. 9.
Automobile identification, System and means for. C. O. Roose. 2,098,432; Nov. 9.
Automobile theft preventer. W. H. Blaney. 2,098,854; Nov. 9.
Awning. G. A. Houseman. 2,098,705; Nov. 9.
Bacteric culture and production thereof. A. H. Hendrickson. 2,098,918; Nov. 9.
Bag-filling and weighing machine, Automatic. R. Jarrier. 2,098,246–7; Nov. 9.
Bag for vacuum cleaners, Dust. L. N. Parks. 2,098,632; Nov. 9.
Ball control mechanism for pinball games. B. E. Mills. 2,098,648; Nov. 9.
Bandless Jordan plug. A. Dorman. 2,098,279; Nov. 9.
Bar: *See*—
Dividing bar.
Basin, Surgical. Pollock, J. C. 2,098,673; Nov. 9.
Basket, Fish and tackle. W. E. Smith and I. J. Focht. 2,098,636; Nov. 9.
Battery: *See*—
Storage battery.
Battery container. J. W. Young. 2,098,478; Nov. 9.
Beam and the like for building construction. A. Rafter. 2,098,676; Nov. 9.
Bearing: *See*—
Antifriction bearing.
Bearing. H. E. Wise. 2,098,683; Nov. 9.
Bed supporting structure for trailers or automobiles. E. E. Hills. 2,098,825; Nov. 9.
Belt and joint therefor, Transmission. C. L. Paulus. 2,098,755; Nov. 9.
Bit: *See*—
Roller bit.
Bitt-chock. C. G. Halpine. 2,098,238; Nov. 9.
Block or slab molding means and method. G. L. Barnes. 2,098,929; Nov. 9.
Bobbin and producing the same. D. G. Baker. 2,098,218; Nov. 9.
Bobbins, Making wound. D. G. Baker. 2,098,219; Nov. 9.
Bolt cushioning means for locks. W. S. Edwards 2,098,776; Nov. 9.
Bottle. F. C. Curley. 2,098,823; Nov. 9.
Box: *See*—
Cardboard box. Rural mail box.
Bracket: *See*—
Strainer bracket.
Brake: *See*—
Hoist brake. Vehicle brake.
Brake control, Automatic. J. F. Bannon and C. W. Bigler. 2,098,736; Nov. 9.
Brake. R. A. Goepfrich. 2,098,657; Nov. 9.
Brake. J. G. Hawley. 2,098,660; Nov. 9.
Brake. V. W. Kliesrath. 2,098,665; Nov. 9.
Brake. L. E. LaBrie. 2,098,666; Nov. 9.
Brake. J. W. Tatter. 2,098,681; Nov. 9.
Brake and mounting, Coaster. E. W. Glacy. 2,098,704; Nov. 9.
Brake apparatus, Hydraulic. E. G. Carroll. 2,098,653; Nov. 9.
Brake apparatus, Trailer. F. J. Machovec. 2,098,458; Nov. 9.
Brake control. F. C. Baird. 2,098,481; Nov. 9.
Brake drum, Water-cooled. W. G. Fitzpatrick and S. W. Webster. 2,098,490; Nov. 9.
Brake operating mechanism. G. G. Ingalls. 2,098,546; Nov. 9.
Brooch. M. Belloch. 2,098,820; Nov. 9.
Brooder. B. W. Warner. 2,098,475; Nov. 9.
Butling machine. G. E. McLaughlin and W. E. Broughton. 2,098,506; Nov. 9.
Building construction. R. M. Calkins and J. W. Swank. 2,098,717; Nov. 9.
Bumper for animals, Head. J. A. Caldwell. 2,098,614; Nov. 9.
Burner: *See*—
Fluid fuel burner. Gas burner.
Button, Tufting. W. B. Mathewson. 2,098,786; Nov. 9.
By-pass arrangement. H. A. Reynolds. 2,098,712; Nov. 9.
Cable, Apparatus for making. E. W. McKnight. 2,098,922; Nov. 9.
Calculating device. E. C. Wente. 2,098,326; Nov. 9.
Can or container. H. Sebell. 2,098,763; Nov. 9.
Can-weighing and sorting apparatus, Filled. W. R. Smith. 2,098,260; Nov. 9.
Caps, Making closure. W. P. White. 2,098,906; Nov. 9.
Car construction, Railway. H. M. Pflager. 2,098,516; Nov. 9.
Carbonaceous materials, Hydrogenating distillable. M. Pier, W. Simon, and W. Kroenig. 2,098,400; Nov. 9.
Card, Control. L. E. Lentz. 2,098,345; Nov. 9.
Cardboard box. E. L. Moore. 2,098,508; Nov. 9.
Carton. E. A. Walther. 2,098,639; Nov. 9.
Cartridge stop for machine guns. N. K. Turnbull. 2,098,264; Nov. 9.
Cartridges, Method and apparatus for charging blasting. F. H. Armstrong. 2,098,529; Nov. 9.
Case construction, Cigarette. A. F. Reilly. 2,098,930; Nov. 9.
Cashew nut shell liquid, Destructively distilling. M. T. Harvey. 2,098,824; Nov. 9.
Catch for use in detachably securing the ends of bracelets, chains and other articles together. A. Micallef. 2,098,461; Nov. 9.
Cathode ray device. A. B. du Mont. 2,098,231; Nov. 9.
Cellulose acetate composition. J. Rivkin. 2,098,362; Nov. 9.
Cellulose derivatives and products obtained therefrom, Manufacture of. H. Dreyfus. 2,098,336; Nov. 9.
Cellulosic materials, Treating. D. de Goenez and E. C. Tarnuzzer. 2,098,775; Nov. 9.
Cement or binder material. P. S. Barnhart. 2,098,221; Nov. 9.
Cement or bonding material, Making. P. S. Barnhart. 2,098,222; Nov. 9.
Ceramic material. H. Pulfrich. 2,098,812; Nov. 9.
Chair: *See*—
Folding chair. Treatment chair.
Theater chair.
Chair. P. E. G. Ericson. 2,098,743; Nov. 9.
Chair capable of being piled up in a vertical direction. F. A. Schädler. 2,098,888; Nov. 9.
Channel cementing machine. W. L. MacKenzie. 2,098,253; Nov. 9.
Chassis, Delivery vehicle. G. S. Pirounoff. 2,098,357; Nov. 9.

Cheese, Manufacturing cream. C. P. Sharpless. 2,098,764; Nov. 9.
Cheese product, Manufacturing cream. C. P. Sharpless. 2,098,765; Nov. 9.
Chemical manufacture. H. D. Munson. 2,098,399; Nov. 9.
Chocking device for vehicle lifts. J. M. Cunneen. 2,098,376; Nov. 9.
Choking device, Automatic. C. D. Ammon. 2,098,479; Nov. 9.
Chuck and collet therefor, Tool-holding. H. G. Procunier. 2,098,675; Nov. 9.
Cigarette. C. S. Finnell. 2,098,619; Nov. 9.
Cigarette extinguisher. H. D. Edwards. 2,098,337; Nov. 9.
Circuit control device. W. Bogue. 2,098,771; Nov. 9.
Circuit, Electric. J. Plebanski. 2,098,757; Nov. 9.
Circuit for spare discharge devices. G. H. Rockwood, Jr. 2,098,310; Nov. 9.
Circuit interrupter, High voltage electric. H. V. Erben. 2,098,801; Nov. 9.
Circuits, Maintenance of program transmission. H. A. Affel. 2,098,329; Nov. 9.
Circuits, Railway track. H. G. Witmer. 2,098,848; Nov. 9.
Clamp and gauge, Combination. J. F. Holm. 2,098,686; Nov. 9.
Clasp. R. W. Cook. 2,098,821; Nov. 9.
Cleaner: *See*—
Flue oven cleaner.
Cleaning and polishing composition. L. C. Allen and B. B. Doughty. 2,098,607; Nov. 9.
Cleaning device, Forming a suction. C. E. Stevens. 2,098,797; Nov. 9.
Clip for firearms, Cartridge. J. C. Garand. 2,098,234; Nov. 9.
Clock and calendar, Combination. J. C. Morris. 2,098,302; Nov. 9.
Closure for containers. R. W. Wilson. 2,098,799; Nov. 9.
Closure, Tearable. H. A. Skov. 2,098,555; Nov. 9.
Clothes drier. J. A. Billingsley. 2,098,853; Nov. 9.
Clothespin or like article. H. J. Peterson. 2,098,834; Nov. 9.
Clutch control mechanism. H. W. and E. R. Price. 2,098,674; Nov. 9.
Coal, Coating. H. R. Fife. 2,098,232; Nov. 9.
Coat and hat hook. H. E. Binder. 2,098,330; Nov. 9.
Communication system. H. J. Nichols. 2,098,305; Nov. 9.
Compass. A. F. Hegenberger and M. Isaacson. 2,098,241; Nov. 9.
Composite body. H. Pulfrich. 2,098,811; Nov. 9.
Compounds of cinchopen and its derivatives, Complex. F. W. Bramigk. 2,098,448; Nov. 9.
Compressor and muffler, Direct action air. J. R. Tucker. 2,098,474; Nov. 9.
Condenser: *See*—
Electrolytic condenser. Variable condenser.
Condensers, Arrangement in. B. Hansson. 2,098,746; Nov. 9.
Connecter: *See*—
Switch plug connecter. Swivel connecter.
Connecter. G. B. Benander. 2,098,800; Nov. 9.
Connection, Bottom strip seat frame. D. E. Sargent. 2,098,649; Nov. 9.
Contact seizure of metal parts, Preventing. A. L. Parker. 2,098,256; Nov. 9.
Container: *See*—
Battery container. Sealed container.
Food container.
Container. H. B. Lermer. 2,098,751; Nov. 9.
Container. A. R. Metzger. 2,098,690; Nov. 9.
Control, Automatic. J. J. Neuman. 2,098,591; Nov. 9.
Control device for heating systems. E. J. Dillman. 2,098,912; Nov. 9.
Control for air circulating means, System of. D. J. Jones. 2,098,806; Nov. 9.
Control mechanism for pumps. H. W. Landenberger. 2,098,425; Nov. 9.
Control of amplification, Automatic. H. Bartels. 2,098,370; Nov. 9.
Control of signaling circuits. D. Mitchell. 2,098,350; Nov. 9.
Control system. L. R. Allison. 2,098,819; Nov. 9.
Control system. P. S. Dickey. 2,098,913; Nov. 9.
Control system. H. H. Gorrie. 2,098,914; Nov. 9.
Control system. H. Hootz. 2,098,804; Nov. 9.
Control system for elevators. A. Pinto. 2,098,792; Nov. 9.
Control system, Remote. E. J. Blake. 2,098,910; Nov. 9.
Control unit, Master. L. M. Keefe. 2,098,248; Nov. 9.
Cot. W. B. Tucker. 2,098,603; Nov. 9.
Counting mechanism, Electrically controlled. P. G. Krippner, R. J. Helms, and A. G. Bur. 2,098,872; Nov. 9.
Coupling. S. J. Jones. 2,098,581; Nov. 9.
Coupling arrangement. E. Klotz and E. Zepler. 2,098,393; Nov. 9.
Coupling device. C. B. Kennedy. 2,098,423; Nov. 9.
Coupling element, High frequency. H. Rinia and T. A. Spoor. 2,098,403; Nov. 9.
Coupling for fire alarm circuits, Fusible. G. D. Stauffer. 2,098,680; Nov. 9.
Coupling for lubricators. W. G. Nord. 2,098,514; Nov. 9.
Cover: *See*—
Slip cover.
Covering, Flexible board wood floor. A. Elmendorf. 2,098,777; Nov. 9.
Crane. R. E. Ljungkull. 2,098,299; Nov. 9.
Crane, Full circle boom. J. Halley. 2,098,237; Nov. 9.
Crank cases, Strengthening. H. Gilmore. 2,098,451; Nov. 9.
Crank, Register set-back. W. H. Parker, N. J. Selbert, and G. J. Genung. 2,098,730; Nov. 9.
Cultivator. E. R. Kenyon. 2,098,726; Nov. 9.
Current motor control, Alternating. A. Pinto. 2,098,793; Nov. 9.
Curtain fixture. J. F. Levan. 2,098,827; Nov. 9.
Cuspidor, Dental. J. A. Saffir. 2,098,932; Nov. 9.
Cutter: *See*—
Operating seam cutter. Wire cutter.
Strip cutter.
Cutter and advertising device, Combined. R. D. Elliott. 2,098,863; Nov. 9.
Cyclopropane, Synthesis of. H. B. Hass and G. E. Hinds. 2,098,239; Nov. 9.
Cylinder head, Air-cooled. M. Christian. 2,098,741; Nov. 9.
Dam, Oral airway. J. P. Henahan. 2,098,340; Nov. 9.
Dampener, Sucker rod impulse and impact. J. C. Hinkle and F. E. Schelder. 2,098,290; Nov. 9.
Damper, Link type dynamic. C. C. De Pew. 2,098,571; Nov. 9.
De-icing means for aircraft. R. Chilton. 2,098,566; Nov. 9.
Dental apparatus. T. F. Prather. 2,098,732; Nov. 9.
Dental appliance. M. Staunt. 2,098,317; Nov. 9.
Dental floss holder. C. E. Bluhm. 2,098,610; Nov. 9.
Deodorizer. J. D. Keillor. 2,098,294; Nov. 9.
Derivatives of polyhydroxy compounds, Manufacture of. H. Dreyfus. 2,098,335; Nov. 9.
Device for hardening structures produced from hide substance. O. W. Becker. 2,098,852; Nov. 9.
Diagnostic instrument. L. L. Gagnon. 2,098,702; Nov. 9.
Die: *See*—
Pulling die.
Dimethylfurane, Preparation of. G. A. Perkins and W. J. Toussaint. 2,098,592; Nov. 9.
Direction wireless system. J. Plebanski. 2,098,756; Nov. 9.
Directional inclination recorder. H. B. Webster. 2,098,476; Nov. 9.
Discharger for projectiles. R. C. Coupland. 2,098,229; Nov. 9.
Dispenser. F. Le Boeuf. 2,098,344; Nov. 9.
Dispensing device. J. Welsh. 2,098,477; Nov. 9.
Dispensing receptacle. W. B. W. Mann. 2,098,550; Nov. 9.
Display device. M. P. Exline and W. F. Beale. 2,098,450; Nov. 9.
Display device. S. Ruben. 2,098,519; Nov. 9.
Display holder. A. C. Handler and M. H. Wansky. 2,098,543; Nov. 9.
Display rack. A. H. Ludwick. 2,098,828; Nov. 9.
Distance finder. W. L. Walker. 2,098,266; Nov. 9.
Distance, System of indicating. E. W. Gent. 2,098,287; Nov. 9.
Distillation process, Continuous pressure. O. C. Brewster, M. G. Paulus, and A. E. Thompson. 2,098,772; Nov. 9.
Distributing frame. F. W. Treptow. 2,098,321; Nov. 9.
Dividing bar. S. C. Awbrey. 2,098,714; Nov. 9.
Doll. E. G. Schaeffer. 2,098,925; Nov. 9.
Door closer. W. S. Richmond. 2,098,837; Nov. 9.
Door closing and checking device. D. R. Lasler. 2,098,501; Nov. 9.
Door holder. R. Hornung. 2,098,783; Nov. 9.
Door indicating device. H. H. Starks. 2,098,471; Nov. 9.
Drafting instrument. R. H. Cutting. 2,098,616; Nov. 9.
Drier: *See*—
Clothes drier.
Driers in drying oil alkyd-nitrocellulose blends, Incorporating metallic. W. R. Marshall. 2,098,503; Nov. 9.
Drill grinding machine. R. C. Weishamped. 2,098,267; Nov. 9.
Drive for motor vehicle axles, Power. E. J. Gould. 2,098,645; Nov. 9.
Dump body. R. T. Osman. 2,098,670; Nov. 9.
Dyes and their preparation, Azo. S. Coffey, M. Lapworth, and W. A. Sexton. 2,098,276; Nov. 9.
Dyeing machine. J. Schmitz, Jr. 2,098,890; Nov. 9.
Dyestuff for cotton, Yellow substantive. M. Schubert. 2,098,599; Nov. 9.
Dyestuffs, Azo. H. Hopff and A. Weickmann. 2,098,782; Nov. 9.
Dyestuffs, Grinding. I. T. Thornton. 2,098,798; Nov. 9.
Dyestuffs of the anthraquinone series, Vat. P. Nawiasky, A. Ehrhardt, and K. Saftlen. 2,098,590; Nov. 9.
Dyestuffs, Water-soluble azo. E. Fischer and R. Huss. 2,098,643; Nov. 9.
Earth, Method of lurd burning diatomaceous. R. W. Schmidt. 2,098,762; Nov. 9.

Educational apparatus. E. H. Lewis. 2,098,646; Nov. 9.
Electrical contact member for conduits. M. J. De Mask. 2,098,414; Nov. 9.
Electrical control. I. E. McCabe. 2,098,397; Nov. 9.
Electrical discharge apparatus. J. L. H. Jonker and K. M. Van Gessel. 2,098,807; Nov. 9.
Electrical measuring system. E. D. Doyle. 2,098,574; Nov. 9.
Electrical switch. C. W. Thompson. 2,098,473; Nov. 9.
Electrocardiograph apparatus. L. F. Southwick. 2,098,695; Nov. 9.
Electrocuting trap. E. A. Lindsley. 2,098,647; Nov. 9.
Electrolytic condenser. P. R. Coursey and C. H. Marcus. 2,098,774; Nov. 9.
Electrolytic condenser. A. Georgiev. 2,098,745; Nov. 9.
Electromagnet. W. G. Schneider. 2,098,926; Nov. 9.
Electronic apparatus. F. B. Aubert and J. Rossetti. 2,098,217; Nov. 9.
Embroidered fabric. J. Schlfter. 2,098,259; Nov. 9.
Enclosed switch. C. E. Hanny. 2,098,579; Nov. 9.
Enclosure, Foldable. J. W. Smith. 2,098,469; Nov. 9.
Engine: *See*—

Inking mechanism for rotary intaglio printing machines. R. A. Krahmer. 2,098,750; Nov. 9.
Innersole. R. M. Lehner. 2,098,502; Nov. 9.
Insecticide. I. L. Ressler. 2,098,836; Nov. 9.
Internal combustion engine. M. Mallory. 2,098,875; Nov. 9.
Jack: *See*—
Hose jack.
Jar, Rotary. W. L. Foster and J. J. Santiago. 2,098,401; Nov. 9.
Joint: *See*—
Expansion joint. Universal joint.
Spectacle joint.
Joist support. E. Carlson. 2,098,485; Nov. 9.
Key cutting machine. S. A. McPhee. 2,098,728; Nov. 9.
Knife, Pocket. G. Schrade. 2,098,678; Nov. 9.
Knitting machine. H. Agulnek. 2,098,446; Nov. 9.
Lamp: *See*—
Flash lamp.
Lamp and manufacture thereof, Incandescent electric. R. M. Zabel. 2,098,907; Nov. 9.
Lamps, Treating. F. Kallus. 2,098,582; Nov. 9.
Lasting machine. A. F. Pym. 2,098,358; Nov. 9.
Lead, Making colloidal. D. M. Phillippi and J. E. Wilson. 2,098,710; Nov. 9.
Leather substitute. R. Morgan. 2,098,788; Nov. 9.
Leather substitute. R. Morgan. 2,098,789; Nov. 9.
Leveling machine. E. E. Winkley. 2,098,366; Nov. 9.
Lifeboat propelling mechanism. C. W. Allen. 2,098,606; Nov. 9.
Light shield for cameras, etc. C. A. Watrous. 2,098,843; Nov. 9.
Lines of type matter in phototype composing, Justification of. L. Wenczler. 2,098,928; Nov. 9.
Lining, Tunnel. A. Foukal. 2,098,015; Nov. 9.
Lister Planters, Attachment for. G. Campbell. 2,098,738; Nov. 9.
Lighting fixture, Electric. A. J. Parissi. 2,098,631; Nov. 9.
Liquid mixtures, Apparatus for the purification of miscellaneous. A. Berges. 2,098,608; Nov. 9.
Liquid pasteurizing apparatus. A. B. Juhasz. 2,098,663; Nov. 9.
Liquids from phenols and other accompanying substances, Purification of aqueous. P. H. Gericke, P. Herold, H. Kratz, and E. Vogt. 2,098,779; Nov. 9.
Litharge, Making sublimed. B. S. White. 2,098,268; Nov. 9.
Load allocating device. W. A. Carter. 2,098,654; Nov. 9.
Lock: *See*—
Nut lock. Universal bolt lock.
Lock for railways, Switch. A. E. Shirley. 2,098,796; Nov. 9.
Lock mechanism for automatic guns. A. J. Lahti. 2,098,727; Nov. 9.
Lock operating means, Automobile door. J. P. Jones. 2,098,871; Nov. 9.
Loom: *See*—
Hand operated loom.
Loom picker. F. W. Merrick. 2,098,589; Nov. 9.
Looseleaf device. A. M. Rabinof. 2,098,794; Nov. 9.
Lubricating device. A. Y. Dodge and H. R. Tear. 2,098,377; Nov. 9.
Lubricating device. J. A. Watson. 2,098,408; Nov. 9.
Lubricating device and method of manufacture. A. Y. Dodge. 2,098,379; Nov. 9.
Lubricator: *See*—
Rail lubricator.
Machine for cleaning vessels, particularly bottles. F. Stegemann. 2,098,526; Nov. 9.
Machine for tie plates, Automatic. N. F. Foner. 2,098,576; Nov. 9.
Machine for treating seed grain. J. H. Dostert. 2,098,618; Nov. 9.
Mallet, Mechanical. H. D. Greenberg. 2,098,495; Nov. 9.
Manifold, Fuel equalizing. P. Kolimbat. 2,098,424; Nov. 9.
Manifolding attachment for writing machines. H. Ziegler. 2,098,368; Nov. 9.
Manifolding machine. A. A. Johnson. 2,098,496; Nov. 9.
Material, Apparatus for delivering and weighing predetermined quantities of. T. O. Ward and S. Eaton. 2,098,324; Nov. 9.
Material, Auto top. M. N. Nickowitz. 2,098,754; Nov. 9.
Material, Device for handling frozen. J. S. Knight. 2,098,250; Nov. 9.
Material, Distributing. H. Y. Satterlee. 2,098,887; Nov. 9.
Material working apparatus. J. S. Barnes, P. R. Guirl, and G. C. Johnson. 2,098,220; Nov. 9.
Matrix, Typographical. H. R. Freund. 2,098,916; Nov. 9.
Measuring apparatus. T. R. Harrison. 2,098,685; Nov. 9.
Measuring apparatus. H. E. Weaver. 2,098,325; Nov. 9.
Meat tenderer. J. E. Bridges. 2,098,856; Nov. 9.
Merchandise display table. L. S. Janes, J. G. Raben, and J. Nielsen. 2,098,453; Nov. 9.
Metal body, Clad. F. H. Driggs. 2,098,282; Nov. 9.
Mixer: *See*—
Plaster mixer.
Moistureproof article. W. H. Charch, M. M. Brubaker, and F. M. Melgs. 2,098,534–42; Nov. 9.
Mold: *See*—
Tire mold.
Mold for manufacturing composite vitreous tile and concrete staves. P. C. Fish. 2,098,382; Nov. 9.
Motor for rotary spindle machines, Hydraulic. E. K. Benedek. 2,098,213–14; Nov. 9.
Mounting, Sump pump. L. E. Golinick. 2,098,621; Nov. 9.
Musical instrument. A. Loomis. 2,098,457; Nov. 9.
Nitrogen in alloy steels, Incorporating. G. F. Comstock and V. V. Efimoff. 2,098,567; Nov. 9.
Nozzle for shoe channel cementing machines. W. L. Mac Kenzie. 2,098,347; Nov. 9.
Nozzle, Spray. E. Cooper and T. C. Shiels. 2,098,487; Nov. 9.
Nut lock. A. Thode. 2,098,840; Nov. 9.
Odorizing apparatus and method for gas lines. F. A. Hough. 2,098,626; Nov. 9.
Oil filter. J. E. Hurn. 2,098,725; Nov. 9.
Oil level control, Synchronized. J. A. and C. H. Rook. 2,098,883; Nov. 9.
Operating seam cutter. S. M. Crewdson. 2,098,899; Nov. 9.
Optical instrument. W. Günther. 2,098,917; Nov. 9.
Organic compounds, Nitrogen containing. M. A. Dahlen. 2,098,861; Nov. 9.
Oscillation generator. C. W. Hansell. 2,098,386; Nov. 9.
Oven. O. T. Myers and A. Emily. 2,098,729; Nov. 9.
Overshot. W. L. Church. 2,098,332; Nov. 9.
Packer. W. J. Brundred, W. E. Crowley, and R. B. Bossler. 2,098,484; Nov. 9.
Pad: *See*—
Foot pad.
Pad and preparing same, Copying. W. Hoskins, Jr. 2,098,662; Nov. 9.
Paper or like material, Laminated sheet of. P. S. Barnhart. 2,098,223; Nov. 9.
Paper, Treating. H. Carew. 2,098,533; Nov. 9.
Parachute, Automatic. H. A. Burgess. 2,098,613; Nov. 9.
Pencil manufacture, Lead. K. M. Herstein. 2,098,452; Nov. 9.
Phonograph, Robot. L. J. Andres. 2,098,216; Nov. 9.
Photographic material. W. Schneider and G. Wilmanns. 2,098,891; Nov. 9.
Photographic process with exposure diminution. L. T. Troland. 2,098,441–2; Nov. 9.
Photography, Color. S. D. Threadgold. 2,098,602; Nov. 9.
Picture apparatus, Double simultaneous motion. R. Thomas. 2,098,767; Nov. 9.
Pile fabric. W. A. Rice and F. G. Shinn. 2,098,595; Nov. 9.
Pipe cleaning apparatus, Beer. C. C. Smith. 2,098,525; Nov. 9.
Pipe handling tool. L. F. Bansh. 2,098,369; Nov. 9.
Pipe sleeve with floor and ceiling plate, Adjustable. J. Hutchinson. 2,098,389; Nov. 9.
Pipe union. W. S. Moffitt. 2,098,669; Nov. 9.
Pistom expander. L. D. Hax. 2,098,447; Nov. 9.
Piston ring. F. A. Luthy. 2,098,901–2; Nov. 9.
Piston rings, Making. R. S. Newton. 2,098,790; Nov. 9.
Piston structure, Floating. F. F. Bronson. 2,098,612; Nov. 9.
Planetarium. B. A. La Grasse. 2,098,296; Nov. 9.
Plank, Spring. R. R. Winship. 2,098,328; Nov. 9.
Plaster base. A. V. Spinosa. 2,098,261; Nov. 9.
Plaster mixer. B. D. Bonham. 2,098,483; Nov. 9.
Plated article. W. J. Wrighton. 2,098,411; Nov. 9.
Plating by needle deflection, Mechanism and process for effecting reverse. J. and R. H. Lawson. 2,098,297; Nov. 9.
Plow. C. G. Strandlund. 2,098,472; Nov. 9.
Plug: *See*—
Bandless Jordan plug. Spark plug.
Plyboard. J. W. Sale. 2,098,733; Nov. 9.
Pole, Skeleton. L. Lawton. 2,098,343; Nov. 9.
Powder filling machine. C. J. Westin and A. Donaghy, Sr. 2,098,905; Nov. 9.
Powder, Flashlight. A. Kälber. 2,098,341; Nov. 9.
Power plant, Hydraulic. J. M. Nash. 2,098,876; Nov. 9.
Printer. A. V. Bedford. 2,098,371; Nov. 9.
Projecting apparatus. E. C. Schattschneider. 2,098,311; Nov. 9.
Protective system. H. J. Robinson and R. F. Harrison. 2,098,309; Nov. 9.

Protective systems. R. R. Goodrich. 2,098,384; Nov. 9.
Protector for air brakes, Exhaust port. L. A. Safford. 2,098,885–6; Nov. 9.
Protector for permanent hair waving apparatus, Air-cooled. G. Turco. 2,098,768; Nov. 9.
Pully attachment for tractors. C. E. Frudden. 2,098,492; Nov. 9.
Pulling die. A. Solosko. 2,098,470; Nov. 9.
Pump: *See*—
Rotary pump.
Pump and reservoir for centralized lubricating systems, Combined. E. W. Davis. 2,098,570; Nov. 9.
Pump testing apparatus. E. J. and J. H. O. Saballus. 2,098,677; Nov. 9.
Rack: *See*—
Display rack. Toggery rack.
Radio receivers, Automatic operation of plurality of. J. Markowitz. 2,098,587; Nov. 9.
Radio transmitting system. E. H. Armstrong. 2,098,698; Nov. 9.
Rail lubricator. H. J. Perazzoli. 2,098,791; Nov. 9.
Railways and the like, Electric control and indication of point operating mechanisms for. R. M. MacGregor and D. G. Shipp. 2,098,707; Nov. 9.
Rake. H. K. Depue. 2,098,572; Nov. 9.
Range, Kitchen. G. E. Pickup. 2,098,464; Nov. 9.
Rat trap, Electric. E. B. Rousseau. 2,098,884; Nov. 9.
Razor and sharpener, Combination safety. J. Polillo. 2,098,465; Nov. 9.
Razor, Dry safety. M. Amsler. 2,098,849; Nov. 9.
Razor, Motor driven. A. Mattson, J. I. Smith, and E. Frans. 2,098,504; Nov. 9.
Razor with resilient detachable support, Safety. F. and E. Ebert. 2,098,862; Nov. 9.
Razors and other articles, Apparatus for polishing. C. F. Ern, Jr. 2,098,283; Nov. 9.
Reaction product of an ester-like wax and a base. L. Orthner and H. Keppler. 2,098,551; Nov. 9.
Receptacle: *See*—
Dispensing receptacle.
Receptacle. J. W. Busson and G. C. Thompson. 2,098,858; Nov. 9.
Receptacle and identification carrier therefor. T. A. W. Thomas. 2,098,557; Nov. 9.
Reclaiming method. F. W. Hall and N. R. Wilson. 2,098,385; Nov. 9.
Record controlled machine. R. E. Page. 2,098,355; Nov. 9.
Record transfer device for automatic phonographs. J. H. Teaf. 2,098,601; Nov. 9.
Recorder: *See*—
Directional inclination recorder. Time recorder.
Recording unusual or accidental occurrences, Apparatus for automatically. E. Masson. 2,098,689; Nov. 9.
Reel: *See*—
Fishing reel.
Refractory material. J. D. Sullivan. 2,098,839; Nov. 9.
Refrigerating apparatus. E. B. Newill. 2,098,924; Nov. 9.
Refrigerating apparatus. L. A. Philipp. 2,098,731; Nov. 9.
Refrigerator. M. Hokanson. 2,098,724; Nov. 9.
Regenerative furnace. O. Reiner. 2,098,553; Nov. 9.
Register, Cash. H. W. Clark. 2,098,486; Nov. 9.
Register, Sales tax. C. H. Whitacre. 2,098,896; Nov. 9.
Regulating device for a combustion power engine coupled to an electric generator for vehicles. O. Schlüpfer. 2,098,761; Nov. 9.
Resilient fastener. D. D. Demarest. 2,098,721; Nov. 9.
Resin production. J. Rivkin. 2,098,361; Nov. 9.
Resins and method of making, Artificial. J. Harmon and F. M. Meigs. 2,098,869; Nov. 9.
Retaining means for loose aggregates. K. Slidell. 2,098,903; Nov. 9.
Reverberatory furnace. E. R. Marble. 2,098,586; Nov. 9.
Rheostat. H. L. Bradley and F. J. Haas. 2,098,273; Nov. 9.
Ring: *See*—
Piston ring.
Road joint machine. J. N. Heltzel. 2,098,870; Nov. 9.
Roll, Top. W. Stahlecker. 2,098,436; Nov. 9.
Roller bit. C. E. Reed. 2,098,758; Nov. 9.
Roller unit, Interchangeable duplex. L. Depovsek. 2,098,722; Nov. 9.
Roof construction, House. I. M. Brandjord. 2,098,855; Nov. 9.
Rotary pump. J. C. Buckbee. 2,098,652; Nov. 9.
Rotating machine. G. Hopfensberger. 2,098,244; Nov. 9.
Rubber articles, Process of and apparatus for moulding hollow. J. A. Law. 2,098,395; Nov. 9.
Rubber compound. J. D. Morron. 2,098,429; Nov. 9.
Rubber derivatives, Porous halogen containing. H. A. Winkelmann and W. C. Calvert. 2,098,365; Nov. 9.
Rural mail box. C. I. Holmes. 2,098,242; Nov. 9.
Saddle, Cribbing. F. J. Trumpour. 2,098,263; Nov. 9.
Safety device. H. A. Fine. 2,098,381; Nov. 9.
Safety device. S. O. Huntington. 2,098,805; Nov. 9.
Safety hook. E. Rodenbach. 2,098,466; Nov. 9.
Safety switch. W. Anderson. 2,098,559; Nov. 9.
Safety switch. H. J. Hammerly. 2,098,578; Nov. 9.
Saltcellar. A. H. Payson. 2,098,832; Nov. 9.
Sand roller bearing, Self-aligning. W. P. McGaha. 2,098,630; Nov. 9.
Sash balance. D. Rosenthal. 2,098,634; Nov. 9.
Scale, Weighing. M. J. Weber and R. E. Vanderhoff. 2,098,845–6; Nov. 9.
Screen. J. M. Trotcky. 2,098,322; Nov. 9.
Sealed container. C. S. Andrews. 2,098,818; Nov. 9.
Seamed structures, Making adhesively-secured. W. W. Rowe. 2,098,258; Nov. 9.
Seat back. H. S. Leader and H. P. Nordmark. 2,098,456; Nov. 9.
Selector. F. G. Nicolaus and C. J. Breitenstein. 2,098,353; Nov. 9.
Self-actuating valve. A. Van Veen. 2,098,815; Nov. 9.
Separable fastener. W. L. Gilmore. 2,098,338; Nov. 9.
Separator with discharge of the centrifuged substance through a hollow spindle. C. Schmitz. 2,098,889; Nov. 9.
Serum treatment for mange. H. J. Tingley. 2,098,637; Nov. 9.
Settling tank. W. W. Sayers and H. F. Watson. 2,098,467; Nov. 9.
Sewing machine. S. Zonis. 2,098,770; Nov. 9.
Sewing machine, Lockstitch. E. E. Winkley. 2,098,327; Nov. 9.
Sewing machine, Shoe. B. T. Leveque. 2,098,251; Nov. 9.
Sewing machine, Shoe. B. T. Leveque. 2,098,298; Nov. 9.
Sewing machine shuttle. A. R. Wood. 2,098,269; Nov. 9.
Sewing machines, Bobbin-thread case for. A. R. Wood. 2,098,270; Nov. 9.
Sewing machines, Lubricating means for. M. L. Waterman. 2,098,904; Nov. 9.
Shaft or rod for golf clubs or other sporting implements. R. H. Cowdery. 2,098,615; Nov. 9.
Sharpening device. S. Battocchi. 2,098,530; Nov. 9.
Shell, Aerial. E. Jeanis. 2,098,627; Nov. 9.
Shingle, Lock type. J. V. Donahue. 2,098,488; Nov. 9.
Ships, Stabilization of. W. L. Bazé. 2,098,531; Nov. 9.
Shock absorber. J. Mercier. 2,098,398; Nov. 9.
Shock absorber, Fluid. F. A. Deutsch. 2,098,415; Nov. 9.
Shock absorber, Hydraulic. F. A. Deutsch. 2,098,416; Nov. 9.
Shoe, Athletic. I. Shapiro. 2,098,468; Nov. 9.
Shoe heating machine. C. E. Hood. 2,098,243; Nov. 9.
Shoe, Cushion. F. M. Gilkerson. 2,098,235; Nov. 9.
Shoe gluing stand. J. F. Sottile. 2,098,313; Nov. 9.
Shoe heating. L. Yentis. 2,098,735; Nov. 9.
Shoes, Pressing. W. C. Card, Jr. 2,098,773; Nov. 9.
Shovel with adjustable handle. H. Z. Bishop. 2,098,609; Nov. 9.
Signal device. W. R. Curtiss. 2,098,742; Nov. 9.
Signaling and control system, Automatic railroad. C. W. W. Prescott. 2,098,401; Nov. 9.
Signaling apparatus, Railway. R. M. Gilson. 2,098,822; Nov. 9.
Signaling device based upon the spacing due to the speed, Railroad. R. A. Thot. 2,098,363; Nov. 9.
Signaling, Railway. R. A. McCann. 2,098,829; Nov. 9.
Signaling system and apparatus, Railway. S. Citterio and P. Vacchina. 2,098,719; Nov. 9.
Signaling system for railways and the like, Track circuit. L. H. Peter. 2,098,833; Nov. 9.
Silk, Artificial. H. T. Clarke and C. J. Malm. 2,098,228; Nov. 9.
Sleet on mobile bodies, Preventing the formation of. R. I. Bashford. 2,098,482; Nov. 9.
Sizing machine for battery grid plates. A. D. Lund. 2,098,808; Nov. 9.
Skirt, Divided. S. K. Pierce. 2,098,810; Nov. 9.
Sled. L. E. Reed. 2,098,880; Nov. 9.
Sleeve, Shirt. A. J. Wenzel. 2,098,847; Nov. 9.
Slip cover. W. L. Fry. 2,098,684; Nov. 9.
Sludge collector. G. L. Morehead. 2,098,463; Nov. 9.
Socket. W. K. Henning. 2,098,747; Nov. 9.
Socket, Lamp. F. R. Reutter. 2,098,594; Nov. 9.
Socket, Lamp. S. I. Spender. 2,098,600; Nov. 9.
Solvents, Apparatus for treating cleaning. L. E. Wesselmann. 2,098,713; Nov. 9.
Sound and picture apparatus, Combined. C. N. Batsel. 2,098,699–700; Nov. 9.
Sound, Method of and means for transmitting, recording, and reproducing. J. Tykocinski-Tykociner. 2,098,364; Nov. 9.
Sound translating apparatus. H. F. Hopkins. 2,098,291; Nov. 9.
Sound-transmission, sound-recording, and sound-reproducing system. A. D. Blumlein. 2,098,372; Nov. 9.
Sound transmitting system. E. Kammerer. 2,098,392; Nov. 9.
Space conditioner. L. W. Child. 2,098,375; Nov. 9.
Spacing mechanism. T. K. Walma. 2,098,816; Nov. 9.
Spacing mechanism for typewriting machines, Variable. C. C. Peters. 2,098,878; Nov. 9.
Spark plug. J. Devine. 2,098,934; Nov. 9.
Spectacle joint. G. L. Mandaville. 2,098,921; Nov. 9.
Spirometer. H. Dornseif. 2,098,280; Nov. 9.
Spray device. R. B. Simning. 2,098,523; Nov. 9.
Spreader tube. R. M. Cutts, Jr. 2,098,617; Nov. 9.
Spur gear. A. Forster. 2,098,864; Nov. 9.
Stabilizing device for aerial navigation machines. E. E. Oehmichen. 2,098,877; Nov. 9.

Stamp holder. C. A. Swanson. 2,098,814; Nov. 9.
Stand: *See*—
Shoe gluing stand.
Stapling machine. H. Dingle. 2,098,573; Nov. 9.
Starter, Engine. J. W. Fitz Gerald. 2,098,866; Nov. 9.
Station selector for radio receivers, Automatic. W. J. Bowman. 2,098,331; Nov. 9.
Stay, Box. E. H. Angier. 2,098,909; Nov. 9.
Steam generator. H. N. F. Verloop. 2,098,841; Nov. 9.
Steering device for automobiles. W. H. Furness. 2,098,778; Nov. 9.
Stenciling apparatus. F. B. McQuiston and E. M. Hommel. 2,098,588; Nov. 9.
Stereosonic effects, System for producing. G. L. Beers. 2,098,561; Nov. 9.
Stop motion for looms, Warp. E. W. Barrett. 2,098,560; Nov. 9.
Stop motion, Mechanical warp. T. C. Wagner. 2,098,444; Nov. 9.
Stopper for a hose, Leakage. E. Tamada. 2,098,556; Nov. 9.
Storage battery. C. Ambruster. 2,098,908; Nov. 9.
Strainer bracket, Sink. C. H. Bullock. 2,098,374; Nov. 9.
Strip cutter. J. E. Cook. 2,098,641; Nov. 9.
Stripping machine. D. Daneke. 2,098,413; Nov. 9.
Stuttering, Device for overcoming. W. B. Glisson. 2,098,867; Nov. 9.
Sugar manufacture. R. Whymper. 2,098,604; Nov. 9.
Supercharger. F. F. Kishline. 2,098,499; Nov. 9.
Support: *See*—
Joist support.
Support for a motor vehicle, Rear wheel. H. J. van Doorne and P. H. van der Trappen. 2,098,894; Nov. 9.
Support for lamps, Insulated. K. Wiegand and F. Göritz. 2,098,817; Nov. 9.
Surfacing machine. J. C. Temple. 2,098,262; Nov. 9.
Suspension, Individual. J. W. Leighton. 2,098,874; Nov. 9.
Switch: *See*—
Electrical switch. Safety switch.
Enclosed switch.
Switch. J. M. Gleason. 2,098,644; Nov. 9.
Switch operating apparatus, Railway. K. J. J. McGowan. 2,098,831; Nov. 9.
Switch plug connecter. P. B. Boone. 2,098,225; Nov. 9.
Swivel connecter. L. G. Nakich. 2,098,304; Nov. 9.
Swivel, Wire line. F. L. Pivoto. 2,098,518; Nov. 9.
Synchronizing system. F. Schröter. 2,098,598; Nov. 9.
Syringe. J. T. Goltman and J. W. Robbins. 2,098,658; Nov. 9.
Syringe. A. E. Smith. 2,098,524; Nov. 9.
Table: *See*—
Extension table. Merchandise display table.
Folding table.
Tabulating machine. L. C. Reynolds. 2,098,359; Nov. 9.
Tag package. W. Borchert. 2,098,611; Nov. 9.
Tamping machine. W. L. Velten. 2,098,895; Nov. 9.
Tank: *See*—
Settling tank.
Tank. O. N. Gredell. 2,098,577; Nov. 9.
Tap bush and forming the same. C. Sintz. 2,098,892; Nov. 9.
Target practicing device. H. Küppenbender, W. Winzenburg, R. Feigner, O. Fischer, and K. Kaden. 2,098,873; Nov. 9.
Teeth, Interchangeable. B. A. Lincoln. 2,098,584; Nov. 9.
Telepicture synchronizing system. W. G. H. Finch. 2,098,802; Nov. 9.
Telautograph receiver. A. J. Wohlgemuth. 2,098,605; Nov. 9.
Telegraphone and like apparatus. N. M. Rust and C. J. F. Tweed. 2,098,596; Nov. 9.
Telegraphy system with position indicator. L. L. E. Chauveau. 2,098,227; Nov. 9.
Telephone apparatus. C. N. Reifsteck and G. L. Dimmick. 2,098,402; Nov. 9.
Telephone system. W. W. Carpenter and O. Myers. 2,098,274; Nov. 9.
Television transmission system. M. J. E. Golay. 2,098,236; Nov. 9.
Television transmitting apparatus. H. Iams. 2,098,390; Nov. 9.
Temperature measuring system. I. M. Stein. 2,098,650; Nov. 9.
Tension control for elastic filaments, Constant. A. W. Keen and F. D. Chittenden. 2,098,422; Nov. 9.
Textile apparatus. R. H. J. Riley, R. Ashton, and H. Livesey. 2,098,360; Nov. 9.
Textile material, Treatment of. C. Dreyfus and W. Whitehead. 2,098,333; Nov. 9.
Theater chair. M. W. Hard. 2,098,623; Nov. 9.
Therapeutic apparatus. S. Benson. 2,098,272; Nov. 9.
Thermostat controlled valve. J. K. Lund. 2,098,252; Nov. 9.
Thio-ethers, Production of. W. Reppe and H. Ufer. 2,098,759; Nov. 9.
Thread and producing same, Artificial. G. M. Karns. 2,098,628; Nov. 9.
Thread, Apparatus for the production of artificial. O. S. Petrescu. 2,098,633; Nov. 9.
Thread treatment, Artificial. J. S. Fonda and G. W. Filson. 2,098,620; Nov. 9.
Threads, Apparatus for equalizing the tension of. R. S. Francis. 2,098,418; Nov. 9.
3-amino-quinaldine derivatives and preparing them. L. Schörnig. 2,098,927; Nov. 9.
Ticket severing means. R. T. Moloney. 2,098,351; Nov. 9.
Tie-plate assembly. N. F. Foner. 2,098,935; Nov. 9.
Tile, Drip point grid. F. M. Miller. 2,098,667; Nov. 9.
Time controlled system. E. B. Jackson. 2,098,547; Nov. 9.
Time recorder, Watchman's. A. C. Johnson and T. M. Wroble. 2,098,497; Nov. 9.
Timepiece, Self-winding. L. Bornfriend. 2,098,737; Nov. 9.
Tire mold. M. M. Lanyon. 2,098,688; Nov. 9.
Tire structure, Combined felly, rim, and dual pneumatic. P. N. Chinsson. 2,098,859; Nov. 9.
Titanium pigments, Manufacture of. R. Dahlstrom and L. W. Ryan. 2,098,278; Nov. 9.
Toggery rack. S. C. Awbrey. 2,098,715; Nov. 9.
Tool: *See*—
Pipe handling tool.
Toy animal nose piece. A. A. Gerling. 2,098,656; Nov. 9.

Water reducing valve. A. J. Sparrow. 2,098,696; Nov. 9.
Water treating composition. E. P. Partridge. 2,098,431; Nov. 9.
Wax from oils, Filtering. B. Hopper and K. Kingman. 2,098,545; Nov. 9.

Web folding method and apparatus. J. Menschner. 2,098,427; Nov. 9.
Welding, Electric. D. T. May. 2,098,300; Nov. 9.
Well cleaning device. J. J. Santiago. 2,098,520; Nov. 9.
Wells, Apparatus for cleaning. J. Grant. 2,098,494; Nov. 9.
Wheel: *See*—
Vehicle wheel.
Whipstocks, Device for orienting. O. Bares and R. I. Bares. 2,098,271; Nov. 9.
Wind mechanism for fishing reels, Level. J. V. Schafer. 2,098,693; Nov. 9.
Wire cutter. M. L. Rowe. 2,098,795; Nov. 9.
Wireless direction finding system. H. M. Dowsett and L. E. Q. Walker. 2,098,281; Nov. 9.
Work equipment. H. L. De Lisle. 2,098,655; Nov. 9.
Worm, Sheet metal. W. J. Stuber. 2,098,439; Nov. 9.
Wrapping machine. T. G. Jackson. 2,098,245; Nov. 9.
Wreath, Ornamental. I. H. Shalomith. 2,098,314; Nov. 9.
Wringer. W. L. Kauffman, II. 2,098,919–20; Nov. 9.
X-ray apparatus. S. Hirsch. 2,098,900; Nov. 9.
X-ray measuring system. B. Cassen. 2,098,275; Nov. 9.
X-raytube. D. G. Sharp. 2,098,315; Nov. 9.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 9, 1937

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number—class, second number—subclass, third number—patent number

Hamilton, James T., Pittsburgh, Pa., assignor to J. T. & A. Hamilton Company. Glass bottle. 106,972; Nov. 16.

Hansen, Melvin O., assignor to Libbey Glass Company, Toledo, Ohio. Tumbler. 106,973; Nov. 16.

Hanson, Paul E., Seattle, Wash. Ring mounting or similar article of jewelry. 107,016; Nov. 16.

Heizmann, Hugo, Boston, Mass. Plaque. 106,974; Nov. 16.
Heizmann, Hugo, Boston, Mass. Combination pencil stand and ashtray. 106,975; Nov. 16.
Hokerk, Lynde D. F., Utica, assignor to Kerk Guild, Inc., Whitesboro, N. Y. Combined cake of soap and support therefor. 106,976; Nov. 16.
Holmes, Minot K., Muncie, Ind., assignor to Owens-Illinois Glass Company, Toledo, Ohio. Hollow glass building block. 106,977; Nov. 16.
Holmes, T. J., Company. (See Lohse, Frederick W., assignor.)
Iddings, Daniel P., San Francisco, Calif. Indicating novelty for a toilet door. 106,978; Nov. 16.
Imperial Glass Corporation. (See Newton, Earl W., assignor.)
Ingwersen, Gustav F., Denver, Colo. Dispenser casing or similar article. 106,979; Nov. 16.
International Silver Company. (See Kintz, Alfred G., assignor.)
International Silver Company. (See Zawisza, Edward P., assignor.)
Jones, David, Muncie, Ind., assignor to Owens-Illinois Glass Company, Toledo, Ohio. Hollow glass building block. 106,980; Nov. 16.
Kelly, Daniel A., assignor to The Prime Manufacturing Company, Milwaukee, Wis. Electric fence controller cabinet. 106,981; Nov. 16.
Kelly, Thomas K., Jr. (See Blooston, R. J., and Kelly.)
Kerk Guild, Inc. (See Hokerk, Lynde D., assignor.)
Kihn, Lawrence J., Pittsburgh, Pa., assignor to J. T. & A. Hamilton Company. Glass bottle. 107,017; Nov. 16.
Kintz, Alfred G., Wallingford, assignor to International Silver Company, Meriden, Conn. Spoon or other article of flatware. 107,018; Nov. 16.
Kohl, William R., Cumberland, assignor to Carr-Lowrey Glass Co., Baltimore, Md. Bottle. 106,982; Nov. 16.
Kramer, Andrew A. (See Kramer, J. M., and Mullin, assignors.)
Kramer, Andrew A. and J. M., and W. M. Gadberry, Kansas City, Mo.; said Gadberry and said J. M. Kramer assignors to said A. A. Kramer. Tank body for vehicles. 107,054; Nov. 16.
Kramer, Joseph M. (See Kramer, Andrew A. and J. M., and Gadberry.)
Kramer, Joseph M., and H. A. Mullin, assignors to A. A. Kramer, Kansas City, Mo. Trailer tank vehicle body. 107,019; Nov. 16.
Kropp, Willis A., Oak Park, assignor to Stewart-Warner Corporation, Chicago, Ill. Combined hose tower and cabinet for automobile service stations or similar articles. 107,020; Nov. 16.
Kruck, Ralph E., Springfield, Mass., assignor to Westinghouse Electric & Manufacturing Company. Base for electric fans or the like. 106,983; Nov. 16.
Kruck, Ralph E., Springfield, Mass., assignor to Westinghouse Electric & Manufacturing Company. Base for electric fans or the like. 106,984; Nov. 16.
Kruck, Ralph E., Springfield, Mass., assignor to Westinghouse Electric & Manufacturing Company. Base for electric fans or the like. 106,985; Nov. 16.
Lefrak, Benjamin, New York, N. Y. Coat. 107,021; Nov. 16.
Leopold, George O. (See Fegley, T. J., and Leopold.)
Levey, Max, assignor to Excel Projector Corp., Chicago, Ill. Projector. 107,022; Nov. 16.
Libbey Glass Company. (See Hansen, Melvin O., assignor.)
Lichter, Jesse S., Lawrence, N. Y. Button. 107,023; Nov. 16.
Lohse, Frederick W., Attleboro, assignor to T. J. Holmes Company, Inc., Norton, Mass. Bottle. 107,024; Nov. 16.
Love, Arthur H., New York, N. Y. Handbag. 107,045; Nov. 16.
Manson, Frank G., Dayton, Ohio. Pneumatic cushion. 106,986; Nov. 16.
McCain, Edwin W., St. Louis, Mo. Shoe. 107,025; Nov. 16.
Messer, Sidney, New York, N. Y. Textile fabric. 107,026; Nov. 16.
Messer, Sidney, New York, N. Y. Textile fabric. 107,027; Nov. 16.
Mihalyi, Joseph, assignor to Eastman Kodak Company, Rochester, N. Y. Motion picture camera. 107,028; Nov. 16.
Minoff, Jack, Newark, N. J. Knitted fabric. 107,029; Nov. 16.
Montgomery Ward & Co., Inc. (See Cashmore, Joseph M., assignor.)
Mullin, Hugh A. (See Kramer, J. M., and Mullin.)
Newton, Earl W., Evanston, Ill., assignor to Imperial Glass Corporation, Bellaire, Ohio. Goblet or similar article. 107,030; Nov. 16.
North Bro's M'f'g Co. (See Fegley, T. J., and Leopold, assignors.)
Orchard Paper Company. (See Carter, Theodore L., assignor.)
Owens-Illinois Glass Company. (See Holmes, Minot K., assignor.)
Owens-Illinois Glass Company. (See Jones, David, assignor.)
Paschal, Guy, New York, N. Y. Air conditioning machine casing. 106,987; Nov. 16.
Perlmutter, Isidore, New York, N. Y. Sachet. 106,988; Nov. 16.
Perper, Elfie N., New York, N. Y. Dress. 107,055; Nov. 16.
Porter, William E., Lowell, assignor to A. S. Campbell Co., Inc., East Boston, Mass. Vertical bumper. 107,046; Nov. 16.
Price, David W., New York, N. Y. Dress. 107,056; Nov. 16.
Prigozen, Nathan, New York, N. Y. Coat. 107,031; Nov. 16.
Prime Manufacturing Company, The. (See Kelly, Daniel A., assignor.)
Prince Matchabelli, Inc. (See Stone, Eula M., assignor.)
Raap, Peter H., Oak Park, assignor to Central Metallic Casket Co., Chicago, Ill. Medallion. 107,032; Nov. 16.
Rosenston, Morris, Boston, Mass. Shoe. 107,033; Nov. 16.
Rosow, Morris, Philadelphia, Pa. Coat tie. 107,034; Nov. 16.
Salomon, Irving, Chicago, Ill. Chair. 106,989; Nov. 16.
Salomon, Irving, Chicago, Ill. Chair. 106,990; Nov. 16.
Salomon, Irving, Chicago, Ill. Settee. 106,991; Nov. 16.
Schlessel, Philip, New York, N. Y. Dress. 107,057; Nov. 16.
Schmuckler, Bernard M., et al. (See Guttman, John B., assignor.)
Schmuckler, Jacob J., et al. (See Guttman, John B., assignor.)
Schmuckler, J. J., & Son. (See Guttman, John B., assignor.)
Schroeder, Lawrence R., Lakewood, assignor to The Cleveland Cooperative Stove Company, Cleveland, Ohio. Combined range lamp and bracket. 106,992; Nov. 16.
Solomon, Bernard M., Montgomery, Ala. Service station building. 106,993; Nov. 16.
Standard Oil Company of California. (See Thompson, Erskine D., assignor.)
Stewart, Lemuel L., Chicago, Ill., assignor to The Adlake Company. Desk lamp or similar article. 106,994; Nov. 16.
Stewart, Lemuel L., Chicago, Ill., assignor to The Adlake Company. Desk lamp or similar article. 106,995; Nov. 16.
Stewart, Lemuel L., Chicago, Ill., assignor to The Adlake Company. Desk lamp or similar article. 106,996; Nov. 16.
Stewart-Warner Corporation. (See Kropp, Willis A., assignor.)
Stone, Eula M., New York, N. Y., assignor to Prince Matchabelli, Inc. Combined bottle and stopper. 107,035; Nov. 16.
Stricker, Ethel E., New York, N. Y. Negligee. 107,058; Nov. 16.
Thompson, Erskine D., Burlingame, assignor to Standard Oil Company of California, San Francisco, Calif. Can rack. 106,997; Nov. 16.
Van Hoe, Albert, East Moline, Ill. Mass card holder. 106,998; Nov. 16.
Wallingford Company, The. (See Gilby, George T., assignor.)
Warren Telechron Company. (See Bars, Jacques M., assignor.)
Warren Telechron Company. (See Green, Frank W., assignor.)
Weil, Lewis P., Germantown, Pa. Flower holder. 107,036; Nov. 16.
Weiner, Harold, Providence, R. I. Brooch. 107,037; Nov. 16.
Wenett, Philip, New York, N. Y. Dress ensemble. 107,061; Nov. 16.
Westinghouse Electric & Manufacturing Company. (See Kruck, Ralph E., assignor.)
Wilde, Hans W., North Bergen, N. J. Textile fabric. 107,059; Nov. 16.
Willis, Robert F., Detroit, Mich. Window shade guard. 106,999; Nov. 16.
Wilmet, Georges, New York, N. Y., assignor to Dixie-Vortex Company, Easton, Pa. Carton or similar article. 107,000; Nov. 16.
Wood, Orville T., assignor to Blake Manufacturing Corporation, Clinton, Mass. Switch housing for flashlights. 107,001; Nov. 16.
Wood, Orville T., assignor to Blake Manufacturing Corporation, Clinton, Mass. Switch housing for flashlights. 107,002; Nov. 16.
Wood, Orville T., assignor to Blake Manufacturing Corporation, Clinton, Mass. Switch housing for flashlights. 107,003; Nov. 16.
Zawisza, Edward P., assignor to International Silver Company, Meriden, Conn. Spoon or other article of flatware. 107,038; Nov. 16.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 16TH DAY OF NOVEMBER, 1937

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Acme Rayon Corporation. (See Huttinger, Charles A., assignor.)
Adler, Lee E., Dallas, Tex. Telephone signal system. 2,099,250; Nov. 16.
Adrian, Matthew B., assignor to X-Ray Shoe Fitter, Inc., Milwaukee, Wis. X-ray inspection apparatus. 2,099,185; Nov. 16.
Aermotor Company. (See Scholes, Daniel R., assignor.)
Agfa Ansco Corporation. (See Goldhammer, Leo, assignor.)
Aikman, Burton S., Wilkinsburg, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Compressor governor. 2,099,416; Nov. 16.
Aitken, Andrew W., assignor to The Buffalo-Springfield Roller Co., Springfield, Ohio. Road roller. 2,099,590; Nov. 16.
Alco Valve Company. (See Shrode, John L., assignor.)
Allen, Edwin H., assignor to Highway Trailer Company, Edgerton, Wis. Railroad car and trailer combination apparatus. 2,099,288; Nov. 16.
Allen, Sidney G., Raleigh, N. C. Crash cause recorder for aircraft. 2,099,587; Nov. 16.
Allen, S. L., & Co. (See Haagen, Charles W., assignor.)
Alport, David E. and S., Kansas City, Mo., assignors to J. W. Anderson, Gary, Ind. Razor. 2,099,251; Nov. 16.
Alport, Simon. (See Alport, David E. and S.)
Althen, William C., Columbus, Ohio. Machine for removing tire treads. 2,099,458; Nov. 16.
American Brake Company, The. (See Crossman, Theodore C., assignor.)
American Perforator Company. (See Rix, Edward G., assignor.)
American Radiator Company. (See Timmis, W. W., and Walker, assignors.)
American Sheet and Tin Plate Company. (See Dahl, L. S., and Schultz, assignors.)
American Stay Company. (See Murray, Albert C., assignor.)
American Steel and Wire Company of New Jersey, The. (See Carlson, Clarence O., assignor.)
American Telephone and Telegraph Company. (See Holden, William H. T., assignor.)
American Telephone and Telegraph Company. (See Weaver, Allan, assignor.)
American Thermos Bottle Company. (See Payson, Arthur H., assignor.)
American Tire Guard Company. (See Overturf, Clarence A., assignor.)
Anaconda Wire & Cable Company. (See Wodtke, Hans V., assignor.)
Anderegg, Reuben H., La Crosse, Wis. Evaporator coil. 2,099,186; Nov. 16.
Anderson Company, The. (See Bramming, Carl, assignor.)
Anderson, Howard P., Erie, Pa., assignor to The Standard Stoker Company, Inc. Stoker. 2,099,552; Nov. 16.
Anderson, John W. (See Alport, David E. and S., assignors.)
Anderson, Raymond H., Thornton Heath, England. Delivery or extrusion nozzle device. 2,099,289; Nov. 16.
Anderson, William, assignor to Lycoming Manufacturing Company, Williamsport, Pa. Heating apparatus. 2,099,383; Nov. 16.
Annema, Norman J., Grand Rapids, Mich. Egg handling tool. 2,099,588; Nov. 16.
Apex Electrical Manufacturing Company, The. (See Frantz, W. A., and McCabe, assignors.)
Apex Electrical Manufacturing Company, The. (See McCabe, J. J., and Seyfried, assignors.)
Arco Company, The. (See Hexter, Paul L., assignor.)
Armbruster, Ludwig, Berlin-Zehlendorf, Germany. Skeleton structure. 2,099,589; Nov. 16.
Armstrong, Fullerton G. G., Beverley, and H. Clayton-Wright, Stratford-on-Avon, England, said Clayton-Wright assignor to said Armstrong. Windshield wiper motor. 2,098,936; Nov. 16.
Arnold, Edwin E., Pittsburgh, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Liquid fuel burner. 2,099,092; Nov. 16.
Associated Electric Laboratories, Inc. (See Ostline, John E., assignor.)
Atkins, Edward G., assignor to E G A Carburetor Co., Jackson, Mich. Carburetor. 2,099,553; Nov. 16.
Atlas Powder Company. (See Bucy, E. H., and Watkins, assignors.)
Atti, Raphael, Union City, assignor to H. H. Timbers, Glen Ridge, N. J. Card shuffling and dealing device. 2,099,187; Nov. 16.
Aument, H. Chester, Long Island City, N. Y. Container construction. 2,099,095; Nov. 16.
Automatic Sprinkler Company of America. (See Lowe, E. A., and Hamilton, assignors.)
Automatic Voting Machine Corporation. (See Gustavson, Alvin N., assignor.)
Avery, Henry C., New Brunswick, N. J., assignor, by mesne assignments, to The Patent and Licensing Corporation, New York, N. Y. Roof composition and producing the same. 2,099,093; Nov. 16.
Avery, Henry C., New Brunswick, N. J., assignor to The Patent and Licensing Corporation, New York, N. Y. Roofing. 2,099,094; Nov. 16.
Bach, Stefan, Nuremberg, and K. Kurz, Furth, Germany. Gold leaf substitute. 2,099,641; Nov. 16.
Bacharach Industrial Instrument Company. (See Vayda, L. L., and Rossomme, assignors.)
Backes, Edward W., Cook County, Ill., assignor to Poor & Company, New York, N. Y. Track gauge indicator. 2,098,938; Nov. 16.
Bacon, William I. (See James, C. H., and Bacon.)
Bagby, Ralph B., Evanston, Ill. Filling machine. 2,099,252; Nov. 16.
Bagby, Ralph B., Chicago, Ill. Trip mechanism for filling machines. 2,099,253; Nov. 16.
Baird, Ronald J., Passaic, N. J., assignor to A. O. Smith Corporation, Milwaukee, Wis. Apparatus for the manufacture of mercury sulphate. 2,099,290; Nov. 16.
Balch, Ralph H. (See Elvin, W. J., Balch, and Whitehead.)
Baldwin-Southwark Corporation. (See Sharp, Robert E. B., assignor.)
Ball, Albert P., assignor to Briggs Manufacturing Company, Detroit, Mich. Fastening device for panels or the like. 2,099,189; Nov. 16.
Ball Brothers Company. (See Wadsworth, Frank L. O., assignor.)
Ball, Thomas M., Detroit, Mich. Internal combustion engine fuel system. 2,099,096; Nov. 16.
Ballard, John R., assignor to Bal-Rod, Inc., San Francisco, Calif. Portable room cooling apparatus. 2,099,188; Nov. 16.
Ballman, Charles W., Indianapolis, Ind. Fishing rod holder. 2,099,254; Nov. 16.
Bal-Rod, Inc. (See Ballard, John R., assignor.)
Bancroft, Howard L., Sharpsville, Pa., and H. S. Smith, Hubbard, Ohio. Pump or compressor. 2,099,326; Nov. 16.
Bandish, Joseph M. (See Markel, O., Phillips, and Bandish.)
Bandish, Joseph M., Chicago, Ill. Packing. 2,098,992; Nov. 16.
Bangs, Ralph L., Wakefield, and W. A. Hermanson, Brighton, assignors to Forest Wadding Company, Boston, Mass. Insulated cover. 2,099,669; Nov. 16.
Banker, Charles. (See Eastburn, S. L., and Banker.)
Bannister, Bryant, Mount Lebanon, Pa., assignor to National Tube Company. Apparatus for making pipes and tubes. 2,099,459; Nov. 16.
Barber Company, The. (See Smith, Preston R., assignor.)
Barbour, Roy, Beaufort, N. C. Motor governor. 2,098,939; Nov. 16.
Barcalo Manufacturing Company. (See Vallone, Joseph M., assignor.)
Barker, Stuart D. (See Sellen, Charles L., assignor.)
Barnes, Charles D., Long Beach, and M. T. Flaxman, Wilmington, assignors to Union Oil Company of California, Los Angeles, Calif. Dewaxing oils. 2,099,190; Nov. 16.
Barr Rubber Products Company, The. (See Frissell, Robert R., assignor.)
Barrell, William A., North Andover, assignor to Lawrence Duck Company, Lawrence, Mass. Asbestos filled drier felt. 2,098,993; Nov. 16.
Barrell, William A., North Andover, assignor to Lawrence Duck Company, Lawrence, Mass. Asbestos-faced drier felt. 2,098,994; Nov. 16.
Barrell, William A., North Andover, assignor to Lawrence Duck Company, Lawrence, Mass. Asbestos textile yarn. 2,098,995; Nov. 16.
Barrett Company, The. (See Gould, David F., assignor.)
Barrett Company, The. (See Miller, Stuart P., assignor.)
Barrott, William E., Aurora, Ind. Volumetric liquid dispenser. 2,099,591; Nov. 16.
Barton, James F., Edwardsville, Ill. Form puller. 2,099,592; Nov. 16.
Bast, Frank J., Queens Village, assignor to Charles J. Tagliabue Mfg. Co., Brooklyn, N. Y. Heat-processing recorder. 2,099,417; Nov. 16.

Bethlehem Foundry & Machine Company. (See Thorp, G., and Halse, assignors.)
Bauer, Harold H., Montgomery County, near Dayton, Ohio. Tapering attachment for boring machines. 2,099,255; Nov. 16.
Baxter, James W., Jr., et al. (See Tapp, Lora E., assignor.)
Bean, Robert F., Bridgeport, Conn., assignor to General Electric Company. Shiftable brush rigging. 2,099,354; Nov. 16.
Bedford, Burnice D. (See Griffith, R. C., and Bedford.)
Belder, Warren H., and T. M. Cunningham, Passaic, N. J. Sealing containers. 2,099,097; Nov. 16.
Bell, Alfred B., assignor to Heywood-Wakefield Company, Gardner, Mass. Recliner mechanism for chairs. 2,099,460; Nov. 16.
Bell Telephone Laboratories, Incorporated. (See Black, Harold S., assignor.)
Bell Telephone Laboratories, Incorporated. (See Dudley, Homer W., assignor.)
Bell Telephone Laboratories, Incorporated. (See Hefele, John R., assignor.)
Bell Telephone Laboratories, Incorporated. (See Ives, Herbert E., assignor.)
Bell Telephone Laboratories, Incorporated. (See Kelsay, Le Roy W., assignor.)
Bell Telephone Laboratories, Incorporated. (See Mallinckrodt, Charles O., assignor.)
Bell Telephone Laboratories, Incorporated. (See Roberts, J. G., and Richard, assignors.)
Benander, George B., Yalesville, assignor, by mesne assignments, to The Monowatt Electric Corporation, Bridgeport, Conn. Electrical connecter. 2,099,555; Nov. 16.
Bender, Karl, Wetzlar an der Lahn, and M. Bunke, Tiefenbach Kreis Wetzlar, assignors to Buderus'sche Eisenwerke, Wetzlar, Germany. Refining or separating electrically conductive liquids. 2,099,593; Nov. 16.
Bendix Aviation Corporation. (See Carbonara, Victor E., assignor.)
Bendix Aviation Corporation. (See Seward, Clarence L., Jr., assignor.)
Benedict, Anthony C., Rockville Centre, N. Y. Envelope. 2,099,256; Nov. 16.
Bennett, Charles E., Ridgewood, assignor to The Okonite-Callender Cable Company, Incorporated, Paterson, N. J. Electric cable system. 2,099,291; Nov. 16.
Berg, Adolph. (See Koepke, William F., assignor.)
Bergstein, Edna M., trustee et al. (See Bergstein, Robert M., assignor.)
Bergstein, Robert M., Cincinnati, Ohio, assignor to E. M. and R. M. Bergstein, trustees. Container. 2,099,257; Nov. 16.
Bernstein, Ernst, Dresden, assignor to A. Monforts, Gladbach-Rheydt, Germany. Fabric treating machine. 2,099,461; Nov. 16.
Bevilacqua, John. (See Di Nuccio, Camillo, assignor.)
Bezanson, George W. (See Henning, F. L., and Benzanson.)
Binkley, William J., Warrenton, assignor to James R. Kearney Corporation, St. Louis, Mo. Bracket for electrical wires. 2,099,098; Nov. 16.
Binney and Smith Co. (See Morrison, Charles C., assignor.)
Bird, Russell H., Detroit, Mich. Refrigerated vending machine. 2,099,258; Nov. 16.
Bissell, Raymond W., Milford, assignor to The Strouse Adler Company, New Haven, Conn. Apparel garment. 2,099,099; Nov. 16.
Black, Harold S., Elmhurst, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Vacuum tube circuit. 2,098,950; Nov. 16.
Blake, Herman C., Hyde Park, Mass., and S. Blake, Richmond, Maine. Hanger. 2,098,996; Nov. 16.
Blake, Samuel. (See Blake, Herman C. and S.)
Blessing, Edgar F., East Orange, N. J. Steel alloy. 2,099,509; Nov. 16.
Blodgett, Herbert C., assignor to Overhead Door Corporation, Hartford City, Ind. Sliding door. 2,099,191; Nov. 16.
Blohm, August H., Chicago, Ill., assignor to Trans-Lux Corporation, New York, N. Y. Web feeding mechanism. 2,098,940; Nov. 16.
Blohm, August H., Chicago, Ill., assignor to Trans-Lux Corporation, New York, N. Y. Projection system. 2,098,941; Nov. 16.
Bloomer Bros. Company. (See Inman, Harry A., and W. H., assignors.)
Bloomfield, Samuel, Chicago, Ill. Service tray. 2,099,433; Nov. 16.
Bloomquist, Algot S., Paxton, Ill. Power lift lever. 2,099,594; Nov. 16.
Boax, John J., McKeesport, Pa., assignor to National Tube Company. Apparatus for drying pipe coatings. 2,099,462; Nov. 16.
Bockmühl, Max, and G. Ehrhart, Frankfort-on-the-Main, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Preparing glucosides having an action on the heart obtained from oleander leaves. 2,099,158; Nov. 16.
Bond, Alexander R., Plainfield, N. J., assignor to W. B. Walt, New York, N. Y. Valve cut-off indicator for locomotives. 2,099,100; Nov. 16.
Borne Scrymser Company. (See Siever, Hughes L., assignor.)
Borroughs, Joseph N. (See Trewhitt, J. E., and Old, assignors.)
Bosch, Robert, Aktiengesellschaft. (See Klein, Hermann, assignor.)
Boston, Charles W., Kenmore, N. Y. Display cover structure. 2,099,046; Nov. 16.
Bottomley, Samuel. (See Owens, H., and Bottomley.)
Bowers, Frank. (See Howse, C. L., Thomas, and Bowers.)
Bradley, Charles E., and K. L. Keene, assignors to Mishawaka Rubber and Woolen Manufacturing Company, Mishawaka, Ind. Waterproof bathing sandal. 2,099,418; Nov. 16.
Bradley, Fred J. (See Bradley, Richard C., assignor.)
Bradley, Richard C., Brooklyn, assignor of one-half to F. J. Bradley, St. Albans, N. Y. Register. 2,099,463; Nov. 16.
Bradshaw, George B., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Flexible articles. 2,099,047; Nov. 16.
Bramming, Carl, assignor to The Anderson Company, Gary, Ind. Stud. 2,098,997; Nov. 16.
Brant, Frank O., Piedmont, Calif. Easel construction. 2,099,192; Nov. 16.
Brasch, Arno, and F. Lange, Berlin, Germany. Apparatus for producing extremely fast corpuscular rays. 2,099,327; Nov. 16.
Briggs Manufacturing Company. (See Ball, Albert P., assignor.)
Brightwell, Curtis F., Pasadena, Calif. Motor or pump. 2,099,193; Nov. 16.
Brinkmann, Heinrich, Dortmund, Germany. Ladle for casting fluid metal. 2,098,937; Nov. 16.
Brinton, William H., near Coatesville, Pa. Ration. 2,098,998; Nov. 16.
Bristol Aeroplane Company Limited, The. (See Fedden, A. H. R., and Copley, assignors.)
Brown, Alfred B., Essen Fells, and C. T. Siebs, Fanwood, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Reel. 2,099,102; Nov. 16.
Brown, Banks D., assignor to Capstan Glass Company, Connellsville, Pa. Sealed package. 2,099,419; Nov. 16.
Brown, Benjamin W. (See Chapman, J., and Brown.)
Brown Brothers & Company Limited, et al. (See Wallace, William, assignor.)
Brown, Jesse J., Syracuse, N. Y. Dual safety device for oil burners. 2,098,951; Nov. 16.
Brown, Kenneth N., New York, N. Y. Collapsible refill jar. 2,099,595; Nov. 16.
Brown, Mortimer J., Niagara Falls, N. Y. Dripless dispensing device. 2,099,292; Nov. 16.
Brown, Roger S., Upper Montclair, N. J., assignor of one-half to B. J. Sayles, Pittsburgh, Pa. Furnace. 2,098,999; Nov. 16.
Brown, Theophilus, assignor to Deere & Company, Moline, Ill. Tractor. 2,099,194; Nov. 16.
Brubaker, Merlin M., Lindemere, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Protection of materials subject to parasitic attack. 2,098,942; Nov. 16.
Bruce, William McA. (See Riley, R., and Bruce.)
Bruening, Lee P., assignor of one-third to F. Goggin, Butte, Mont. Multiple purpose garment hanger. 2,099,596 Nov. 16.
Brun, Willi, Stratford, Conn., assignor to Remington Arms Company, Inc. Chemical compound and use therefor. 2,099,293; Nov. 16.
Bruner, Donald L., Coral Gables, Fla., and J. H. Herr, Dayton, Ohio. Goggles. 2,099,464; Nov. 16.
Bucy, Edmond H., and R. Watkins, Waukegan, Ill., assignors to Atlas Powder Company, Wilmington, Del. Condensation product of phenolphthalein. 2,099,510; Nov. 16.
Buderus'sche Eisenwerke. (See Bender, K., and Bunke.)
Buell, Albert E., and W. A. Schulze, assignors to Phillips Petroleum Company, Bartlesville, Okla. Desulphurizing hydrocarbons. 2,098,943; Nov. 16.
Buffalo-Springfield Roller Co., The. (See Aitken, Andrew W., assignor.)
Bunke, Max. (See Bender, K., and Bunke.)
Burleson, Wade H., assignor to The Ohio Brass Company, Mansfield, Ohio. Conductor clamp. 2,099,465; Nov. 16.
Burns, Erwin, Los Angeles, and H. P. Wickersham, Huntington Park, Calif. Setting tool. 2,099,048; Nov. 16.
Busch, Leo, Berlin-Karlshorst, Germany. Roll carrier for photographic strip film. 2,099,646; Nov. 16.
Buschbeck, Werner, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Carrier wave modulation and suppression. 2,099,294; Nov. 16.
Bush, A. G. (See Criner, Harry J., assignor.)
Bush, Rankin J., Jeannette, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid pressure brake. 2,099,384; Nov. 16.
Busse, Ferdinand, Munich, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Developing apparatus. 2,099,159; Nov. 16.
Butler, Irvin E., assignor of one-half to J. C. Fowler, Baltimore, Md. Electrical safety system. 2,099,195; Nov. 16.
Butt, Frederic W. (See Hamilton, W. S. H., and Butt.)

Butterworth, William R., Jr. (See Leonard, J. W., Butterworth, Leonard, and Wellford, Harry A., and W. L., Jr.)
Caeser, Viktor, Stuttgart, Germany. Oscillator for the biological treatment of living tissue. 2,099,511; Nov. 16.
Calabro, Joseph, Everett, Mass. Automobile bumper. 2,099,049; Nov. 16.
Calico Printers' Association Limited. (See Elliott, Claud J., assignor.)
Callender's Cable and Construction Company. (See Crocker, William G., assignor.)
Campbell, Ralph. (See Nass, F. H. and Campbell.)
Canfield, Dana W., Chico, Calif. Wrist-type memorandum pad. 2,099,295; Nov. 16.
Capstan Glass Company. (See Brown, Banks D., assignor.)
Caputo, James V., Crafton, Pa. Apparatus for welding. 2,098,952; Nov. 16.
Carbonara, Victor E., Rockville Centre, N. Y., assignor to Bendix Aviation Corporation, South Bend, Ind. Altimeter. 2,099,466; Nov. 16.
Carbonara, Victor E., Rockville Centre, N. Y., assignor to Bendix Aviation Corporation, South Bend, Ind. Altimeter. 2,099,467; Nov. 16.
Cardwell-Westinghouse Company. (See Sproul, Donald F., assignor.)
Carlson, Clarence O., Cleveland Heights, Ohio, assignor to The American Steel and Wire Company of New Jersey. Tool. 2,099,259; Nov. 16.
Carlson, Gustav A. (See Hedblom, Lars O., assignor.)
Carpenter, Allan O., Corning, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J. Safety device for engines. 2,099,556; Nov. 16.
Carpenter, E. W., Manufacturing Company, The. (See Carpenter, Edward W., assignor.)
Carpenter, Edward W., Fairfield, assignor to The E. W. Carpenter Manufacturing Company, Bridgeport, Conn. Swivel harp fixture. 2,099,000; Nov. 16.
Carr, Frank L., Jr., Maplewood, Pa. Weather strip for metal sash windows. 2,099,597; Nov. 16.
Carter Carburetor Corporation. (See Ewart, William M., assignor.)
Carter, John D., Lansdowne, assignor to Philadelphia Quartz Company, Philadelphia, Pa. Fiberboard. 2,099,598; Nov. 16.
Carter, Philip S., Rocky Point, N. Y., assignor to Radio Corporation of America. Aperiodic antenna. 2,099,296; Nov. 16.
Cartlidge, Frank, assignor to Goodman Manufacturing Company, Chicago, Ill. Conveyer. 2,099,512; Nov. 16.
Casagrande, Leo, Berlin-Charlottenburg, Germany. Hardening soil. 2,099,328; Nov. 16.
Cash, A. W., Company. (See Temple, Paul C., assignor.)
Ceder, Wilbur J., Los Angeles, Calif. Pocket room guide. 2,098,944; Nov. 16.
Celanese Corporation of America. (See Elvin, W. J., Balch, and Whitehead, assignors.)
Celanese Corporation of America. (See Sowter, Percy F. C., assignor.)
Celanese Corporation of America. (See Taylor, W. I., and Woodruff, assignors.)
Cerstvik, Stephen, Newark, assignor to Eclipse Aviation Corporation, East Orange, N. J. Electrical generating and control system. 2,099,468; Nov. 16.
Certain-Teed Products Corporation. (See Outman, Winfred H., assignor.)
Chamberlain, Paul A., assignor to Chicago Flexible Shaft Company, Chicago, Ill. Speed control mechanism. 2,099,050; Nov. 16.
Champagne Paper Corporation. (See Jones, Edwin P., assignor.)
Chapman, James, Atlanta, and B. W. Brown, Hapeville, Ga. Idle dagger rod and light shuttle box device. 2,099,469; Nov. 16.
Chapman, John E., Springfield, Ill. Electric fan. 2,099,196; Nov. 16.
Charch, William H., Buffalo, N. Y., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Method and apparatus for drying. 2,099,160; Nov. 16.
Chemical Construction Corporation. (See Christensen, Axel, assignor.)
Chemische Fabrik von Heyden, A. G. (See Zellmann, R., and Milller, assignors.)
Cheney Weeder Company. (See Edgington, Aaron D., assignor.)
Chicago Flexible Shaft Company. (See Chamberlain, Paul A., assignor.)
Childs, Marice, assignor to G. T. Downs, Philadelphia, Pa. Multiple-jacquard motion. 2,099,001; Nov. 16.
Christensen, Axel, Rye, N. Y., assignor to Chemical Construction Corporation. Nitric acid manufacture. 2,098,953; Nov. 16.
Chrysler Corporation. (See Fleming, Alexander M., assignor.)
Chrysler Corporation. (See Holmes, John R., assignor.)
Chrysler Corporation. (See Nissley, H. H., and Mazzie, assignors.)
Chrysler Corporation. (See Patterson, Herbert F., assignor.)
Ciamberlini, Ugo, Rome, Italy. Pneumatic tachometer working independently of the external pressure. 2,099,385; Nov. 16.
Ciblé, Pierre, Paris, France. Motor starting device. 2,099,386; Nov. 16.
Clark, Carl L., Warren, and A. G. Knowles, Niles, assignors, by mesne assignments, to Mullins Manufacturing Corporation, Salem, Ohio. Skid platform. 2,099,051; Nov. 16.
Clayton-Wright, Howard. (See Armstrong, F. G. G., and Clayton-Wright.)
Clément, Louis E., Meudon-Val-Fleury, France, assignor, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Photographic material and process. 2,099,297; Nov. 16.
Climax Machinery Company. (See Smith, Russell T., assignor.)
Cloud, Claude C., Chicago, Ill. Display.. 2,099,420; Nov. 16.
Coddington, Edwin D., Milwaukee, Wis., assignor to Reynolds Corporation, New York, N. Y. Stud. 2,099,470; Nov. 16.
Coffee Products Corporation. (See Fronmuller, Douglas, assignor.)
Cohn, Samuel H., and S. Levin, New York, N. Y. Combined center-bar buckle and belt-connecter. 2,099,387; Nov. 16.
Colt, Samuel S., Orange, N. J. Concrete form and reenforcement retaining means. 2,099,260; Nov. 16.
Comstock, Millard, and H. C. Schoepflin, assignors to Ornamental Specialties, Inc., Buffalo, N. Y. Combination grave marker and flower holder. 2,099,329; Nov. 16.
Copley, John W. (See Fedden, A. H. R., and Copley.)
Corporon, George J., Newburyport, assignor to Merrimac Hat Corporation, Amesbury, Mass. Forming apparatus for wool hat and other tubular felt bodies. 2,099,330; Nov. 16.
Cox, Thomas K., Baltimore, Md., assignor to Western Electric Company, Incorporated, New York, N. Y. Coating articles. 2,099,103; Nov. 16.
Crabtree, George W., Cleveland Heights, Ohio. Spring cover. 2,099,197; Nov. 16.
Cramer, John D. (See Dibelka, H. G., and Cramer.)
Crenshaw, Benjamin A., deceased, by T. C. Crenshaw, executor, assignor to Steve Kalisz, Chicago, Ill. Direction signal. 2,099,331; Nov. 16.
Crenshaw, Thomas C., executor. (See Crenshaw, Benjamin A.)
Criner, Harry J., assignor of one-half to A. G. Bush, Davenport, Iowa. Trap nest. 2,099,052; Nov. 16.
Crocker, William G., Kent, assignor to Callender's Cable and Construction Company, Limited, London, England. Electrical measuring system. 2,099,002; Nov. 16.
Crossman, Theodore C., Wilkinsburg, assignor to The American Brake Company, Wilmerding, Pa. Brake rigging. 2,099,421; Nov. 16.
Crystal Tube Mfg. Co. (See Goodman, Leon, assignor.)
Culbertson, Albert B., Jr., St. Louis, Mo., assignor, by mesne assignments, to The Standard Oil Company, Chicago, Ill. Treating hydrocarbons. 2,099,434; Nov. 16.
Culp, Roy, Battle Creek, Mich. Lathe attachment. 2,099,198; Nov. 16.
Cunningham, Thomas M. (See Belder, W. H., and Cunningham.)
Dahl, Lawrence S., and J. H. Shultz, Gary, Ind., assignors to American Sheet and Tin Plate Company. Wide strip cold rolling. 2,099,261; Nov. 16.
Dahlen, Miles A., Wilmington, and F. Zwilgmeyer, Arden, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Printing and dyeing compositions. 2,099,104; Nov. 16.
Dally, Martin. (See Giesen, J., Hanisch, and Dally.)
Dalmer, Otto, C. Diehl, and H. Pieper, Darmstadt, Germany, assignors to Merck & Co. Inc., Rahway, N. J. Hydrouracil compounds and their production. 2,098,954; Nov. 16.
Daut, Doctor W. W. (See Hazlett, George W., assignor.)
Davenport, Ralph M., Los Angeles, Calif. Combined carrier scraper. 2,099,435; Nov. 16.
Davis, Robert W., Lexington, Ky. Wire splicer. 2,098,945; Nov. 16.
Dean, Floyd D. (See Schwarz, B. E., and Dean.)
Deere & Company. (See Brown, Theophilus, assignor.)
Dehnert, Heinrich. (See Krzikalla, H., Dehnert, and Vossen.)
De Lange, Cornelis, assignor to N. V. Philips Gloeilampenfabrieken, Eindhoven, Netherlands. Electrolytic device. 2,099,599; Nov. 16.
Del Cerro, Carlos A. P. (See Limeses, J., Saraleugi, and Del Cerro.)
De Leeuw, Adolph L., Plainfield, N. J., assignor to Norton Company, Worcester, Mass. Grinding machine. 2,099,161; Nov. 16.
De Mayo, Frank, Jr., Kansas City, Mo., assignor to Vendo Sales Company. Bottle vending machine. 2,099,557; Nov. 16.
Delta Manufacturing Company. (See Tautz, Herbert E., assignor.)
Denner, Charlotte I., Santa Rosa, Calif. Crocheting fork. 2,099,600; Nov. 16.
Denny, William, & Brothers, Limited, et al. (See Wallace, William, assignor.)
De Simó, Martin, and F. B. Hilmer, Berkeley, assignors to Shell Development Company, San Francisco, Calif. Hydrocarbon oil manufacture. 2,099,513; Nov. 16.

Devendor, John A. and W. A., Jackson Heights, N. Y. One-piece buckle. 2,099,199; Nov. 16.
Devendor, William A. (See Devendor, John A. and W. A.)
De Witt, William J., and P. A. Ross, assignors to Shoe Form Co., Inc., Auburn, N. Y. Tackle box. 2,099,003; Nov. 16.
Diamond Match Company, The. (See Joley, Albert N., assignor.)
Diamond Match Company, The. (See Nolan, John R., assignor.)
Diamond Power Specialty Corporation. (See Howse, C. L., Thomas, and Bowers, assignors.)
Dibelka, Henry G., and J. D. Cramer, assignors to The Norlipp Company, Chicago, Ill. Device for closing filling openings of liquid containers. 2,099,558; Nov. 16.
Dickerson, Walker T., Company, The. (See Gordon, Hiram, assignor.)
Diehl, Claus. (See Dalmer, O., Diehl, and Pieper.)
Di Nuccio, Camillo, assignor of one-half to J. Bevilacqua, Providence, R. I. Reversible hanger mounting for pictures and the like. 2,099,332; Nov. 16.
Dippel, Frederick W., Milwaukee, Wis. Instrument panel oil level indicator. 2,099,105; Nov. 16.
Dodge, Charles W. (See Uber, Harold L., assignor.)
Donnan, Dan A., Fennimore, Wis. Rake attachment. 2,099,053; Nov. 16.
Donovan, Alfred F. (See Donovan, Alfred W. and A. F.)
Donovan, Alfred W., Quincy, and A. F. Donovan, Boston, assignors to E. T. Wright & Company, Inc., Rockland, Mass. Shoe. 2,099,436; Nov. 16.
Dorr Company, The. (See Lund, Nels B., assignor.)
Dow Chemical Company, The. (See Stoesser, Wesley C., assignor.)
Downs, George T. (See Childs, Marice, assignor.)
Draeger, Rupert H., U. S. Navy. Film editing device. 2,098,955; Nov. 16.
Dreyfus, Henry, London, England. Manufacture of materials containing pigments. 2,099,004; Nov. 16.
Dreyfus, Henry, London, England. Production or treatment of artificial filaments, threads, yarns, ribbons, and the like. 2,099,005; Nov. 16.
Dudley, Homer W., Garden City, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Signaling system. 2,098,956; Nov. 16.
Du Pont, E. I., de Nemours & Company. (See Bradshaw, George B., assignor.)
Du Pont, E. I., de Nemours & Company. (See Brubaker, Merlin M., assignor.)
Du Pont, E. I., de Nemours & Company. (See Charch, William H., assignor.)
Du Pont, E. I., de Nemours & Company. (See Dahlen, M. A., and Zwilgmeyer, assignors.)
Du Pont, E. I., de Nemours & Company. (See Eberlin, Walter C., assignor.)
Du Pont, E. I., de Nemours & Company. (See Heckert, Winfield W., assignor.)
Du Pont, E. I., de Nemours & Company. (See Kirby, J. E., and Werntz, assignors.)
Du Pont, E. I., de Nemours & Company. (See Kraft, Frederick G., assignor.)
Du Pont, E. I., de Nemours & Company. (See Snyder, Arthur L., assignor.)
Du Pont, E. I., de Nemours & Company. (See Strain, Daniel E., assignor.)
Du Pont, E. I., de Nemours & Company. (See Werntz, James H., assignor.)
Du Pont, E. I., de Nemours & Company. (See Zwilgmeyer, Frithjof, assignor.)
Durnell, Harold G., and S. T. Steel, Bartlesville, Okla. Well pumping unit. 2,098,957; Nov. 16.
Duro Metal Products Company. (See Hedgpeth, Theron L., assignor.)
E G A Carburetor Co. (See Atkins, Edward G., assignor.)
Eastburn, Samuel L., Sloatsburg, and C. Banker, Hillburn, assignors to Ramapo Ajax Corporation, New York, N. Y. Railway switch. 2,099,559; Nov. 16.
Eastman Kodak Company. (See Clement, Louis E., assignor.)
Eastman Kodak Company. (See Fritts, Edwin C., assignor.)
Eastman Kodak Company. (See Kenyon, W. O., and Van Dyke, assignors.)
Eastman Kodak Company. (See Reid, Marvin J., assignor.)
Eberhard, Boyd C., Akron, Ohio, assignor to Wingfoot Corporation, Wilmington, Del. Puncture-sealing inner tube for pneumatic tires. 2,099,514; Nov. 16.
Eberlin, Walter C., Kenmore, N. Y., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Process and apparatus for drying. 2,099,162; Nov. 16.
Ebert, Charles, Leonia, N. J., and W. B. Newkirk, Western Springs, Ill., assignors to International Patents Development Company, Wilmington, Del. Refining sugar liquors. 2,099,389; Nov. 16.
Eclipse Aviation Corporation. (See Cerstvik, Stephen, assignor.)
Econo Products, Inc. (See Waters, Gilbert C., assignor.)
Edgington, Aaron D., assignor to Cheney Weeder Company, Cheney, Wash. Harvester attachment. 2,099,471; Nov. 16.
Edison, Thomas A., Incorporated. (See Huenlich, Charles, assignor.)
Edwards, James W. (See Ruys, J. D., and Edwards.)
Eger, Ernst, Grosse Pointe Park, Mich., assignor to United States Rubber Products Inc., New York, N. Y. Tire antiskid device. 2,099,006; Nov. 16.
Ehrhart, Gustav. (See Bockmühl, M., and Ehrhart.)
Elnson-Freeman Co. (See Horr, John V., assignor.)
Ekstromer, Edward C., San Francisco, Calif., assignor to Electrolift Corporation, Reno, Nev. Multiple motor unit. 2,098,958; Nov. 16.
Electric Storage Battery Company, The. (See Woodbridge, Joseph L., assignor.)
Electric Vacuum Cleaner Company. (See Lang, Henry T., assignor.)
Electrolift Corporation. (See Ekstromer, Edward C., assignor.)
Elliott, Claud J., Ainsdale, Southport, assignor to The Calico Printers' Association Limited, Manchester, England. Fabric printing machine. 2,098,946; Nov. 16.
Elmore, Charles F., Evanston, Ill., assignor, by mesne assignments, to Pilot Letter Label Co. Envelope. 2,099,007; Nov. 16.
Elvin, William J., R. H. Balch, and W. Whitehead, Cumberland, Md., assignors to Celanese Corporation of America. Creel for artificial yarns. 2,099,008; Nov. 16.
Emery, Charles R. (See Zick, Frank E., assignor.)
Emery, George S., Tulsa, Okla. Binder. 2,099,472; Nov. 16.
Engelson, Larry R., New York, N. Y. Vest. 2,099,054; Nov. 16.
Engineering Laboratories, Inc. (See Scherbatskoy, S. A., and Neufeld, assignors.)
Ewart, William M., assignor to Carter Carburetor Corporation, St. Louis, Mo. Carburetor spring. 2,099,106; Nov. 16.
Factor, Max, & Co. (See Firestein, M., and Ferentzy, assignors.)
Fairbanks, Sumner C. (See Hammersley, C. S., and Fairbanks.)
Falk Corporation, The. (See Slonneger, John C., assignor.)
Farmer, Ayad L., Los Angeles, Calif. Trailer brake system. 2,099,263; Nov. 16.
Farmer, George C., Chicago, Ill., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Pneumatic clutch control device. 2,099,422; Nov. 16.
Fedden, Alfred H. R., and J. W. Copley, assignors to The Bristol Aeroplane Company Limited, Bristol, England. Cowl for air-cooled aircraft engines. 2,098,947; Nov. 16.
Felock, David F., et al. (See Tapp, Lora E., assignor.)
Fenske, Merrell R. (See McCluer, W. B., and Fenske.)
Ferentzy, Steven. (See Firestein, M., and Ferentzy.)
Ferngren, Enoch T., Jackson Heights, Long Island, N. Y., assignor, by mesne assignments, to Plax Corporation, Hartford, Conn. Flexible bottle. 2,099,055; Nov. 16.
Ferngren, Enoch T., Jackson Heights, Long Island, N. Y., assignor, by mesne assignments, to Plax Corporation, Hartford, Conn. Container closure and cap. 2,099,056; Nov. 16.
Ferngren, Enoch T., Jackson Heights, Long Island, N. Y., assignor, by mesne assignments, to Plax Corporation, Hartford, Conn. Two part container construction. 2,099,057; Nov. 16.
Ferro Engineering Company, The. (See Lemmerman, Robert G., assignor.)
Fields, George W., Atlanta, Ga. Ratchet wrench. 2,099,601; Nov. 16.
Findlater, Stevenson, McKeesport, Pa., assignor to National Tube Company. Rolling mill guide. 2,099,473; Nov. 16.
Findora, John A., assignor to Stubnitz-Greene Spring Corporation, Adrian, Mich. Spring cushion. 2,099,200; Nov. 16.
Finley, Walter H., and C. H. Hamilton, Nashville, Tenn. Humidifying system and apparatus. 2,099,009; Nov. 16.
Firestein, Max, Beverly Hills, and S. Ferentzy, assignors to Max Factor & Co., Los Angeles, Calif. Photographic make-up. 2,099,010; Nov. 16.
Fischer, Hellmuth, Ilmenau, Germany. Luminescent glass. 2,099,602; Nov. 16.
Fischer, William H., assignor to Knapp-Monarch Company, St. Louis, Mo. Electrical appliance and base. 2,099,437; Nov. 16.
Fitch, Ellery R., Irwin, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Shockproof retardation controller. 2,099,390; Nov. 16.
Flagg, Frederick P., assignor to Waltham Watch Company, Waltham, Mass. Compensating spring. 2,099,474; Nov. 16.
Flaxman, Marcellus T. (See Barnes, C. D., and Flaxman.)
Fleming, Alexander M., Detroit, assignor to Chrysler Corporation, Highland Park, Mich. Adjustable seat. 2,099,107; Nov. 16.
Flint, James G. (See McWhirter, E. M. S., and Flint.)
Food Machinery Corporation. (See Paxton, Gerald C., assignor.)
Food Machinery Corporation. (See Paxton, Hale, assignor.)
Food Machinery Corporation. (See Stockdale, Harry C., assignor.)
Foote Company, The. (See Lundbye, Axel E., assignor.)

Foregger Co., The. (See Leech, Beverley C., assignor.)
Forest Wadding Company. (See Bangs, R. L., and Hermanson, assignors.)
Fortman, Gustave D., Philadelphia, Pa. Coating composition. 2,099,423; Nov. 16.
Fournet, Donald J., Lafayette, La. Mouth wiper for typesetting machines. 2,099,264; Nov. 16.
Foushee, William and M. B. Heckendorn, Cedar Point, Kans. Mower. 2098,948; Nov. 16.
Fowler, John C. (See Butler, Irvin E., assignor.)
Fox, Charles A., assignor to James R. Kearney Corporation, St. Louis, Mo. Pole splice. 2,099,108; Nov. 16.
Fracker, Henry E., assignor to National Technical Laboratories, Pasadena, Calif. Electrical testing machine. 2,099,298; Nov. 16.
Frantz, Walter A., Shaker Heights, and J. J. McCabe, assignors to The Apex Electrical Manufacturing Company, Cleveland, Ohio. Combined washing and drying machine. 2,099,163; Nov. 16.
Frederics, E., Inc. (See Frederics, Ernest O., assignor.)
Frederics, Ernest O., Bronxville, assignor to E. Frederics, Inc., New York, N. Y. Hair waving heater. 2,099,424; Nov. 16.
Frey, Charles N. (See Light, R. F., Frey, and Patitz.)
Frey, Frederick E., and W. F. Huppke, assignors to Phillips Petroleum Company, Bartlesville, Okla. Converting hydrocarbons. 2,098,959; Nov. 16.
Frey, Frederick E., and W. F. Huppke, assignors to Phillips Petroleum Company, Bartlesville, Okla. Converting hydrocarbons. 2,098,960; Nov. 16.
Freyssinet, Eugène, Neuilly-sur-Seine, France. Manufacture of molded pieces from mortars or concrete. 2,099,265; Nov. 16.
Fried, Jerome A., assignor to Allen Wales Adding Machine Corporation, Ithaca, N. Y. Governor for electric motors. 2,099,560; Nov. 16.
Friendly Knitting Mills, Inc. (See Reeb, Henry, assignor.)
Frissell, Robert R., assignor to The Barr Rubber Products Company, Sandusky, Ohio. Inflatable article and producing the same. 2,099,058; Nov. 16.
Fritts, Edwin C., Rochester, N. Y., assignor, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Reel mounting for motion picture projection apparatus. 2,099,299; Nov. 16.
Fritz, Karl, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Oscillation generator. 2,099,300; Nov. 16.
Fronmuller, Douglas, Middle Village, assignor to Coffee Products Corporation, New York, N. Y. Manufacture of concentrated coffee extract. 2,098,961; Nov. 16.
Fuehrer, George H., Phillipsburg, assignor to Ingersoll-Rand Company, Jersey City, N. J. Implement retainer. 2,099,333; Nov. 16.
Gabrielson, Carl and C. Waucquez, assignors to L. C. Smith & Corona Typewriters, Inc., Syracuse, N. Y. Typewriting machine. 2,099,011; Nov. 16.
Gagnier, George E. (See Place, Bion C., assignor.)
Gardner, Albert T., Streatham, assignor of one-half to E. W. Richardson, London, England. Platen-operating mechanism. 2,099,059; Nov. 16.
Garlock Packing Company, The. (See Stewart, Hugh T., assignor.)
Garner, Russell H., assignor to L. N. Partch, Pasadena, Calif., and R. H. Garner. Drafting machine. 2,099,266; Nov. 16.
Gasoline Products Company. (See Keith, Percy C., Jr.)
Gauschemann, Adolf B., Bayonne, N. J. Wax sweating oven. 2,099,603; Nov. 16.
Gautier, Trevor R., assignor to Nashua Gummed and Coated Paper Company, Nashua, N. H. Plural-length tape dispensing means. 2,099,647; Nov. 16.
Gebhardt, Johannes, assignor to Wanderer-Werke vorm. Winklhofer & Jaenicke Akt.-Ges, Schönau-Chemnitz, Germany. Calculating machine. 2,099,060; Nov. 16.
Geissen, Carl, Berlin-Schoneberg, assignor of one-half to Rheinmetall-Borsig Aktiengesellschaft/Werk Borsig, Berlin-Tegel, Germany. Train. 2,098,949; Nov. 16.
General Aniline Works, Inc. (See Krzikalla, H., Dehnert, and Vossen, assignors.)
General Aniline Works, Inc. (See Kunz, M. A., Krzikalla, and Limbacher, assignors.)
General Aniline Works, Inc. (See Lange, Max, assignor.)
General Aniline Works, Inc. (See Morschel, H., and Gund, assignors.)
General Electric Company. (See Bean, Robert F., assignor.)
General Electric Company. (See Griffith, R. C., and Bedford, assignors.)
General Electric Company. (See Metzger, Friedrich, assignor.)
General Electric Company. (See Pepper, Carl P., assignor.)
General Electric Company. (See Savage, Marion A., assignor.)
General Electric Company. (See Schiebeler, Carl, assignor.)
General Electric Company. (See Terpak, Stephen, assignor.)
General Electric Company. (See Travers, Fred H., assignor.)
General Electric Company. (See Turner, Harold R., assignor.)
General Electric Company. (See Valentine, Irving R., assignor.)
General Electric Company. (See van Hoorn, Fred G., assignor.)
General Electric Company. (See Zickrick, Lyall, assignor.)
General Motors Corporation. (See Kneisley, Richard D., assignor.)
General Steel Castings Corporation. (See Hallquist, Einar G., assignor.)
General Steel Castings Corporation. (See Sheehan, William M., assignor.)
Gerber, Dale C., assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 2,099,391; Nov. 16.
Gerth, Felix. (See Hahnemann, W. M., and Gerth.)
Getaz, James L., Marysville, Tenn. Absorption refrigerating machine. 2,099,201; Nov. 16.
Gevaert Photo-Production N. V. (See Schwarz, Georg.)
Gibboney, Thomas F. (See Keen, T. B., and Gibboney.)
Giesen, Johann, H. Hanisch, and M. Daily, Leuna, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Purification of synthetically produced alcohols. 2,099,475; Nov. 16.
Gilbert, Mark L., assignor to Gil-Boat Company, Holland, Mich. Boat and constructing the same. 2,099,438; Nov. 16.
Gilbert, Walter V. (See Pearson, R. E., and Gilbert.)
Gil-Boat Company. (See Gilbert, Mark L., assignor.)
Glowka, Martin, New York, N. Y. Waterproof spat. 2,099,476. Nov. 16.
Goggin, Frederick. (See Bruening, Lee P., assignor.)
Goldhammer, Leo, Munich, Germany, assignor to Agfa Ansco Corporation, Binghamton, N. Y. Pasting press. 2,099,439; Nov. 16.
Good, John N., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid pressure brake. 2,099,392; Nov. 16.
Goodman, Leon, assignor to Crystal Tube Mfg. Co., Chicago, Ill. Bag construction. 2,099,425; Nov. 16.
Goodman Manufacturing Company. (See Cartlidge, Frank, assignor.)
Goodrich, Albert S., and C. R. Tait, assignors to Hammermill Paper Company, Erie, Pa. Optical testing. 2,099,012; Nov. 16.
Gordon, Arthur, Chicago, Ill. Waste trap. 2,099,061; Nov. 16.
Gordon, Hiram, assignor to The Walker T. Dickerson Company, Columbus, Ohio. Mechanism for laying shoe sole channels. 2,099,393; Nov. 16.
Gordon, Hiram, assignor to The Walker T. Dickerson Company, Columbus, Ohio. Shank stiffener. 2,099,394; Nov. 16.
Gormley, John B., Boston, Mass. Shaving device. 2,099,334; Nov. 16.
Gould, David F., Riverton, N. J., assignor to The Barrett Company, New York, N. Y. Obtaining para-cresol from tar acid mixtures. 2,099,109; Nov. 16.
Government of the United States, Henry A. Wallace, for the. (See Hellbach, Rudolph, assignor.)
Graham, Charles, Stockton, Calif. Water clarifier. 2,099,062; Nov. 16.
Green, Vernor E., assignor to Little Falls Manufacturing Company, Inc., Little Falls, N. Y. Undergarment and the like. 2,099,110; Nov. 16.
Grey, Harold N., New York, N. Y. Watchcase. 2,099,515; Nov. 16.
Griffith, Arthur C., assignor to United States Gypsum Company, Chicago, Ill. Vault construction. 2,099,648; Nov. 16.
Griffith, Rolland C., and B. D. Bedford, Schenectady, N. Y., assignor to General Electric Company. Electric valve converting apparatus. 2,099,561; Nov. 16.
Gruse, William A. (See Hjerpe, E. B., and Gruse.)
Gruyer, Jean M., assignor to Victor Simon, Lyon, France. Change speed chain gearing for bicycles and the like. 2,099,477; Nov. 16.
Gulf Oil Corporation. (See Hjerpe, E. B., and Gruse, assignors.)
Gulf Research & Development Company. (See Rusler, George W., assignor.)
Gund, Felix. (See Morschel, H., and Gund.)
Gunning, Russell, Tipton, Ind. Tractor operated hay loader. 2,099,604; Nov. 16.
Gurian, William, New York, N. Y. Culotte. 2,099,478; Nov. 16.
Gustavson, Alvin N., Jamestown, N. Y., assignor to Automatic Voting Machine Corporation. Party selector mechanism for voting machines. 2,099,202; Nov. 16.
Haagen, Charles W., assignor to S. L. Allen & Co., Inc., Philadelphia, Pa. Fertilizer distributor. 2,099,013; Nov. 16.
Hackett, Bernard A., Detroit, Mich. Vending machine. 2,099,267; Nov. 16.
Hackett, Harry, New York, N. Y. Timing and signaling device. 2,099,516; Nov. 16.
Haessler, Walter M. (See Neal, J. F., and Haessler.)
Hahnemann, Walter M., Berlin-Marienfelde, and F. Gerth, assignors to C. Lorenz Aktiengesellschaft, Berlin-Tempelhof, Germany. System for high frequency transmissions. 2,099,395; Nov. 16.
Haines, Harold F., Olympia, Wash. Attachment for smoking pipes. 2,099,203; Nov. 16.

Hall, Charles L., Detroit, Mich., assignor to United-Carr Fastener Corporation, Cambridge, Mass. Ceiling installation and fastener for the same. 2,099,649; Nov. 16.

Hall, Charles L., Detroit, Mich., assignor to United-Carr Fastener Corporation, Cambridge, Mass. Cushion tufting structure. 2,099,650; Nov. 16.

Hallquist, Elnar G., Wallingford, Pa., assignor to General Steel Castings Corporation, Granite City, Ill. Railway vehicle structure. 2,099,164; Nov. 16.

Halsam Products Company. (See Paulson, Nils I., assignor.)

Halse, Ernest. (See Thorp, G., and Halse.)

Hamersley, Carl S., New York, N. Y., and S. C. Fairbanks, Passaic, N. J.; said Fairbanks assignor to said Hamersley. Paper wrapper for commodities. 2,099,301; Nov. 16.

Hamilton, Charles H. (See Finley, W. H., and Hamilton.)

Hamilton, John R. (See Lowe, E. A., and Hamilton.)

Hamilton, William S. H., Larchmont, and F. W. Butt, Woodside, L. I., New York, assignors to The New York Central Railroad Company. Centering device for swivel trucks. 2,099,361; Nov. 16.

Hammarsjö, Erik A., Stockholm, Sweden. Press for soling shoes. 2,099,302; Nov. 16.

Hammermill Paper Company. (See Goodrich, A. S., and Tait, assignors.)

Hammond, Laurens, Chicago, Ill. Multiple key switch. 2,099,204; Nov. 16.

Hanisch, Helmut. (See Giesen, J., Hanisch, and Dally.)

Hansen, Fred E., Lakewood, Ohio. Hose coupling. 2,099,335; Nov. 16.

Hanson, Kenneth C., Clairinch, High Pine Close, Weybridge, England. Razor. 2,099,605; Nov. 16.

Hardwick, Christopher L., Cleveland, Tenn. Stove. 2,099,440; Nov. 16.

Harley, Maldon C., Cranford, England. Aircraft lamp. 2,099,362; Nov. 16.

Harper, Philip S., Chicago, Ill. Gas burner. 2,099,205; Nov. 16.

Hart, Fred E., Los Angeles, Calif. Combined tooth brush holder and sterilizer. 2,099,336; Nov. 16.

Hastings Manufacturing Company. (See Phillips, Harold P., assignor.)

Hatch, Raymond S., Longview, assignor to Weyerhaeuser Timber Company, Tacoma, Wash. Producing vanillin from waste sulphite liquor. 2,099,014; Nov. 16.

Hayes, Orril H., Damariscotta, Maine. Floor construction. 2,099,517; Nov. 16.

Hazeltine Corporation. (See Wheeler, Harold A., assignor.)

Hazlett, George W., assignor of one-half to Dr. W. W. Dant, Muscatine, Iowa. Globe chronometer. 2,099,518; Nov. 16.

H'Doubler, Charles W., and G. I. Mills, Springfield, Mo. Typewriting machine. 2,099,262; Nov. 16.

Hebenstreit, William J. (See Heinkel, J., and Hebenstreit.)

Heckendorn, Marson B. (See Foushee, W., and Heckendorn.)

Heckert, Winfield W., Arden, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Textile. 2,099,363; Nov. 16.

Heckert, Winfield W., Ardentown, assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Cellulosic product and preparing same. 2,099,441; Nov. 16.

Hedberg, Carl W. J., Bound Brook, N. J., assignor to Research Corporation, New York, N. Y. Insulator compartment. 2,099,063; Nov. 16.

Hedblom, Lars O., assignor of one-half to G. A. Carlson, Detroit, Mich. Fuel pump. 2,099,206; Nov. 16.

Hedgpeth, Theron L., Oak Park, assignor to Duro Metal Products Company, Chicago, Ill. Woodworking tool. 2,099,519; Nov. 16.

Hefele, John R., Brooklyn, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Gaseous discharge device. 2,099,111; Nov. 16.

Heinkel, John, St. Louis, Mo., and W. J. Hebenstreit, Kansas City, Kans. Curb box for service pipe shutoffs in water systems. 2,099,479; Nov. 16.

Heift, Ernst, Berlin-Halensee, Germany, assignor, by mesne assignments, to "Unichem" Chemikalien Handels A.-G., Zurich, Switzerland. Plastic material and producing the same. 2,099,651; Nov. 16.

Hellbach, Rudolph, Washington, D. C., assignor to H. A. Wallace, for the Government of the United States. Carrying out aeration in biochemical processes. 2,098,962; Nov. 16.

Hem, Halvor O., assignor to Toledo Scale Manufacturing Company, Toledo, Ohio. Device for maintaining the condition of level of supports. 2,099,562; Nov. 16.

Henderson, Ray M., Houston, Tex. Refrigerator drip catcher and air circulation control. 2,099,165; Nov. 16.

Hendrycy, Clara F., New York, N. Y. Collar and the like. 2,099,520; Nov. 16.

Henning, Francis L., Boston, and G. W. Bezanson, Winchester, Mass.; said Henning assignor to said Bezanson. Pressure responsive mixing valve. 2,099,563; Nov. 16.

Henry, Nelson B., Columbus, Ga. Seed cotton cleaner-drier. 2,099,064; Nov. 16.

Henson, West, and W. Nelson, Jr., New York, N. Y. Paper holder. 2,099,268; Nov. 16.

Hercules Powder Company. (See Humphrey, Irvin W., assignor.)

Hercules Powder Company. (See Speicher, John K., assignor.)

Hercules Powder Company. (See Spellacy, John R., assignor.)

Hercules Powder Company. (See Tinsley, John S., assignor.)

Herkimer, Harold W., and H. E. Holcomb, Niagara Falls, N. Y. Baseball bat. 2,099,521; Nov. 16.

Hermanson, William A. (See Bangs, R. L., and Hermanson.)

Hermas Machine Company. (See Mason, G. H., Shand, and Johnson.)

Herr, James H. (See Bruner, D. L., and Herr.)

Herthel, Eugene C., Flossmoor, Ill., assignor to Sinclair Refining Company, New York, N. Y. Cracking hydrocarbon. 2,099,426; Nov. 16.

Hewitt, Ellis E., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid pressure brake. 2,099,396; Nov. 16.

Hewitt, Ellis E., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid pressure brake. 2,099,397; Nov. 16.

Hexter, Paul L., assignor to The Arco Company, Cleveland, Ohio. Surface contact gauge for liquids. 2,098,963; Nov. 16.

Heywood-Wakefield Company. (See Bell, Alfred B., assignor.)

Highway Trailer Company. (See Allen, Edwin H., assignor.)

Hildyard, William A., Brunswick, assignor to Strate-Stroke Pumps and Engines Proprietary Limited, Footscray, Victoria, Australia. Reciprocating engine or pump. 2,099,481; Nov. 16.

Hill-Diesel Engine Company. (See Olds, Ransom E., assignor.)

Hill, Harry S., and C. H. Williams, Springfield, Ohio. Valve grinder. 2,099,207; Nov. 16.

Hill, Hughes H., Augusta, Ga. Pass book. 2,099,482; Nov. 16.

Hill, Rowland, and E. F. Walker, Blackley, Manchester, assignors to Imperial Chemical Industries, Limited, London, England. Artificial resins. 2,098,964; Nov. 16.

Hill, Walter M., Randallstown, Md., assignor to Western Electric Company, Incorporated, New York, N. Y. Apparatus for testing insulation. 2,099,112; Nov. 16.

Hillmer, Frederick B. (See de Simó, M., and Hillmer.)

Hinde, Marion K., Atlanta, Ga. Automatic circuit breaker. 2,099,483; Nov. 16.

Hjerpe, Eric B., Pittsburgh, and W. A. Gruse, Wilkinsburg, assignors, by mesne assignments, to Gulf Oil Corporation, Pittsburgh, Pa. Manufacturing propyl chloride. 2,099,480; Nov. 16.

Hoffman, Roger K., Moscow, Idaho. Neckwear display clip. 2,099,269; Nov. 16.

Hoft, Maurice A., Indianapolis, Ind. Refuse burning furnace. 2,099,522; Nov. 16.

Hohl, Russell L., New York, N. Y. Building construction. 2,099,337; Nov. 16.

Hohwart, William, Woodside, N. Y. Self-sealing envelope. 2,099,303; Nov. 16.

Hokerk, Lynde D., Utica, assignor to Kerk Guild, Inc., Whitesboro, N. Y. Toilet appliance. 2,099,484; Nov. 16.

Holcomb, Harlan E. (See Herkimer, H. W., and Holcomb.)

Holden, William H. T., New York, N. Y., assignor to American Telephone and Telegraph Company. Distributor device. 2,099,065; Nov. 16.

Holinagel, Theodore C., Milwaukee, Wis. Barrel. 2,099,113; Nov. 16.

Holmes, John R., Highland Park, assignor to Chrysler Corporation, Detroit, Mich. Vehicle wheel suspension. 2,099,114; Nov. 16.

Holophane Company. (See Rolph, Thomas W., assignor.)

Holsen, Ralph P., Milwaukee, Wis. Bicycle lock. 2,099,606; Nov. 16.

Hoover Company, The. (See Gerber, Dale C., assignor.)

Hoover Company, The. (See Smellie, Donald G., assignor.)

Hoover Company, The. (See White, Harry B., assignor.)

Horr, John V., Hastings-on-Hudson, assignor to Elnson-Freeman Co., Inc., Long Island City, N. Y. Cardboard display device. 2,099,015; Nov. 16.

Horsfall, William H. D., and M. B. Jackson, Toronto, Ontario, Canada. Apparatus for preventing the oxidation of metals. 2,099,208; Nov. 16.

Houde Engineering Corporation. (See Peo, Ralph F., assignor.)

Houghton, Donald M., Newton, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Composite strand. 2,099,016; Nov. 16.

Howard, William A. (See Roberts, T. B., and Howard.)

Howell, Hugh A., Berwyn, assignor to United Pressed Products Co., Chicago, Ill. Loud speaking telephone system. 2,099,442; Nov. 16.

Howse, Curtis L., W. P. Thomas, and F. Bowers, assignors to Diamond Power Specialty Corporation, Detroit, Mich. Gas treating apparatus. 2,099,667; Nov. 16.

Huenlich, Charles, Bloomfield, assignor to Thomas A. Edison, Incorporated, West Orange, N. J. Phonograph. 2,099,564; Nov. 16.

Hufferd, George H., Detroit, Mich., assignor to Thompson Products, Incorporated, Cleveland, Ohio. Lubricated rubber joint. 2,099,209; Nov. 16.

Hujo, Stephen, Jr., Clarksburg, W. Va. Goblet foot forming device. 2,099,485; Nov. 16.

Humphrey, Irvin W., assignor to Hercules Powder Company, Wilmington, Del. Hydrogenated resin esters and producing. 2,099,066; Nov. 16.

Humphrey, Irvin W., assignor to Hercules Powder Company, Wilmington, Del. Hydrogenated resin esters and their production. 2,099,067; Nov. 16.

Humphrey, Irvin W., assignor to Hercules Powder Company, Wilmington, Del. Synthetic resin and method of producing. 2,099,486; Nov. 16.

Hunter, Edward, Springfield, Ohio. Registering photographic reproductions used in process of color printing. 2,099,364; Nov. 16.

Huppke, Walter F. (See Frey, F. E., and Huppke.)

Huttinger, Charles A., Lakewood, assignor to Acme Rayon Corporation, Cleveland, Ohio. Apparatus for the liquid-treatment of fine filamentous thread. 2,099,338; Nov. 16.

Huttinger, William R., Lansdowne, Pa. Switch. 2,099,607; Nov. 16.

I. G. Farbenindustrie Aktiengesellschaft. (See Busse, Ferdinand, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Giesen, J., Hanisch, and Dally, assignors.)

I. G. Farbenindustrie Aktiengesellschaft. (See Rumcheidt, C., and Strzyzewski, assignors.)

Ilford Limited. (See Levy, L. A., and West, assignors.)

Imperial Chemical Industries Limited. (See Hill, R., and Walker, assignors.)

Inga Internationale Nahrungs- und Genussmittel-Aktiengesellschaft. (See Jezler, Hubert, assignor.)

Ingersoll-Rand Company. (See Carpenter, Allan O., assignor.)

Ingersoll-Rand Company. (See Fuehrer, George H., assignor.)

Ingersoll-Rand Company. (See MacLean, John A., assignor.)

Inman, Harry A. and W. H., assignors to Bloomer Bros. Company, Newark, N. Y. Carton construction. 2,099,166; Nov. 16.

Inman, William H. (See Inman, Harry A. and W. H.)

International Patents Development Company. (See Ebert, C., and Newkirk, assignors.)

International Standard Electric Corporation. (See Mildner, Raymond C., assignor.)

Ireland, Murray, St. Paul, Minn., assignor to McGraw Electric Company, Chicago, Ill. Automatic electric toaster. 2,099,210; Nov. 16.

Ives, Herbert E., Montclair, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Communication system. 2,099,115; Nov. 16.

Jackson, Maunsell B. (See Horsfall, W. H. D., and Jackson.)

James, Cyril H., and W. I. Bacon, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating upon shoe parts. 2,099,017; Nov. 16.

James, Henry C., Jr., Oakland, Calif., assignor to National Products, Inc. Clock. 2,098,965; Nov. 16.

Janssen, Henry, assignor to Textile Machine Works, Wyomissing, Pa. Support for hosiery display forms. 2,099,652; Nov. 16.

Jensen, Peter A., Wall Lake, Iowa. Fastening device. 2,099,398; Nov. 16.

Jezler, Hubert, Zurich, assignor to the firm Inga Internationale Nahrungs- und Genussmittel-Aktiengesellschaft, Schaffhouse, Switzerland. Collapsible container. 2,099,523; Nov. 16.

Johnson, Carl W., Glencoe, and G. M. Smith, Congress Park, Ill.; said Smith assignor to said Johnson. Automobile jack. 2,099,487; Nov. 16.

Johnson, Clarence N. (See Mason, G. H., Shand, and Johnson.)

Joley, Albert N., Springfield, Mass., assignor to The Diamond Match Company, Wilmington, Del. Wire container. 2,099,339; Nov. 16.

Jones, Edwin P., Garden City, assignor to Champagne Paper Corporation, New York, N. Y. Manufacturing paper pulp. 2,099,399; Nov. 16.

Jones, Edwin P., Garden City, assignor to Champagne Paper Corporation, New York, N. Y. Preparation of paper pulp. 2,099,400; Nov. 16.

Jungmann, Martin, Vienna, Austria. Orthopedic correcting appliance. 2,099,401; Nov. 16.

Kalamazoo Paraffine Company. (See Macomber, Lewis H., assignor.)

Kalisz, Steve. (See Crenshaw, Benjamin A., assignor.)

Kalle & Co. Aktiengesellschaft. (See Kögel, G., and Zahn, assignors.)

Kalinbach, Lloyd R., West Englewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Clamp. 2,099,116; Nov. 16.

Karr, Charles D., Holland, Mich. Bedding pad. 2,099,427; Nov. 16.

Kasdan, Nathan, New York, N. Y., and R. F. Landwehr, Laurelton, L. I., assignors to Majestic Metal Specialties Inc., New York, N. Y. Lipstick holder. 2,099,488; Nov. 16.

Kautz, Karl, Massillon, assignor to Republic Steel Corporation, Youngstown, Ohio. Enameling. 2,099,340; Nov. 16.

Kearney, James R., Corporation. (See Binkley, William J., assignor.)

Kearney, James R., Corporation. (See Fox, Charles A., assignor.)

Keen, Thomas B., New York, N. Y., and T. F. Gibboney, Reedsville, Pa. Blanket. 2,099,609; Nov. 16.

Keene, Kenneth L. (See Bradley, C. E., and Keene.)

Keith, Percy C., Jr., Peapack, assignor to Gasoline Products Company, Inc., Newark, N. J. Cracking oils in the vapor phase. 2,099,668; Nov. 16.

Keithly, Fred D., Forest Hills, N. Y. Fireplace screen. 2,099,068; Nov. 16.

Keller, Joseph W., Merion, assignor to Pratt Food Company, Philadelphia, Pa. Pill or tablet. 2,099,402; Nov. 16.

Keller, Joseph W., Merion, assignor to Pratt Food Company, Philadelphia, Pa. Split action tablet. 2,099,403; Nov. 16.

Keller, William H., Inc. (See Shaff, Ernest H., assignor.)

Keller, William J., St. Louis, Mo. Lateral draft burner. 2,099,608; Nov. 16.

Kelsay, Le Roy W., Summit, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Terminal mounting. 2,099,117; Nov. 16.

Kemper, Käthe, Halver, assignor to F. E. Krauss, Schwarzenberg, Saxony, Germany. Linen wringing machine. 2,099,365; Nov. 16.

Kennedy, George W., Philadelphia, Pa. Toilet assembly. 2,099,118; Nov. 16.

Kennedy, John F., Evanston, Ill. Fluid heater. 2,099,018; Nov. 16.

Kenyon, William O., and R. H. Van Dyke, Rochester, N. Y., assignors, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Colored cellulose ester sheeting. 2,099,341; Nov. 16.

Kepler, Lionel J., Dayton, Ohio. Compensating wheel mounting. 2,099,304; Nov. 16.

Kerk Guild, Inc. (See Hokerk, Lynde D., assignor.)

Kilgen, George J., et al. (See Langdon, Jesse D., assignor.)

King, Harold L., Glen Ridge, A. Sharp, Bayonne, and K. Schnorr, Belleville, N. J. Yeast molding and cutting machine. 2,099,119; Nov. 16.

Kingman, Russell B., Orange, N. J. Polishing pad. 2,098,966; Nov. 16.

Kinzie, Charles, Niagara Falls, assignor to The Titanium Alloy Manufacturing Company, New York, N. Y. Pigments and making same. 2,099,019; Nov. 16.

Kirby, James E., and J. H. Werntz, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Flotation process. 2,099,120; Nov. 16.

Kitson Company. (See Werring, Francis W., assignor.)

Kivley, Ray C., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Material handling apparatus. 2,099,121; Nov. 16.

Klein, Hermann, Stuttgart-Feuerbach, assignor to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Starter for internal-combustion engines. 2,099,524; Nov. 16.

Knapp-Monarch Company. (See Fischer, William H., assignor.)

Kneisley, Richard D., assignor to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,099,653; Nov. 16.

Knowles, Albert G. (See Clark, C. L., and Knowles.)

Koepke, William F., assignor of thirty per cent to A. Berg, New York, N. Y. Portable electric head lamp. 2,099,167; Nov. 16.

Kögel, Gustav, Baden-Baden, and R. Zahn, Wiesbaden, assignors to Kalle & Co. Aktiengesellschaft, Wiesbaden-Biebrich, Germany. Light sensitive colloid layers and tanned pictures therefrom. 2,099,404; Nov. 16.

Kraft, Frederick G., Richmond, Va., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Valve. 2,099,443; Nov. 16.

Krall, Reginald F. (See Middleton, C. C., and Krall.)

Krauss, Friedrich E. (See Kemper, Käthe, assignor.)

Kreisler, Jacques, New Rochelle, N. Y. Roll top container. 2,099,122; Nov. 16.

Krzikalla, Hans. (See Kunz, M. A., Krzikalla, and Limbacher.)

Krzikalla, Hans, H. Dehnert, and D. Vossen, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Production of water-soluble azo dyestuffs. 2,099,525; Nov. 16.

Kunz, Max A., Mannheim, and H. Krzikalla and W. Limbacher, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Azo dyestuffs. 2,099,168; Nov. 16.

Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Elliott Fisher Company, New York, N. Y. Combined typewriting and computing machine. 2,099,123; Nov. 16.

Kurowski, Alfred G. F., Brooklyn, assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting and calculating machine. 2,099,565; Nov. 16.

Kurz, Konrad. (See Bach, S., and Kurz.)

Kutcher, Charles A., Sheridan, Wyo. Supercharger. 2,099,366; Nov. 16.

Lambert, Homer T., St. Joseph, Mich. Power transmission. 2,099,489; Nov. 16.

Lampl, Alfred, Berlin, Germany, assignor to Norma Electric Corporation, New York, N. Y. Electrical device. 2,099,305; Nov. 16.

Landreth, Morton L., Elmhurst, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Coin collector apparatus for use at telephone pay stations. 2,099,124; Nov. 16.

Landwehr, Richard F. (See Kasdan, N., and Landwehr.)

Lang, Henry T., assignor to Electric Vacuum Cleaner Company, Inc., Cleveland, Ohio. Vacuum cleaner. 2,099,566; Nov. 16.

Langdon, Jesse D., assignor of two-thirds to G. J. Kilgen and E. W. Todd, Los Angeles, Calif. Resilient light socket and bracket extension. 2,099,405; Nov. 16.

Langdon, Jesse D., assignor of two-thirds to G. J. Kilgen and E. W. Todd, Los Angeles, Calif. Light casing. 2,099,444; Nov. 16.

Lange, Fritz. (See Brasch, A., and Lange.)

Lange, Max, Frankfort-on-the-Main-Hochst, Germany, assignor to General Aniline Works, Inc., New York, N. Y. Azo-dyestuffs. 2,098,967; Nov. 16.

Langslow, Esther A. S., New York, N. Y. Pipe clip. 2,099,125; Nov. 16.

Lapidus, Jack, et al. (See Marsden, Leonard, assignor.)

Larsen, Gabriel, Springfield, N. J., assignor to L. E. Waterman Company, New York, N. Y. Forming tubes. 2,099,126; Nov. 16.

Larsson, Ernst A., assignor to The Ohio Brass Company, Mansfield, Ohio. Coupling mechanism. 2,099,490; Nov. 16.

Lavarack, Frederick C., Montclair, N. J., assignor to Railroad Accessories Corporation, New York, N. Y. Connecter. 2,099,526; Nov. 16.

Lawrence Duck Company. (See Barrell, William A., assignor.)

Lawton, Chester S., Ridgewood, N. J., assignor to The Western Union Telegraph Company, New York, N. Y. Method of and apparatus for laying submarine cables. 2,099,527; Nov. 16.

La Ducer, Arthur O., assignor to The Wiremold Company, Hartford, Conn. Wiremold lumiline reflector. 2,099,020; Nov. 16.

Landes, George M., Webb City, Mo. Rodent trap. 2,099,021; Nov. 16.

Ledder, William, St. Louis, Mo. Receptacle and socket for neon tubes. 2,099,610; Nov. 16.

Leech, Beverley C., Regina, Saskatchewan, Canada, assignor to The Foregger Co., Inc. Pharyngeal bulb gasway. 2,099,127; Nov. 16.

Lefranc, Jacques G. A., Paris, France. Compounding ceramic products. 2,099,367; Nov. 16.

Lemmerman, Robert G., Lakeline, assignor to The Ferro Engineering Company, Cleveland, Ohio. Refractory. 2,099,342; Nov. 16.

Leonard, Claud. (See Leonard, J. W., Butterworth, Leonard, and Wellford, H. A. and W. L., Jr.)

Leonard, Jesse W., W. R. Butterworth, Jr., C. Leonard, and H. A. and W. L. Wellford, Memphis, Tenn. Barrel stave crozer. 2,099,445; Nov. 16.

Leonhauser, Henry A. Baltimore, Md., assignor to The Ohio Brass Company, Mansfield, Ohio. Renewable and self-lubricating trolley shoe. 2,099,491; Nov. 16.

Leupold, Volpel and Company. (See Stevens, John C., assignor.)

Levin, Samuel. (See Cohn, S. H., and Levin.)

Levine, Irwin B., assignor to Wired Radio, Inc., New York, N. Y. Transmission system. 2,099,022; Nov. 16.

Levoy, Monroe B., Great Neck, N. Y. Picture crime mystery game. 2,099,611; Nov. 16.

Levy, Leonard A., and D. W. West, London, assignors of one-half to Ilford Limited, Ilford, Essex, England. Fluorescent substances. 2,099,023; Nov. 16.

Levy, René L., Montrouge, France, assignor to Société d'Inventions Aernautiques et Mecaniques S. I. A. M., Fribourg, (Suisse). Device for the automatic control of camber flaps and the like for airplanes. 2,099,368; Nov. 16.

Lewis, Robert R., Baldwin, assignor to Vulcan Proofing Company, New York, N. Y. Draw sheet for rotary printing presses. 2,099,024; Nov. 16.

Light, Robert F., Mount Vernon, C. N. Frey, Scarsdale, and G. J. Patitz, Peekskill, assignors to Standard Brands Incorporated, New York, N. Y. Treating liquid yeast. 2,099,025; Nov. 16.

Limbacher, Walter. (See Kunz, M. A., Krzikalla, and Limbacher.)

Limeses, Jose, A. M. M. T. M. Saralegui, and C. A. P. Del Cerro, Buenos Aires, Argentina. Sculpture. 2,099,612; Nov. 16.

Lion Agricultural Implements Limited. (See Penn, Philip, assignor.)

Lipton, Ruby. (See Lipton, Sarah, assignor.)

Lipton, Sarah, assignor to R. Lipton, New York, N. Y. Hat fastener. 2,099,128; Nov. 16.

Little Falls Manufacturing Company. (See Green, Vernor E., assignor.)

Lobdell-Emery Manufacturing Company, The. (See Swett, Earl W., assignor.)

Lockert, Frank B., Dallas, Tex. Illuminated street marker. 2,099,446; Nov. 16.

Loewus, Julian S., Atlanta, Ga. Eraser. 2,099,613; Nov. 16.

Logan, John W., Jr., Forest Hills, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Train brake system. 2,099,428; Nov. 16.

Lorenz, C., Aktiengesellschaft. (See Hahnemann, W. M., and Gerth, assignors.)

Lowe, Ernest A., and J. R. Hamilton, Cleveland Heights, assignor to Automatic Sprinkler Company of America, Cleveland, Ohio. Fire extinguishing and alarm apparatus. 2,099,069; Nov. 16.

Lucius, William L., Rochester, N. Y. Building construction and panel for use therein. 2,099,211; Nov. 16.

Luders, Alfred E., Stamford, Conn. Boat. 2,099,492; Nov. 16.

Lund, Nels B., Seaford, assignor to The Dorr Company, Inc., New York, N. Y. Sedimentation apparatus. 2,099,654; Nov. 19.

Lundbye, Axel E., assignor to The Foote Company, Inc., Nunda, N. Y. Transmission mechanism for power booms of concrete pavers. 2,099,070; Nov. 16.

Lundbye, Axel E., assignor to The Foote Company, Inc., Nunda, N. Y. Distributing means for concrete pavers. 2,099,071; Nov. 16.

Lutz, Wilmer A., Bucyrus, Ohio. Lime spreader. 2,099,369; Nov. 16.

Lycoming Manufacturing Company. (See Anderson, William, assignor.)

Lynn, Ewing K., East McKeesport, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Valve loader. 2,099,406; Nov. 16.

Lyon, George A., Allenhurst, N. J. Bumper guard. 2,099,212; Nov. 16.

Lyon, George R. (See Thies, H. R., and Lyon.)

MacClatchie, John W., Los Angeles, assignor to MacClatchie Manufacturing Company of California, Compton, Calif. Sealing means. 2,099,169; Nov. 16.

MacClatchie Manufacturing Company of California. (See MacClatchie, John W., assignor.)

MacFadden, Wilford C., Philadelphia, Pa., assignor to United-Carr Fastener Corporation, Cambridge, Mass. Mounting bracket and installation thereof. 2,099,655; Nov. 16.

MacLean, John A., Hampton, assignor to Ingersoll-Rand Company, Jersey City, N. J. Refrigerating apparatus. 2,099,567; Nov. 16.

Macomber, Lewis H., assignor to Kalamazoo Paraffine Company, Kalamazoo, Mich. Wax cake. 2,099,213; Nov. 16.

Magnetic Analysis Corporation. (See Zuschlag, Theodor, assignor.)

Maneval, Charles H., assignor to Standard Novelty Works, Duncannon, Pa. Coaster sled. 2,099,656; Nov. 16.

Mahoney, John C., Westfield, N. J., assignor to Henry Vogt Machine Co. Inc., Louisville, Ky. Double pipe heat exchanger. 2,099,493; Nov. 16.

Majestic Metal Specialties, Inc. (See Kasdan, N., and Landwehr, assignors.)

Majewski, Joseph M., Jr., assignor to Foster L. Talge, doing business as Rival Manufacturing Company, Kansas City, Mo. Fruit juice extractor. 2,099,170; Nov. 16.

Mallinckrodt, Charles O., Forest Hills, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Transmission regulation. 2,098,968; Nov. 16.

Markel, Orville, Chicago, W. H. Phillips, Oak Park, and J. M. Bandish, Chicago, Ill. Condenser tube seal. 2,099,026; Nov. 16.

Marks, William H. (See Packert, R. A., and Marks.)

Marsden, Leonard, Newton-le-Willows, Lancashire, assignor of one-third to J. Lapidus, Manchester, England, and one-third to P. Marsden, Edmonton, Alberta, Canada. Stamping and embossing machine and in particular biscuit making machines. 2,099,614; Nov. 16.

Marsden, Percival, et al. (See Marsden, Leonard, assignor.)

Marshall, William, Seattle, Wash. Register. 2,099,306; Nov. 16.

Marvin, John T. (See Matthews, B. L., and Marvin.)

Mason, George H., Glen Rock, and J. S. Shand, Paterson, N. J., and C. N. Johnson, New Brighton, N. Y., assignors to Hermas Machine Company, Hawthorne, N. J. Fabric shearing machine. 2,099,027; Nov. 16.

Master Builders Company, The. (See Scripture, Edward W., Jr., assignor.)

Matsuyama, Frank A., San Francisco, Calif. Police weapon. 2,099,447; Nov. 16.

Matthes, Samuel S., assignor to The Ohio Brass Company, Mansfield, Ohio. Overhead trolley system. 2,099,494; Nov. 16.

Matthews, Birchard L., Lakewood, and J. T. Marvin, Fairview Village, assignors to The Patrol Valve Company, Cleveland, Ohio. Combination gas cock and thermostatic control means. 2,099,171; Nov. 16.

Mazzie, Gabriel M. (See Nissley, H. H., and Mazzie.)

McAdams, Harry, Philadelphia, assignor to The Nolde and Horst Company, Reading, Pa. Yarn-change feeding mechanism for circular knitting machines. 2,099,307; Nov. 16.

McAdams, James, Chicago, Ill. Beer tap adapter. 2,099,528; Nov. 16.

McAllister, Johanna C., Salt Lake City, Utah. Garment hanger slip-on cover. 2,099,308; Nov. 16.

McAllister, Walter H., Wyoming, assignor to The Procter & Gamble Company, Cincinnati, Ohio. Forming the sulphuric esters of unsaturated higher alcohols. 2,099,214; Nov. 16.

McCallum & Robinson, Inc. (See Robinson, William W., assignor.)

McCabe, John J. (See Frantz, W. A., and McCabe.)

McCabe, John J., and A. W. Seyfried, assignors to The Apex Electrical Manufacturing Company, Cleveland, Ohio. Suction sweeper. 2,099,172; Nov. 16.

McCarthy, Justin J., Boston, Mass. Finger print powder. 2,099,028; Nov. 16.

McCluer, Wilbert B., and M. R. Fenske, State College, Pa., assignor to Pennsylvania Petroleum Research Corporation. Treating mineral oils. 2,099,615; Nov. 16.

McCordock, Howard A., Webster Groves, Mo. Repeating back for cameras. 2,099,072; Nov. 16.

McCormick, Hugh M., et al. (See Tapp, Lora E., assignor.)

McDarment, Allan M. (See Wright, Jack, assignor.)

McDerment, James H., assignor to The Swartwout Company, Cleveland, Ohio. Ventilator. 2,099,309; Nov. 16.

McFarlane, Robert B., Toronto, Ontario, Canada. Door lock. 2,099,343; Nov. 16.

McGill Manufacturing Company. (See Robinson, Thomas L., assignor.)

McGraw Electric Company. (See Ireland, Murray, assignor.)

McKay, Edgar J., Short Hills, N. J. Tag. 2,099,029; Nov. 16.

McMullen, Carlton L., Llanerch, Pa. Fluid dispensing apparatus. 2,099,129; Nov. 16.

McNamee, Owen A., Worcester, Mass. Apparatus for coating wire. 2,099,270; Nov. 16.

McNeil, Claude P., Whiting, Ind., and S. A. Montgomery, Wood River, assignors to Standard Oil Company, Chicago, Ill. Asphalt oxidation. 2,099,448; Nov. 16.

McNeil, Gordon I. (See Teisher, A. A., and McNeil.)

McWhirter, Eric M. S., and J. G. Flint, Aldwych, London, England, assignors to Western Electric Company, Incorporated, New York, N. Y. Printing telegraph manual exchange system. 2,099,130; Nov. 16.

Mensing, Frederick D., Philadelphia, Pa. Heat exchange system. 2,099,310; Nov. 16.

Merck & Co. Inc. (See Dalmer, O., Diehl, and Pieper, assignors.)

Merrimac Hat Corporation. (See Corporon, George J., assignor.)

Mestrezat, John W. (See O'Connell, Thomas J., assignor.)

Metalectric Corporation, The. (See Watson, Edgar E., assignor.)

Metzger, Friedrich, Berlin-Tempelhof, Germany, assignor to General Electric Company. Reactance element control. 2,099,568; Nov. 16.

Metzger, Otto, assignor to Vereinigte Deutsche Metallwerke Aktiengesellschaft, Nuremberg, Germany. Making dry cells. 2,099,449; Nov. 16.

Meyer, Paul, New York, N. Y. Article of furniture. 2,099,450; Nov. 16.

Meyer, Walter A. (See Moran, R. C., and Meyer.)

Middleton, Charles C., and R. F. Krall, assignors to Woodall-Duckham (1920) Limited, London, England. Operating device for use in connection with coke-oven doors. 2,099,271; Nov. 16.

Midgley, Walter. (See Woodeson, W. A., and Midgley.)

Mildner, Raymond C., London, England, assignor to International Standard Electric Corporation, New York, N. Y. Electric cable. 2,099,407; Nov. 16.

Miller, Stuart P., Scarsdale, assignor to The Barrett Company, New York, N. Y. Thick butt shingle. 2,099,131; Nov. 16.

Miller, Stuart P., Scarsdale, assignor to The Barrett Company, New York, N. Y. Making clutch facings, brake linings, and like products. 2,099,132; Nov. 16.

Mills, Bert E., Oak Park, assignor to Mills Novelty Company, Chicago, Ill. Selective vending machine. 2,099,344; Nov. 16.

Mills, Bert E., Oak Park, assignor to Mills Novelty Co., Chicago, Ill. Table leg construction. 2,099,657; Nov. 16.

Mills, George I. (See H'Doubler, C. W., and Mills.)

Mills Novelty Company. (See Mills, Bert E., assignor.)

Mirel, Louis L., Brooklyn, N. Y. Folding necktie holder. 2,099,495; Nov. 16.

Mishawaka Rubber and Woolen Manufacturing Company. (See Bradley, C. E., and Keene, assignors.)

Mitchell, Walter C., Los Angeles, Calif. Electric arc lamp. 2,099,073; Nov. 16.

Modern Equipment Corporation. (See Myers, Don D., assignor.)

Monforts, A. (See Bernstein, Ernst, assignor.)

Monnier, Vital, Lausanne, Switzerland. Phial. 2,099,370; Nov. 16.

Monowatt Electric Corporation, The. (See Benander, George B., assignor.)

Monsanto Chemical Company. (See Sibley, Robert L., assignor.)

Montgomery, Samuel A. (See McNeil, C. P., and Montgomery.)

Moore, James E., Rome, Ga., assignor to Tubize Chatillon Corporation, New York, N. Y. Producing hairy rayon yarn. 2,099,215; Nov. 16.

Moran, Robert C., Wenonah, and W. A. Meyer, Paulsboro, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, New York, N. Y. Recovery of sulphonic acids. 2,099,529; Nov. 16.

Morgan Construction Company. (See Morgan, M., and Whalen, assignors.)

Morgan, Myles, Worcester, and J. N. Whalen, Boylston, assignors to Morgan Construction Company, Worcester, Mass. Shears. 2,099,496; Nov. 16.

Morrison, Charles C., Easton, Pa., assignor to Binney and Smith Co., New York, N. Y. Applying paint. 2,099,030; Nov. 16.

Morschel, Heinrich, Leverkusen-Wiesdorf, and F. Gund, Cologne-Deutz, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Water-insoluble azo-dyestuffs and fiber dyed therewith. 2,099,272; Nov. 16.

Muck, Otto, Marquartstein, L. F. Muller and P. Zier, Munich, Germany. Time and zone metering device. 2,099,616; Nov. 16.

Mueller, Clarence S., Point Place, Ohio. Chaser grinding means. 2,099,074; Nov. 16.

Mueller, Louis A., assignor to The Springfield Leather Products Company, Springfield, Ohio. Billfold. 2,099,569; Nov. 16.

Muller, Ludwig F. (See Muck, O., Muller, and Zier.)

Müller, Richard. (See Zellmann, R., and Müller.)

Mullins Manufacturing Corporation. (See Clark, C. L., and Knowles, assignor.)

Multiposter Advertising Corporation. (See Roberts, Charles, assignor.)

Munro, Alexander L., and H. H. Rumpel, assignors to Smith Engineering Works, Milwaukee, Wis. Granular material washer. 2,099,133; Nov. 16.

Murray, Albert C., Wakefield, assignor, by mesne assignments, to American Stay Company, Boston, Mass. Making shoe trimmings and the like. 2,098,969; Nov. 16.

Murray Corporation of America, The. (See Widman, Charles H., assignor.)

Murray, John D., assignor to Murray Liquafilm Corporation, Chicago, Ill. Coatings. 2,099,570; Nov. 16.

Murray Liquafilm Corporation. (See Murray, John D., assignor.)

Myer, James E., assignor to Timber Engineering Company, Washington, D. C. Timber connecter. 2,099,273; Nov. 16.

Myers, Don D., Toledo, assignor to Modern Equipment Corporation, Defiance, Ohio. Automobile lift. 2,099,274; Nov. 16.

N. V. Philips, Gloeilampenfabrieken. (See de Lange, Cornelis, assignor.)

Nash-Kelvinator Corporation. (See Philipp, Lawrence A., assignor.)

Nashua Gummed and Coated Paper Company. (See Gautier, Trevor R., assignor.)

Nass, Frederick H., and R. Campbell, Detroit, Mich. Metal testing machine. 2,099,216; Nov. 16.

National Products, Inc. (See James, Henry C., Jr., assignor.)

National Standard Company. (See Pierce, Robert C., assignor.)

National Technical Laboratories. (See Fracker, Henry E., assignor.)

National Tube Company. (See Bannister, Bryant, assignor.)

National Tube Company. (See Boax, John J., assignor.)

National Tube Company. (See Findlater, Stevenson, assignor.)

National Tube Company. (See Offutt, John W., assignor.)

National Union Radio Corporation. (See Nicholson, Madison G., Jr., assignor.)

Neal, John F., and W. M. Haessler, St. Louis, Mo. Resilient support. 2,099,031; Nov. 16.

Nelson, Orvis K., Pawhuska, Okla. Fluid current motor. 2,099,617; Nov. 16.

Nelson, William, Jr. (See Henson, W., and Nelson.)

Nemec, Fred A., Whittier, Calif. Gas burner. 2,099,275; Nov. 16.

Neufeld, Jacob. (See Scherbatskoy, S. A., and Neufeld.)

Newkirk, William B. (See Ebert, C., and Newkirk, assignors.)

Newland, Clinton C., Glendale, assignor to Frederick A. Speik, South Pasadena, Calif. Mop wringer. 2,099,217; Nov. 16.

Newton, Phillip S., Oakland, Calif. Therapeutic lamp and method. 2,098,990; Nov. 16.

New York Central Railroad Company, The. (See Hamilton, W. S. H., and Butt, assignors.)

Nicholson, Frederick A., and W. T. Pritchard, assignors to Stetson-Ross Machine Company, Seattle, Wash. Driving mechanism to maintain constant the required length of an endless driving means. 2,099,218; Nov. 16.

Nicholson, Frederick A., and W. T. Pritchard, assignors to Stetson-Ross Machine Company, Seattle, Wash. Mechanism to maintain constant the required length of an endless driving means. 2,099,219; Nov. 16.

Nicholson, Frederick A., and W. T. Pritchard, assignors to Stetson-Ross Machine Company, Seattle, Wash. Mechanism to maintain constant the required length of an endless driving means. 2,099,220; Nov. 16.

Nicholson, Madison G., Jr., Verona, assignor to National Union Radio Corporation, Newark, N. J. Circuit for reducing static. 2,099,311; Nov. 16.

Nihon Denki Kogyo Kabushiki Kaisha. (See Yonemura, S., Okazawa, and Osada, assignors.)

Nilson, Karl J. E., Schenectady, N. Y. Traction wheel. 2,099,136; Nov. 16.
Nissley, Harry H., Highland Park, and G. M. Mazzie, assignors to Chrysler Corporation, Detroit, Mich. Vehicle body construction. 2,099,134; Nov. 16.
Nolan, John R., Larchmont, N. Y., assignor to The Diamond Match Company, Wilmington, Del. Machine for making match packets. 2,099,137; Nov. 16.
Noide and Horst Company, The. (See McAdams, Harry, assignor.)
Norcross, Burt F., Dorchester, Mass. Shoe. 2,099,138; Nov. 16.
Norlipp Company, The. (See Dibelka, H. G., and Cramer, assignors.)
Norma Electric Corporation. (See Lampl, Alfred, assignor.)
Norris, George E., Columbus, Ohio. Recording mechanism for coin-operated machines. 2,099,173; Nov. 16.
North Vernon Industries, Inc. (See Platter, Orval R., assignor.)
Norton Company. (See De Leeuw, Adolph L., assignor.)
Novick, Abraham, Flushing, assignor to F. L. Smithe Machine Co., Inc., New York, N. Y. Envelope machine. 2,098,970; Nov. 16.
Nuebling, Edward, New York, N. Y. Water meter. 2,099,139; Nov. 16.
Oakes Products Corporation. (See Sandberg, Ray A., assignor.)
O'Connell, Thomas J., assignor of one-half to J. W. Mestrezat, Flint, Mich. Egg separator. 2,099,276; Nov. 16.
Ofcutt, John W., Ellwood City, Pa., assignor to National Tube Company. Guide for tube rolling mills. 2,099,497; Nov. 16.
Ohio Brass Company, The. (See Burleson, Wade H., assignor.)
Ohio Brass Company, The. (See Larsson, Ernst A., assignor.)
Ohio Brass Company. (See Leonhauser, Henry A., assignor.)
Ohio Brass Company, The. (See Matthes, Samuel S., assignor.)
Okazawa, Tsuruji. (See Yonemura, S., Okazawa, and Osada.)
Okonite-Callender Cable Company. (See Bennett, Charles E., assignor.)
Old, Charles A. (See Trewhitt, J. E., and Old.)
Olds, Ransom E., assignor to Hill-Diesel Engine Company, Lansing, Mich. Diesel engine. 2,099,371; Nov. 16.
Olney, George W., Minneapolis, Minn. Machine for spreading and distributing coal to furnaces. 2,099,618; Nov. 16.
Olszanowski, Peter A., Buffalo, N. Y. Body support or stool. 2,099,345; Nov. 16.
O'Neill, Eugene F., assignor of fifty per cent to F. M. Skaj, St. Paul, Minn. Advertising blotting device. 2,099,135; Nov. 16.
Ornamental Specialties, Inc. (See Comstock, M., and Schoepflin, assignors.)
Osada, Kota. (See Yonemura, S., Okazawa, and Osada.)
Ostline, John E., Berwyn, assignor to Associated Electric Laboratories, Inc., Chicago, Ill. Automatic telephone system. 2,099,429; Nov. 16.
Outman, Winfred H., Richmond, Calif., assignor to Certain-Teed Products Corporation, New York, N. Y. Making a covering for surfaces exposed to the weather. 2,099,571; Nov. 16.
Outman, Winfred H., Richmond, Calif., assignor to Certain-Teed Products Corporation, New York, N. Y. Covering for surfaces exposed to the weather. 2,099,572; Nov. 16.
Overhead Door Corporation. (See Blodgett, Herbert C., assignor.)
Overturf, Clarence A., assignor to American Tire Guard Company, Detroit, Mich. Tire deflating device. 2,099,642; Nov. 16.
Owens, Henry & Company. (See Owens, H., and Bottomley, assignors.)
Owens, Henry, Providence, R. I., and S. Bottomley, North Andover, Mass., assignors to Henry Owens & Company, Inc., Providence, R. I. Selective strand trapping and cutting device for use in strand doubling or twisting machines. 2,099,530; Nov. 16.
Packert, Richard A., West Orange, and W. H. Marks, Clifton, N. J. Protecting device. 2,099,408; Nov. 16.
Partch, Leonard N., et al. (See Garner, Russell H., assignor.)
Passarge, Gerhard, Hamburg, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Electron discharge device. 2,099,531; Nov. 16.
Patent and Licensing Corporation, The. (See Avery, Henry C., assignor.)
Patitz, Gerhardt J. (See Light, R. F., Frey, and Patitz.)
Patrol Valve Company, The. (See Matthews, B. L., and Marvin, assignors.)
Patterson, Herbert F., assignor to Chrysler Corporation, Detroit, Mich. Transmission. 2,099,140; Nov. 16.
Patterson, Michael A. (See Pessagno, E. A., Schreier, Patterson, and Worland.)
Paulson, Nils I., assignor to Halsam Products Company, Chicago, Ill. Toy building construction. 2,099,075; Nov. 16.
Paxton, Gerald C., Santa Ana, Calif., assignor, by mesne assignments, to Food Machinery Corporation. Drop bar clean-out. 2,099,221; Nov. 16.
Paxton, Gerald C., Santa Ana, Calif., assignor, by mesne assignments, to Food Machinery Corporation. Fresh fruit brusher. 2,099,222; Nov. 16.
Paxton, Hale, Santa Ana, Calif., assignor, by mesne assignments, to Food Machinery Corporation. Sizer. 2,099,223; Nov. 16.
Paxton, Hale, Santa Ana, Calif., assignor, by mesne assignments, to Food Machinery Corporation. Lemon washer. 2,099,224; Nov. 16.
Paxton, Hale, Santa Ana, Calif., assignor, by mesne assignments, to Food Machinery Corporation. Clean-out. 2,099,225; Nov. 16.
Paxton, Hale, Santa Ana, Calif., assignor, by mesne assignments, to Food Machinery Corporation. Clean-out. 2,099,226; Nov. 16.
Payson, Arthur H., assignor to The American Thermos Bottle Company, Norwich, Conn. Bottle assembly. 2,099,174; Nov. 16.
Pearson, Richard E., and W. V. Gilbert, London, England; said Pearson assignor to said Gilbert. Preparation of chromic acid and sparingly soluble chromates. 2,099,658; Nov. 16.
Penn, Philip, assignor to Lion Agricultural Implements Limited, Winnipeg, Manitoba, Canada. Agricultural implement. 2,099,032; Nov. 16.
Pennsylvania Petroleum Research Corporation. (See McCluer, W. B., and Fenske, assignors.)
Peo, Ralph F., assignor to Houde Engineering Corporation, Buffalo, N. Y. Air cooling unit for automobile vehicles. 2,099,227; Nov. 16.
Pepper, Carl P., Fort Wayne, Ind., assignor to General Electric Company. Electric switch. 2,099,573; Nov. 16.
Perkins, Albert G., Warsaw, N. Y. Pipe coating apparatus. 2,099,076; Nov. 16.
Perkins, Albert G., Warsaw, N. Y. Feed apparatus for pipe coating machines and the like. 2,099,346; Nov. 16.
Perkins, Frank P., assignor to Michael Yundt Company, Waukesha, Wis. Conveyer. 2,098,971; Nov. 16.
Permutit Company, The. (See Riley R., and Bruce, assignors.)
Pessagno, Emile A., Chevy Chase, Md., E. P. Schreier, M. A. Patterson, and W. V. Worland, Washington, D. C. Building construction. 2,099,077; Nov. 16.
Peterson, Adolph H. (See Pleiter, A., and Peterson.)
Peterson, Donald L., Minneapolis, Minn. Animated display. 2,099,277; Nov. 16.
Petroleum Rectifying Company of California. (See St. Hill, Thomas N., assignor.)
Philadelphia Quartz Company. (See Carter, John D., assignor.)
Philipp, Lawrence A., assignor, by mesne assignments, to Nash-Kelvinator Corporation, Detroit, Mich. Refrigerating apparatus. 2,099,409; Nov. 16.
Phillips, Harold P., assignor to Hastings Manufacturing Company, Hastings, Mich. Device for grooving valve stems and the like. 2,099,228; Nov. 16.
Phillips Petroleum Company. (See Buell, A. E., and Schulze, assignors.)
Phillips, William H. (See Markel, O., Phillips, and Bandish.)
Phillips Petroleum Company. (See Frey, F. E., and Huppke, assignors.)
Pieper, Hartmann. (See Dalmer, O., Diehl, and Pieper.)
Pierce, Robert C., assignor to National Standard Company, Niles, Mich. Wire-handling apparatus. 2,099,532; Nov. 16.
Pilot Letter Label Co. (See Elmore, Charles F., assignor.)
Pitman, Henry L., Hartford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Combined typewriting and computing machine. 2,098,972; Nov. 16.
Place, Blon C., assignor of one-half to G. E. Gagnier, Detroit, Mich. Securing trim panels. 2,099,619; Nov. 16.
Platter, Orval R., assignor to North Vernon Industries, Inc., North Vernon, Ind. Folding chair. 2,099,498; Nov. 16.
Plax Corporation. (See Ferngren, Enoch T., assignor.)
Pleiter, Albert, and A. H. Peterson, Northville, Mich. Garment. 2,099,620; Nov. 16.
Polleys, Herbert R., New Haven, Conn., assignor to United States Rubber Products, Inc., New York, N. Y. Trimming machine knife guard supporting and operating mechanism. 2,099,033; Nov. 16.
Poor & Company. (See Backes, Edward W., assignor.)
Porcelier Manufacturing Company. (See Walder, Emil, assignor.)
Porsche, Ferdinand, Stuttgart, Germany. Spring suspension of independent car wheels, especially for motor vehicles. 2,099,312; Nov. 16.
Porskievics, Anthony J., Atlantic Highlands, N. J., assignor to W. B. Wait, New York, N. Y. Speed and cut-off indicator for locomotives. 2,099,101; Nov. 16.
Possenheim, Louis, New York, N. Y. Fin equipped rudder. 2,099,229; Nov. 16.
Potdevin, Adolph, Garden City, assignor to Potdevin Machine Company, Brooklyn, N. Y. Unwinding apparatus for paper webs and the like. 2,099,313; Nov. 16.

Potdevin, Adolph, Garden City, assignor to Potdevin Machine Company, Brooklyn, N. Y. Cutting-off mechanism for bag making machines and the like. 2,099,314; Nov. 16.
Potdevin Machine Company. (See Potdevin, Adolph, assignor.)
Pratt Food Company. (See Keller, Joseph W., assignor.)
Prescott, John H., Columbus, Ohio. Convertible metallic cot. 2,099,621; Nov. 16.
Printz, Glenn E., Detroit, Mich. Apparatus for electrically marking metals. 2,099,622; Nov. 16.
Prinz, Dietrich, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Magnetron. 2,099,533; Nov. 16.
Pritchard, Wilmot T. (See Nicholson, F. A., and Pritchard.)
Procházka, Karel, Dusniky, Czechoslovakia. Track sanding device. 2,099,315; Nov. 16.
Procter & Gamble Company, The. (See McAllister, Walter H., assignor.)
Quea, Thomas S., Watertown, Conn. Can opener. 2,099,430; Nov. 16.
Rabe, Karl, Stuttgart, Germany. Precombustion-chamber engine. 2,099,316; Nov. 16.
Radio Corporation of America. (See Carter, Philip S., assignor.)
Raffles, Harry, Chicago, Ill. Metal tapping tool. 2,099,246; Nov. 16.
Railton, Reid A., Byfleet, England, and A. C. Sampietro, Genoa, Italy, assignors to Robot Gearing Limited, London, England. Preselective change-speed gearing. 2,099,141; Nov. 16.
Railroad Accessories Corporation. (See Lavarack, Frederick C., assignor.)
Ramapo Ajax Corporation. (See Eastburn, S. L., and Banker, assignors.)
Ranault, Louis. (See Saives, Léon, assignor.)
Ranco Incorporated. (See Raney, Estel C., assignor.)
Randal, Howard S. (See Roberts, T. B., and Howard, assignor.)
Raney, Estel C., assignor to Ranco Incorporated, Columbus, Ohio. Electric vulcanizer. 2,099,499; Nov. 16.
Raymond Concrete Pile Company. (See Upson, M. M., and Smith.)
Raymond Concrete Pile Company. (See Watt, Elihu D., assignor.)
Reeb, Henry, assignor to Friendly Knitting Mills, Inc., Brooklyn, N. Y. Sweater. 2,099,431; Nov. 16.
Relber, Albert H., Evanston, Ill., assignor, by mesne assignments, to Teletypesetter Corporation. Plural selection adapter for delay mechanism. 2,098,973; Nov. 16.
Reichel, John, assignor to Sharp & Dohme, Incorporated, Philadelphia, Pa. Sterilization of lyophilic biologically active substances. 2,099,659; Nov. 16.
Reid, Marvin J., assignor to Eastman Kodak Company, Rochester, N. Y. Recovery of cellulose esters from scrap. 2,099,347; Nov. 16.
Reid, Marvin J., assignor to Eastman Kodak Company, Rochester, N. Y. Reclaiming film scraps. 2,099,348; Nov. 16.
Reinhard, Carl A., Los Angeles, Calif. Means and method of determining the inclination of well holes. 2,099,372; Nov. 16.
Remington Arms Company. (See Brun, Willi, assignor.)
Repass, George E., Gulfport, Miss. Drafting apparatus. 2,098,974; Nov. 16.
Republic Steel Corporation. (See Kautz, Karl, assignor.)
Research Corporation. (See Hedberg, Carl W. J., assignor.)
Reynolds Corporation. (See Coddington, Edwin D., assignor.)
Rheinmetall-Borsig Aktiengesellschaft Werk Borsig. (See Geissen, Carl, assignor.)
Geissen, Carl, assignor.)
Rich, Louise B., administratrix. (See Rich, Willis D.)
Rich, Willis D., Hingham, Mass., deceased; Louise B. Rich, administratrix. Furniture pad. 2,098,975; Nov. 16.
Richard, Charles D. (See Roberts, J. G., and Richard.)
Richards, Dwight R., Claremont, N. H., assignor to Sullivan Machinery Company. Mining apparatus. 2,099,373; Nov. 16.
Richards, Joshua M., Brookline, Mass. Skylight or floor-light construction. 2,099,534; Nov. 16.
Richardson, Eric W. (See Gardner, Albert T., assignor.)
Riely, James C., et al. (See Tapp, Lora E., assignor.)
Riley, Ray, Long Island City, N. Y., and W. McA. Bruce, Mt. Holly, N. J., assignors to The Permutit Company, New York, N. Y. Cupriferous fungicides. 2,099,623; Nov. 16.
Rival Manufacturing Company. (See Majewski, Joseph M., Jr., assignor.)
Rix, Edward G., assignor to American Perforator Company, Chicago, Ill. Perforating machine. 2,099,230; Nov. 16.
Robarge, George F., Toledo, Ohio. Machine for simultaneously forming rings and assembling them on shafts. 2,099,624; Nov. 16.
Roberts, Charles, assignor to Multiposter Advertising Corporation, New York, N. Y. Display device and drive therefor. 2,099,142; Nov. 16.
Roberts, John G., Dobbs Ferry, and C. D. Richard, West New Brighton, assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y. Call transmitter device. 2,099,143; Nov. 16.
Roberts, Turney B., and W. A. Howard, Memphis, Tex.; said Howard assignor to H. S. Randal, Memphis, Tex. Steering wheel structure. 2,099,625; Nov. 16.
Robinson, Thomas L., assignor to McGill Manufacturing Company, Valparaiso, Ind. Bearing. 2,099,660; Nov. 16.
Robinson, William W., assignor to McCallum & Robinson, Inc., Memphis, Tenn. Rug and making same. 2,099,626; Nov. 16.
Robot Gearing Limited. (See Railton, R. A., and Sampietro, assignors.)
Roller-Smith Company. (See Wood, Joseph D., assignor.)
Rolph, Thomas W., Newark, Ohio, assignor to Holophane Company, Inc., New York, N. Y. Refractor. 2,099,034; Nov. 16.
Romine, Mary C., administratrix. (See Romine, Robert T.)
Romine, Robert T., deceased, Macomb County, by Mary C. Romine, Mt. Clemens, Mich., administratrix. Stack lifter. 2,099,078; Nov. 16.
Rosebury, Fred, assignor to University Patents, Inc., New York, N. Y. Vacuum tube potentiometer. 2,099,349; Nov. 16.
Roseman, Leo. (See Rosenman, H., and Roseman.)
Rosenberg, Heyman, New York, N. Y. Blank feeding means. 2,099,232; Nov. 16.
Rosenman, Herman, and L. Roseman, Newark, N. J. Slip stitch sewing machine. 2,099,574; Nov. 16.
Rosow, Morris, Philadelphia, Pa. Coat tie. 2,099,535; Nov. 16.
Ross, Paul A. (See De Witt, W. J., and Ross.)
Rossmann, Rudolf, Gauting, near Munich, Germany, assignor to Tefag Textil-Finanz A.-G., Zurich, Switzerland. High capacity weaving machine. 2,099,027; Nov. 16.
Rossomme, Raymond H. (See Vayda, L. L., and Rossomme.)
Rounds, Marion D., South Braintree, Mass. Processed sugar and making the same. 2,099,175; Nov. 16.
Rowley, Arthur A., Hamden, assignor to Winchester Repeating Arms Company, New Haven, Conn. Upturn-and-pullback bolt-action firearm. 2,099,035; Nov. 16.
Royal Typewriter Company. (See Utz, Anthony, assignor.)
Ruben, Samuel, New Rochelle, N. Y. Reaction products of glycols and alkaloids. 2,099,432; Nov. 16.
Rumpel, Harvey H. (See Munro, A. L., and Rumpel.)
Rumscheidt, Carl, and A. Strzyzewski, Leuna, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of coarsely crystalline ammonium sulphate. 2,099,079; Nov. 16.
Ruskin, Frances R. (See Ruskin, Simon L., assignor.)
Ruskin, Simon L., assignor to F. R. Ruskin, New York N. Y. Medicinal preparations containing metal compounds of decomposition products of nucleoproteins. 2,098,976; Nov. 16.
Rusler, George W., Verona, assignor to Gulf Research & Development Company, Pittsburgh, Pa. Bottom hole well sampler. 2,099,080; Nov. 16.
Russ, Edward H., Jr., Louisville, Ky. Stretching and drying apparatus. 2,099,081; Nov. 16.
Ruys, Jan D., Pittsburg, and J. W. Edwards, Concord, Calif., assignors to Shell Development Company, San Francisco, Calif. Halogenation of unsaturated compounds. 2,099,231; Nov. 16.
Ryerson, Creighton W., assignor to Ryerson & Haynes, Inc., Jackson, Mich. Laminated rim construction and making the same. 2,099,410; Nov. 16.
Ryerson & Haynes, Inc. (See Ryerson, Creighton W., assignor.)
Safety Car Heating & Lighting Company, The. (See Schepmoes, Lindsley, assignor.)
St. Hill, Thomas N., San Marino, assignor to Petroleum Rectifying Company of California, Los Angeles, Calif. Electric dehydrator. 2,098,982; Nov. 16.
St. Joseph Iron Works. (See Schmidtke, Albert H., assignor.)
Saives, Léon, assignor to L. Renault, Billancourt, France. Rolling of thin sheet metal. 2,099,082; Nov. 16.
Sampietro, Achille C. (See Railton, R. A., and Sampietro.)
Sampson, James F., Skiatook, Okla. Adjustable pull rod clamp. 2,099,628; Nov. 16.
Sandberg, Ray A., Waukegan, assignor to Oakes Products Corporation, North Chicago, Ill. Brake lever construction. 2,099,233; Nov. 16.
Sanders, Edward A., Bath, England. Safety fuse. 2,099,500; Nov. 16.
Saralegui, Antonio M. M. T. M. (See Limeses, J., Saralegui, and De Cerro.)
Savage, Marion A., Scotia, N. Y., assignor to General Electric Company. Dynamo-electric machine. 2,099,575; Nov. 16.
Sayles, Bertram J. (See Brown, Roger S., assignor.)
Schaetzel, Edward G., Alhambra, Calif. Closure and pouring device. 2,099,629; Nov. 16.
Schauweker, William K., Cleveland, Ohio. Check and check controlled mechanism. 2,099,234; Nov. 16.
Schenck, Friedrich. (See Windaus, A., and Schenck.)
Schepmoes, Lindsley, New Haven, Conn., assignor to The Safety Car Heating & Lighting Company. Vehicle lighting. 2,099,451; Nov. 16.

Schepmoes, Lindsley, New Haven, Conn., assignor to The Safety Car Heating & Lighting Company. Lighting system. 2,099,452; Nov. 16.

Scherbatskoy, Serge A., and J. Neufeld, assignors to Engineering Laboratories, Inc., Tulsa, Okla. Method and apparatus for seismic prospecting. 2,099,536; Nov. 16.

Schiebeler, Carl, Berlin-Charlottenburg, Germany, assignor to General Electric Company. Control system. 2,099,576; Nov. 16.

Schimanek, Emil, Budapest, Hungary. Internal combustion engine. 2,099,278; Nov. 16.

Schmidt, Francis J., Wauwatosa, Wis. Storm window top ventilator. 2,099,235; Nov. 16.

Schmidtke, Albert H., assignor to St. Joseph Iron Works, St. Joseph, Mich. Machine for making and attaching wire basket handles or the like. 2,099,411; Nov. 16.

Schmiedeknecht, Victor E., Louisville, Ky., assignor to Standard Sanitary Manufacturing Company. Dental lavatory. 2,099,317; Nov. 16.

Schmitt, George P., New York, N. Y. Razor and hair clipper. 2,099,537; Nov. 16.

Schneider, Adolf G., Beloit, Wis. Transmission. 2,099,630; Nov. 16.

Schnider, Morris, Los Angeles, Calif. Soap and brush holder. 2,099,279; Nov. 16.

Schnorr, Karl. (See King, H. L., Sharp, and Schnorr.)

Schoepflin, Herbert C. (See Comstock, M., and Schoepflin.)

Scholes, Daniel R., Oak Park, assignor to Aermotor Company, Chicago, Ill. Power transmitting and lubricating mechanism. 2,099,036; Nov. 16.

Schreier, Edwin P. (See Pessagno, E. A., Schreier, Patterson, and Worland.)

Scripture, Edward W., Jr., Shaker Heights, assignor to The Master Builders Company, Cleveland, Ohio. Aluminous cements. 2,099,176; Nov. 16.

Schultz, Alfred H., New York, N. Y. Picture frame. 2,099,538; Nov. 16.

Schulze, Walter A. (See Buell, A. E., and Schulze.)

Schwab, Martin C., Chicago, Ill. Valve for liquid-flow apparatus. 2,099,083; Nov. 16.

Schwarz, Bruno E., Barcelona, Spain, and F. D. Dean, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Making shoe stiffeners. 2,099,037; Nov. 16.

Schwarz, Georg, Anvers, assignor to Gevaert Photo-Production N. V., Onde God, near Anvers, Belgium. Photographic developer and photographic developing. 2,099,374; Nov. 16.

Searle, Dudley F., Oakland, Calif. Air brake control system. 2,099,453; Nov. 16.

Sebrell, Lorin B., Silver Lake, Ohio, assignor to Wingfoot Corporation, Wilmington, Del. Preparing rubber conversion products. 2,099,318; Nov. 16.

Seckham, Charles P., Wakefield, England. Apparatus for stripping electric cables. 2,099,084; Nov. 16.

Seidler, Carl, New York, N. Y. Dispensing container. 2,099,412; Nov. 16.

Sellen, Charles L., assignor to S. D. Barker, Seattle, Wash. Hose supporter. 2,098,977; Nov. 16.

Serra, Luigi, Washington, D. C., assignor to Serra Ltd. Siphon flush tank. 2,099,631; Nov. 16.

Serra Ltd. (See Serra, Luigi, assignor.)

Servel, Inc. (See Ullstrand, Hugo M., assignor.)

Seward, Clarence L., Jr., Washington, D. C., assignor to Bendix Aviation Corporation, South Bend, Ind. Antivibration support for instruments. 2,099,375; Nov. 16.

Seyfried, Arthur W. (See McCabe, J. J., and Seyfried.)

Shaff, Ernest H., assignor to W. H. Keller, Inc., Grand Haven, Mich. Portable pressure fluid actuated tool. 2,099,280; Nov. 16.

Shand, John S. (See Mason, G. H., Shand, and Johnson.)

Shapiro, Abraham, assignor to Universal Stamping & Mfg. Co., Chicago, Ill. Motion picture and sound reproducing machine. 2,099,376; Nov. 16.

Sharp, Albert. (See King, H. L., Sharp, and Schnorr.)

Sharp & Dohme, Incorporated. (See Reichel, John, assignor.)

Sharp, Robert E. B., Philadelphia, Pa., assignor to Baldwin-Southwark Corporation. Strip bearing. 2,099,661; Nov. 16.

Shaw, David M., Sydenham, London, England. Grip, handle, or shaft of percussive or swinging implements. 2,099,319; Nov. 16.

Shaw, George S., Wallasey, England. Moving band for advertising and the like devices. 2,099,281; Nov. 16.

Sheehan, William M., Merion, Pa., assignor to General Steel Castings Corporation, Granite City, Ill. Vehicle structure. 2,099,145; Nov. 16.

Shell Development Company. (See de Simó, M., and Hilmer, assignors.)

Shell Development Company. (See Ruys, J. D., and Edwards, assignors.)

Sherman, John Q., Dayton, Ohio. Split platen mounting. 2,098,978; Nov. 16.

Shikles, John R., Dearborn, Mo. Milk testing device. 2,099,038; Nov. 16.

Shively, Holly I., Chicago, Ill. Stocking. 2,099,530; Nov. 16.

Shoe Form Co. (See De Witt, W. J., and Ross, assignors.)

Shrode, John L., assignor to Alco Valve Company, Incorporated, St. Louis, Mo. Superheat control for refrigeration systems. 2,099,085; Nov. 16.

Shroyer, Jacob L., Oak Park, Ill. Automobile brake tester. 2,098,979; Nov. 16.

Shultz, John H. (See Dahl, L. S., and Shultz.)

Sibley, Robert L., Nitro, W. Va., assignor, by mesne assignments, to Monsanto Chemical Company, Wilmington, Del. Coating composition and preparing same. 2,099,236; Nov. 16.

Sibley, Robert L., Nitro, W. Va., assignor, by mesne assignments, to Monsanto Chemical Company, Wilmington, Del. Coating composition. 2,099,237; Nov. 16.

Siebs, Claude T. (See Brown, A. B., and Siebs.)

Siemens Brothers & Company Limited. (See Wigan, Edmund R., assignor.)

Siever, Hughes L., Keyser, W. Va., assignor to Borne Scrymser Company, New York, N. Y. Conditioning textile stock. 2,099,146; Nov. 16.

Silver, Myer S., Brookline, Mass. Arch support pad. 2,099,577; Nov. 16.

Simon, Victor. (See Gruyer, Jean M., assignor.)

Simpson, Alexander, London, England. Wearing apparel. 2,099,238; Nov. 16.

Sinclair Refining Company. (See Herthel, Eugene C., assignor.)

Sigveland, Ivar E., St. Paul, Minn. Dental matrix. 2,099,454; Nov. 16.

Skaj, Frank M. (See O'Neill, Eugene F., assignor.)

Slonneger, John C., assignor to The Falk Corporation, Milwaukee, Wis. Dynamometer. 2,099,662; Nov. 16.

Smellie, Donald G., Canton, assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 2,099,377; Nov. 16.

Smellie, Donald G., Canton, assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 2,099,378; Nov. 16.

Smith, A. O., Corporation. (See Baird, Ronald J., assignor.)

Smith, David C., Jacksonville, Ill. Clothes pin. 2,099,177; Nov. 16.

Smith, Donald H., Hempstead, assignor to The Western Union Telegraph Company, New York, N. Y. Insulator shield. 2,099,540; Nov. 16.

Smith, Edward A. (See Upson, M. M., and Smith.)

Smith Engineering Works. (See Munro, A. L., and Rumpel, assignors.)

Smith, Ernest, Manchester, England. Guard for machinery. 2,099,282; Nov. 16.

Smith, Gilbert M. (See Johnson, C. W., and Smith.)

Smith, Horace S. (See Bancroft, H. L., and Smith.)

Smith, L. C., & Corona Typewriters, Inc. (See Gabrielson, C., and Waucquez, assignors.)

Smith, Preston R., Rahway, N. J., assignor, by mesne assignments, to The Barber Company, Inc., Philadelphia, Pa. Bituminous emulsion. 2,099,351; Nov. 16.

Smith, Preston R., Rahway, N. J., assignor, by mesne assignments, to The Barber Company, Inc., Philadelphia, Pa. Bituminous emulsion. 2,099,352; Nov. 6.

Smith, Preston R., Rahway, N. J., assignor, by mesne assignments, to The Barber Company, Inc., Philadelphia, Pa. Bituminous emulsion. 2,099,353; Nov. 16.

Smith, Russell T., assignor to Climax Machinery Company, Indianapolis, Ind. Dehumidifier. 2,099,665; Nov. 16.

Smithe, F. L., Machine Co. (See Novick, Abraham, assignor.)

Snyder, Arthur L., Garden City, N. Y., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Process and apparatus for the utilization of artificial thread. 2,099,178; Nov. 16.

Snyder, Jesse B., Tacoma, Wash. Boiler pressure control apparatus. 2,099,239; Nov. 16.

Société d' Inventions Aeronautiques et Mecaniques S. I. A. M. (See Levy, René L., assignor.)

Socony-Vacuum Oil Company. (See Moran, R. C., and Meyer, assignors.)

Sowter, Percy F. C., Spondon, near Derby, England, assignor to Celanese Corporation of America. Yarn manufacture. 2,098,980; Nov. 16.

Sowter, Percy F. C., Spondon, near Derby, England, assignor to Celanese Corporation of America. Yarn manufacture. 2,098,981; Nov. 16.

Spaeth, Charles, Flushing, N. Y. Magnetic discharge device. 2,099,144; Nov. 16.

Spain, Rowland W., assignor of one-half to H. J. Tully & Company, New York, N. Y. Abdominal bandage and support. 2,099,541; Nov. 16.

Speicher, John K., Newark, assignor to Hercules Powder Company, Wilmington, Del. Nitrocellulose emulsions and producing. 2,099,501; Nov. 16.

Spelk, Frederick A. (See Newland, Clinton C., assignor.)

Spellacy, John R., Millbrae, Calif., assignor, by mesne assignments, to Hercules Powder Company, Wilmington, Del. Manufacturing casein. 2,099,379; Nov. 16.

Springfield Leather Products Company, The. (See Mueller, Louis A., assignor.)

Sproul, Donald F., Chicago, Ill., assignor to Cardwell-Westinghouse Company. Bolster supporting unit. 2,099,240; Nov. 16.

Stainbrook, Forest A., Boston, Mass. Sharpening device. 2,099,179; Nov. 16.

Standard Brands Incorporated. (See Light, R. F., Frey, and Pattiz, assignors.)

Standard Novelty Works. (See Maneval, Charles H., assignor.)

Standard Oil Company. (See McNeil, C. P., and Montgomery, assignors.)

Standard Oil Company. (See Webb, William L., assignor.)

Standard Oil Company, The. (See Culbertson, Albert B., Jr., assignor.)

Standard Sanitary Manufacturing Company. (See Schmiedeknecht, Victor E., assignor.)

Standard Stoker Company, The. (See Anderson, Howard P., assignor.)

Starr, Frederick E., Belzoni, Miss. Blind fastener for wall and ceiling boards. 2,099,632; Nov. 16.

Steel, Samuel T. (See Durnell, H. G., and Steel.)

Steele, Burt J., Columbus, Ohio. Envelope. 2,099,354; Nov. 16.

Stelkens, Willy, Cologne-on-the-Rhine, Germany. Uniting curved bodies including boots and shoes. 2,099,320; Nov. 16.

Stetson-Ross Machine Company. (See Nicolson, F. A., and Pritchard, assignors.)

Stevens, Edwin F., St. Paul, Minn. Interlocking steel sheet piling. 2,099,542; Nov .16.

Stevens, Edwin F., St. Paul, Minn. Concrete interlocking piling. 2,099,543; Nov. 16.

Stevens, John C., assignor to Leupold Volpel and Company, Portland, Oreg. Liquid level recorder. 2,099,180; Nov. 16.

Stevenson, Hale W., Des Moines, Iowa. Traction spreader. 2,099,283; Nov. 16.

Stewart, Hugh T., assignor to The Garlock Packing Company, Palmyra, N. Y. Packing composition. 2,099,241; Nov. 16.

Stewart, Hugh T., assignor to The Garlock Packing Company, Palmyra, N. Y. Packing composition. 2,099,242; Nov. 16.

Stewart, Robert H., Detroit, Mich. Display sign and construction. 2,099,633; Nov. 16.

Stickney, Burnham C., Hillside, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 2,099,578; Nov. 16.

Stockdale, Harry C. Ravenna, Ohio, assignor to Food Machinery Corporation, San Jose, Calif. Cleaning device for strainers. 2,099,502; Nov. 16.

Stoesser, Wesley C., assignor to The Dow Chemical Company, Midland, Mich. Pyrolysis of hydrocarbons. 2,099,350; Nov. 16.

Strain, Daniel E., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Cellulosic article of manufacture and preparing same. 2,099,455; Nov. 16.

Strate-Stroke Pumps and Engines Proprietary Limited. (See Hilldyard, William A., assignor.)

Strelow, Max. (See Strelow, Wilhelm, and M.)

Strelow, Wilhelm, Berlin-Zehlendorf, and M. Strelow, Potsdam, Germany. Gas valve construction. 2,099,284; Nov. 16.

Strezoff, Bogola, Minneapolis, Minn. Boat propelling device. 2,099,544; Nov. 16.

Strobridge, William, Syracuse, assignor to United States Hoffman Machinery Corporation, New York, N. Y. Garment pressing machine. 2,099,181; Nov. 16.

Strouse Adler Company, The. (See Bissell, Raymond W., assignor.)

Strzyzewski, Anton. (See Rumscheidt, C., and Strzyzewski.)

Stubnitz-Greene Spring Corporation. (See Findora, John A., assignor.)

Sullivan Machinery Company. (See Richards, Dwight R., assignor.)

Swartwout Company, The. (See McDerment, James H., assignor.)

Sweet, Herbert P., Providence, R. I. Door latch. 2,099,456; Nov. 16.

Swett, Earl W., assignor to The Lobdell-Emery Manufacturing Company, Alma, Mich. Saddle and making the same. 2,099,503; Nov. 16.

Swingspout Measure Company. (See Wiswell, Ozro N., assignor.)

Taaffe, Thomas, Los Angeles, Calif. Illuminated sign. 2,099,243; Nov. 16.

Taglabue, Charles J., Mfg. Co. (See Bast, Frank J., assignor.)

Tait, Charles R. (See Goodrich, A. S., and Tait.)

Talger, Foster L. (See Majewski, Joseph M., Jr., assignor.)

Tapp, Lorn E., assignor of six and one-fourth per cent to J. W. Baxter, Jr., six and one-fourth per cent to D. F. Felock, twelve and one-half per cent to J. C. Riely, twenty-five percent to H. M. McCormick, New Albany, Ind. Key-lever-lock for key-lever type machines. 2,099,147; Nov. 16.

Tautz, Herbert E., assignor to Delta Manufacturing Company, Milwaukee, Wis. Scroll saw. 2,099,321; Nov. 16.

Taylor, Warren G., Chicago, Ill. Vacuum tube. 2,099,579; Nov. 16.

Taylor, William I., and A. H. Woodruff, Spondon, near Derby, England, assignors to Celanese Corporation of America. Lubrication of twisting spindles used in yarn and like winding machinery. 2,099,039; Nov. 16.

Tefag Textil-Finanz A.-G. (See Rossmann, Rudolf, assignor.)

Teisher, Austin A., and G. I. McNeil, Akron, Ohio, assignors to Wingfoot Corporation, Wilmington, Del. Belt. 2,099,545; Nov. 16.

Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Buschbeck, Werner, assignor.)

Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Fritz, Karl, assignor.)

Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Passarge, Gerhard, assignor.)

Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Prinz, Dietrich, assignor.)

Teletypesetter Corporation. (See Reiber, Albert H., assignor.)

Temple, Paul C., assignor to A. W. Cash Company, Decatur, Ill. Lever. 2,099,244; Nov. 16.

Teorell, Karl H., Stockholm, Sweden. Tool for cleaning furnace-grates. 2,099,355; Nov. 16.

Terpak, Stephen, Pittsfield, Mass., assignor to General Electric Company. High voltage liquid-filled bushing. 2,099,666; Nov. 16.

Texas Company, The. (See Weber, Charles W., assignor.)

Textile Machine Works. (See Janssen, Henry, assignor.)

Thew Shovel Company. (See Wilson, Emery J., assignor.)

Thies, Herman R., Stow, and G. R. Lyon, Akron, Ohio, assignors to Wingfoot Corporation, Wilmington, Del. Treatment of rubber. 2,099,546; Nov. 16.

Thomas, Willis P. (See Howse, C. L., Thomas, and Bowers.)

Thompson, Frederick B., Hollywood, Calif. Motion picture film treating apparatus. 2,099,245; Nov. 16.

Thompson Products, Incorporated. (See Hufferd, George H., assignor.)

Thorp, Gerald, and E. Halse, assignors to Bethlehem Foundry & Machine Company, Bethlehem, Pa. Apparatus for heat treating granular foods. 2,099,634; Nov. 16.

Timber Engineering Company. (See Myer, James E., assignor.)

Timbers, Homer H. (See Atti, Raphael, assignor.)

Timmis, William W., Glen Cove, and W. K. Walker, assignors to American Radiator Company, New York, N. Y. Heat exchange system. 2,099,182; Nov. 16.

Tinsley, John S., New Brunswick, N. J., assignor to Hercules Powder Company, Wilmington, Del. Laminated glass. 2,099,086; Nov. 16.

Titanium Alloy Manufacturing Company, The. (See Kinzie, Charles J., assignor.)

Tobey, Fred W., Grand Rapids, Mich. Filing cabinet. 2,099,148; Nov. 16.

Todd, Edward W., et al. (See Langdon, Jesse D., assignor.)

Toledo Scale Manufacturing Company. (See Hem, Halvor O., assignor.)

Tondeur, Rene, London, England. Manufacture of metallic tubing. 2,099,040; Nov. 16.

Toniolo, Guy, Grapeville, Pa. Ashtray. 2,099,635; Nov. 16.

Trans-Lux Corporation. (See Blohm, August H., assignor.)

Travers, Fred H., Stratford, Conn., assignor to General Electric Company. Switch handle. 2,099,580; Nov. 16.

Trewhitt, James E., and C. A. Old, assignors to Joseph N. Borroughs, Oakland, Calif. Towel dispensing device. 2,099,183; Nov. 16.

Tubize Chatillon Corporation. (See Moore, James E., assignor.)

Tully, Henry J., & Company. (See Spain, Rowland W., assignor.)

Turner, Harold R., Pittsfield, Mass., assignor to General Electric Company. Terminal for lead covered cables. 2,099,581; Nov. 16.

Turnquist, Alexander N., Glen Ellyn, Ill. Building block. 2,099,149; Nov. 16.

Uber, Harold L., assignor to C. W. Dodge, Jamestown, N. Y. Tobacco-user's appliance. 2,098,983; Nov. 16.

Ullstrand, Hugo M., Evansville, Ind., assignor to Servel, Inc., New York, N. Y., Refrigeration. 2,099,041; Nov. 16.

Underwood Elliott Fisher Company. (See Kurowski, Alfred G. F., assignor.)

Underwood Elliott Fisher Company. (See Pitman, Henry L., assignor.)

Underwood Elliott Fisher Company. (See Stickney, Burnham C., assignor.)

"Unichem" Chemikalien Handels A.-G. (See Helft, Ernst, assignor.)

Union Oil Company of California. (See Barnes, C. D., and Flaxman, assignors.)

Union Switch & Signal Company, The. (See Young, Henry S., assignor.)

United-Carr Fastener Corporation. (See Hall, Charles L., assignor.)

United-Carr Fastener Corporation. (See McFadden, Wilford C., assignor.)

United-Carr Fastener Corporation. (See Upham, Preston, assignor.)

United Pressed Products Co. (See Howell, Hugh A., assignor.)

United Shoe Machinery Corporation. (See Houghton, Donald M., assignor.)

United Shoe Machinery Corporation. (See James, C. H., and Bacon, assignors.)

United Shoe Machinery Corporation. (See Schwarz, B. E., and Dean, assignors.)
United Shoe Machinery Corporation. (See Whelton, John M., assignor.)
United States Gypsum Company. (See Griffith, Arthur C., assignor.)
United States Hoffman Machinery Corporation. (See Strowbridge, William, assignor.)
United States Rubber Products, Inc. (See Eger, Ernst, assignor.)
United States Rubber Products, Inc. (See Polleys, Herbert R., assignor.)
Universal Oil Products Company. (See van Heeden, Arthur P., assignor.)
Universal Stamping & Mfg. Co. (See Shapiro, Abraham, assignor.)
University Patents, Inc. (See Rosebury, Fred, assignor.)
Upham, Preston, Brookline, assignor to United-Carr Fastener Corporation, Cambridge, Mass. Handbag structure. 2,099,663; Nov. 16.
Upson, Maxwell M., Englewood, and E. A. Smith, Chatham, N. J., assignors to Raymond Concrete Pile Company, New York, N. Y. Concrete pile manufacture. 2,099,285; Nov. 16.
Usbeck, Christian, Steinbach-Hallenberg, Germany. Paste cutting roller. 2,099,286; Nov. 16.
Utz, Anthony, Hartford, Conn., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 2,099,504; Nov. 16.
Valentine, Irving R., Erie, Pa., assignor to General Electric Company. Brazing flux. 2,099,582; Nov. 16.
Vallone, Joseph M., assignor to Barcalo Manufacturing Company, Buffalo, N. Y. Frame for gliders and the like. 2,099,457; Nov. 16.
Vance, Alva J., Beverly Hills, Calif. Apparatus for effecting separation of the parts of dentures. 2,099,087; Nov. 16.
Van Dyke, Russell H. (See Kenyon, W. O., and Van Dyke.)
Van Heeden, Arthur P., assignor, by mesne assignments, to Universal Oil Products Company, Chicago, Ill. Apparatus for producing gas. 2,099,150; Nov. 16.
Varley, Edith A., executrix. (See Varley, Richard.)
Varley, Richard, deceased, New York, N. Y.; E. A. Varley, executrix. Alarm clock device. 2,099,547; Nov. 16.
Vayda, Louis L., Aspinwall, and R. H. Rossomme, Wilkinsburg, Pa., assignors to Bacharach Industrial Instrument Company. Apparatus for testing gases. 2,099,548; Nov. 16.
Vendo Sales Company. (See De Mayo, Frank, Jr., assignor.)
Vereinigte Deutsche Metallwerke Aktiengesellschaft. (See Metzger, Otto, assignor.)
Vincent, Sidney C., and F. C. Volkman, Baltimore, Md. Flasher motor unit. 2,099,583; Nov. 16.
Vogt, Adolf, Tschechnitz, near Breslau, assignor to Dr. Alexander Wacker Gesellschaft für Elektrochemische Industrie G. m. b. H., Munich, Germany. Production of magnesium from magnesium oxides. 2,099,151; Nov. 16.
Vogt, Henry, Machine Co. Inc. (See Mahoney, John C., assignor.)
Voight, George F., Oakland, Calif. Composite lath. 2,099,584; Nov. 16.
Volkman, Frederick C. (See Vincent, S. C., and Volkman.)
Von Daeniken, Karl, Lucerne, Switzerland. Reinforcing insert for lapes on coats. 2,099,356; Nov. 16.
Von Hoorn, Fred G., Bridgeport, Conn., assignor to General Electric Company. Circuit breaker. 2,099,585; Nov. 16.
Vossen, Dieter. (See Krzikalla, H., Dehnert, and Vossen.)
Vulcan Proofing Company. (See Lewis, Robert R., assignor.)
Wacker, Dr. Alexander, Gesellschaft für Elektrochemische Industrie G. m. b. H. (See Vogt, Adolf, assignor.)
Wadsworth, Frank L. O., Pittsburgh, Pa., assignor to Ball Brothers Company, Muncie, Ind. Method and apparatus for feeding molten glass. 2,099,088; Nov. 16.
Wait, William B. (See Bond, Alexander R., assignor.)
Wait, William B. (See Porskievics, Anthony J., assignor.)
Walder, Emil, assignor to Porcelier Manufacturing Company, Greensburg, Pa. Waffle iron. 2,099,152; Nov. 16.
Wales, Allen, Adding Machine Corporation. (See Fried, Jerome A., assignor.)
Walker, Eric E. (See Hill, R., and Walker.)
Walker, William K. (See Timmis, W. W., and Walker.)
Walker, William L., Tulsa, Okla. Gaugers' tape reel. 2,099,153; Nov. 16.
Wallace, Henry A. (See Heilbach, Rudolph, assignor.)
Wallace, William, assignor of one-half to Brown Brothers & Company Limited, Edinburgh, and one-half to William Denny & Brothers, Limited, Dumbarton, Scotland. Antirolling apparatus for ships. 2,099,380; Nov. 16.
Waltham Watch Company. (See Flagg, Frederick P., assignor.)
Wanderer-Werke vorm. Winklhofer & Jaenicke Akt.-Ges. (See Gebhardt, Johannes, assignor.)
Waterman, L. E., Company. (See Larsen, Gabriel, assignor.)
Waters, Gilbert C., assignor to Econo Products, Inc., Rochester, N. Y. Shrinkage control of flexible printing plates and the like. 2,099,154; Nov. 16.
Watkins, Robert. (See Bucy, E. H., and Watkins.)
Watson, Edgar E., assignor to The Metalectric Corporation, Waterloo, Iowa. Ball and socket coupling. 2,099,549; Nov. 16.
Watt, Elihu D., Plainfield, N. J., assignor to Raymond Concrete Pile Company, New York, N. Y. Apparatus for driving pile shells. 2,099,664; Nov. 16.
Waucquez, Charles. (See Gabrielson, C., and Waucquez.)
Weaver, Allan, Port Washington, N. Y., assignor to American Telephone and Telegraph Company. Relay. 2,099,089; Nov. 16.
Weaver, I. A., Engineering Company. (See Weaver, Ira A., assignor.)
Weaver, Ira A., assignor to I. A. Weaver Engineering Company, Springfield, Ill. Vehicle-lift. 2,099,636; Nov. 16.
Weaver, Morris, Fredericksburg, Pa. Seed separator. 2,099,505; Nov. 16.
Webb, William L., assignor to Standard Oil Company, Chicago, Ill. Making hydrocarbon resins. 2,099,090; Nov. 16.
Weber, Charles W., Margate City, N. J., assignor to The Texas Company, New York, N. Y. Liquid display device. 2,099,155; Nov. 16.
Wellford, Harry A. (See Leonard, J. W., Butterworth, Leonard, and Wellford, Harry A. and W. L., Jr.)
Wellford, Walker L., Jr. (See Leonard, J. W., Butterworth, Leonard, and Wellford, Harry A. and W. L., Jr.)
Wendel, Albert N., Meservey, Iowa. Tractor attachment. 2,099,637; Nov. 16.
Werntz, James H. (See Kirby, J. E., and Werntz.)
Werntz, James H., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Halide esters of polyunsaturated alcohols and preparing same. 2,099,357; Nov. 16.
Werring, Francis W., assignor to Kitson Company, Philadelphia, Pa. Temperature and pressure relief valve. 2,099,643; Nov. 16.
West, Donald W. (See Levy, L. A., and West.)
Western Electric Company. (See Brown, A. B., and Siebs, assignors.)
Western Electric Company. (See Cox, Thomas K., assignor.)
Western Electric Company. (See Hill, Walter M., assignor.)
Western Electric Company. (See Kalmbach, Lloyd R., assignor.)
Western Electric Company. (See Kivley, Ray C., assignor.)
Western Electric Company. (See Landreth, Morton L., assignor.)
Western Electric Company. (See McWhirter, E. M. S., and Flint, assignors.)
Western Union Telegraph Company, The. (See Lawton, Chester S., assignor.)
Western Union Telegraph Company, The. (See Smith, Donald H., assignor.)
Westinghouse Air Brake Company, The. (See Aikman, Burton S., assignor.)
Westinghouse Air Brake Company, The. (See Bush, Rankin J., assignor.)
Westinghouse Air Brake Company, The. (See Farmer, George C., assignor.)
Westinghouse Air Brake Company, The. (See Fitch, Ellery R., assignor.)
Westinghouse Air Brake Company, The. (See Good, John N., assignor.)
Westinghouse Air Brake Company, The. (See Hewitt, Ellis E., assignor.)
Westinghouse Air Brake Company, The. (See Logan, John W., Jr., assignor.)
Westinghouse Air Brake Company, The. (See Lynn, Ewing K., assignor.)
Westinghouse Electric & Manufacturing Company. (See Arnold, Edwin E., assignor.)
Weyerhaeuser Timber Company. (See Hatch, Raymond S., assignor.)
Whalen, John N. (See Morgan, M., and Whalen.)
Wheeler, Harold A., Great Neck, N. Y., assignor to Hazeltine Corporation. Automatic frequency control for oscillation systems. 2,099,156; Nov. 16.
Whelton, John M., Peabody, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Lip turning machine. 2,099,042; Nov. 16.
White, Harry B., Canton, assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 2,099,413; Nov. 16.
Whitehead, Richard H., New Haven, Conn. Clock. 2,099,414; Nov. 16.
Whitehead, William. (See Elvin, W. J., Balch, and Whitehead.)
Whitlock, Nell H., Indianapolis, Ind. Pie making and automatic baking machine combined. 2,099,247; Nov. 16.
Wickersham, Harry P. (See Burns, E., and Wickersham.)
Wicklein, Raymond R., Roselle, N. J. Crucible. 2,099,043; Nov. 16.
Widman, Charles H., Detroit, Mich., assignor to The Murray Corporation of America. Vehicle door. 2,099,248; Nov. 16.

Wigan, Edmund R., assignor to Siemens Brothers & Company Limited, London, England. Telephone instrument circuit. 2,099,381; Nov. 16.
Wiggenhorn, Guido J., South Pasadena, Calif. Water cooler. 2,099,157; Nov. 16.
Wiley, Joe, Fresco, Calif. Molding machine. 2,099,638; Nov. 16.
Williams, Charles H. (See Hill, H. S., and Williams.)
Williams, Harold E., Carthage, Mo. Reinforced fabric and making same. 2,099,586; Nov. 16.
Wilson, Emery J., Cleveland, assignor to Thew Shovel Company, Lorain, Ohio. Propelling and steering mechanisms for trucks and the like. 2,099,044; Nov. 16.
Winchester Repeating Arms Company. (See Rowley, Arthur A., assignor.)
Winckler Engineering Laboratories Incorporated. (See Winckler, Gunnar A. F., assignor.)
Winckler, Gunnar A. F., Worcester, assignor to Winckler Engineering Laboratories Incorporated, Boston, Mass. Illuminated buoy for marine service. 2,099,506; Nov. 16.
Windaus, Adolf, and F. Schenck, Gottingen, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Dehydro-sterol compounds and manufacture thereof. 2,098,984; Nov. 16.
Windaus, Adolf, Goettingen, and F. Schenck, Wuppertal-Elberfeld, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. 7-hydroxy-cholesterol. 2,098,985; Nov. 16.
Windaus, Adolf, Goettingen, and F. Schenck, Wuppertal-Elberfeld, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Antirachitic vitamin. 2,099,550; Nov. 16.
Wingfoot Corporation. (See Eberhard, Boyd C., assignor.)
Wingfoot Corporation. (See Sebrell, Lorin B., assignor.)
Wingfoot Corporation. (See Teisher, A. A., and McNeil, assignors.)
Wingfoot Corporation. (See Thies, H. R., and Lyon, assignors.)
Winters, Ted S., Albany, N. Y. Maximum demand regulator. 2,098,986; Nov. 16.
Winthrop Chemical Company. (See Bockmühl, M., and Ehrhart, assignors.)
Winthrop Chemical Company. (See Windaus, A., and Schenck, assignors.)
Wired Radio, Inc. (See Levine, Irwin B., assignor.)
Wiremold Company, The. (See La Ducer, Arthur O., assignor.)
Wiswell, Ozro N., Los Angeles, Calif. Means for opening containers. 2,099,322; Nov. 16.
Wiswell, Ozro N., assignor to Swingspout Measure Company, Los Angeles, Calif. Device for opening cans. 2,099,323; Nov. 16.
Wiswell, Ozro N., assignor to Swingspout Measure Company, Los Angeles, Calif. Device for opening cans. 2,099,323; Nov. 16.
Wiswell, Ozro N., assignor to Swingspout Measure Company, Los Angeles, Calif. Device for opening cans. 2,099,324; Nov. 16.
Witchger, ugene S., Saginaw, Mich. Self-adjusting mechanism. 2,098,987; Nov. 16.
Witschi, Frederick, Yonkers, N. Y. Apparatus for waving hair. 2,099,358; Nov. 16.
Wodtke, Hans V., Plainfield, N. J., assignor to Anaconda Wire & Cable Company, New York, N. Y. Protective jacket for conductors or cables. 2,099,415; Nov. 16.
Wolfe, Walter G., Greenwood, Mass. Projection device. 2,098,988; Nov. 16.
Wood, John, Manufacturing Company. (See Woodford, Joseph C., assignor.)
Wood, Josep D., Bethlehem, Pa., assignor to Roller-Smith Company. Circuit breaker. 2,099,639; Nov. 16.
Wood, Sydney M., Lake Bluff, Ill. Jetty. 2,099,249; Nov. 16.
Woodall-Duckham (1920) Limited. (See Middleton, C. C., and Krall, assignors.)
Woodbridge, Joseph L., assignor to The Electric Storage Battery Company, Philadelphia, Pa. Charging-control system. 2,099,640; Nov. 16.
Woodeson, William A., and W. Midgley, assignors to W. A. Woodeson, Gateshead-on-Tyne, England. Driving rotary members. 2,099,359; Nov. 16.
Woodford, Joseph C., Haverford, assignor to John Wood Manufacturing Company, Inc., Conshohocken, Pa. Liquid dispensing apparatus. 2,099,644; Nov. 16.
Woodford, Joseph C., Haverford, assignor to John Wood Manufacturing Company, Inc., Conshohocken, Pa. Register transfer mechanism. 2,099,645; Nov. 16.
Woodruff, Alfred H. (See Taylor, W. L., and Woodruff.)
Woods, Clayton W., Burbank, Calif. Softening water. 2,099,287; Nov. 16.
Worland, Wilfrid V. (See Pessagno, E. A., Schreier, Patterson, and Worland.)
Wright, E. T., & Company. (See Donovan, Alfred W. and A. F., assignors.)
Wright, Jack, assignor of one-half to A. M. McDarment, Cleveland, Ohio. Necktie rack. 2,099,507; Nov. 16.
X-Ray Shoe Fitter, Inc. (See Adrian, Matthew B., assignor.)
Yoder, Carl M., Lakewood, assignor to The Yoder Company, Cleveland, Ohio. Apparatus for and making hollow bodies. 2,098,989; Nov. 16.
Yoder Company, The. (See Yoder, Carl M., assignor.)
Yonemura, Sadao, Koishikawa-ku, Tokyo, T. Okazawa, Shibuya-ku, Tokyo, and K. Osada, Sakai, Edogawa-ku, Tokyo, assignors to Nihon Denki Kogyo Kabushiki Kaisha, Tokyo, Japan. Producing pure alumina and crude potassium sulphate from alunite. 2,099,360; Nov. 16.
Young, Henry S., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling system. 2,099,508; Nov. 16.
Yundt, Michael, Company. (See Perkins, Frank P., assignor.)
Zahn, Rudolf. (See Kögel, G., and Zahn.)
Zellhoefer, Glenn F., Bloomington, Ill. Refrigerating apparatus. 2,099,382; Nov. 16.
Zellmann, Rudolf, and R. Müller, Radebeul, assignors to Chemische Fabrik von Heyden, A. G., Radebeul, near Dresden, Germany. Manufacture of reactive thorium oxide and its transformation into thorium salts. 2,099,325; Nov. 16.
Zick, Frank E., assignor of one-half to C. R. Emery, Dearborn, Mich. Window mechanism. 2,099,184; Nov. 16.
Zickrick, Lyall, Schenectady, N. Y., assignor to General Electric Company. Electrical switch contacts. 2,099,551; Nov. 16.
Zier, Paul. (See Muck, O., Muller, and Zier.)
Zotos, Georg, Berlin, Germany. Charging high-speed rotary furnaces. 2,099,045; Nov. 16.
Zuschlag, Theodor, West Englewood, N. J., assignor to Magnetic Analysis Corporation. Magnetic analysis. 2,098,991; Nov. 16.
Zwilgmeyer, Frithjof. (See Dahlen, M. A., and Zwilgmeyer.)
Zwilgmeyer, Frithjof, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Printing and dyeing compositions and processes. 2,099,091; Nov. 16.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 16TH DAY OF NOVEMBER, 1937

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Earthenware bodies. I. E. Sproat. 20,555; Nov. 16.
Fuel burning system, Hydrocarbon. F. V. Risinger. 20,557; Nov. 16.
Hoist, Traveling. W. H. Ringe. 20,554; Nov. 16.
Light, Warning. E. E. Highhill. 20,552; Nov. 16.
Massecuite, Treating. G. E. Stevens. 20,556; Nov. 16.
Plate for wheels, Ornamental. G. A. Lyon. 20,553; Nov. 16.
Refrigerating apparatus. R. R. Candor. 20,558; Nov. 16.

LIST OF DESIGN INVENTIONS

Bag or the like, Fountain. F. Dabroski. 107,043; Nov. 16.
Base for electric fans or the like. R. E. Kruck. 106,983–5; Nov. 16.
Blind tilting device, Venetian. E. Anderson. 106,956; Nov. 16.
Block, Hollow glass building. M. K. Holmes. 106,977; Nov. 16.
Block, Hollow glass building. D. Jones. 106,980; Nov. 16.
Bottle. W. R. Kohl. 106,982; Nov. 16.
Bottle. F. W. Lohse. 107,024; Nov. 16.
Bottle and stopper, Combined. E. M. Stone. 107,035; Nov. 16.
Bottle, Glass. J. T. Hamilton. 106,972; Nov. 16.
Bottle, Glass. L. J. Klhn. 107,017; Nov. 16.
Boutonniere, Artificial. H. Haimes. 107,015; Nov. 16.
Bowl or similar article of hollow ware. G. T. Gilby. 106,971; Nov. 16.
Box or similar article. W. J. De Witt. 106,968; Nov. 16.
Brooch. H. Weiner. 107,037; Nov. 16.
Building, Service station. B. M. Solomon. 106,993; Nov. 16.
Bumper, Vertical. W. E. Porter. 107,046; Nov. 16.
Button. J. S. Lichter. 107,023; Nov. 16.
Cabinet, Electric fence controller. D. A. Kelly. 106,981; Nov. 16.
Camera, Motion picture. J. Mihalyi. 107,028; Nov. 16.
Carton or similar article. G. Wilmet. 107,000; Nov. 16.
Case, Clock. J. M. Bars. 107,004; Nov. 16.
Case, Clock. F. W. Green. 107,039; Nov. 16.
Casing, Air conditioning machine. G. Paschal. 106,987; Nov. 16.
Casing or similar article, Dispenser. G. F. Ingwersen. 106,979; Nov. 16.
Chair. I. Salomon. 106,989–90; Nov. 16.
Coat. B. Lefrak. 107,021; Nov. 16.
Coat. N. Prigozen. 107,031; Nov. 16.
Container for jewelry or similar articles, Display. J. B. Guttman. 107,014; Nov. 16.
Cushion, Pneumatic. F. G. Manson. 106,986; Nov. 16.
Desk. P. M. Fuller. 106,970; Nov. 16.
Dress. I. Aaronson. 107,060; Nov. 16.
Dress. P. Fracchia. 107,049–50; Nov. 16.
Dress. B. Fried. 107,011–12; Nov. 16.
Dress. H. Goldman. 107,051–3; Nov. 16.
Dress. E. N. Perper. 107,055; Nov. 16.
Dress. D. W. Price. 107,056; Nov. 16.
Dress. P. Schlessel. 107,057; Nov. 16.
Dress ensemble. P. Wenett. 107,061; Nov. 16.
Fabric, Knitted. J. Minoff. 107,029; Nov. 16.
Fabric, Textile. B. Adler. 107,047; Nov. 16.
Fabric, Textile. S. Messer. 107,026–7; Nov. 16.
Fabric, Textile. H. W. Wilde. 107,059; Nov. 16.
Game board. M. A. Bell. 106,958; Nov. 16.
Game board and apparatus or similar article, Combination. R. W. Danon. 106,967; Nov. 16.
Goblet or similar article. A. J. Cunningham. 107,040–2; Nov. 16.
Goblet or similar article. E. W. Newton. 107,030; Nov. 16.
Guard, Window shade. R. F. Willis. 106,999; Nov. 16.
Handbag. A. H. Love. 107,045; Nov. 16.
Heater, Circulating gas. W. T. Bradbury. 106,965; Nov. 16.
Holder, Flower. L. P. Weil. 107,036; Nov. 16.
Holder, Mass card. A. Van Hoe. 106,998; Nov. 16.
Housing for flashlights, Switch. O. T. Wood. 107,001–3; Nov. 16.
Ice crusher. T. J. Fegley and G. O. Leopold. 107,010; Nov. 16.
Lace. P. Groebli. 107,013; Nov. 16.
Lamp and bracket, Combined range. L. R. Schroeder. 106,992; Nov. 16.
Lamp or similar article, Desk. L. L. Stewart. 106,994–6; Nov. 16.
Medallion. P. H. Raap. 107,032; Nov. 16.
Mounting or similar article of jewelry, Ring. P. E. Hanson. 107,016; Nov. 16.
Necklace or analogous article. A. S. Bowen and T. Bailey. 106,963–4; Nov. 16.
Negligee. E. E. Stricker. 107,058; Nov. 16.
Novelty for a toilet door, Indicating. D. P. Iddings. 106,978; Nov. 16.
Paper or similar article, Wrapping. T. L. Carter. 107,006; Nov. 16.
Percolator, Coffee. S. H. Geffner. 107,044; Nov. 16.
Plaque. H. Helzmann. 106,974; Nov. 16.
Plate or similar article. A. Crane. 106,966; Nov. 16.
Pliers. M. C. Dellinger. 107,008; Nov. 16.
Power unit, Portable. J. W. Fitz Gerald. 106,969; Nov. 16.
Projector. M. Levey. 107,022; Nov. 16.
Rack, Can. E. D. Thomson. 106,997; Nov. 16.
Ring. R. J. Blooston and T. K. Kelly, Jr. 106,959; Nov. 16.
Rug. R. F. Bemporad. 107,005; Nov. 16.
Sachet. I. Perlmutter. 106,988; Nov. 16.
Screw driver, Pistol-grip. J. M. Cashmore. 107,007; Nov. 16.
Settee. I. Salomon. 106,991; Nov. 16.
Shoe. T. Dronoff. 107,009; Nov. 16.
Shoe. E. W. McCain. 107,025; Nov. 16.
Shoe. M. Rosenston. 107,033; Nov. 16.
Soap and support therefor, Combined cake of. L. De F. Hokerk. 106,976; Nov. 16.
Spoon or other article of flatware. A. G. Kintz. 107,018; Nov. 16.
Spoon or other article of flatware. E. P. Zawisza. 107,038; Nov. 16.
Stand and ashtray, Combination pencil. H. Heizmann. 106,975; Nov. 16.
Support, retainer, and stop attachment for Venetian blinds, Combination bearing. E. Anderson. 106,955; Nov. 16.
Sweater. H. Boepple. 106,960–2; Nov. 16.
Table. A. H. Bechtol. 106,957; Nov. 16.
Tank body for vehicles. A. A. Kramer, J. M. Kramer, and W. M. Gadberry. 107,054; Nov. 16.
Tank vehicle body, Trailer. J. M. Kramer and H. A. Mullin. 107,019; Nov. 16.
Tie, Coat. M. Rosow. 107,034; Nov. 16.
Tool unit, Power driven hand. C. Desoutter. 107,048; Nov. 16.
Tower and cabinet for automobile service stations or similar articles, Combined hose. W. A. Kropp. 107,020; Nov. 16.
Tumbler. M. O. Hansen. 106,973; Nov. 16.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 16TH DAY OF NOVEMBER, 1937

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Acid and sparingly soluble chromates, Preparation of chromic. R. E. Pearson and W. V. Gilbert. 2,099,658; Nov. 16.
Acid manufacture, Nitric. A. Christensen. 2,098,953; Nov. 16.
Acids, Recovery of sulphonic. R. C. Moren and W. A. Meyer. 2,099,529; Nov. 16.
Adjustable seat. A. M. Fleming. 2,099,107; Nov. 16.
Advertising blotting device. E. F. O'Neill. 2,099,135; Nov. 16.
Aeration in biochemical processes, Carrying out. R. Hellbach. 2,098,962; Nov. 16.
Agricultural implement. P. Penn. 2,099,032; Nov. 16.
Air cooling unit for automotive vehicles. R. F. Peo. 2,099,227; Nov. 16.
Aircraft, Crash cause recorder for. S. G. Allen. 2,099,587; Nov. 16.
Aircraft lamp. M. C. Harley. 2,099,362; Nov. 16.
Alcohols, Purification of synthetically produced. J. Giesen, H. Hanisch, and M. Daily. 2,099,475; Nov. 16.
Alloy, Steel. E. F. Blessing. 2,099,509; Nov. 16.
Altimeter. V. E. Carbonara. 2,099,466–7; Nov. 16.
Alumina and crude potassium sulphate from alunite, Producing pure. S. Yonemura, T. Okazawa, and K. Osada. 2,099,360; Nov. 16.
Ammonium sulphate, Production of coarsely crystalline. C. Rumscheidt and A. Strzyzewski. 2,099,079; Nov. 16.
Antenna, Aperiodic. P. S. Carter. 2,099,296; Nov. 16.
Apparel, Wearing. A. Simpson. 2,099,238; Nov. 16.
Arch support pad. M. S. Silver. 2,099,577; Nov. 16.
Articles, Flexible. G. B. Bradshaw. 2,099,047; Nov. 16.
Articles, Method of coating. T. K. Cox. 2,099,103; Nov. 16.
Ashtray. G. Toniolo. 2,099,635; Nov. 16.
Asphalt oxidation. C. P. McNeil and S. A. Montgomery. 2,099,448; Nov. 16.
Automobile jack. C. W. Johnson and G. M. Smith. 2,099,487; Nov. 16.
Azo-dyestuffs. M. Lange. 2,098,967; Nov. 16.
Azodyestuffs and fiber dyed therewith, Water-insoluble. H. Morschel and F. Gund. 2,099,272; Nov. 16.
Bag construction. L. Goodman. 2,099,425; Nov. 16.
Ball and socket coupling. E. E. Watson. 2,099,549; Nov. 16.
Band for advertising and the like devices, Moving. G. S. Shaw. 2,099,281; Nov. 16.
Bandage and support, Abdominal. R. W. Spain. 2,099,541; Nov. 16.
Bar clean-out, Drop. G. C. Paxton. 2,099,221; Nov. 16.
Barrel. T. C. Hollnagel. 2,099,113; Nov. 16.
Barrel stave crozer. J. W. Leonard, W. R. Butterworth, Jr., C. Leonard, H. A. Wellford, and W. L. Wellford, Jr. 2,099,445; Nov. 16.
Bat, Baseball. H. W. Herkimer and H. E. Holcomb. 2,099,521; Nov. 16.
Bearing: *See*—
Strip bearing.
Bearing. T. L. Robinson. 2,099,660; Nov. 16.
Bedding pad. C. D. Karr. 2,099,427; Nov. 16.
Beer trap adapter. J. McAdams. 2,099,528; Nov. 16.
Belt. A. A. Teisher and G. I. McNeil. 2,099,545; Nov. 16.
Bicycle lock. R. P. Holsen. 2,099,606; Nov. 16.
Billfold. L. A. Mueller. 2,099,569; Nov. 16.
Binder. G. S. Emery. 2,099,472; Nov. 16.
Bituminous emulsion. P. R. Smith. 2,099,351–3; Nov. 16.
Blank feeding means. H. Rosenberg. 2,099,232; Nov. 16.
Blanket. T. B. Keen and T. F. Gibboney. 2,099,609; Nov. 16.
Block: *See*—
Building block.
Boat. A. E. Luders. 2,099,492; Nov. 16.
Boat and constructing the same. M. L. Gilbert. 2,099,438; Nov. 16.
Boat propelling device. B. Strezoff. 2,099,544; Nov. 16.
Boiler pressure control apparatus. J. B. Snyder. 2,099,239; Nov. 16.
Bodies including boots and shoes, Uniting curved. W. Stelkens. 2,099,320; Nov. 16.
Bolster supporting unit. D. F. Sproul. 2,099,240; Nov. 16.
Book, Pass. H. H. Hill. 2,099,482; Nov. 16.
Bottle assembly. A. H. Payson. 2,099,174; Nov. 16.
Bottle, Flexible. E. T. Ferngren. 2,099,065; Nov. 16.
Bottle vending machine. F. De Mayo, Jr. 2,099,557; Nov. 16.
Box: *See*—
Tackle box.
Box for service pipe shut-offs in water systems, Curb. J. Heinkel and W. J. Hebenstreit. 2,099,479; Nov. 16.
Bracket and installation thereof, Mounting. W. C. MacFadden. 2,099,655; Nov. 16.
Bracket for electrical wires. W. J. Binkley. 2,099,098; Nov. 16.
Brake: *See*—
Fluid pressure brake.
Brake control system, Air. D. F. Searle. 2,099,453; Nov. 16.
Brake lever construction. R. A. Sandberg. 2,099,233; Nov. 16.
Brake rigging. T. C. Crossman. 2,099,421; Nov. 16.
Brake system, Trailer. A. L. Farmer. 2,099,263; Nov. 16.
Brake system, Train. J. W. Logan, Jr. 2,099,428; Nov. 16.
Brake tester, Automobile. J. L. Shroyer. 2,098,979; Nov. 16.
Brush rigging, Shiftable. R. F. Bean. 2,099,554; Nov. 16.
Buckle and belt-connecter, Combined center-bar. S. H. Cohn and S. Levin. 2,099,387; Nov. 16.
Buckle, One-piece. J. A. and W. A. Devendor. 2,099,199; Nov. 16.
Building block. A. N. Turnquist. 2,099,149; Nov. 16.
Building construction. R. L. Hohl. 2,099,337; Nov. 16.
Building construction. E. A. Pesagno, E. P. Schreier, M. A. Patterson, and W. V. Worland. 2,099,077; Nov. 16.
Building construction and panel for use therein. W. I. Lucius. 2,099,211; Nov. 16.
Bumper, Automobile. J. Calabro. 2,099,049; Nov. 16.
Buoy for marine service, Illuminated. G. A. F. Winckler. 2,099,506; Nov. 16.
Burner: *See*—
Gas burner.
Lateral draft burner.
Liquid fuel burner.
Bushing, High voltage liquid-filled. S. Terpak. 2,099,666; Nov. 16.
Cabinet, Filing. F. W. Tobey. 2,099,148; Nov. 16.
Cable, Electric. R. C. Mildner. 2,099,407; Nov. 16.
Cable system, Electric. C. E. Bennett. 2,099,291; Nov. 16.
Cables, Apparatus for stripping electric. C. P. Seckham. 2,099,084; Nov. 16.
Cables, Method of and apparatus for laying submarine. C. S. Lawton. 2,099,527; Nov. 16.
Calculating machine. J. Gebhardt. 2,099,060; Nov. 16.
Call transmitter device. J. G. Roberts and C. D. Richard. 2,099,143; Nov. 16.
Camber flaps and the like for airplanes, Device for the automatic control of. R. L. Levy. 2,099,368; Nov. 16.
Cameras, Repeating back for. H. A. McCordock. 2,099,072; Nov. 16.
Cans, Device for opening. O. N. Wiswell. 2,099,323–4; Nov. 16.
Car and trailer combination apparatus, Railroad. E. H. Allen. 2,099,288; Nov. 16.
Carburetor. E. G. Atkins. 2,099,553; Nov. 16.
Carburetor spring. W. M. Ewart. 2,099,106; Nov. 16.
Card shuffling and dealing device. R. Atti. 2,099,187; Nov. 16.
Carrier for photographic strip film, Roll. L. Busch. 2,099,646; Nov. 16.
Carrier scraper, Combined. R. M. Davenport. 2,099,435; Nov. 16.
Carrier wave modulation and suppression. W. Buschbeck. 2,099,294; Nov. 16.
Carton construction. H. A. and W. H. Inman. 2,099,166; Nov. 16.
Casein, Manufacturing. J. R. Spellacy. 2,099,379; Nov. 16.
Casing: *See*—
Light casing.
Ceiling installation and fastener for the same. C. L. Hall. 2,099,649; Nov. 16.
Cellulosic article of manufacture and preparing same. D. E. Strain. 2,099,455; Nov. 16.
Cellulose esters from scrap, Recovery of. M. J. Reid. 2,099,347; Nov. 16.
Cellulosic product and preparing same. W. W. Heckert. 2,099,441; Nov. 16.
Cements, Aluminous. E. W. Scripture. 2,099,176; Nov. 16.
Centering device for swivel trucks. W. S. H. Hamilton and F. W. Butt. 2,099,361; Nov. 16.
Ceramic products, Compounding. J. G. A. Lefranc. 2,099,367; Nov. 16.

Chain gearing for bicycles and the like, Change speed. J. M. Gruyer. 2,099,477; Nov. 16.
Chair: *See*—
Folding chair.
Charging-control system. J. L. Woodbridge. 2,099,640; Nov. 16.
Chaser grinding means. C. S. Mueller. 2,099,074; Nov. 16.
Check and check controlled mechanism. W. K. Schauweker. 2,099,234; Nov. 16.
Chemical compound and use therefor. W. Brun. 2,099,293; Nov. 16.
Chronometer, Glove. G. W. Hazlett. 2,099,518; Nov. 16.
Circuit breaker. F. G. von Hoorn. 2,099,585; Nov. 16.
Circuit breaker. J. D. Wood. 2,099,639; Nov. 16.
Circuit breaker, Automatic. M. K. Hindle. 2,099,483; Nov. 16.
Circuit for reducing static. M. G. Nicholson, Jr. 2,099,311; Nov. 16.
Circuit, Telephone instrument. E. R. Wigan. 2,099,381; Nov. 16.
Circuit, Vacuum tube. H. S. Black. 2,098,950; Nov. 16.
Clamp: *See*—
Conductor clamp. Pull rod clamp.
Clamp. L. R. Kalmbach. 2,099,116; Nov. 16.
Cleaner: *See*—
Suction cleaner. Vacuum cleaner.
Cleaning device for strainers. H. C. Stockdale. 2,099,502; Nov. 16.
Clean-out. H. Paxton. 2,099,225–6; Nov. 16.
Clip: *See*—
Display clip. Pipe clip.
Clock. H. C. James, Jr. 2,098,965; Nov. 16.
Clock. R. H. Whitehead. 2,099,414; Nov. 16.
Clock device, Alarm. R. Varley. 2,099,547; Nov. 16.
Closure and pouring device. E. G. Schaetzel. 2,099,629; Nov. 16.
Clothes pin. D. C. Smith. 2,099,177; Nov. 16.
Clutch control device, Pneumatic. G. C. Farmer. 2,099,422; Nov. 16.
Clutch facings, brake linings, and like products, Making. S. P. Miller. 2,099,132; Nov. 16.
Coating composition. G. D. Fortman. 2,099,423; Nov. 16.
Coating composition. R. L. Sibley. 2,099,237; Nov. 16.
Coating composition and preparing same. R. L. Sibley. 2,099,236; Nov. 16.
Coatings. J. D. Murray. 2,099,570; Nov. 16.
Cock and thermostatic control means, Combination gas. B. L. Matthews and J. T. Marvin. 2,099,171; Nov. 16.
Coffee extract, Manufacture of concentrated. D. Fronmuller. 2,098,961; Nov. 16.
Coil, Evaporator. R. H. Anderegg. 2,099,186; Nov. 16.
Coin collector apparatus for use at telephone pay stations. M. L. Landreth. 2,099,124; Nov. 16.
Collapsible container. H. Jezler. 2,099,523; Nov. 16.
Collar and the like. C. F. Hendrycy. 2,099,520; Nov. 16.
Colloid layers and tanned pictures therefrom, Light sensitive. G. Kögel and R. Zahn. 2,099,404; Nov. 16.
Communication system. H. E. Ives. 2,099,115; Nov. 16.
Compartment, Insulator. C. W. J. Hedberg. 2,099,063; Nov. 16.
Compensating spring. F. P. Flagg. 2,099,474; Nov. 16.
Compounds, Halogenation of unsaturated. J. D. Ruys and J. W. Edwards. 2,099,231; Nov. 16.
Concrete pile manufacture. M. M. Upson and E. A. Smith. 2,099,285; Nov. 16.
Condensation product of phenolphthalein. E. H. Bucy and R. Watkins. 2,099,510; Nov. 16.
Conductor clamp. W. H. Burleson. 2,099,465; Nov. 16.
Connecter: *See*—
Buckle and belt-connecter. Timber connecter.
Electrical connecter.
Connecter. F. C. Lavarack. 2,099,526; Nov. 16.
Container: *See* –
Collapsible container. Roll top container.
Dispensing container. Wire container.
Container. R. M. Bergstein. 2,099,257; Nov. 16.
Container closure and cap. E. T. Ferngren. 2,099,056;
Container construction. H. C. Aument. 2,099,095; Nov. 16.
Container construction, Two part. E. T. Ferngren. 2,099,057; Nov. 16.
Containers, Means for opening. O. N. Wiswell. 2,099,322; Nov. 16.
Containers, Sealing. W. H. Belder and T. M. Cunningham. 2,099,097; Nov. 16.
Control for refrigeration systems, Superheat. J. L. Shrode. 2,099,035; Nov. 16.
Control system. C. Schiebeler. 2,099,576; Nov. 16.
Conveyer. F. Cartlidge. 2,099,512; Nov. 16.
Conveyer. F. P. Perkins. 2,098,971; Nov. 16.
Cooler: *See*—
Water cooler.
Cot, Convertible metallic. J. H. Prescott. 2,099,621; Nov. 16.
Coupling: *See*—
Ball and socket coupling. Hose coupling.
Coupling mechanism. E. A. Larsson. 2,099,490; Nov. 16.
Cover: *See*—
Insulated cover. Spring cover.
Slip-on cover.
Cover structure, Display. C. W. Boston. 2,099,046; Nov. 16.
Covering for surfaces exposed to the weather. W. H. Outman. 2,099,572; Nov. 16.
Covering for surfaces exposed to the weather, Making a. W. H. Outman. 2,099,571; Nov. 16.
Cowl for air-cooled aircraft engines. A. H. R. Fedden and J. W. Copley. 2,098,947; Nov. 16.
Creel for artificial yarns. W. J. Elvin, R. H. Balch, and W. Whitehead. 2,099,008; Nov. 16.
Crucible. R. R. Wicklein. 2,099,043; Nov. 16.
Culotte. W. Gurian. 2,099,478; Nov. 16.
Cushion, Spring. J. A. Findora. 2,099,200; Nov. 16.
Cushion tufting structure. C. L. Hall. 2,099,650; Nov. 16.
Cutting-off mechanism for bag making machines and the like. A. Potdevin. 2,099,314; Nov. 16.
Dehumidifier. R. T. Smith. 2,099,665; Nov. 16.
Dehydrator, Electric. T. N. St. Hill. 2,098,982; Nov. 16.
Dehydro-sterol compounds and manufacture thereof. A. Windaus and F. Schenck. 2,098,984; Nov. 16.
Dentures, Apparatus for effecting separation of the parts of. A. J. Vance. 2,099,087; Nov. 16.
Developing apparatus. F. Busse. 2,099,159; Nov. 16.
Diesel engine. R. E. Olds. 2,099,371; Nov. 16.
Direction signal. B. A. Crenshaw. 2,099,331; Nov. 16.
Dispenser: *See*—
Liquid dispenser.
Dispensing container. C. Seidler. 2,099,412; Nov. 16.
Dispensing device, Dripless. M. J. Brown. 2,099,292; Nov. 16.
Display. C. C. Cloud. 2,099,420; Nov. 16.
Display, Animated. D. L. Peterson. 2,099,277; Nov. 16.
Display clip, Neckwear. R. K. Hoffman. 2,099,269; Nov. 16.
Display device and drive therefor. C. Roberts. 2,099,142; Nov. 16.
Display device, Cardboard. J. V. Horr. 2,099,015; Nov. 16.
Distributing means for concrete pavers. A. E. Lundbye. 2,099,071; Nov. 16.
Distributor device. W. H. T. Holden. 2,099,065; Nov. 16.
Door latch. H. P. Sweet. 2,099,456; Nov. 16.
Door lock. R. B. McFarlane. 2,099,343; Nov. 16.
Door, Sliding. H. C. Blodgett. 2,099,191; Nov. 16.
Door, Vehicle. C. H. Widman. 2,099,248; Nov. 16.
Doors, Operating device for use in connection with coke-oven. C. C. Middleton and R. F. Krall. 2,099,271; Nov. 16.
Drafting apparatus. G. E. Repass. 2,098,974; Nov. 16.
Drafting machine. R. H. Garner. 2,099,266; Nov. 16.
Drier: *See*—
Seed cotton cleaner-drier.
Driving mechanism to maintain constant the required length of an endless driving means. F. A. Nicholson and W. T. Pritchard. 2,099,218; Nov. 16.
Dry cells, Making. O. Metzger. 2,099,449; Nov. 16.
Drying, Method and apparatus for. W. H. Charch. 2,099,160; Nov. 16.
Drying, Process and apparatus for. W. C. Eberlin. 2,099,162; Nov. 16.
Dyestuffs, Azo. M. A. Kunz, H. Krzikalla, and W. Limbacher. 2,099,168; Nov. 16.
Dyestuffs, Production of water-soluble azo. H. Krzikalla, H. Dehnert, and D. Vossen. 2,099,525; Nov. 16.
Dynamo-electric machine. M. A. Savage. 2,099,575; Nov. 16.
Dynamometer. J. C. Slonneger. 2,099,662; Nov. 16.
Easel construction. F. O. Brant. 2,099,192; Nov. 16.
Egg handling tool. N. J. Annema. 2,099,588; Nov. 16.
Egg separator. T. J. O'Connell. 2,099,276; Nov. 16.
Electric arc lamp. W. C. Mitchell. 2,099,073; Nov. 16.
Electric switch. C. P. Pepper. 2,099,573; Nov. 16.
Electrical appliance and base. W. H. Fischer. 2,099,437; Nov. 16.
Electrical connecter. G. B. Benander. 2,099,555; Nov. 16.
Electrical device. A. Lampl. 2,099,305; Nov. 16.
Electrical generating and control system. S. Cerstvik. 2,099,468; Nov. 16.
Electrical measuring system. W. G. Crocker. 2,099,002; Nov. 16.
Electrical safety system. I. E. Butler. 2,099,195; Nov. 16.
Electrical testing machine. H. E. Fracker. 2,099,298; Nov. 16.
Electrolytic device. C. de Lange. 2,099,599; Nov. 16.
Electron discharge device. G. Passarge. 2,099,531; Nov. 16.
Enameling, Process of. K. Kautz. 2,099,340; Nov. 16.
Engine: *See*—
Diesel engine. Precombustion - chamber engine.
Internal combustion engine.
Engine or pump, Reciprocating. W. A. Hildyard. 2,099,481; Nov. 16.
Envelope. A. C. Benedict. 2,099,256; Nov. 16.
Envelope. C. F. Elmore. 2,099,007; Nov. 16.
Envelope. B. J. Steele. 2,099,354; Nov. 16.

Refrigerating apparatus. L. A. Philipp. 2,099,409; Nov. 16.
Refrigerating apparatus. G. F. Zellhoefer. 2,099,382; Nov. 16.
Refrigerating machine, Absorption. J. L. Getaz. 2,099,201; Nov. 16.
Refrigeration. H. M. Ullstrand. 2,099,041; Nov. 16.
Refrigerator drip catcher and air circulation control. R. M. Henderson. 2,099,165; Nov. 16.
Refuse burning furnace. M. A. Hofft. 2,099,522; Nov. 16.
Register. R. C. Bradley. 2,099,463; Nov. 16.
Register. W. Marshall. 2,099,306; Nov. 16.
Register transfer mechanism. J. C. Woodford. 2,099,645; Nov. 16.
Regulator: *See*—
Maximum demand regulator.
Relay. A. Weaver. 2,099,089; Nov. 16.
Resilient support. J. F. Neal and W. M. Haessler. 2,099,031; Nov. 16.
Resin and producing, Synthetic. I. W. Humphrey. 2,099,486; Nov. 16.
Resin esters and their production, Hydrogenated. I. W. Humphrey. 2,099,067; Nov. 16.
Resins, Artificial. R. Hill and E. E. Walker. 2,098,964; Nov. 16.
Resins, Making hydrocarbon. W. L. Webb. 2,099,090; Nov. 16.
Retardation controller, Shockproof. E. R. Fitch. 2,099,390; Nov. 16.
Rim construction and making the same, Laminated. C. W. Ryerson. 2,099,410; Nov. 16.
Road roller. A. W. Aitken. 2,099,590; Nov. 16.
Rodent trap. G. M. Landes. 2,099,021; Nov. 16.
Roll top container. J. Kreisler. 2,099,122; Nov. 16.
Roller: *See*—
Paste cutting roller. Road roller.
Roof composition and producing the same. H. C. Avery. 2,099,093; Nov. 16.
Roofing. H. C. Avery. 2,099,094; Nov. 16.
Room cooling apparatus, Portable. J. R. Ballard. 2,099,188; Nov. 16.
Rotary members, Driving. W. A. Woodeson and W. Midgley. 2,099,359; Nov. 16.
Rubber conversion products, Preparing. L. B. Sebrell. 2,099,318; Nov. 16.
Rubber, Treatment of. H. R. Thies and G. R. Lyon. 2,099,546; Nov. 16.
Rudder, Fin equipped. L. Possenheim. 2,099,229; Nov. 16.
Rug and making same. W. W. Robinson. 2,099,626; Nov. 16.
Saddle and making the same. E. W. Swett. 2,099,503; Nov. 16.
Safety device for engines. A. O. Carpenter. 2,099,556; Nov. 16.
Safety device for oil burners, Dual. J. J. Brown. 2,098,951; Nov. 16.
Sandal, Waterproof bathing. C. E. Bradley and K. L. Keene. 2,099,418; Nov. 16.
Sanding device, Track. K. Procházka. 2,099,315; Nov. 16.
Saw, Scroll. H. E. Tautz. 2,099,321; Nov. 16.
Screen: *See*—
Fireplace screen.
Sculpture. J. Limeses, A. M. M. T. M. Saralegui, and C. A. P. Del Cerro. 2,099,612; Nov. 16.
Seal, Condenser tube. O. Markel, W. H. Phillips, and J. M. Bandish. 2,099,026; Nov. 16.
Sealing means. J. W. McClatchie. 2,099,169; Nov. 16.
Seat: *See*—
Adjustable seat.
Sedimentation apparatus. N. B. Lund. 2,099,654; Nov. 16.
Seed cotton cleaner-drier. N. B. Henry. 2,099,064; Nov. 16.
Seed separator. M. Weaver. 2,099,505; Nov. 16.
Seismic prospecting, Method and apparatus for. S. A. Scherbatskoy and J. Neufeld. 2,099,536; Nov. 16.
Self-adjusting mechanism. E. S. Witchger. 2,098,987; Nov. 16.
Separator: *See*—
Egg separator. Seed separator.
Setting tool. E. Burns and H. P. Wickersham. 2,099,048; Nov. 16.
7-hydroxy-cholesterol. A. Windaus and F. Schenck. 2,098,985; Nov. 16.
Sewing machine, Slip stitch. H. Rosenman and L. Roseman. 2,099,574; Nov. 16.
Shank stiffener. H. Gordon. 2,099,394; Nov. 16.
Sharpening device. F. A. Stainbrook. 2,099,179; Nov. 16.
Shaving device. J. B. Gormley. 2,099,334; Nov. 16.
Shears. M. Morgan and J. N. Whalen. 2,099,496; Nov. 16.
Sheet for rotary printing presses, Draw. R. R. Lewis. 2,099,024; Nov. 16.
Sheeting, colored cellulose ester. W. O. Kenyon and R. H. Van Dyke. 2,099,341; Nov. 16.

Shield, Insulator. D. H. Smith. 2,099,540; Nov. 16.
Shingle, Thick butt. S. P. Miller. 2,099,131; Nov. 16.
Ships, Antirolling apparatus for. W. Wallace. 2,099,380; Nov. 16.

Weaving machine, High capacity. R. Rossmann. 2,099,627; Nov. 16.
Web feeding mechanism. A. H. Blohm. 2,098,940; Nov. 16.
Welding, Apparatus for. J. V. Caputo. 2,098,952; Nov. 16.
Well holes, Means and method of determining the inclination of. C. A. Reinhard. 2,099,372; Nov. 16.
Well pumping unit. H. G. Durnell and S. T. Steel. 2,098,957; Nov. 16.
Well sampler, Bottom hole. G. W. Rusler. 2,099,080; Nov. 16.
Wheel: *See*—
Traction wheel.
Wheel structure, Steering. T. B. Roberts and W. A. Howard. 2,099,625; Nov. 16.
Wheel suspension, Vehicle. J. R. Holmes. 2,099,114; Nov. 16.
Window mechanism. F. E. Zick. 2,099,184; Nov. 16.
Window top ventilator, Storm. F. J. Schmidt. 2,099,235; Nov. 16.
Windshield wiper motor. F. G. G. Armstrong and H. Clayton-Wright. 2,098,936; Nov. 16.
Wiper for typesetting machines, Mouth. D. J. Fournet. 2,099,264; Nov. 16.
Wire, Apparatus for coating. O. A. McNamee. 2,099,270; Nov. 16.
Wire container. A. N. Joley. 2,099,339; Nov. 16.
Wire-handling apparatus. R. C. Pierce. 2,099,532; Nov. 16.
Wire splicer. R. W. Davis. 2,098,945; Nov. 16.
Woodworking tool. T. L. Hedgpeth. 2,099,519; Nov. 16.
Wrapper for commodities, Paper. C. S. Hamersley and S. C. Fairbanks. 2,099,301; Nov. 16.
Wrench: *See*—
Ratchet wrench.
Wringer, Mop. C. C. Newland. 2,099,217; Nov. 16.
X-ray inspection apparatus. M. B. Adrian. 2,099,185; Nov. 16.
Yarn, Asbestos textile. W. A. Barrell. 2,098,995; Nov. 16.
Yarn-change feeding mechanism for circular knitting machines. H. McAdams. 2,099,307; Nov. 16.
Yarn manufacture. P. F. C. Sowter. 2,098,980–1; Nov. 16.
Yarn, Producing hairy rayon. J. E. Moore. 2,099,215; Nov. 16.
Yeast molding and cutting machine. H. L. King, A. Sharp, and K. Schnorr. 2,099,119; Nov. 16.
Yeast, Treating liquid. R. F. Light, C. N. Frey, and G. J. Patitz. 2,099,025; Nov. 16.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 16, 1937

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number = class, second number = subclass, third number = patent number

Ames, Butler, Boston, Mass. Cooking apparatus. 2,099,788; Nov. 23.
Anderson, Emil E. W. (See Dalén, S. G., and Anderson.)
Andreas, Arno, Munster, Germany, assignor to Bagpak, Inc., New York, N. Y. Packing filling machine. 2,099,834; Nov. 23.
Andrews, L. V., assignor to Riley Stoker Corporation, Worcester, Mass. Pulverizing apparatus. 2,100,020; Nov. 23.
Andrews, Nathaniel R., Yonkers, N. Y. Separating liquids from solids and apparatus therefor. 2,100,118; Nov. 23.
Armour & Company. (See Conquest, Victor, assignor.)
Armstrong, Edward R., Hollyoak, Del. Sea bottom anchor system and placing the same. 2,100,231; Nov. 23.
Armstrong Siddeley Motors Limited. (See Cutler, Gerard M., assignor.)
Arveson, Maurice H., Highland, Ind., assignor to Standard Oil Company, Chicago, Ill. Treatment of hydrocarbon oil. 2,099,919; Nov. 23.
Ashford, John. (See Leonard, Carl H., assignor.)
Ashton, Benjamin N., Bloomfield, assignor to Eclipse Aviation Corporation, East Orange, N. J. Distributor valve. 2,100,154; Nov. 23.
Associated Attleboro Manufacturers, Inc. (See Stenberg, Knut E. B., assignor.)
Associated Electric Laboratories, Inc. (See Robinson, Harold C., assignor.)
Ateliers de Constructions Electriques de Delle. (See Clerc, André, assignor.)
Atlantic Refining Company, The. (See Ferris, S. W., Houghton, and Cowles, assignors.)
Atwell, Harold V., White Plains, N. Y., assignor to Gasoline Products Company, Inc., Newark, N. J. Treating hydrocarbon oil. 2,099,920; Nov. 23.
Bagpak, Inc. (See Andreas, Arno, assignor.)
Bahlke, William H., R. F. Ruthruff, and F. W. Sullivan, Jr., Hammond, assignors to Standard Oil Company, Whiting, Ind. Decomposing hydrocarbon oils. 2,099,718; Nov. 23.
Bairey, George B., Wolf Point, Mont., assignor, by mesne assignments, to Collins Radio Company. Antenna system. 2,099,671; Nov. 23.
Baker, David B., Riverside, C. R. Rogers, Oak Park, and N. O. Panzegrau, Chicago, Ill., assignors to International Harvester Company. Front end construction for tractors. 2,099,789; Nov. 23.
Baker, David B., Riverside, C. R. Rogers, Oak Park, and N. O. Panzegrau, Chicago, Ill., assignors to International Harvester Company. Mounting of auxiliaries for tractor engines. 2,099,790; Nov. 23.
Baldwin, Alfred W., and H. A. Piggott, Blackley, Manchester, England, assignors to Imperial Chemical Industries Limited. Solubilized higher aliphatic sulphides and their production. 2,100,297; Nov. 23.
Baldwin Rubber Company. (See Hunter, G. G., Pryale, and Clark, assignors.)
Baldwin-Southwark Corporation. (See DeForest, Alfred V., assignor.)
Ball, Donald A. (See Quick, C. G., Ball, and Whitehead.)
Ballantine, Stuart, Mountain Lakes, N. J., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Electrical communication circuit. 2,100,180; Nov. 23.
Bancroft, Albert F., West Newton, assignor to Bancroft-Walker Company, Waltham, Mass. Shoe machine. 2,099,995; Nov. 23.
Bancroft-Walker Company. (See Bancroft, Albert F., assignor.)
Bangs, Ralph C., Providence, R. I., assignor to Coro-Gram, Inc., New York, N. Y. Button. 2,099,979; Nov. 23.
Banning, Thomas A., Jr., Evanston, Ill., assignor to Radio Corporation of America. Preselective tuning for radio reception and the like. 2,099,719; Nov. 23.
Barlow, Edwin H., Hillside, A. P. Hewlett, Cranford, and P. E. Kuhl, Elizabeth, N. J., assignors to Standard Oil Development Company. Producing gasoline from cracked naphtha. 2,099,835; Nov. 23.
Barrows, Donald S., assignor to The Symington-Gould Corporation, Rochester, N. Y. Railway truck. 2,100,181; Nov. 23.
Barry, Gerald J., assignor to Philco Radio & Television Corporation, Philadelphia, Pa. Flexible coupling for radio volume control or the like. 2,100,232; Nov. 23.
Barsch, Guillaume, Paris, France, assignor to Industrie A. G. Allegro, Emmenbrucke, Switzerland. Blade sharpening device. 2,099,791; Nov. 23.
Baxter, William E., Floyd County, Ind. Pouch. 2,100,298; Nov. 23.
Beadling, Charles T., Canonsburg, Pa. Electric soldering iron. 2,099,792; Nov. 23.
Beard, Earl E., Milwaukee, Wis., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Anthraquinonyl thiazoles. 2,099,672; Nov. 23.
Beard, Earl E., Milwaukee, Wis., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. 1-Acylamino anthraquinone-6-thiazoles. 2,099,673; Nov. 23.
Beatie, Cecil E., Forest Hills, N. Y., assignor, by mesne assignments, to Power Patents Company, Jersey City, N. J. Cracking oil. 2,100,048; Nov. 23.
Beaumont, Eugene P., New York, N. Y., assignor to Whiting Manufacturing Company, Minneapolis, Minn. Automatic chain lock. 2,100,233; Nov. 23.
Becker, Stephen P., Poughkeepsie, N. Y. Line tap stick wrench. 2,099,921; Nov. 23.
Bedell, James R., Cuyahoga Falls, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Dispensing container. 2,100,096; Nov. 23.
Beharrell, George E., Streetly; J. Wright, Coventry; and H. Trevaskis, Sutton Coldfield, assignors to Dunlop Rubber Company, Limited, London, England. Machine gun fire control apparatus. 2,100,097; Nov. 23.
Beling, Christopher C., executor. (See Beling, Leopold.)
Beling, Leopold, deceased, Long Beach, N. Y.; C. C. Beling, executor, Newark, N. J. Teapot. 2,099,996; Nov. 23.
Belknap, Gardner A., Conneautville, Pa. Massaging device. 2,100,234; Nov. 23.
Bell, Nathan, Los Angeles, Calif. Culinary article. 2,100,021; Nov. 23.
Bell Telephone Laboratories, Incorporated. (See Ives, Herbert E., assignor.)
Bell Telephone Laboratories, Incorporated. (See Morton, Edmund R., assignor.)
Bellman, Edward L., assignor of one-half to E. W. Johnson, Rockford, Ill. Screw propeller. 2,099,922; Nov. 23.
Bendix Aviation Corporation. (See Reichel, Wladimir A., assignor.)
Benecke, Heinrich, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Coil body for field coils of electrodynamic loudspeakers. 2,099,997; Nov. 23.
Bennett, Henry E., Grand Rapids, Mich. Chair. 2,100,098; Nov. 23.

Beran, Vojtěch, Pribram, Czechoslovakia. Electrical purification of gases. 2,100,155; Nov. 23.
Berg, Robert H., San Francisco, Calif. Loading and unloading device for trucks or other vehicles. 2,099,998; Nov. 23.
Berglund, Emil. (See Nilson, Harold.)
Bergstein, Edna M., et al., trustees. (See Bergstein, Samuel, assignor.)
Bergstein, Robert M., et al., trustees. (See Bergstein, Samuel, assignor.)
Bergstein, Samuel, Cincinnati, Ohio, assignor to E. M. and R. M. Bergstein, trustees. Container assembling machine. 2,100,022; Nov. 23.
Berman, George A., assignor of one-half to O. L. Rugaard, Lawrence, Mass. Floor surfacing machine. 2,099,969; Nov. 23.
Billner, Karl P., New York, N. Y. Apparatus for stabilizing high speed trains. 2,099,720; Nov. 23.
Bingham's, Sam'l., Son Mfg. Co. (See Conklin, Melvin J., assignor.)
Bishkin, Sam L. (See Rolshausen, F. W., and Bishkin.)
Bitney, Dewey H., assignor to Union Steel Products Company, Albion, Mich. Continuous column clip. 2,099,951; Nov. 23.
Black, William F. (See Dahl, O., and Black.)
Blake, Henry W., assignor to W. F. Kirk, Kansas City, Mo. Refrigerator structure. 2,099,793; Nov. 23.
Blanchard, Philip D., Hammond, Ind., and C. R. Hardy, Mount Vernon, assignors to The Superheater Company, New York, N. Y. Compound feeder. 2,099,836; Nov. 23.
Blau, Ludwig W., Houston, Tex., assignor to Standard Oil Development Company. Seismic reflection method. 2,099,837; Nov. 23.
Bleuel, Alex H., Wauwatosa, Wis. Studding shoe. 2,100,209; Nov. 23.
Blount, William H., West Brookfield, assignor to Sleeper & Hartley, Inc., Worcester, Mass. Coil stripper. 2,100,046; Nov. 23.
Bocjl Corporation, trustee. (See Jenkins, Clarence E., assignor.)
Bock Oil Burner Corporation. (See Bock, Oscar L., assignor.)
Bock, Oscar L., assignor to Bock Oil Burner Corporation, Madison, Wis. Method of burning fuel. 2,100,049; Nov. 23.
Bonney, Lynn F., Los Angeles, and R. B. Moran, La Canada, Calif. Orienting device for well tools. 2,099,794; Nov. 23.
Bonsall, Charles D., Pittsburgh, assignor to P. H. Murphy Company, New Kensington, Pa. Hatch construction. 2,100,120; Nov. 23.
Bonsall, Charles D., Pittsburgh, assignor to P. H. Murphy Company, New Kensington, Pa. Hatch construction. 2,100,121; Nov. 23.
Bonsall, Charles D., Pittsburgh, assignor to P. H. Murphy Company, New Kensington, Pa. Hatch construction. 2,100,123; Nov. 23.
Bonsall, Charles D., Pittsburgh, assignor to P. H. Murphy Company, New Kensington, Pa. Hatch construction. 2,100,126; Nov. 23.
Bonsall, Charles D., Pittsburgh, assignor to P. H. Murphy Company, New Kensington, Pa. Hatch construction. 2,100,127; Nov. 23.
Bonsall, Charles D., Pittsburgh, assignor to P. H. Murphy Company, New Kensington, Pa. Hatch construction. 2,100,130; Nov. 23.
Bossert, Christian, Pforzheim, Germany. Slide pencil. 2,099,999; Nov. 23.
Boston Wire Stitcher Company. (See Davis, E. W., and Maynard, assignors.)
Bowles, Edward L., Wellesley Farms, Mass. Measuring dynamic characteristics. 2,099,923; Nov. 23.
Boye Needle Company, The. (See Davis, Edward D., assignor.)
Brassert, H. A., & Co. (See Paschke, M., and Peetz, assignors.)
Braun, Karl, Berlin-Frohnau, and H. Plauson, Berlin, Germany. Manufacturing soap. 2,100,047; Nov. 23.
Breitensteln, Albert F., assignor to The Geometric Tool Company, New Haven, Conn. Thread cutting chaser. 2,099,721; Nov. 23.
Bressler, Albert M., New York, N. Y. Handbag. 2,099,924; Nov. 23.
Brock, Thomas J., assignor of thirty per cent to J. L. Lean, San Jose, Calif. Illuminating device. 2,099,952; Nov. 23.
Brooks, Benjamin T. (See Lebo, R. B., and Brooks.)
Brown, Edward G., Wilson, Wyo. Lariat holder. 2,100,023; Nov. 23.
Brown, Milo, Blackfoot, Idaho. Sack holder. 2,100,235; Nov. 23.
Brown, Reynolds D., Jr., assignor to Philadelphia Storage Battery Company, Philadelphia, Pa. Intercarrier noise suppressor. 2,100,236; Nov. 23.
Brown, William H. (See Gebauer, C. L., and Brown.)
Bruder, Edmund, Chicago, Ill. Smoking tube. 2,099,925; Nov. 23.
Bruder, Edmund, Chicago, Ill. Smoking tube. 2,099,926; Nov. 23.
Bryant Electric Company, The. (See Cunningham, Roy H., assignor.)
Bubes, Simon, Chicago, Ill. Door lock. 2,100,237; Nov. 23.
Buchheit, Henry F., Milwaukee, Wis., assignor of one-half to A. Mater. Fire fighting and rescue apparatus. 2,100,066; Nov. 23.
Buchler, Clifford C., and J. M. Page, Jr., Casper, Wyo., assignors to Standard Oil Company, Chicago, Ill. Refining lubricating oil with dichloroethyl ether. 2,100,099; Nov. 23.
Buckwalter, Tracy V., assignor to The Timken Roller Bearing Company, Canton, Ohio. Truck. 2,100,065; Nov. 23.
Buehler, Allan M., assignor to Eastern Steel Products Limited, Preston, Ontario, Canada. Fertilizer sowing attachment for seeding machines. 2,099,795; Nov. 23.
Buffalo Pressed Steel Company. (See Haas, Lucien L., assignor.)
Buffalo Pressed Steel Company. (See MacKenzie, R. J., and Haas, assignors.)
Buffalo Pressed Steel Company Inc. (See Heath, Laurence R., assignor.)
Builders Iron Foundry. (See Kennison, Karl R., assignor.)
Bullock, Edward W., C. T. Galloway, L. O. Carlsen, and R. S. Condon, assignors to Gleason Works, Rochester, N. Y. Machine for grinding gears. 2,099,674; Nov. 23.
Burgess, John L., Fort Worth, Tex. Metallic expansion joint. 2,100,238; Nov. 23.
Burns, Fred J., assignor to The Columbia Mills, Inc., Saginaw, Mich. Venetian blind supporting bracket. 2,099,953; Nov. 23.
Buschbeck, Werner, assignor to Telefunken Gesellscraft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Phase modulation. 2,100,156; Nov. 23.
Byers, John A., Evanston, assignor to James P. Clow & Sons, Chicago, Ill. Pipe joint. 2,099,722; Nov. 23.
Cain, Bernard M., Ballston Lake, N. Y., assignor to General Electric Company. Ignition system for internal combustion engines. 2,100,210; Nov. 23.
Capeliushnicoff, Matvey A., and S. L. Zalkin, Baku, Union of Soviet Socialist Republics. Distant pneumatic control for a drilling rig. 2,100,131; Nov. 23.
Carborundum Company, The. (See Woodell, Charles E., assignor.)
Carlsen, Leonard O. (See Bullock, E. W. Galloway, Carlsen, and Condon.)
Carlson, Charles O., Staten Island, N. Y. Oil burner mounting for marine use. 2,099,838; Nov. 23.
Carlton, Paul C., Baldwin, Md. Magnifying glass. 2,100,239; Nov. 23.
Carver, Andrew J., Walters, Okla. 90° bend, flexible pipe cleaning tool. 2,099,723; Nov. 23.
Casablancas, Fernando, Lausanne, Switzerland. Guiding of belts in high-draft mechanisms. 2,099,970; Nov. 23.
Caterpillar Tractor Co. (See Gustafson, Carl A., assignor.)
Cayo, Julius N., Benton Harbor, Mich. Container. 2,100,240; Nov. 23.
Celanese Corporation of America. (See Roberts, R. P., and Johnson, assignors.)
Celanese Corporation of America. (See Seymour, George W., assignor.)
Celanese Corporation of America. (See Weinberg, Leon W., assignor.)
Central National Bank of Cleveland. (See Paden, William L., assignor.)
Cercia, Inc. (See Emmer, Charles E., assignor.)
Chain Store Products Corporation. (See Hermsdorf, Walter H., assignor.)
Chamberlain Corporation. (See Etten, Nicholas L., assignor.)
Chambers, Jewel Co. (See Smith, N. J., and Chambers.)
Chandler, Harry H., New Ipswich, N. H. Swab. 2,100,157; Nov. 23.
Chaney Manufacturing Company, The. (See Harold, W. F., and Deutsch, assignors.)
Chemische Fabrik Grünau Landshoff & Meyer A. G. (See Sommer, F., and Nassau, assignors.)
Chernoff, Phillin M., Middletown, Conn. Dispensing device. 2,099,839; Nov. 23.
Chibnik, Harry, Sioux Falls, S. Dak. Cultivator shovel. 2,099,796; Nov. 23.
Chicago Rawhide Manufacturing Company. (See Travis, Edward P., assignor.)
Church, Walter L., Houston, Tex. Pump. 2,099,840; Nov. 23.
Cincinnati Time Recorder Company, The. (See Faris, Joseph W., assignor.)
Clark Equipment Company. (See Lapsley, Robert, assignor.)
Clark, Richard U., assignor to The Magnavox Company, Fort Wayne, Ind. Electrolytic condenser unit. 2,099,797; Nov. 23.
Clark, Samuel C. (See Hunter, G. G., Pryale, and Clark.)
Clayton, Benjamin, Houston, Tex., assignor to Refining, Inc., Reno, Nev. Refining glyceride type oils. 2,100,276; Nov. 23.
Clayton, Benjamin, Houston, Tex., assignor to Refining, Inc., Reno, Nev. Refining glyceride oil. 2,100,277; Nov. 23.
Clayton, Benjamin, Houston, Tex., W. B. Kerrick, Los Angeles, and H. M. Stadt, Glendale, Calif., assignors to Refining, Inc., Reno, Nev. Refining oils. 2,100,274; Nov. 23.

Clayton, Benjamin, Sugarland, Tex., W. B. Kerrick, Los Angeles, and H. M. Stadt, Glendale, Calif., and B. H. Thurman, Bronxville, N. Y., assignors to Refining, Inc., Reno, Nev. Refining glyceride oils. 2,100,275; Nov. 23.

Clayton, Martin M., Baden, Pa., assignor to National Electric Products Corporation. Electrical duct feed. 2,100,100; Nov. 23.

Clerc, André, Villeurbanne, assignor to Atellers de Constructions Electriques de Delle, Paris, France. Compressed fluid circuit breaker with multiple breaks. 2,100,182; Nov. 23.

Cleveland Welding Company, The. (See Mankki, Onnie, assignor.)

Clow, James B., & Son. (See Byers, John A., assignor.)

Coffing, Frederick W., Danville, Ill. Free-chain hoist. 2,099,676; Nov. 23.

Cogsdill Manufacturing Company. (See Cogsdill, Stuart A., assignor.)

Cogsdill, Stuart A., assignor to Cogsdill Manufacturing Company, Inc., Detroit, Mich. Machine for grinding tools. 2,099,724; Nov. 23.

Cohn, Henryk, and C. Sibert, Berlin, Germany. Voluminously swellable substance and making same from waxes. 2,100,067; Nov. 23.

Collins, Douglas, Salisbury, N. C. Pedal mechanism. 2,099,798; Nov. 23.

Collins Radio Company. (See Bairey, Georg[illegible], assignor.)

Columbia Mills, Inc., The. (See Burns, Fred J[illegible]signor.)

Combustion Engineering Company. (See Jac[illegible]George P., assignor.)

Combustion Engineering Company. (See Sm[illegible], A[illegible]ed R., assignor.)

Condon, Robert S. (See Bullock, E. W., Galloway, Carlsen, and Condon.)

Conklin, Melvin J., Kalamazoo, Mich., assignor to Sam'l Bingham's Son Mfg. Co., Chicago, Ill. Coating apparatus. 2,100,068; Nov. 23.

Connell, Karl, Branch, N. Y. Apparatus for the administration of gases. 2,099,841; Nov. 23.

Connell, Karl, Branch, N. Y. Gas flow means for anesthetic apparatus and the like. 2,099,842; Nov. 23.

Connell, Karl, Branch, N. Y. Formation of breathing tubes and the like. 2,099,843; Nov. [illegible]3.

Conquest, Victor, assignor to Armour and Company, Chicago, Ill. Motor fuel. 2,100,287; Nov. 23.

Constantine, Platon, New York, N. Y. Hair waving apparatus. 2,100,158; Nov. 23.

Cook, Donald D., assignor of one-fourth to R. G. Richardson, one-fourth to J. W. Martin, and one-fourth to M. K. Fuller, Chicago, Ill. Apparatus and process for treatment of respiratory diseases. 2,099,954; Nov. 23.

Corley, John T., Providence, R. I. Cellar pipe. 2,099,799; Nov. 23.

Coro-Gram, Inc. (See Bangs, Ralph C., assignor.)

Cowan, Frank M., Plainfield, N. J., assignor to American District Telegraph Company, New York, N. Y. Method and apparatus for initiating temperature rise alarms. 2,100,183; Nov. 23.

Cowan, Frank M., Plainfield, N. J., assignor to American District Telegraph Company, New York, N. Y. Breather for temperature rise alarm systems. 2,100,184; Nov. 23.

Cowles, Henry C., Jr. (See Ferris, S. W., Houghton, and Cowles.)

Creveling, John L., Tucson, Ariz., assignor to The Lubrication Corporation, Chicago, Ill. Lubricating device. 2,100,069; Nov. 23.

Criqui, Charles A. (See Larkin, Elwood T., assignor.)

Crouse-Hinds Company. (See Winter, Danel B., assignor.)

Cunningham, John P., Kingman, Ariz. Rock or earth drill bit. 2,099,677; Nov. 23.

Cunningham, Roy H., Fairfield, assignor to The Bryant Electric Company, Bridgeport, Conn. Electric lamp support. 2,100,241; Nov. 23.

Curboy, James T., Southbridge, assignor to A. E. Leon, Belmont, Mass. Loom shuttle. 2,100,101; Nov. 23.

Curstädt, Victor, Berlin, Germany, assignor of one-fourth to G. H. Hirsch, New York. Porous bushing for bearings and making same. 2,100,159; Nov. 23.

Curtis, Eugene W., Chicago, Ill. Rivet. 2,099,678; Nov. 23.

Curtis, Harold E. (See Espenschied, L., and Curtis.)

Cutler, Gerard M., assignor to Armstrong Siddeley Motors Limited, Coventry, England. Gearing for driving superchargers on aircraft engines. 2,099,675; Nov. 23.

Dahl, Oscar, and W. F. Black, La Rochelle, France, assignor to V. D. Limited, London, England. Fishing net. 2,100,160; Nov. 23.

Dailey, Jay F., Hillside, assignor of one-fourth to R. Schroeder, Essex County, N. J., and one-half to M. T. Fisher and A. M. Pedersen. Automatic controller for a radio receiving set. 2,099,971; Nov. 23.

Dalén, Sten G., and E. E. W. Anderson, assignors to Aga-Baltic Radio Aktiebolag, Stockholm, Sweden. Electric generator. 2,099,972; Nov. 23.

Danielson Manufacturing Company, The. (See Whitehead, O. N., and Toelle, assignors.)

Darby, J. F. (See Porter, Albert N., assignor.)

Dardani, Edward V., Southport, Conn. Odometer for motor vehicles. 2,100,024; Nov. 23.

David, Aubrey D., Clarendon, Pa., assignor to The Petroleum Processes Corporation, Wichita, Kans. Manufacture of black wax. 2,100,070; Nov. 23.

Davis, Edward D., assignor to The Boye Needle Company, Chicago, Ill. Hairpin. 2,099,927; Nov. 23.

Davis, Edward D., assignor to The Boye Needle Company, Chicago, Ill. Commodity display cabinet. 2,100,132; Nov. 23.

Davis, Elmer W., Newton Center, Mass., and A. H. Maynard, Warwick, R. I., assignors to Boston Wire Stitcher Company, Portland, Maine. Identification and recording devices. 2,099,679; Nov. 23.

Davis, Leonard S. (See Spencer, H. W., and Davis.)

De Corlieu, Louis M., Saint Mande, France. Lifesaving and swimming propelling device. 2,099,973; Nov. 23.

Deese, Robert F., Jr., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Preparation of 2-chloro-5-amino-benzoic acid. 2,100,242; Nov. 23.

De Forest, Alfred V., Southport, Conn., assignor to Baldwin-Southwark Corporation. Scratch recorder. 2,099,725; Nov. 23.

Deutsch, Leo. (See Herold, W. F., and Deutsch.)

Disbrow, Clarkson A., New Rochelle, N. Y., assignor, by mesne assignments, to Poor & Company. Insulated rail joint. 2,099,680; Nov. 23.

Dixon, Jodie T., Luxora, Ark. Trailer hitch and brake actuator. 2,100,133; Nov. 23.

Dodge, Lloyd L., assignor to Rhinelander Paper Company, Rhinelander, Wis. Paper and making same. 2,099,726; Nov. 23.

Doody, Frederick C., St. Onge, S. Dak. Auxiliary glare shield. 2,100,243; Nov. 23.

Dooley, William J. (See Weasler, A. V., and Dooley.)

Doppelhammer, John, Twin Lakes, Minn. Hydrant. 2,099,928; Nov. 23.

Douglas, Harry A., Bronson, Mich., assignor to Kingston Products Corporation. Electrical connecting means. 2,100,025; Nov. 23.

Draeger, Rupert H., U. S. Navy. Camera indexing mechanism. 2,099,681; Nov. 23.

Draeger, Rupert H., U. S. Navy. Page finder. 2,099,682; Nov. 23.

Drake, Harcourt C., Hempstead, assignor to Sperry Products, Inc., Brooklyn, N. Y. Flaw detector mechanism. 2,099,844; Nov. 23.

Draper Corporation. (See McRae, George H., assignor.)

Drysdale, William D. (See Peo, R. F., and Drysdale.)

Ducker, Louis F., Marlemont, assignor to R. A. Kaps and C. H. C. Van Pelt, Cincinnati, Ohio, and said L. F. Ducker, trustees. Liquid expresser. 2,100,026; Nov. 23.

Dufay-Chromex Limited. (See Harrison, G. B., and Threadgold, assignors.)

Duga, William L., and A. H. McNalley, San Francisco, Calif.; said McNalley assignor to said Duga. Making shoes. 2,099,974; Nov. 23.

Duncan, Archibald A., Akron, Ohio. Telephone receiver. 2,099,727; Nov. 23.

Duncan, Charles R., Waukegan, assignor to Oakes Products Corporation, North Chicago, Ill. Brake lever. 2,099,728; Nov. 23.

Dunlop Rubber Company. (See Beharrell, G. E., Wright, and Trevaskis, assignors.)

Du Pont, E. I., de Nemours & Company. (See Beard, Earl E., assignor.)

Du Pont, E. I., de Nemours & Company. (See Deese, Robert F., Jr., assignor.)

Du Pont, E. I., de Nemours & Company. (See Larchar, Arthur W., assignor.)

Du Pont, E. I., de Nemours & Company. (See Quenelle, Charles C., assignor.)

Du Pont, E. I., de Nemours & Company. (See Somers, Norman C., assignor.)

Du Pont, E. I., de Nemours & Company. (See Tinker, J. M., and Weinmayr, assignors.)

Du Pont, E. I., de Nemours & Company. (See Waldron, William R., assignor.)

Dutcher, Bernard R., Bogota, N. J. Apparatus for mounting prints and the like. 2,099,845; Nov. 23.

Dyer, Lloyd W., Swissvale, and O. D. Gamel, Wilkinsburg, assignors to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Circuit breaker. 2,100,102; Nov. 23.

Eastern Steel Products Limited. (See Buehler, Allan M., assignor.)

Eastman Kodak Company. (See Riddell, William A., assignor.)

Eastwood-Neally Corporation. (See Webb, Nelson, W., assignor.)

Eberle, Gustave. (See Eberle, Louis C., assignor.)

Eberle, Louis C., assignor of one-half to G. Eberle, Roselle Park, N. J. Leader bracket. 2,100,001; Nov. 23.

Ebert, Joseph F., Hollis, assignor to Signal Engineering & Manufacturing Company, New York, N. Y. Electromagnetic bell. 2,099,929; Nov. 23.

Eclipse Aviation Corporation. (See Ashton, Benjamin N., assignor.)

Eclipse Aviation Corporation. (See Finnegan, Martin J., assignor.)

Eclipse Aviation Corporation. (See Havill, Clinton H., assignor.)

Eclipse Aviation Corporation. (See Mock, Frank C., assignor.)

Schmitt, Carl E., doing business as Mountain City Poultry Company, Altoona, Pa. Kin-Thur-Thum. For a Salve for Healing Peeps. 16,600; Nov. 30.
Tivoli Brewing Company, Detroit, Mich. Enjoy Altes Lager. For Beer. 16,601; Nov. 30.

CLASSIFIED LIST OF TRADE-MARKS REGISTERED

CLASS 1

Coal. Kelly-Carter Coal Company. 352,454; Nov. 30; Serial No. 395,039; published Sept. 21, 1937.
Lime, Dolomitic hydrated. United States Gypsum Company. 352,338; Nov. 30; Serial No. 385,015; published Sept. 21, 1937.
Mud secured from natural springs containing medicinal properties. Janie Lincoln Incorporated. 352,538; Nov. 30.
Seeds and garden seeds, Flower. O. M. Scott & Sons Company. 352,466; Nov. 30; Serial No. 395,243; published Sept. 21, 1937.

CLASS 2

Cases, Corrugated board packing. L. D. Hicks. 352,331; Nov. 30; Serial No. 381,205; published Sept. 21, 1937.
Trays, Compartment. K. E. Remis. 352,389; Nov. 30; Serial No. 393,473; published Sept. 21, 1937.

CLASS 3

Frames, purse frames, pocketbook frames, Bag. J. E. Mergott Company. 352,527; Nov. 30.
Trunks, luggage, and wardrobe cases, and overnight bags. Ever-Wear Trunk Works, Inc. 352,444; Nov. 30; Serial No. 394,831; published Sept. 14, 1937.

CLASS 4

Buffing and polishing compositions. Nulite Polish Company. 121,483; renewed Apr. 30, 1938.
Leather dressing compound. J. J. Jones. 352,533; Nov. 30.
Soap and soap flakes. National Retailer-Owned Grocers, Inc. 352,529; Nov. 30.
Soap, Toilet. A. Bourjois & Co. 120,245; renewed Jan. 29, 1938.

CLASS 6

Alkalizing preparation, Effervescent. Effervescent Products, Inc. 352,413; Nov. 30; Serial No. 394,166; published Sept. 14, 1937.
Anaesthetic, Local. Oxycaine Company. 352,425; Nov. 30; Serial No. 394,502; published Sept. 14, 1937.
Anti-freeze preparation. Cliffs Dow Chemical Company. 352,359; Nov. 30; Serial No. 390,308; published Sept. 21, 1937.
Anti-freeze solution. Pacific Distillers, Inc. 352,458; Nov. 30; Serial No. 395,081; published Sept. 14, 1937.
Astringents, astringent cerates, beauty and bleach creams, etc. Parfumerie St. Denis. 352,440; Nov. 30; Serial No. 394,799; published Sept. 14, 1937.
Bitters, Stomach. Liebenthal Brothers Company. 352,323; Nov. 30; Serial No. 345,211; published Mar. 27, 1934.
Carbohydrate for use as a plasticizer. Nulomoline Company. 352,340; Nov. 30; Serial No. 385,936; published Sept. 14, 1937.
Chemical for use in the shaping of hats. J. Coll. 352,341; Nov. 30; Serial No. 386,012; published Sept. 21, 1937.
Chemical wall paper remover. Stanley Paint and Varnish Co. Inc. 352,448; Nov. 30; Serial No. 394,872; published Sept. 14, 1937.
Cleaner, Chemical drain pipe. Stanley Paint and Varnish Co. Inc. 352,447; Nov. 30; Serial No. 394,870; published Sept. 14, 1937.
Compacts, Vanity. Mark Cross Company. 352,432; Nov. 30; Serial No. 394,669; published Sept. 14, 1937.
Compound or preparation in the nature of a repellent for dogs. W. F. Swan. 352,469; Nov. 30; Serial No. 395,322; published Sept. 21, 1937.
Cough drops. G. J. Praechtl. 352,497; Nov. 30; Serial No. 395,852; published Sept. 21, 1937.
Cream for the skin, Healing. Chemical Products, Inc., of California. 352,325; Nov. 30; Serial No. 374,402; published Oct. 13, 1936.
Cream, Medicated. Lucky Tiger Manufacturing Company. 352,455; Nov. 30; Serial No. 395,041; published Sept. 14, 1937.
Creams, sunburn balm, talcum, etc., Face. T. Denkers. 352,462; Nov. 30; Serial No. 395,127; published Sept. 21, 1937.
Dentifrice. E. W. Schuessler. 352,418; Nov. 30; Serial No. 394,309; published Sept. 14, 1937.
Ear-drops. Doho Chemical Corporation. 352,451; Nov. 30; Serial No. 394,935; published Sept. 14, 1937.
Food preparation, Concentrated energy. Bond Pharmacals. 352,386; Nov. 30; Serial No. 393,211; published Sept. 14, 1937.
Frost preventing and thawing liquid, anti-freeze solution, etc. G. E. Hitz. 352,336; Nov. 30; Serial No. 384,748; published Sept. 14, 1937.
Gums used as a base for a permanent wave set, Processed natural. Thurston & Braidich. 352,371; Nov. 30; Serial No. 391,665; published Sept. 14, 1937.
Hair grower. S. Wright. 352,400; Nov. 30; Serial No. 393,828; published Sept. 14, 1937.
Hair rinse preparation. Golden Glint Co. 352,428; Nov. 30; Serial No. 394,600; published Sept. 14, 1937.
Hair rinse preparation. Golden Glint Company. 352,429; Nov. 30; Serial No. 394,601; published Sept. 14, 1937.
Incense in cigarette form. S. C. Ghose. 352,501; Nov. 30; Serial No. 395,915; published Sept. 21, 1937.
Inhalant. Parke, Davis & Company; 352,335; Nov. 30; Serial No. 383,222; published Nov. 3, 1936.
Insecticides. McLaughlin Gormley King Company. 352,406; Nov. 30; Serial No. 394,043; published Sept. 14, 1937.
Insecticides. McLaughlin Gormley King Company. 352,464; Nov. 30; Serial No. 395,199; published Sept. 21, 1937.
Insecticides, fungicides, and disinfectants. California Spray Chemical Company. 121,042; renewed Apr. 2, 1938.
Magnesium preparation for medicinal purposes. Wm. S. Merrell Company. 352,339; Nov. 30; Serial No. 385,055; published Sept. 14, 1937.
Materials for generation of oxygen and peroxid of hydrogen. Roessler & Hasslacher Chemical Co. 119,573; renewed Nov. 27, 1937.
Medicinal preparation. Bradley-Eaton Chemical Co. 352,474; Nov. 30; Serial No. 395,398; published Sept. 21, 1937.
Medicinal preparation. Elm Drug & Surgical Co. 352,470; Nov. 30; Serial No. 395,338; published Sept. 21, 1937.
Medicinal preparation. Eli Lilly and Company. 352,430–1; Nov. 30; Serial Nos. 394,619–20; published Sept. 14, 1937.
Medicinal preparation. F. Merz. 352,379-80; Nov. 30; Serial Nos. 392,383–4; published Sept. 14, 1937.
Medicinal preparation. Schering Corporation. 352,445–6; Nov. 30; Serial Nos. 394,865–6; published Sept. 14, 1937.
Medicinal product. John Wyeth and Brother, Incorporated. 352,473; Nov. 30; Serial No. 395,369; published Sept. 21, 1937.
Mothproofing preparations. Kydo Mothproofing Corporation. 352,477; Nov. 30; Serial No. 395,450; published Sept. 21, 1937.
Perfume. Kathleen Mary Quinlan, Inc. 352,461; Nov. 30; Serial No. 395,095; published Sept. 21, 1937.
Perfumes. Bo-Kay Perfume Co. 352,480; Nov. 30; Serial No. 395,604; published Sept. 14, 1937.
Perfumes. Jean Patou, Inc. 352,502; Nov. 30; Serial No. 395,965; published Sept. 21, 1937.
Pharmaceutical preparation. R. Jordan. 352,419; Nov. 30; Serial No. 394,373; published Sept. 14, 1937.
Pharmaceuticals and drug medication. Endo Products, Inc. 352,403; Nov. 30; Serial No. 393,899; published Sept. 14, 1937.
Powder, toilet waters, rouge, etc., Face. A. Bourjois & Co. 121,397; renewed Apr. 30, 1938.
Preparation for dandruff, headache pills, corn preparation, etc. S. L. Weinstock. 352,366; Nov. 30; Serial No. 391,260; published Sept. 14, 1937.
Preparation of hay fever. D. E. Hamer. 352,482; Nov. 30; Serial No. 395,618; published Sept. 14, 1937.
Preparation for preserving and beautifying the hair. Lanman & Kemp-Barclay & Co. Incorporated. 352,457; Nov. 30; Serial No. 395,071; published Sept. 21, 1937.
Preparation for treatment of dermaphytes. Nye, Weston & Griffin, Inc. 352,479; Nov. 30; Serial No. 395,536; published Sept. 14, 1937.
Preparation for use in desizing textile goods. Takamine Laboratory, Inc. 352,450; Nov. 30; Serial No. 394,875; published Sept. 14, 1937.
Preparations for use as antiseptic and bacterial agents, insecticides and disinfectants. Merz & Co. Chemische Fabrik. 352,373; Nov. 30; Serial No. 392,043; published Sept. 14 1937.
Salts, bases, or compounds of aminoxyarsenobenzene, etc. Takamine Laboratory, Inc. 121,511–12; renewed Apr. 30, 1938.
Sedative, hypnotic, and analgesic preparation. W. Kramer. 352,471; Nov. 30; Serial No. 395,347; published Sept. 21, 1937.
Shampoo. Millerine Company. 352,357; Nov. 30; Serial No. 390,079; published Sept. 21, 1937.

Shampoo, Olive oil. R. P. Schmidt. 352,433; Nov. 30; Serial No. 394,680; published Sept. 21, 1937.
Sodium and aluminum salts. Booth Chemical Company. 121,252; renewed Apr. 23, 1938.
Sodium phosphate. General Chemical Company. 352,452; Nov. 30; Serial No. 394,939; published Sept. 14, 1937.
Sulphur preparations, Finely divided. Dow Chemical Company. 352,333; Nov. 30; Serial No. 381,406; published Sept. 14, 1937.
Tablets for relieving pain due to headaches, neuralgia, etc. Purity Drug Co. Inc. 352,493; Nov. 30; Serial No. 395,768; published Sept. 21, 1937.
Toilet preparations. A. Bourjois & Co. 120,064; renewed Jan. 8, 1938.
Toilet preparations. A. Bourjois & Co. 120,330; renewed Feb. 5, 1938.
Toilet preparations. Supreme Laboratories, Inc. 352,519; Nov. 30.
Tonic and purifier, Blood. H. D. Loudermelt. 352,354; Nov. 30; Serial No. 389,257; published Sept. 21, 1937.
Tonic, General. E. F. Murphy. 352,401; Nov. 30; Serial No. 393,870; published Sept. 14, 1937.
Tonic, Generical medicinal. A. J. Paparelli. 352,337; Nov. 30; Serial No. 384,814; published June 8, 1937.
Tonics. E. R. Squibb & Sons. 352,438; Nov. 30; Serial No. 394,761; published Sept. 14, 1937.
Tooth powder. Pro-phy-lac-tic Brush Company. 352,420; Nov. 30; Serial No. 394,384; published Sept. 14, 1937.
Vitaminic preparation. E. R. Squibb & Sons. 352,439; Nov. 30; Serial No. 394,762; published Sept. 14, 1937.
Wax and thinner, Emulsified. S. C. Goldman. 352,434; Nov. 30; Serial No. 394,704; published Sept. 21, 1937.

CLASS 7

Rope, Lariat. Rochester Ropes, Inc. 352,465; Nov. 30; Serial No. 395,212; published Sept. 21, 1937.

CLASS 8

Ash receivers and trays. Owens-Illinois Glass Company. 352,484; Nov. 30; Serial No. 395,624; published Sept. 21, 1937.
Ash receivers, ash trays, cigar, cigarette and tobacco boxes, etc. Boynton & Company. 352,468; Nov. 30; Serial No. 395,266; published Sept. 21, 1937.
Pads or mats for use in ash trays, Crunch. H. S. Sadtler. 352,427; Nov. 30; Serial No. 394,557; published Sept. 21, 1937.

CLASS 9

Guns and pistols. L. D. Hicks. 352,332; Nov. 30; Serial No. 381,206; published Sept. 21, 1937.

CLASS 10

Fertilizer. Robertson Chemical Corporation. 352,503; Nov. 30; Serial No. 395,967; published Sept. 21, 1937.

CLASS 11

Ink, Printing. General Printing Ink Corporation. 352,481; Nov. 30; Serial No. 395,615; published Sept. 21, 1937.

CLASS 13

Bathtubs. Briggs Manufacturing Co. 352,412; Nov. 30; Serial No. 394,158; published Sept. 21, 1937.
Fasteners, Separable. Strauss Fasteners, Inc. 352,449; Nov. 30; Serial No. 394,874; published Sept. 21, 1937.
Hollowware. Aluminum Products Company. 352,396; Nov. 30; Serial No. 393,631; published Sept. 21, 1937.
Pipe, casing, tubing, etc. Republic Steel Corporation. 352,376; Nov. 30; Serial No. 392,333; published Sept. 21, 1937.
Pipe couplings and unions, Metal. National Tank Company. 352,522; Nov. 30.
Valves and metal pipe fittings, Plumbing and steam-fitting. Hasco Valve and Machine Co. 352,356; Nov. 30; Serial No. 390,064; published Sept. 21, 1937.

CLASS 14

Carbon, metal ingots, billets, etc. Republic Steel Corporation. 352,377; Nov. 30; Serial No. 392,334; published Sept. 21, 1937.
Copper, Electrolytic. Phelps Dodge Corporation. 352,499; Nov. 30; Serial No. 395,879; published Sept. 21, 1937.
Plate, Forged. M. W. Kellogg Company. 352,498; Nov. 30; Serial No. 395,866; published Sept. 21, 1937.

CLASS 16

Paint for poultry houses and brooders, Window. Dr. Salsbury's Laboratories. 352,407; Nov. 30; Serial No. 394,062; published Sept. 21, 1937.
Paints and paint enamels. Walgreen Co. 352,334; Nov. 30; Serial No. 381,794; published Sept. 21, 1937.
Paints, paint and varnish remover, and polishing wax. Perfection Paint and Color Company. 352,369; Nov. 30; Serial No. 391,587; published Sept. 21, 1937.
Preparation for waxing linoleum, asphalt, rubber, etc. Baldwin Laboratories, Inc. 352,467; Nov. 30; Serial No. 395,263; published Sept. 21, 1937.
Turpentine. Socony-Vacuum Oil Company. 352,393; Nov. 30; Serial No. 393,556; published Aug. 3, 1937.

CLASS 19

Automobile accessories and equipment. Peters and Russell, Inc. 352,327; Nov. 30; Serial No. 380,304; published Sept. 21, 1937.
Automobiles, bodies, running-gears, etc., Electrically-self-propelled. Ford Motor Company. 119,956; renewed Dec. 25, 1937.
Busses, hearses, ambulances, etc. Flexible Company. 352,536; Nov. 30.
Covers, utomobile seat. Firestone Tire & Rubber Company. 352,350; Nov. 30; Serial No. 387,864; published Sept. 21, 1937.
Heaters, Automobile-body. Noblitt-Sparks Industries, Inc. 352,329; Nov. 30; Serial No. 381,167; published Sept. 14, 1937.
Trucks, Lifting. Yale & Towne Manufacturing Company. 352,409; Nov. 30; Serial No. 394,107; published Sept. 21, 1937.

CLASS 21

Batteries, Electric storage. M. Bosworth. 352,347; Nov. 30; Serial No. 387,372; published Sept. 21, 1937.
Communicating apparatus. International Carrier-Call and Television Corporation. 352,524; Nov. 30.
Electrical apparatus, machines, and supplies. Frankel Connector Co. Inc. 121,284; renewed Apr. 23, 1938.
Electrical rectifiers and chargers. The Argas Corp. 352,404; Nov. 30; Serial No. 393,934; published Sept. 21, 1937.
Irons, Garment or other material pressing steam electric. Steem-Electric Corporation. 352,415; Nov. 30; Serial No. 394,261; published Sept. 21, 1937.
Lamps, Electric signal. Akron Brass Manufacturing Company. 352,352; Nov. 30; Serial No. 388,254; published Apr. 20, 1937.
Lighting fixtures, Electric. Edwin F. Guth Company. 352,394; Nov. 30; Serial No. 393,594; published Sept. 21, 1937.
Machines for frying hamburgers and other meats and edible foods and parts thereof. Roto-Way Corporation. 352,537; Nov. 30.
Sound amplifying and transmitting systems and parts thereof, Inter-communicating. Webster Electric Company. 352,426; Nov. 30; Serial No. 394,517; published Sept. 21, 1937.

CLASS 22

Fishing lures. Automotive Maintenance Machinery Co. 352,370; Nov. 30; Serial No. 391,607; published Sept. 21, 1937.
Game, Board -racing. S. H. Neuburger. 352,512; Nov. 30; Serial No. 396,368; published Sept. 21, 1937.
Life preservers, Self-inflating. Lifegard Co. 352,508; Nov. 30; Serial No. 396,140; published Sept. 21, 1937.
Puzzles, croquet sets, game balls and bats, etc. Abraham & Straus, Inc. 352,345; Nov. 30; Serial No. 387,057; published Sept. 21, 1937.
Targets, Shooting. L. D. Hicks. 352,330; Nov. 30; Serial No. 381,204; published Sept. 21, 1937.
Toy. E. J. Stewart. 352,516; Nov. 30; Serial No. 396,332; published Sept. 21, 1937.
Toy for dogs. Rock Manufacturing Company. 352,506; Nov. 30; Serial No. 396,086; published Sept. 21, 1937.
Toys. Vereinigte Spielwarenfabriken Andreas Förtner & J. Haffner's Nachf. G. m. b. H. 352,374–5; Nov. 30; Serial Nos. 392,296–7; published Sept. 21, 1937.

CLASS 23

Conveyers for loose rock, etc., Feed. Robins Conveying Belt Company. 352,391; Nov. 30; Serial No. 393,551; published Sept. 21, 1937.
Duplicating machines and parts thereof. A. B. Dick Company. 352,367; Nov. 30; Serial No. 391,415; published Sept. 21, 1937.
Flour milling machinery and parts thereof. Allis-Chalmers Manufacturing Company. 352,398; Nov. 30; Serial No. 393,748; published Sept. 21, 1937.
Fluid pressure systems and fluid pressure apparatus. Advance Pump Company. 352,353; Nov. 30; Serial No. 388,824; published Sept. 21, 1937.
Homogenizers and pumps. J. Marco. 352,410; Nov. 30; Serial No. 394,141; published Sept. 21, 1937.
Machine for dicing or making intersecting cuts in meat. Federal Engineering Company. 352,364; Nov. 30; Serial No. 391,021; published Sept. 21, 1937.
Machines for vaporizing and applying insecticidal sprays. Tobacco By-Products and Chemical Corporation. 352,421; Nov. 30; Serial No. 394,391; published Sept. 21, 1937.
Material handling equipment and particularly conveying mechanisms and parts thereof. Robins Conveying Belt Company. 352,392; Nov. 30; Serial No. 393,552; published Sept. 21, 1937.
Milking machines, Mechanical. H. De Laere. 352,416; Nov. 30; Serial No. 394,274; published Sept. 21, 1937.
Mixing and sifting machine and parts thereof. American Machine and Foundry Company. 352,351; Nov. 30; Serial No. 388,490; published Sept. 21, 1937.
Printing presses and printing industry accessories. American Type Founders Sales Corporation. 352,387; Nov. 30; Serial No. 393,261; published Sept. 21, 1937.

Hall, Charles G., Caldwell, Idaho, assignor to Edible Bottle Company. Device for making frozen confections. 2,100,031; Nov. 23.
Hall, Charles O., East Orange, N. J. Variable speed gear transmission. 2,099,734; Nov. 23.
Hall, Horace W., Newton, Mass. Playing racket. 2,099,735; Nov. 23.
Haller, Herbert L. J. (See Schaffer, P. S., and Haller.)
Hallner, Enoch, Ericson, Nebr. Smoke filter for smoking devices. 2,100,051; Nov. 23.
Hallstein, Raymond F., Philadelphia, Pa. Tobacco pipe. 2,100,248; Nov. 23.
Hamilton, Cliff S., Lincoln, Nebr., assignor to Parke, Davis & Company, Detroit, Mich. Aromatic oxyketone arsenicals and making them. 2,099,685; Nov. 23.
Hamilton, Cliff S., Lincoln, Nebr., assignor to Parke, Davis & Company, Detroit, Mich. Organic arsenic compounds. 2,099,686; Nov. 23.
Hammaren, Fredrik. (See Sundelin, U., and Granzellius, assignors.)
Handley, John, London, England. Registering and displaying apparatus particularly applicable to totalizators. 2,100,164; Nov. 23.
Handrek, Hans, Bad Klosterlausnitz, assignor to Porzellanfabrik Kahla, Kahla, Germany. Entrance insulation for electrical conductors. 2,100,187; Nov. 23.
Hansen, Arnold M., Jylland, Denmark. Bathing suit. 2,099,885; Nov. 23.
Hansmann, Elwood, Glencoe, assignor to Stewart-Warner Corporation, Chicago, Ill. Windshield cleaner. 2,100,188; Nov. 23.
Hardy, Charles R. (See Blanchard, P. D., and Hardy.)
Hardy, James J., Jr., Cincinnati, Ohio. Electrical connecter. 2,100,009; Nov. 23.
Harmon, Benjamin G. (See Schoengarth, Walter L., assignor.)
Harris, Owen D., Petersburg, Ind. Adjustable body support. 2,099,977; Nov. 23.
Harrison, Geoffrey B., and S. D. Threadgold, Ilford, assignors, by mesne assignments, to Dufay-Chromex Limited, Aldwych, London, England. Printing or reproducing color photographs. 2,100,006; Nov. 23.
Harrison, Henry, Conshohocken, Pa. Display device. 2,100,077; Nov. 23.
Harrison, Sarah A., Omaha, Nebr. Button backer. 2,100,103; Nov. 23.
Hart, Guy, assignor to Gibson, Inc., Kalamazoo, Mich. Neck for musical instruments. 2,100,249; Nov. 23.
Hartig, Henry E., Robbinsdale, assignor to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn. Temperature control apparatus. 2,099,687; Nov. 23.
Hasson, Paul R., and N. C. Storey, Leeds, England. Hydraulic hoist. 2,099,886; Nov. 23.
Hauton, Paul S., Atlanta, Ga. Mechanical pencil. 2,100,007; Nov. 23.
Havill, Clinton H., South Orange, assignor to Eclipse Aviation Corporation, East Orange, N. J. Aircraft. 2,099,808; Nov. 23.
Heath, Laurence R., assignor to Buffalo Pressed Steel Company Inc., Buffalo, N. Y. Muffler. 2,099,887; Nov. 23.
Heberlein Patent Corporation. (See Weiss, Ernst, assignor.)
Hedfield, Reynold T., and H. Seegers, assignors to Jas. P. Marsh Corporation, Chicago, Ill. Thermometer. 2,099,899; Nov. 23.
Hejduk, Frantisek, and J. Neumann, Prague, Czechoslovakia. Meter for measuring and registering liquid volumes received and delivered. 2,100,052; Nov. 23.
Helm, Howard J. (See George, R. H., and Helm.)
Heldt, Friedrich, Gelsenkirchen, Germany. Bristle for cleaning devices. 2,100,138; Nov. 23.
Henninger, Alan E., South Ardmore, Pa., assignor to General Electric Company. Circuit breaker control system. 2,100,215; Nov. 23.
Henningsen, Poul, Charlottenlund, near Copenhagen, assignor to Louis Poulsen & Co., Copenhagen, Denmark. Multipleshade holder. 2,100,078; Nov. 23.
Hermsdorf, Walter H., assignor to Chain Store Products Corporation, Chicago, Ill. Hair waving device. 2,099,736; Nov. 23.
Herold, Walter F., and L. Deutsch, assignors to The Chaney Manufacturing Company, Springfield, Ohio. Mount for indicators. 2,099,958; Nov. 23.
Herz, Cornelius M. (See Irwin, R. W., and Herz.)
Hess, Everett I., Newport, R. I. Fruit cutting device. 2,099,978; Nov. 23.
Hewlett, Amlot P. (See Barlow, E. H., Hewlett, and Kuhl.)
Heyl, George V., Chicago, Ill., assignor to Johnson & Johnson, New Brunswick, N. J. Protective coating for tennis strings and the like. 2,100,250; Nov. 23.
Heymer, Gerd. (See Eggert J., and Heymer.)
Hill, Edward G., Richmond, Va., and J. X. Phillips, Washington, D. C., assignors to Hill Engineering Corporation, Richmond, Va. Brake control mechanism. 2,100,053; Nov. 23.
Hill Engineering Corporation. (See Hill, E. G., and Phillips, assignors.)
Hill, George. (See Floyd, E. P., and Hackney.)
Hill, Warren E., Northampton, and C. L. McArthur, Cambridge, assignors to Pro-phy-lac-tic Brush Company, Northampton, Mass. Tooth brush and making the same. 2,099,688; Nov. 23.
Hill, Warren E., Northampton, Mass., and F. A. Parkhurst, Bethesda, Md., assignors to Pro-phy-lac-tic Brush Company, Northampton, Mass. Making self-sterilizing brushes. 2,099,888; Nov. 23.
Hillery-Collings, Charles E., Mitcham, England. Cinematographic camera and projector. 2,100,000; Nov. 23.
Hirsch, Georg H. (See Curstädt, Victor, assignor.)
Hobbs, Howard F., Leamington Spa, England. Automatically variable power transmission mechanism. 2,100,251; Nov. 23.
Hoe, R., & Co. (See Meyer, Joseph E., assignor.)
Hoe, R., & Co. (See Quick, C. G., Ball, and Whitehead, assignors.)
Hoffman Combustion Engineering Company. (See Hoffman, Jerome A., assignor.)
Hoffman, Jerome A., assignor to Hoffman Combustion Engineering Company, Detroit, Mich. Mechanical stoker. 2,100,252; Nov. 23.
Hokerk, Lynde D., Utica, assignor to Kerk Guild, Inc., Whitesboro, N. Y. Fly swatter. 2,100,032; Nov. 23.
Holmberg, August W., Brooklyn, and C. W. Holmberg, New Rochelle, N. Y. Faucet spray and strainer nozzle. 2,100,165; Nov. 23.
Holmberg, Centre W. (See Holmberg, August W., and C. W.)
Holmes, Frederick T., Waterbury, Conn. Rotational trigger mechanism. 2,099,849; Nov. 23.

Holzach, Karl, and G. Niemann, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Water-insoluble metal salts of phthalocyanine-sulphonic acids. 2,099,689; Nov. 23.
Holzach, Karl, and G. Niemann, Ludwigshafen-on-the-Rhine, Germany, assignors to General Aniline Works, Inc., New York, N. Y. Water-insoluble salts of phthalocyanine-sulphonic acids. 2,099,690; Nov. 23.
Honda, Kikutaro, Osaka, Japan. Apparatus for giving drafts to cotton slivers. 2,100,139; Nov. 23.
Hoover Company, The. (See Smellie, Donald G., assignor.)
Hopkins, Albert J., Toronto, Ontario, Canada. Spark plug core. 2,099,737; Nov. 23.
Hopkinson, Russell, and A. V. Tolstoouhov, assignors to Ostro Research Laboratories, Inc., New York, N. Y. Anesthetic tannate. 2,100,054; Nov. 23.
Hoppes, Edwin F. (See Evans, W. B., Garratt, and Hoppes.)
Horlacher, Elmer L., assignor to General Motors Corporation, Dayton, Ohio. Refrigerating apparatus. 2,100,288; Nov. 23.
Horton, Erwin C. (See Hueber, H., and Horton.)
Horton, Erwin C., Hamburg, assignor to Trico Products Corporation, Buffalo, N. Y. Window cleaner. 2,100,055; Nov. 23.
Houde Engineering Corporation. (See Peo, R. F., and Drysdale, assignors.)
Houghton, Willard F. (See Ferris, S. W., Houghton, and Cowles.)
Howard, Frank A., Elizabeth, N. J., assignor to Standard Oil Development Company. Motor fuel. 2,099,850; Nov. 23.
Hueber, Henry, Buffalo, and E. C. Horton, Hamburg, assignors to Trico Products Corporation, Buffalo, N. Y. Motor vehicle temperature modifier. 2,100,281; Nov. 23.
Hughes, Philip C., Brooklyn, N. Y. Vending machine. 2,100,216; Nov. 23.
Humphner, Ferdinand W., Oak Park, Ill., assignor, by mesne assignments, to Mid-States Gummed Paper Co. Decalcomania. 2,100,140; Nov. 23.
Hunter, Gerald G., H. M. Pryale, and S. C. Clark, assignors to Baldwin Rubber Company, Pontiac, Mich. Floor covering. 2,099,809; Nov. 23.
Hunter, William H., Webb City, Mo. Spiral packed working barrel valve body. 2,099,691; Nov. 23.
Hygrade Sylvania Corporation. (See McCarthy, Henry J., assignor.)
Hygrade Sylvania Corporation. (See Miller, Carl F., assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Alles, Richard, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Eggert, J., and Heymer, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Hagedorn, Max, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See Tietz, Hans, assignor.)
I. G. Farbenindustrie Aktiengesellschaft. (See von der Horst, H. D. F., Muenz, and Vogt, assignors.)
Iams, Harley A., Collingswood, N. J., assignor to Radio Corporation of America. Method and apparatus for television transmission. 2,099,980; Nov. 23.
Illusigraph Corporation. (See Stonebraker, Fred, Sr.)
Imperial Chemical Industries Limited. (See Baldwin, A. W., and Piggott, assignors.)
Industrie A. G. Allegro. (See Barsch, Guillaume, assignor.)
International Cellucotton Products Company. (See Fourness, Charles A., assignor.)
International Harvester Company. (See Baker, D. B., Rogers, and Panzegrau, assignors.)
International Harvester Company. (See Lindgren, Alexus C., assignor.)
Intertype Corporation. (See Righter, Edward M., assignor.)
Intertype Corporation. (See Sperry, Samuel E., assignor.)
Ipatieff, Vladimir, assignor to Universal Oil Products Company, Chicago, Ill. Alkylation of trihydric phenols. 2,099,738; Nov. 23.
Irsch, George J., Harvey, assignor of one-half to W. B. Stephenson, Chicago, Ill. Gas separator for incinerators. 2,100,189; Nov. 23.
Irwin, Robert W., and C. M. Herz, Grand Rapids, Mich. Conveyer mechanism. 2,100,253; Nov. 23.
Irwin, William R., assignor to Springfield Boiler Company, Springfield, Ill. Steam generator. 2,099,851; Nov. 23.
Isaacson, Carl C., assignor to L. J. Sladek, Chicago, Ill. Water tank cover. 2,099,932; Nov. 23.
Ives, Herbert E., Montclair, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Television system. 2,099,889; Nov. 23.
Jackson, George P., Flushing, assignor to Combustion Engineering Company, Inc., New York, N. Y. Controlling superheat temperature. 2,100,190; Nov. 23.
Jackson, Thomas G., assignor to Molins Machine Company, Limited, London, England. Wrapping of block shaped articles. 2,100,141; Nov. 23.
James, Henry V., Radlett, England. Regulating the speed of polyphase alternate current motors. 2,099,890; Nov. 23.
Janssen, Henry, assignor to Textile Machine Works, Wyomissing, Pa. Multisection braiding machine. 2,099,933; Nov. 23.
Jebeles, G. J. (See Sutherlin, Walter F., assignor.)
Jenkins, Clarence E., Keene, N. H., assignor to Bocji Corporation, trustee, Pittsburgh, Pa. Extraction of juice from vegetable pulp and like materials. 2,099,739; Nov. 23.
Jenkins, Francis T., Ealing, London, England. Mercurial electric cut-out. 2,100,033; Nov. 23.
Jiffy Lubricator Company. (See Johnson, August, assignor.)
Johannesson, Karl Y., Berwick, Pa. Fountain pen. 2,099,891; Nov. 23.
Johns-Manville Corporation. (See Kieselbach, Henry A., assignor.)
Johns-Manville Corporation. (See Seigle, William R., assignor.)
Johnson, August, assignor to Jiffy Lubricator Company, Inc., Fargo, N. Dak. Hand and air low pressure grease gun. 2,099,959; Nov. 23.
Johnson, Edgar B. (See Roberts, R. P., and Johnson.)
Johnson, Elmer W. (See Bellman, Edward L., assignor.)
Johnson, Herbert F., Pittsfield, Mass. Printer's gauge. 2,100,217; Nov. 23.
Johnson, James R., assignor to The Palmer Brothers Company, New London, Conn. Manufacture of mattresses. 2,100,104; Nov. 23.
Johnson & Johnson. (See Heyl, George V., assignor.)
Johnson, Raymond B., assignor of three-fourths to J. Kraker, Gladewater, Tex. Wrench. 2,099,960; Nov. 23.
Johnson, Richard W., C. L. Loverch, and M. Zaum, Brooklyn, assignors to Fine Art Novelty Corporation, New York, N. Y. Sewing machine. 2,100,166; Nov. 23.
Johnstone, Harold G., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Perforating apparatus. 2,099,892; Nov. 23.
Jones, William, Soho Foundry, Birmingham, assignor to J. O. Powell, Gorseinon, near Swansea, Wales, England. Machine for grading or sorting by weight. 2,099,893; Nov. 23.
Joplin, William A., Quincy, Mass., assignor to Reinforced Paper Bottle Corporation, New York, N. Y. Compressor mechanism. 2,099,934; Nov. 23.
Joy, Joseph F., Claremont, N. H., assignor to Sullivan Machinery Company. Material loading apparatus. 2,099,981; Nov. 23.
Judelshon, Oscar L., Park Ridge, N. J. Cutting and winding machine. 2,100,079; Nov. 23.
Kalle & Co. Aktiengesellschaft. (See Zahn, Rudolf, assignor.)
Kapella Limited. (See Lee, Horace W., assignor.)
Kaps, Richard A., et al., trustees. (See Ducker, Louis F., assignor.)
Kaufmann, Arthur G., Associated, Calif., assignor, by mesne assignments, to Tide Water Associated Oil Company. Emulsifying oil. 2,099,894; Nov. 23.
Kawneer Company, The. (See Plym, Francis J., assignor.)
Kayser, Jullus, & Company. (See Underwood, J., and Mack, assignors.)
Keech, Dana E., Glendale, Calif., assignor, by mesne assignments, to Food Machinery Corporation. Tucking mechanism. 2,100,282; Nov. 23.
Keith, Percival C., Jr., Port Washington, N. Y., assignor to Gasoline Products Company, Inc., Newark, N. J. Treating hydrocarbon oil. 2,100,283; Nov. 23.
Kelley, Floyd C., Schenectady, N. Y., assignor to General Electric Company. Meter pivot. 2,100,218; Nov. 23.
Kendzierski, Andrew, Buffalo, N. Y. Demountable tire rim. 2,099,895; Nov. 23.
Kennedy, Leo W., Detroit, Mich. Showcase and sham construction. 2,099,935; Nov. 23.
Kennison, Karl R., Newton, Mass., assignor to Builders Iron Foundry, Providence, R. I. Open nozzle. 2,100,219; Nov. 23.
Kerk Guild, Inc. (See Kokerk, Lynde D., assignor.)
Kerrick, Walter B. (See Clayton, B., Kerrick, and Stadt.)
Kerrick, Walter B. (See Clayton, B., Kerrick, Stadt, and Thurman.)
Khalil, Seyed, assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 2,099,810; Nov. 23.
Khoenle, Herman F., assignor to The Enterprise Manufacturing Company, Akron, Ohio. Casting bait. 2,100,289; Nov. 23.
Kleckhefer Container Company. (See Kleckhefer, Herbert M., assignor.)
Kleckhefer, Herbert M., Riverton, assignor, by mesne assignments, to Kleckhefer Container Company, Delair, N. J. Manufacturing containers or parts thereof. 2,099,936; Nov. 23.
Kiehl, Royal. (See Klamp, P., and Kiehl.)
Kieselbach, Henry A., Montclair, N. J., assignor to Johns-Manville Corporation, New York, N. Y. Thermal insulation. 2,099,740; Nov. 23.
King, Joseph M., Detroit, Mich. Fluid-thermo-valve. 2,099,811; Nov. 23.
King, Ralph E., Fort Wayne, Ind., assignor to General Electric Company. Shaft seal. 2,100,220; Nov. 23.
Kingston Products Corporation. (See Douglas, Harry A., assignor.)

Kinsel, Augustus B., Flushing, N. Y., assignor, by mesne assignments, to Union Carbide and Carbon Corporation. Indicating extensometer. 2,099,896; Nov. 23.
Kirk, William F. (See Blake, Henry W., assignor.)
Klamp, Paul, and R. Kiehl, assignors to The Timken Roller Bearing Company, Canton, Ohio. Optical bore comparator. 2,100,056; Nov. 23.
Klayf, Hyman, Chicago, Ill. Saucer for cups. 2,099,741; Nov. 23.
Kleidon, Gustave C. (See Moyer, A. F., and Kleidon.)
Klesa, Albert H., Stow, Ohio. Remote feed for liquid fuel. 2,099,742; Nov. 23.
Knudsen, Carl H., Brooklyn, assignor to Viking Diesel Motor Corporation, New York, N. Y. Internal combustion engine. 2,099,852; Nov. 23.
Koenig, Werner, Luzern, assignor to Landis & Gyr, A.-G., Zug, Switzerland. Variable impulse transmitter. 2,099,982; Nov. 23.
Koepp, Rudolph & Co. Chemische Fabrik A. G. (See König, Walter, assignor.)
Kofoed, James C., Northfield, Minn. Weeding and cultivating tool. 2,100,221; Nov. 23.
Konelsky, Ernest, Paris, France. Handbag. 2,099,853; Nov. 23.
König, Walter, Wiesbaden, assignor to Rudolph Koepp & Co., Chemische Fabrik A. G., Oestrich in Rheingau, Germany. Manufacture of shaped products impermeable to moisture. 2,099,812; Nov. 23.
Kraker, John. (See Johnson, Raymond B., assignor.)
Krebs, Henry, assignor to Packard Motor Car Company, Detroit, Mich. Valve spring. 2,100,057; Nov. 23.
Kridler, Bernie C., deceased, Flint, Mich.; P. W. Kridler, administrator. Clip for fastening roofing. 2,100,254; Nov. 23.
Kridler, Philip W., administrator. (See Kridler, Bernie C.)
Kriechbaum, John P., assignor to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn. Time control system. 2,100,284; Nov. 23.
Kroeger, Ellwyn C., assignor to The Maytag Company, Newton, Iowa. Water softener. 2,099,743; Nov. 23.
Krumm, Theodore, Redlands, assignor to P. A. Wellein, Los Angeles, Calif. Washing apparatus. 2,099,692; Nov. 23.
Kruse, Bernard. (See Wallmann, C., Grossweischede, and Kruse.)
Kuhl, Paul E. (See Barlow, E. H., Hewlett, and Kuhl.)
Kurz, Fred, assignor to Sangamo Electric Company, Springfield, Ill. Electricity meter. 2,099,854; Nov. 23.
Lackinger, Frank P., McKees Rocks, Pa. Utensil. 2,100,080; Nov. 23.
Lafitte, Jacques P. L., Paris, France. Gridiron. 2,099,693; Nov. 23.
Lake, Simon, Milford, Conn. Internal combustion engine. 2,099,983; Nov. 23.
Lamson & Sessions Company, The. (See Frayer, Lee A., assignor.)
Land, Edwin H., Wellesley Farms, Mass., assignor to Sheet Polarizer Company, Inc., Union City, N. J. Polarizing optical system. 2,099,694; Nov. 23.
Landis & Gyr, A.-G. (See Koenig, Werner, assignor.)
Landis & Gyr, A.-G. (See Spahn, Emil, assignor.)
Landry, Winfield C. (See Moore, T. V., and Landry.)
Lang, Martin H., Minneapolis, Minn. Adjustable cushion filling machine. 2,099,897; Nov. 23.
Lansing, Raymond P., Montclair, N. J. Driving mechanism. 2,099,813; Nov. 23.
Lapsley, Robert, Berrien Springs, assignor to Clark Equipment Company, Buchanan, Mich. Hydraulic drive. 2,100,191; Nov. 23.
Larchar, Arthur W., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Preparation of isopropyl sulphates. 2,099,814; Nov. 23.
Larkin, Elwood T., Eggertsville, assignor to C. A. Criqui, Buffalo, N. Y. Portable foundation for machinery. 2,099,898; Nov. 23.
Larson, Clayton E., Louisville, Ky., assignor to Reynolds Metals Company, New York, N. Y. Making composite bodies of zinc and aluminum. 2,100,255; Nov. 23.
Larson, Clayton E., Louisville, Ky., assignor to Reynolds Metals Company, New York, N. Y. Making composite bodies of zinc and aluminum. 2,100,256; Nov. 23.
Larson, Clayton E., Luisville, Ky., assignor to Reynolds Metals Company, New York, N. Y. Composite body of magnesium and aluminum and making same. 2,100,257; Nov. 23.
Larson, Clayton E., Luisville, Ky., assignor to Reynolds Metals Company, New York, N. Y. Composite body of copper and aluminum or copper and magnesium, and making same. 2,100,258; Nov. 23.
Lathrop, Harry D., Chicago, Ill., assignor to The Lathrop-Paulson Co. Weigh can and valve mechanism. 2,100,142; Nov. 23.
Lathrop-Paulson Co., The. (See Lathrop, Harry D., assignor.)
Lauterbur, Edward J., assignor to Peerless Bread Machinery Corporation, Sidney, Ohio. Apparatus for dough preparation. 2,099,937; Nov. 23.
Lean, Jennie L. (See Brock, Thomas J., assignor.)
Lebo, Robert B., Elizabeth, N. J., and B. T. Brooks, Old Greenwich, Conn., assignors to Standard Alcohol Company. Hydrolyzing reactive acid liquor. 2,099,855; Nov. 23.
Lee, Albert C., and W. Lee, New Haven, Conn. Signal for automobiles. 2,100,105; Nov. 23.
Lee, Horace W., assignor to Kapella Limited, Leicester, England. Lens. 2,100,291; Nov. 23.
Lee, Horace W., Chiswick, assignor to Kapella Limited, Leicester, England. Lens. 2,100,290; Nov. 23.
Lee, William. (See Lee, Albert C. and W.)
Lehew, Robert H., Highland Park, Mich. Detachable closure and spout for containers. 2,100,167; Nov. 23.
Leindorf, Joseph P., Pelham Manor, N. Y. Tray for canary cages. 2,100,192; Nov. 23.
Leon, Albert E. (See Curboy, James T., assignor.)
Leonard, Carl H., Wakefield, assignor of one-half to J. Ashford, Winnebago, Nebr. Wrench. 2,100,034; Nov. 23.
Lewis, Fritz J. (See Lewis, J. R., Perkins, and Lewis.)
Lewis, James R., S. Perkins, and F. J. Lewis, Hammond, La., assignors, by mesne assignments, to V. M. Thompson, McCrory, Ark. Precooling apparatus. 2,099,815; Nov. 23.
Lewis, Wilbur S., Rocky River, assignor to The Murlé Co., Cleveland, Ohio. Hair waving apparatus. 2,099,856; Nov. 23.
Lilienfeld, Leon, Vienna, Austria. Manufacture of new cellulose compounds and of artificial materials thereof. 2,100,010; Nov. 23.
Lindenblad, Nils E., Port Jefferson, N. Y., assignor to Radio Corporation of America. Linear amplifier with extra wide band pass characteristics. 2,100,193; Nov. 23.
Lindgren, Alexus C., Chicago, Ill., assignor to International Harvester Company. Brake for trailers. 2,099,816; Nov. 23.
Line, Leland E. (See Gordon, Joseph M., assignor.)
Link-Belt Company. (See Waechter, F. F., and Watson, assignors.)
Link, Edwin A., Jr., Binghamton, N. Y. Trainer for aviators. 2,099,857; Nov. 23.
Lockhart, Marshall L., Des Moines, Iowa. Electrostethograph. 2,099,938; Nov. 23.
Loef, Jakob. Moosburg, Germany. Lifting-truck. 2,100,194; Nov. 23.
Lohr, Hans, Jackson Heights, assignor to Fillor Famous Facial Corporation, Long Island City, N. Y. Exterior body treatments. 2,099,744; Nov. 23.
Loverch, Charles L. (See Johnson, R. W., Loverch, and Zaum.)
Lowry, Erwin F., Forest Hills, Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Electric discharge apparatus. 2,100,195; Nov. 23.
Lowry, Erwin F., Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Electron discharge device. 2,100,196; Nov. 23.
Lubrication Corporation, The. (See Creveling, John L., assignor.)
Lubrication Corporation, The. (See Tear, Harry R., assignor.)
Lundquist, Gustaf, Hawthorne, Wis. Pipe connecter. 2,099,984; Nov. 23.
Lykins, William H., Covington, Ind. Collapsible bench and table structure. 2,099,745; Nov. 23.
Lyon Incorporated. (See Tinker, Herbert W., assignor.)
Mack Manufacturing Corporation. (See Matthews, Philip E., assignor.)
Mack, Sterling. (See Underwood, J., and Mack.)
MacKenzie, Roy J., and L. L. Haas, assignors to Buffalo Pressed Steel Company, Buffalo, N. Y. Muffler construction. 2,099,858; Nov. 23.
Macready, George A., Los Angeles, Calif. Collapsible rotary core drill. 2,099,859; Nov. 23.
Madaus, Dr. & Co. (See Madaus, Gerhard, assignor.)
Madaus, Gerhard, Dresden, assignor to the firm Dr. Madaus & Co., Radebeul, Saxonia, Germany. Production of preparations containing the active constituents of vegetable products. 2,100,081; Nov. 23.
Magnavox Company, The. (See Clark, Richard U., assignor.)
Mahana, Charles G., Three Rivers, Mich., assignor to Fairbanks, Morse & Company, Chicago, Ill. Vehicle bearing. 2,099,817; Nov. 23.
Mahoney, William E., Pawtucket, R. I., assignor to Premier Thead Company, Strand winding machine. 2,099,985; Nov. 23.
Maier, Frederick, Buffalo, N. Y. Doughnut forming machine. 2,099,900; Nov. 23.
Major, Randolph T., Plainfield, and W. L. Ruigh, Metuchen, assignors to Merck & Co., Inc., Rahway, N. J. Means and compositions for the stabilization of divinyl ether. 2,099,695; Nov. 23.
Mandelbaum, Malvin R., New York, N. Y., assignor to The Gray Processes Corporation, Newark, N. J. Recovery and purification of hydrocarbon oil. 2,100,011; Nov. 23.
Mankki, Onnie, Cleveland Heights, assignor to The Cleveland Welding Company, Cleveland, Ohio. Bicycle. 2,100,012; Nov. 23.
Mann, Alan N., trustee. (See McCaa, David G., assignor.)
Manville Jenckes Corporation. (See Gibling, Harold F., assignor.)
Marcus, Mary A., New York, N. Y. Treatment of psoriasis. 2,099,696; Nov. 23.
Mareska, Joseph, Cicero, Ill. Hair cutting device. 2,100,082; Nov. 23.
Marks, George A., Chicago, Ill. Diffuser. 2,099,767; Nov. 23.

Marmorek, Simon. (See Engstrand, Gunnar C., assignor.)
Marsh, Jas. P., Corporation. (See Hedfield, R. T., and Seegers, assignors.)
Marshall, Donald A., Toronto, Ontario, Canada, assignor, by mesne assignments, to Etched Products Inc., Detroit, Mich. Etching metals. 2,099,697; Nov. 23.
Martin, John W., et al. (See Cook, Donald D., assignor.)
Martin, Nicholas S., assignor to No-Re-Fil Cap Corp., Brooklyn, N. Y. Dispensing bottle top. 2,100,083; Nov. 23.
Martin, William A., Trenton, Mo. Mausoleum. 2,100,013; Nov. 23.
Mater, Annie. (See Buchheit, Henry F., assignor.)
Matsumoto, Josuke, Los Angeles, Calif. Button and clasp construction. 2,100,106; Nov. 23.
Matthews, Philip E., Plainfield, N. J., assignor to Mack Manufacturing Corporation. Independently sprung front wheel. 2,100,285; Nov. 23.
Mayer, Augustus, Springfield, Ill. Increasing the efficiency of boilers. 2,099,746; Nov. 23.
Maynard, Arthur H. (See Davis, E. W., and Maynard.)
Maytag Company, The. (See Kroeger, Ellwyn C., assignor.)
McArthur, Clifford L. (See Hill, W. E., and McArthur.)
McCaa, David G., Lancaster, Pa., assignor to A. N. Mann, Scarsdale, N. Y., trustee. Static limiting device. 2,099,818; Nov. 23.
McCarthy, Henry J., Danvers, assignor to Hygrade Sylvania Corporation, Salem, Mass. Filament support for radio tubes and the like. 2,100,306; Nov. 23.
McCracken, Fred M., Norwood, Ohio. Compressor. 2,100,014; Nov. 23.
McCubbing Pneumatic Harness Company. (See McCubbing, Robert, assignor.)
McCubbing, Robert, Barrhill, Dalbeattie, assignor to The McCubbing Pneumatic Harness Company, Limited, Dalbeattie, Scotland. Horse collar. 2,099,860; Nov. 23.
McDougall, George F., Portland, Oreg. Sampling valve. 2,099,939; Nov. 23.
McFarland, James L., Schenectady, N. Y., assignor to General Electric Company. Enameling furnace. 2,100,222; Nov. 23.
McGee, James D., Ealing, London, assignor to Electric and Musical Industries Limited, Hayes Middlesex, England. Television. 2,100,259; Nov. 23.
McGrady, Frank C., Washington, D. C. Light support. 2,100,058; Nov. 23.
McJoynt, Thomas L., Janesville, Wis. Pad filling apparatus. 2,099,861; Nov. 23.
McLaughlin, Robert W., Jr., assignor to American Houses, Inc., New York, N. Y. Building construction unit. 2,099,961; Nov. 23.
McMinn, Wiley W., Orange, N. J. Hollow metal shaft and manufacture of same. 2,100,307; Nov. 23.
McNalley, Alfred H. (See Duga, W. L., and McNalley.)
McNeill, George K., Detroit, Mich., assignor to United States Rubber Products, Inc., New York, N. Y. Pneumatic tire tread. 2,100,084; Nov. 23.
McRae, George H., Thomaston, Ga., assignor to Draper Corporation, Hopedale, Mass. Selvage forming device. 2,100,197; Nov. 23.
Megathlin, Ralph S., Wollaston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel-seat fitting machine. 2,099,698; Nov. 23.
Meininghaus, Ulrich, Mulheim-Ruhr, Germany. Turbine. 2,099,699; Nov. 23.
Melcher, Lee W., assignor to Waukesha Motor Company, Waukesha, Wis. Air conditioning means. 2,099,747; Nov. 23.
Melrath, Earle G., assignor to Melrath Supply & Gasket Co., Inc., Philadelphia, Pa. Barrel or drum flange unit. 2,100,168; Nov. 23.
Melrath Supply & Gasket Co. (See Melrath, Earle G., assignor.)
Mendivia, Manuel, Washington, D. C. Miniature offset press. 2,099,962; Nov. 23.
Mercier, Pierre E., Paris, France. Vehicle suspension. 2,099,819; Nov. 23.
Merck & Co. (See Major, R. T., and Ruigh, assignors.)
Merrick, Anson A., assignor to James Vernor Company, Detroit, Mich. Tying bottles together for stacking purposes, such as in displays. 2,100,035; Nov. 23.
Mertens, Paul, Newark, N. J. Eyeglass frame. 2,099,748; Nov. 23.
Mertis, Elmer, Brooklyn, N. Y., assignor to American Machine & Foundry Company. Cooling device for hot seals. 2,099,700; Nov. 23.
Metcalf, Milton M., Vallejo, Calif. Steam actuated poppet valve gear for reciprocating pumping engines. 2,099,701; Nov. 23.
Meyer, Joseph E., Jackson Heights, assignor, by mesne assignments, to R. Hoe & Co., Inc., New York, N. Y. Delivery mechanism for printing machines. 2,099,820; Nov. 23.
Michal, James, assignor to Storkline Furniture Corporation, Chicago, Ill. Brake for baby carriages. 2,100,036; Nov. 23.
Mid-States Gummed Paper Co. (See Humphner, Ferdinand W., assignor.)
Miehle Printing Press and Manufacturing Company. (See Wilkinson, William J., assignor.)
Miller, Carl F., Emporium, Pa., assignor to Hygrade Sylvania Corporation, Salem, Mass. Electron discharge device. 2,100,308; Nov. 23.
Miller, David, Los Angeles, Calif. Straw dispensing machine. 2,099,862; Nov. 23.
Miller, Edward L., Green Island, assignor, by mesne assignments, to American Machine and Metals, Inc., New York, N. Y. Centrifugal extracting and discharging mechanism. 2,099,863; Nov. 23.
Miller, Fred E., Philadelphia, Pa., assignor to Semet Solvay Engineering Corporation, New York, N. Y. Manufacture of distilled spirits. 2,099,864; Nov. 23.
Miller, John H., Short Hills, assignor to Weston Electrical Instrument Corporation, Newark, N. J. Thermocouple ammeter. 2,100,260; Nov. 23.
Minneapolis-Honeywell Regulator Company. (See Hartig, Henry E., assignor.)
Minneapolis-Honeywell Regulator Company. (See Kriechbaum, John P., assignor.)
Mitchell, John E., Dallas, Tex. Extractor-cleaner machine. 2,100,198; Nov. 23.
Mitchell, John E., Dallas, Tex. Extractor-cleaner reclaiming machine. 2,100,199; Nov. 23.
Mitchell, John E., Dallas, Tex. Cotton cleaning and reclaiming machine. 2,100,300; Nov. 23.
Mitchell, John E., Dallas, Tex. Self-contained boll cotton extracting machine. 2,100,301; Nov. 23.
Mitchell, John E., Dallas, Tex. Self-contained boll cotton extracting machine. 2,100,302; Nov. 23.
Mitchell, John E., Dallas, Tex. Cotton cleaning and reclaiming machine. 2,100,303; Nov. 23.
Mock, Frank C., Montclair, assignor to Eclipse Aviation Corporation, East Orange, N. J. Internal combustion engine. 2,100,143; Nov. 23.
Molins Machine Company. (See Jackson, Thomas G., assignor.)
Montgomery, Edward, Knoxville, Tenn. Luggage rack. 2,100,261; Nov. 23.
Moore, Alfred, et al. (See Floyd, E. P., and Hackney, assignors.)
Moore, Roscoe, Kingston, Pa. Conveyer-propelled supply truck for use with shaking conveyers. 2,100,144; Nov. 23.
Moore, Thomas F., Morris Plains, N. J. Well point. 2,100,145; Nov. 23.
Moore, Thomas V., La Porte, and W. C. Landry, Houston, Tex., assignors to Standard Oil Development Company. Power clock of small diameter. 2,099,821; Nov. 23.
Moorhead, Albert L., Klamath Falls, Oreg. Sluice box and amalgamation concentrator. 2,100,262; Nov. 23.
Moran, Robert B. (See Bonney, L. F., and Moran.)
Morehouse, Silas A., Glendale, assignor to Rocky Mountain Steel Products, Inc., Los Angeles, Calif. Control system. 2,100,059; Nov. 23.
Morse Andrews Co. (See Morse, William J., assignor.)
Morse, William J., Attleboro, Mass., assignor to Morse Andrews Co. Combined collar holder and tie clasp. 2,099,901; Nov. 23.
Morton, Edmund R., assignor to Bell Telephone Laboratories, Incorporated, New Lork, N. Y. Sound picture system. 2,099,865; Nov. 23.
Mosley, Alfred J., Aurora, Ill. Grinding mill. 2,100,200; Nov. 23.
Motor Wheel Corporation. (See Van Halteren, Andrew S., assignor.)
Moulton, Edward C., Newburgh, N. Y. Combined ashtray and snuffer. 2,100,263; Nov. 23.
Moyer, Amos F., and G. C. Kleidon, assignors, by mesne assignments, to Toro Manufacturing Corporation of Minnesota, Minneapolis, Minn. Tractor propelled gang lawn mower. 2,099,902; Nov. 23.
Muenz, Ferdinand. (See von der Horst, H. D. F., Muenz, and Vogt.)
Muller, Alfred W., New York, N. Y. Electric attachment plug. 2,099,986; Nov. 23.
Murdock, Sidney A., assignor, by mesne assignments, to R. Gumbiner, Los Angeles, Calif. Film driving system. 2,099,987; Nov. 23.
Murlé Co., The. (See Lewis, Wilbur S., assignor.)
Murphy, Frank L., assignor to Pullman-Standard Car Manufacturing Company, Chicago, Ill. Air conditioning system for cars. 2,099,702; Nov. 23.
Murphy, P. H., Company. (See Bonsall, Charles D., assignor.)
Murphy, P. H., Company. (See Finger, Paul E., assignor.)
Murphy, P. H., Company. (See Gilpin, Garth G., assignor.)
Murphy, P. H., Company. (See West, Victor E., assignor.)
Murphy, P. H., Company. (See Wilkoff, Louis C., assignor.)
Murray Corporation of America, The. (See Osborn, William C., assignor.)
Nardone, Romeo M., assignor to Eclipse Aviation Corporation, East Orange, N. J. Driving mechanism. 2,099,768; Nov. 23.
Nassau, Max. (See Sommer, F., and Nassau.)
National Electric Products Corporation. (See Clayton, Martin M., assignor.)
Neatform Co. Inc., The. (See Goodman, Martin, assignor.)
Nelson, Carl O., Long Beach, Calif. Chain jack. 2,099,940; Nov. 23.
Neumann, Jan. (See Hejduk, F., and Neumann.)

Newman, Henry O., Waterbury, Conn., assignor, by mesne assignments, to United States Rubber Company, New York, N. Y. Production of vulcanized rubber. 2,100,085; Nov. 23.
Nichols, Sam J., et al. (See Floyd, E. P., and Hackney, assignors.)
Niemann, Georg. (See Holzach, K., and Niemann.)
Nilson, Harold, assignor of one-third to J. A. Edeby, Wayzata, and one-third to E. Berglund, Minneapolis, Minn. Lifting apparatus. 2,099,903; Nov. 23.
No-Re-Fil Cap Corporation. (See Martin, Nicholas S., assignor.)
Norris, Edward O., Port Chester, assignor to The Norris Painting Machinery Corporation, Inc., New York, N. Y. Spraying device. 2,099,988; Nov. 23.
Norris Painting Machinery Corporation, The. (See Norris, Edward O., assignor.)
Norton, Clifford, South Orange, N. J., assignor to Otis Elevator Company, New York, N. Y. Elevator roller guide shoe. 2,100,169; Nov. 23.
Nyquist, Harry, Millburn, N. J., assignor to American Telephone and Telegraph Company. Circuits embodying negative impedance. 2,099,769; Nov. 23.
Oakes Products Corporation. (See Duncan, Charles R., assignor.)
Oehmen, Hans, Berlin-Schmargendorf, Germany. Steering wheel. 2,100,147; Nov. 23.
Oelkers, Alfred H., assignor to American Steel Foundries, Chicago, Ill. Wheel and axle assembly. 2,099,822; Nov. 23.
Orth, Richard T., Orange, N. J., assignor to Radio Corporation of America. Electron tube. 2,099,749; Nov. 23.
Osborn, William C., Detroit, Mich., assignor to The Murray Corporation of America. Trim panel construction. 2,099,989; Nov. 23.
Ostro Research Laboratories, Inc. (See Hopkinson, R., and Tolstoouhov, assignors.)
Otis Elevator Company. (See Norton, Clifford, assignor.)
Otis Elevator Company. (See Waters, H., Paulson, and Troster, assignors.)
Packard Motor Car Company. (See Krebs, Henry, assignor.)
Packard Motor Car Company. (See Paton, Clyde R., assignor.)
Paden, William L., Dayton, assignor, by mesne assignments, to Central National Bank of Cleveland, Cleveland, Ohio. Counter selecting and operating means. 2,100,107; Nov. 23.
Page, James M., Jr. (See Buchler, C. C., and Page.)
Palmer Brothers Company, The. (See Johnson, James R., assignor.)
Panzegrau, Norman O. (See Baker, D. B., Rogers, and Panzegrau.)
Parke, Davis & Company. (See Hamilton, Cliff S., assignor.)
Parke, Davis & Company. (See Sharp, Elwood, A., assignor.)
Parker, Claire, Paris, France. Apparatus for producing images. 2,100,148; Nov. 23.
Parkersburg Iron and Steel Company, The. (See Renner, Verdon T., assignor.)
Parkhurst, Frederic A. (See Hill, W. E., and Parkhurst.)
Parks, Walter A., Milwaukee, Wis. Adjustable seat. 2,100,170; Nov. 23.
Paschke, Max, Clausthal-Zellerfeld, and E. Peetz, Duisburg-Huttenheim, Germany, assignors to H. A. Brassert & Co., Chicago, Ill. Manufacture of pig iron. 2,100,086; Nov. 23.
Paton, Clyde R., Birmingham, assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 2,099,703; Nov. 23.
Patten, Wilbert H., assignor to Trent Machine Company, Trenton, N. J. Washer placing machine. 2,100,015; Nov. 23.
Paulson, Arthur W. (See Waters, H., Paulson, and Troster.)
Peck, Cecil C., Cleveland, Ohio. Building construction. 2,099,941; Nov. 23.
Pedersen, Aksel M., et al. (See Dailey, Jay F., assignor.)
Peerless Bread Machinery Corporation. (See Lauterbur, Edward J., assignor.)
Peetz, Eugen. (See Paschke, M., and Peetz.)
Penn Metal Company. (See Spinosa, Arthur V., assignor.)
Pennington, Edmund W., Minneapolis, and C. E. Porter, Jr., St. Paul, assignors to Vivid-Ad, Inc., Minneapolis, Minn. Kaleidoscopic projection and apparatus therefor. 2,099,904; Nov. 23.
Peo, Ralph F., and W. D. Drysdale, assignors to Houde Engineering Corporation, Buffalo, N. Y. Governor clutch drive mechanism support. 2,099,750; Nov. 23.
People of the United States of America. (See Schaffer, P. S., and Haller, assignors.)
Perkins, Sidney. (See Lewis, J. R., Perkins, and Lewis.)
Perrin, René, assignor to Société d'Electrochimie d'Electrometallurgie et des Aciéries Electriques d'Ugine, Paris, France. Treatment of metals and slags. 2,100,264; Nov. 23.
Perrin, René, assignor to Société d'Electrochimie d'Electrometallurgie et des Aciéries Electriques d'Ugine, Paris, France. Manufacture of metal alloys. 2,100,265; Nov. 23.
Perry, Milton H., Lansing, Mich. Oil filter. 2,100,266; Nov. 23.
Perry, Walter M., assignor to Sperry Products, Inc., Brooklyn, N. Y. Rail flaw detector mechanism. 2,099,823; Nov. 23.
Pestarini, Joseph M., Grant City, Staten Island, N. Y. Electrical machine inserted in a series network and operating at an adjustable constant speed. 2,100,171; Nov. 23.
Petroleum Processes Corporation, The. (See David, Aubrey D., assignor.)
Philadelphia Storage Battery Company. (See Brown, Reynolds D., Jr., assignor.)
Philco Radio & Television Corporation. (See Barry, Gerald J., assignor.)
Phillips, John X. (See Hill, E. G., and Phillips.)
Pick Manufacturing Company. (See Weasler, A. V., and Dooley, assignors.)
Piercy, Earl R., assignor to Thomas & Skinner Steel Products Company, Indianapolis, Ind. Sinker for knitting machines. 2,100,060; Nov. 23.
Piggott, Henry A. (See Baldwin, A. W., and Piggott.)
Pirich, George, Minneapolis, Minn. Furnace. 2,099,704; Nov. 23.
Pirsch, Peter, and Sons Co. (See Pirsch, Peter, assignor.)
Pirsch, Peter, assignor to Peter Pirsch and Sons Co., Kenosha, Wis. Tillerman's windshield for ladder truck trailers. 2,099,905; Nov. 23.
Pittsburgh Coal Company. (See White, Jerome C., assignor.)
Plaunt, Charles A., Maywood, Ill. Curtain fixture. 2,099,770; Nov. 23.
Plauson, Hermann. (See Braun, K., and Plauson.)
Plym, Francis J., assignor to The Kawneer Company, Niles, Mich. Window construction. 2,099,751; Nov. 23.
Poor & Company. (See Disbrow, Clarkson A., assignor.)
Porter, Albert N., assignor to J. F. Darby, Tulsa, Okla. Spring shackle. 2,099,942; Nov. 23.
Porter, Charles E., Jr. (See Pennington, E. W., and Porter.)
Porzellanfabrik Kahla. (See Handrek, Hans, assignor.)
Potthast, Walter H., Manning, Iowa. Rotary combustion engine. 2,100,267; Nov. 23.
Poulsen, Louis, & Co. (See Henningsen, Poul, assignor.)
Powell, John O. (See Jones, William, assignor.)
Power Patents Company. (See Beattie, Cecil E., assignor.)
Prager, Herman, Metairie, La. Forming a draft passage in the end of a cigar. 2,099,963; Nov. 23.
Premier Thread Company. (See Mahoney, William E., assignor.)
Price, Abraham R., San Francisco, Calif. Garment marker. 2,099,943; Nov. 23.
Priou, Pierre A. M., Chinon, France. Photographic printing machine. 2,100,087; Nov. 23.
Pro-phy-lac-tic Brush Company. (See Hill, W. E., and McArthur, assignors.)
Pro-phy-lac-tic Brush Company. (See Hill, W. E., and Parkhurst, assignors.)
Pryale, Harry M. (See Hunter, G. G., Pryale, and Clark.)
Pullman-Standard Car Manufacturing Company. (See Murphy, Frank L., assignor.)
Quenelle, Charles C., Newburgh, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Manufacturing wearing apparel and product thereof. 2,100,201; Nov. 23.
Quick, Cecil G., D. A. Ball, and W. A. Whitehead, London, England, assignors to R. Hoe & Co., Inc., New York, N. Y. Delivery mechanism for use in delivering the products of printing machines in counted batches. 2,100,016; Nov. 23.
Qviller, Olaf, assignor to A/S Thunes Mekaniske Vaerksted, Skorjen by Oslo, Norway. Method and arrangement for filtering waste water (back water) from paper, cellulose, and wood pulp factories, etc. 2,100,149; Nov. 23.
Radio Corporation of America. (See Ballantine, Stuart, assignor.)
Radio Corporation of America. (See Banning, Thomas A., Jr., assignor.)
Radio Corporation of America. (See George, R. H., and Heim, assignors.)
Radio Corporation of America. (See Gregory, Harold D., assignor.)
Radio Corporation of America. (See Iams, Harley A., assignor.)
Radio Corporation of America. (See Lindenblad, Nils E., assignor.)
Radio Corporation of America. (See Orth, Richard T., assignor.)
Radio Corporation of America. (See Shore, Henry, assignor.)
Radio Corporation of America. (See Wilson, James T., assignor.)
Radio Corporation of America. (See Wright, Joseph L., assignor.)
Railway Utility Company. (See Willer, Nicholas L., assignor.)
Randolph, Oliver W., Toledo, Ohio. Dehydrator. 2,100,150; Nov. 23.
Ray Airconditioning Corporation. (See Tompson, C., and Ray, assignors.)
Ray, George. (See Tompson, C., and Ray.)
Rea, Wilton T., Flushing, N. Y., assignor to American Telephone and Telegraph Company. Printing telegraph system. 2,099,771; Nov. 23.

Reed, William, Springfield, Mass. Display device. 2,100,223; Nov. 23.
Rees, Leslie H. (See Graham, Elmer J., assignor.)
Reese, Myrtle P., and C. A. Volf, Jr., New York, N. Y.; said Volf, Jr., assignor to said Reese. Article holder. 2,099,906; Nov. 23.
Reeves, Charles R., and C. R. Gentry, Oklahoma City, Okla. Apparatus for purifying oil. 2,099,824; Nov. 23.
Refining, Inc. (See Clayton, Benjamin, assignor.)
Refining, Inc. (See Clayton, B., Kerrick, and Stadt, assignors.)
Refining, Inc. (See Clayton, B., Kerrick, Stadt, and Thurman.)
Reichel, Wladimir A., Philadelphia, Pa., assignor to Bendix Aviation Corporation, South Bend, Ind. Directional gyroscopic indicator. 2,099,705; Nov. 23.
Reinforced Paper Bottle Corporation. (See Joplin, William A., assignor.)
Renault, Louis. (See Salves, Leon, assignor.)
Renner, Verdon T., assignor to The Parkersburg Iron and Steel Company, Parkersburg, W. Va. Sheet metal roofing. 2,099,752; Nov. 23.
Reynolds, Frank M., Sanford, Colo. Battery terminal post clamp. 2,100,268; Nov. 23.
Reynolds Metals Company. (See Larson, Clayton E., assignor.)
Rhinelander Paper Company. (See Dodge, Lloyd L., assignor.)
Richards, William H., Dayton, Ohio. Control device. 2,099,706; Nov. 23.
Richardson, Rodney G., et al. (See Cook, Donald D., assignor.)
Riddell, William A., Rochester, N. Y., assignor, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J. Photographic shutter. 2,099,866; Nov. 23.
Riegel, Jean M., New York, N. Y. Cocktail shaker. 2,100,172; Nov. 23.
Righter, Edward M., Lincoln, Nebr., assignor to Intertype Corporation, Brooklyn, N. Y. Typographical mold and slug. 2,100,304; Nov. 23.
Riley Stoker Corporation. (See Andrews, L. V., assignor.)
Rimbach, Henry W. (See Snyder, F. H., and Rimbach.)
Robbins, Earl J., Seattle, Wash. Mixing machine. 2,099,964; Nov. 23.
Röber, Constantin F., assignor to "Universelle" Cigarettenmaschinenfabrik J. C. Mueller & Co., Dresden, Germany. Cigar bunch trimmer. 2,100,108; Nov. 23.
Roberts, Robert P., and E. B. Johnson, Spondon, near Derby, England, assignors to Celanese Corporation of America. Manufacture of cellulose derivatives. 2,099,753; Nov. 23.
Robertson, Albert, Milwaukee, Wis. Instrument cord. 2,100,088; Nov. 23.
Robinson, Harold C., assignor, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Calculating machine. 2,099,754; Nov. 23.
Robinson, William A. (See Stoate, N. P., and Robinson.)
Roche, Carroll E., Cincinnati, Ohio. Card holder. 2,100,269; Nov. 23.
Rocky Mountain Steel Products, Inc. (See Morehouse, Silas A., assignor.)
Rogers, Clifford R. (See Baker, D. B., Rogers, and Panzegrau.)
Rogers, Marvin C., assignor to Standard Oil Company (Indiana), Chicago, Ill. Distillation of hydrocarbon oils. 2,099,907; Nov. 23.
Rolshausen, Ferdinand W., and S. L. Bishkin, Houston, Tex., assignors to Standard Oil Development Company. Oil base hydratable drilling fluid. 2,099,825; Nov. 23.
Romine, Joseph C., assignor to W. R. Wilson, Detroit, Mich. Ductile gas line connecter. 2,100,270; Nov. 23.
Rosenberg, Heyman, New York, N. Y. Weatherproofing fastener. 2,099,990; Nov. 23.
Rosengarten, Mitchell G., Philadelphia, Pa. Target. 2,099,908; Nov. 23.
Rotor-Table Games, Inc. (See Goldberger, Oscar, assignor.)
Rotter, Rudolph W., Kent, Wash. Culinary device. 2,100,271; Nov. 23.
Royal Typewriter Company. (See Khalil, Seyed, assignor.)
Rozinek, Arthur. (See Szikla, G., and Rozinek.)
Rubens, Harry E., New York, N. Y. Closure device. 2,100,173; Nov. 23.
Ruffino, Peter, Brooklyn, N. Y. Brake. 2,100,174; Nov. 23.
Rugaard, Oswald L. (See Berman, George A., assignor.)
Ruigh, William L. (See Major, R. T., and Ruigh.)
Russell, Donald, et al. (See Floyd, E. P., and Hackney, assignors.)
Ruthruff, Robert F. (See Bahlke, W. H., Ruthruff, and Sullivan.)
Ruthruff, Robert F., Hammond, Ind., assignor to Standard Oil Company (Indiana), Chicago, Ill. Treatment of hydrocarbons. 2,099,755; Nov. 23.
Ryan, William H., Newburgh, N. Y. Domestic water system. 2,100,109; Nov. 23.
Salves, Leon, assignor to L. Renault, Billancourt, France. Body of automobile vehicles. 2,099,867; Nov. 23.
Sandvoss, Hermann, Frankfort-on-the-Main, Germany. Thermostat. 2,100,037; Nov. 23.
Sangamo Electric Company. (See Kurz, Fred, assignor.)
Sarazin, Robert, Neuilly-sur-Seine, France. Recording the work performed by welders. 2,099,965; Nov. 23.
Sawyer, Guy R., assignor of one-half to B. R. Sherburne, Glover, Vt. Electric reversible tooth brush. 2,100,272; Nov. 23.
Saxton, Ellsworth E., Seattle, Wash. Electrical connecter. 2,099,944; Nov. 23.
Schaffer, Paul S., and H. L. J. Haller, Washington, D. C., dedicated to the free use of the People of the United States of America. Insecticide. 2,099,826; Nov. 23.
Scherle, Gottfried, Bloomfield, N. J. Full fashioned hosiery knitting machine. 2,100,202; Nov. 23.
Schloemann Aktiengeselischaft. (See Gassen, Josef, assignor.)
Schmidt-Nielsen, Sigval, Trondhjem, and A. Flood, Larvik, Norway. Manufacture of soap from marine oils. 2,100,146; Nov. 23.
Schneider, Frank H., assignor to The Floyd-Wells Company, Royersford, Pa. Burner forming grid. 2,100,292; Nov. 23.
Schoengarth, Walter L., Ironwood, Mich., assignor to B. G. Harmon, Chicago, Ill. Piston. 2,100,203; Nov. 23.
Schrenk, Louis J., Detroit, Mich. Wet refuse burning grate. 2,099,827; Nov. 23.
Schroeder, Raymond, et al. (See Dailey, Jay F., assignor.)
Schubenel, Robert, Le Vesinet, France. Plug or cork for delivering doses. 2,100,038; Nov. 23.
Seat, Jay L., Fairfield, Conn. Portable fire extinguisher. 2,099,828; Nov. 23.
Seegers, Hans. (See Hedfield, R. T., and Seegers.)
Seibel, Albert C., East St. Louis, Ill. Adjustable window curtain fixture. 2,099,707; Nov. 23.
Seidelhuber, Frank V. (See Seidelhuber, Victor, assignor.)
Seidelhuber, Victor, assignor of one-half to F. V. Seidelhuber, Seattle, Wash. Pelorus. 2,099,772; Nov. 23.
Seigle, William R., Mamaroneck, assignor to Johns-Manville Corporation, New York, N. Y. Air duct. 2,099,756; Nov. 23.
Semet Solvay Engineering Corporation. (See Miller, Fred E., assignor.)
Seymour, George W., Cumberland, Md., assignor to Celanese Corporation of America. Esters of formals and preparing them. 2,099,757; Nov. 23.
Seymour, George W., Cumberland, Md., assignor to Celanese Corporation of America. Compositions containing esters of formals. 2,099,758; Nov. 23.
Sharp, Elwood A., assignor to Parke, Davis & Company, Detroit, Mich. Therapeutic product and making same. 2,099,708; Nov. 23.
Sheet Polarizer Company. (See Land, Edwin H., assignor.)
Sherburne, B. R. (See Sawyer, Guy R., assignor.)
Shore, Henry, Elizabeth, N. J., assignor to Radio Corporation of America. Facsimile system. 2,100,204; Nov. 23.
Siebert, Conrad. (See Cohn, H., and Siebert.)
Signal Engineering & Manufacturing Company. (See Ebert, Joseph F., assignor.)
Signaphone Corporation of America. (See Tuscher, J. E., and Spiro, assignors.)
Simpson, Paul R., San Mateo, Calif. Treatment of coffee or the like. 2,099,945; Nov. 23.
Sing, Lang J., and R. M. Waunch, Salem, Oreg. Automatic annunciator. 2,099,868; Nov. 23.
Skandera, Martin, Mohawk, N. Y. Safety signal for loaded guns. 2,100,273; Nov. 23.
Sladek, Louis J. (See Isaacson, Carl C., assignor.)
Sleeper & Hartley, Inc. (See Blount, William H., assignor.)
Smellie, Donald G., Canton, assignor to The Hoover Company, North Canton, Ohio. Suction cleaner. 2,100,089; Nov. 23.
Smith, Alfred R., Forest Hills, assignor to Combustion Engineering Company, Inc., New York, N. Y. Casing wall construction for boilers. 2,099,829; Nov. 23.
Smith, Donald J. E., assignor to J. E. Whitten, Vancouver, British Columbia, Canada. Crosscut saw handle. 2,099,966; Nov. 23.
Smith, Nelson J., and J. C. Chambers, Dayton, Ohio, assignors, by mesne assignments, to General Motors Corporation. Air conditioning. 2,100,110; Nov. 23.
Smith, William H. (See Stanley, H. C., and Smith.)
Snyder, Francis H., and H. W. Rimbach, assignors to Francis H. Snyder, Inc., New York, N. Y. Color photography. 2,100,224; Nov. 23.
Snyder, Francis H., Inc. (See Snyder, F. H., and Rimbach, assignors.)
Société d'Electrochimie, d'Electrometallurgie et des Aciéries Electriques d'Ugine. (See Perrin, René, assignor.)
Somers, Norman C., Carneys Point, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Preparation of tetraalkyl thiuram monosulphides. 2,099,773; Nov. 23.
Sommer, Fritz, Berlin-Charlottenburg, and M. Nassau, Berlin-Wilmersdorf, assignors to firm: Chemische Fabrik Grünau Landshoff & Meyer A. G., Berlin-Grunau, Germany. Cosmetic products. 2,100,090; Nov. 23.
Southland Cotton Oil Company. (See Taylor, Dick, assignor.)
Spahn, Emil, Zug, Switzerland, assignor to Landis & Gyr, A.-G. Time measuring mechanism. 2,099,759; Nov. 23.

Spencer, Henry W., Roehampton Lane, London, and L. S. Davis, Bexley Heath, England. Muffle and like furnace. 2,099,967; Nov. 23.
Spencer, Will M., Estill Springs, Tenn. Poultry or livestock vehicle body. 2,099,774; Nov. 23.
Sperry Products, Inc. (See Drake, Harcourt C., assignor.)
Sperry Products, Inc. (See Perry, Walter M., assignor.)
Sperry, Samuel E., Hollis, assignor to Intertype Corporation, Brooklyn, N. Y. Typographical machine. 2,100,305; Nov. 23.
Spinosa, Arthur V., Parkersburg, W. Va., assignor to Penn Metal Company, Inc. Plaster base. 2,099,709; Nov. 23.
Spiro, Marcel. (See Tuscher, J. E., and Spiro.)
Spohr, Carl W., Chicago, Ill. Carburetor. 2,100,205; Nov. 23.
Springfield Boiler Company. (See Irwin, William R., assignor.)
Stadt, Henry M. (See Clayton, B., Kerrick, and Stadt.)
Stadt, Henry M. (See Clayton, B., Kerrick, Stadt, and Thurman.)
Stahl, Samuel, Chicago, Ill. Lamp. 2,099,830; Nov. 23.
Stainbrook, Theodore L., Garber, Okla. Valve lock. 2,099,869; Nov. 23.
Standard Alcohol Company. (See Lebo, R. B., and Brooks, assignors.)
Standard Gage Company. (See Emery, Alfred H., assignor.)
Standard Oil Company. (See Arveson, Maurice H., assignor.)
Standard Oil Company. (See Bahlke, W. H., Ruthruff, and Sullivan, assignors.)
Standard Oil Company. (See Buchler, C. C., and Page, assignors.)
Standard Oil Company (Indiana). (See Rogers, Marvin C., assignor.)
Standard Oil Company (Indiana). (See Ruthruff, Robert F., assignor.)
Standard Oil Development Company. (See Barlow, E. H., Hewlett, and Kuhl, assignors.)
Standard Oil Development Company. (See Blau, Ludwig W., assignor.)
Standard Oil Development Company. (See Howard, Frank A., assignor.)
Standard Oil Development Company. (See Moore, T. V., and Landry, assignors.)
Standard Oil Development Company. (See Rolshausen, F. W., and Rishkin, assignors.)
Standard Oil Development Company. (See Stelk, K. T., and Gleason, assignors.)
Stanley, Thomas A., Dallas, Tex. Container filling apparatus. 2,100,039; Nov. 23.
Stanley, Henry C., and W. H. Smith, Manchester, England. Pneumatic cushion. 2,099,870; Nov. 23.
Staudle, Fred R., Milwaukee, Wis. Flatiron holder. 2,099,760; Nov. 23.
Stelk, Karl T., Clifton, and A. H. Gleason, Elizabeth, N. J., assignors to Standard Oil Development Company. Preparation of anhydrides by the use of ketene. 2,099,909; Nov. 23.
Stein, Henry E., Mankato, Minn. Operating mechanism for automotive vehicles. 2,100,225; Nov. 23.
Stenberg, Knut E. B., assignor to Associated Attleboro Manufacturers, Inc., Attleboro, Mass. Composition panel cabinet assembly particularly adapted for use in molded radio cabinets. 2,100,226; Nov. 23.
Stephens, Clarence L., Bayside, N. Y. Picture projecting device. 2,100,008; Nov. 23.
Stephens, John J., Brooklyn, N. Y., assignor to American District Telegraph Company, Jersey City, N. J. Differentially operated detection circuit. 2,100,206; Nov. 23.
Stephenson, William B. (See Irsch, George J., assignor.)
Sterling, Leonard, Newton, Tex. Coil spring trailer. 2,100,040; Nov. 23.
Stern, Benjamin A., Los Angeles, Calif. Apparatus for exercising the hearing organs. 2,099,871; Nov. 23.
Stern, Milton M., Los Angeles, Calif. Scanning device. 2,099,872; Nov. 23.
Sternfels, Martin M., Waterbury, Conn. Machine and process for producing flake metal by electrodeposition. 2,099,873; Nov. 23.
Stewart-Warner Corporation. (See Hansmann, Elwood, assignor.)
Stoate, Norman P., Kew Gardens, and W. A. Robinson, Wembley Hill, England; said Robinson assignor to said Stoate. Apparatus for detecting the presence of foreign bodies on the bottoms of transparent vessels. 2,100,227; Nov. 23.
Stone, Walter C., St. Louis, Mo. Hatch for railway cars. 2,100,119; Nov. 23.
Stonebraker, Fred, Sr., assignor, by mesne assignments, to Illusigraph Corporation, San Diego, Calif. Display sign. 2,100,111; Nov. 23.
Storey, Norman C. (See Hasson, P. R., and Storey.)
Storkline Furniture Corporation. (See Michal, James, assignor.)
Strahan, Joseph C. J., New York, N. Y. Full-fashioned hosiery. 2,099,991; Nov. 23.
Straub, Francis J., New Kensington, Pa. Making concrete building blocks. 2,099,946; Nov. 23.
Stukenborg, Louis C., Memphis, Tenn. Vehicle lift. 2,099,775; Nov. 23.
Sturtevant, B. F., Company. (See Allen, G. W., and Farwell, assignors.)
Sullivan, Frederick W., Jr. (See Bahlke, W. H., Ruthruff, and Sullivan.)
Sullivan Machinery Company. (See Joy, Joseph F., assignor.)
Sundelin, Uno, and K. A. T. Granzellius, assignors of part interest to F. Hammaren, Stockholm, Sweden. Coin registering and calculating apparatus. 2,100,061; Nov. 23.
Superheater Company, The. (See Blanchard, P. D., and Hardy, assignors.)
Sutcliffe, Nathaniel, Newark, N. J. Valve. 2,099,992; Nov. 23.
Sutherlin, Walter F., assignor of one-half to G. J. Jebeles, Birmingham, Ala. Safety switch box. 2,099,761; Nov. 23.
Svenson, Ernest J., Rockford, Ill. Material working apparatus. 2,099,776; Nov. 23.
Symington-Gould Corporation, The. (See Barrows, Donald S., assignor.)
Szikla, Géza, and A. Rozinek, Budapest, Hungary. Gas producer. 2,099,968; Nov. 23.
T & R Jewelry Co. (See Garfinkel, Louis, assignor.)
Taber, Wellington P., West Warwick, R. I. Connecter for V-belts. 2,099,831; Nov. 23.
Tauschek, Gustav, New York, N. Y. Firearm. 2,099,993; Nov. 23.
Taylor, Dick, assignor to Southland Cotton Oil Company, Paris, Tex. Collecting lint. 2,100,112; Nov. 23.
Teague, Walter D., Jr., Kew Gardens, N. Y., assignor to The Floyd-Wells Company, Royersford, Pa. Coverall for ranges. 2,100,293; Nov. 23.
Tear, Harry R., Evanston, assignor to The Lubrication Corporation, Chicago, Ill. Lubricating device. 2,100,091; Nov. 23.
Tear, Harry R., Evanston, assignor to The Lubrication Corporation, Chicago, Ill. Lubricating device. 2,100,092; Nov. 23.
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Benecke, Heinrich, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Buschbeck, Werner, assignor.)
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Fritz, Karl, assignor.)
Textile Machine Works. (See Janssen, Henry, assignor.)
Thiel, Otto, Detroit, Mich. Tacking strip. 2,099,910; Nov. 23.
Thieler, George, Jr., New Orleans, La. Holder for brake inspection tags. 2,100,041; Nov. 23.
Thomas & Skinner Steel Products Company. (See Piercy, Earl R., assignor.)
Thomas, Valley A., Manila, Ark. Pump handle structure. 2,099,832; Nov. 23.
Thomas, Wayne S., Detroit, Mich. Buffing wheel. 2,099,777; Nov. 23.
Thompson, Herbert L., Elgin, Ill. Corn popper. 2,099,911; Nov. 23.
Thompson, Russell G., Rochester, N. Y., assignor to Underwood Elliott Fisher Company. Typewriting machine. 2,099,762; Nov. 23.
Thompson, Vance M. (See Lewis, J. R., Perkins, and Lewis, assignors.)
Threadgold, Stanley D. (See Harrison, G. B., and Threadgold.)
Throckmorton, John W., New York, N. Y., assignor to Gyro Process Company, Detroit, Mich. Cracking of hydrocarbon oil. 2,100,062; Nov. 23.
Thurman, Benjamin H. (See Clayton, B., Kerrick, Stadt, and Thurman.)
Tide Water Associated Oil Company. (See Kaufmann, Arthur G., assignor.)
Tietz, Hans, Leverkusen-Wiesdorf, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Apparatus for producing ice. 2,100,151; Nov. 23.
Timken Roller Bearing Company, The. (See Buckwalter, Tracy V., assignor.)
Timken Roller Bearing Company, The. (See Klamp, P., and Kiehl, assignors.)
Tinker, Herbert W., Milwaukee, Wis., assignor, by mesne assignments, to Lyon Incorporated, Detroit, Mich. Metal tire cover. 2,099,763; Nov. 23.
Tinker, John M., Penns Grove, and V. M. Weinmayr, Pitman, N. J., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Dealkylation of alkyl-aryl ethers. 2,100,228; Nov. 23.
Title Guarantee and Trust Company, executor. (See Townsend, Harry E., assignor.)
Tobin, Frederick M., Rochester, N. Y., assignor to The Tobin Packing Co., Inc., Fort Dodge, Iowa. Treatment of hog carcasses. 2,100,299; Nov. 23.
Tobin Packing Co., The. (See Tobin, Frederick M., assignor.)
Todd, Ralph C., Elyria, Ohio. Hinged structure. 2,099,778; Nov. 23.
Toelle, Walter H. (See Whitehead, O. N., and Toelle.)
Tolstoouhov, Alexander V. (See Hopkinson, R., and Tolstoouhov.)
Tomec, John, Trenton, N. J. Wall covering. 2,100,175; Nov. 23.
Thompson, Clarence, South Norwalk, Conn., and G. Ray, Port Chester, N. Y., assignors to Ray Air Conditioning Corporation, New York, N. Y. Water heating unit. 2,099,947; Nov. 23.

Toro Manufacturing Corporation of Minnesota. (See Moyer, A. F., and Kleidon, assignors.)
Torres, Joseph, New York, N. Y. Smoking pipe. 2,100,093; Nov. 23.
Touceda, Enrique G., Albany, N. Y. Controlling electric apparatus. 2,099,764; Nov. 23.
Townsend, Harry E., deceased, Brooklyn, N. Y.; Title Guarantee and Trust Company, executor. Hermetically sealed package. 2,099,710; Nov. 23.
Townsend, Harry E., deceased, Brooklyn, N. Y.; Title Guarantee and Trust Company, executor. Hermetically sealed package. 2,099,711; Nov. 23.
Travis, Edward P., Floral Park, N. Y., assignor, by mesne assignments, to Chicago Rawhide Manufacturing Company, Chicago, Ill. Grease retainer. 2,100,113; Nov. 23.
Travis, Frederick J., Chicago, Ill. Tube holder. 2,100,042; Nov. 23.
Travis, Paul H., Detroit, Mich. Vehicle pillar structure. 2,099,912; Nov. 23.
Tremolada, Guglielmo R., Los Angeles, Calif. Suspension hydraulic swivel and feed for rotary well drilling. 2,099,779; Nov. 23.
Trent Machine Company. (See Patten, Wilbert H., assignor.)
Trenzen, Carl, Venlo, Netherlands. Evacuating vessels, more particularly lamps. 2,099,874; Nov. 23.
Trevaskis, Henry. (See Beharrell, G. E., Wright, and Trevaskis.)
Trico Products Corporation. (See Horton, Erwin C., assignor.)
Trico Products Corporation. (See Hueber, H., and Horton, assignors.)
Troster, Mathew, Jr. (See Waters, H., Paulson, and Troster.)
Tunaya, Victorino L., Brooklyn, N. Y. Riot car. 2,100,043; Nov. 23.
Tuscher, Jean E., P. Ivry, and M. Spiro, Paris, France, assignors, by mesne assignments, to Signaphone Corporation of America, Wilmington, Del. Automatic telephone signaling apparatus. 2,099,913; Nov. 23.
Underwood Elliott Fisher Company. (See Thompson Russell G., assignor.)
Underwood, James, Easton, and S. Mack, Bangor, Pa., assignors to Julius Kayser & Company, Brooklyn, N. Y. Stocking. 2,099,948; Nov. 23.
Union Carbide and Carbon Corporation. (See Kinzell, Augustus B., assignor.)
Union Steel Products Company. (See Bitney, Dewey H., assignor.)
United Aircraft Corporation. (See Willgoos, Andrew V. D., assignor.)
United Shoe Machinery Corporation. (See Megathlin, Ralph S., assignor.)
United States Rubber Company. (See Gammeter, John R., assignor.)
United States Rubber Company. (See Newman, Henry O., assignor.)
United States Rubber Products, Inc. (See McNeill, George K., assignor.)
Universal Oil Products Company. (See Ipatieff, Vladimir, assignor.)
"Universelle" Cigarettenmaschinenfabrik J. C. Mueller & Co., Dresden, Germany. (See Röber, Constantin F., assignor.)
V. D. Limited. (See Dahl, O., and Black, assignors.)
Van de Casteele, Marc, Roubaix, France. Apparatus for weaving terry fabric. 2,099,780; Nov. 23.
Van Halteren, Andrew S., Akron, Ohio, assignor to Motor Wheel Corporation, Lansing, Mich. Brake drum construction. 2,099,833; Nov. 23.
Van Orden, James E., Acra, N. Y. Skip for concrete mixers. 2,100,229; Nov. 23.
Van Pelt, H. C., et al, trustees. (See Ducker, Louis F., assignor.)
Van Dum, John H., Lakewood, Ohio. Securing device. 2,100,017; Nov. 23.
Vereinigte Stahlwerke Aktiengesellschaft. (See Wallmann, C., Grossweischede, and Kruse, assignors.)
Vernor, James, Company. (See Merrick, Anson A., assignor.)
Victor Adding Machine Company. (See Garbell, Max, assignor.)
Viking Diesel Motor Corporation. (See Knudsen, Carl H., assignor.)
Vivid-Ad, Inc. (See Pennington, E. W., and Porter, assignors.)
Vogt, Adolf. (See von der Horst, H. D. F., Muenz, and Vogt.)
Volf, Christian A., Jr. (See Reese, M. P., and Volf, Jr.)
Von der Horst, Horst D. F., Leuna, and F. Muenz and A. Vogt, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Finishing textiles. 2,099,765; Nov. 23.
Waechter, Ferdinand F., and H. F. Watson, Philadelphia, Pa., assignors to Link-Belt Company, Chicago, Ill. Method of and apparatus for influent supply. 2,099,914; Nov. 23.
Wahl Clipper Corporation. (See Wahl, Leo J., assignor.)
Wahl, Leo J., assignor to Wahl Clipper Corporation, Sterling, Ill. Electric cord plug adapter. 2,100,094; Nov. 23.
Waldron, William R., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Halogenation process and product. 2,099,781; Nov. 23.
Wallmann, Carl, J. Grossweischede, and B. Kruse, Mulheim-Ruhr, assignors to firm Vereinigte Stahlwerke Aktiengesellschaft, Dusseldorf, Germany. Iron sleeper. 2,100,153; Nov. 23.
Walsh, John P., Boston, Mass. Lining up printed matter and registering type. 2,100,114; Nov. 23.
Walton, George W., London, England. Television. 2,100,044; Nov. 23.
Wangenheim, Ethel A., San Francisco, Calif. Undergarment support. 2,099,949; Nov. 23.
Ward, Benjamin O., Valle Crucis, N. C. Log turner. 2,100,115; Nov. 23.
Waters, Harold, Hohokus, A. W. Paulson, Tenafly, N. J., and M. Troster, Jr., assignors to Otis Elevator Company, New York, N. Y. Elevator control system. 2,100,176; Nov. 23.
Waters, Harold, Hohokus, A. W. Paulson, Tenafly, N. J., and M. Troster, Jr., assignors to Otis Elevator Company, New York, N. Y. Elevator system. 2,100,177; Nov. 23.
Watson, Harold F. (See Waechter, F. F., and Watson.)
Waukesha Motor Company. (See Melcher, Lee W., assignor.)
Waunch, Robert M. (See Sing, L. J., and Waunch.)
Weasler, Anthony V., and W. J. Dooley, assignors to Pick Manufacturing Company, West Bend, Wis. Grille guard. 2,100,018; Nov. 23.
Weatherhead, Albert J. Jr., assignor to The Weatherhead Company, Cleveland, Ohio. Hose coupling. 2,099,915; Nov. 23.
Weatherhead Company, The. (See Weatherhead, Albert J., Jr., assignor.)
Weaver, Cary J., Goose Creek, Tex. Water closet. 2,099,875; Nov. 23.
Weaver, Leo L., Cranford, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Strand handling apparatus. 2,099,876; Nov. 23.
Webb, George F., Kansas City, Mo. Method and apparatus for treating pyorrhea. 2,100,116; Nov. 23.
Webb, Nelson W., assignor to Eastwood-Neally Corporation, Belleville, N. J. Method and machine for producing brazed seams in wire cloth. 2,100,294; Nov. 23.
Wellein, Paul A. (See Krumm, Theodore, assignor.)
Weinberg, Leon W., Philadelphia, Pa., assignor to Celanese Corporation of America. Spun yarn and preparing same. 2,099,766; Nov. 23.
Weinmayr, Viktor M. (See Tinker, J. M., and Weinmayr.)
Weiss, Ernst, Wattwil, Switzerland, assignor to Heberlein Patent Corporation, New York, N. Y. Textile printing process and printing paste therefor. 2,099,782; Nov. 23.
West, Victor E., assignor to P. H. Murphy Company, New Kensington, Pa. Hatch construction. 2,100,128; Nov. 23.
Westall, Edward F., Alhambra, Calif. Bailer. 2,099,877; Nov. 23.
Western Electric Company. (See Johnstone, Harold G., assignor.)
Western Electric Company. (See Weaver, Leo L., assignor.)
Westinghouse Electric & Manufacturing Company. (See Dyer, L. W., and Gamel, assignors.)
Westinghouse Electric & Manufacturing Company. (See Lowry, Erwin F., assignor.)
Weston Electrical Instrument Corporation. (See Miller, John H., assignor.)
Wettlaufer, William L., Buffalo, N. Y. Apparaus for treating materials. 2,100,117; Nov. 23.
White, Jerome C., assignor to Pittsburgh Coal Company, Pittsburgh, Pa. Coal mining machine. 2,100,178; Nov. 23.
Whitehead, George E., Cardiff, South Wales. Electrical switch gear. 2,100,230; Nov. 23.
Whitehead, Oscar N., and W. H. Toelle, Wallingford, Conn., assignors, by mesne assignments, to The Danielson Manufacturing Company. Harness cord. 2,099,950; Nov. 23.
Whitehead, William A. (See Quick, C. G., Ball, and Whitehead.)
Whiteside, Robert B., Los Angeles, Calif. Boxed row firecracker package. 2,099,783; Nov. 23.
Whiting Manufacturing Company. (See Beaumont, Eugene P., assignor.)
Whitten, Joseph E. (See Smith, Donald J. E., assignor.)
Wieslander, Daniel H., Portland, Maine. Combined adjustable straight-edge, rule, and alignment tester. 2,099,784; Nov. 23.
Wight, Sedgwick N., assignor to General Railway Signal Company, Rochester, N. Y. Signaling system for railroads. 2,100,295; Nov. 23.
Wight, Sedgwick N., assignor to General Railway Signal Company, Rochester, N. Y. Switch machine for railroads. 2,100,296; Nov. 23.
Wilkening, Frederick W., Narberth, assignor to Wilkening Manufacturing Company, Philadelphia, Pa. Making piston rings. 2,099,712; Nov. 23.
Wilkening Manufacturing Company. (See Wilkening, Frederick W., assignor.)
Wilkinson, William J., Eastchester, N. Y., assignor of one-half to Miehle Printing Press and Manufacturing Company, Chicago, Ill. Color corrected printing. 2,099,916; Nov. 23.

Wilkoff, Louis C., Youngstown, Ohio, assignor, by mesne assignments, to P. H. Murphy Company. Hatch frame. 2,100,129; Nov. 23.
Willer, Nicholas L., assignor to Railway Utility Company, Chicago, Ill. Ventilating device for cars and the like. 2,099,917; Nov. 23.
Willgoos, Andrew V. D., West Hartford, Conn., assignor, by mesne assignments, to United Aircraft Corporation. Engine intake system. 2,099,785; Nov. 23.
Williams, Allan H., Chester, England. Coating metal articles with zinc. 2,100,179; Nov. 23.
Williams, Richard J. (See Wilson, L. F., and Williams.)
Willson, Russell, U. S. Navy. Device for solving relative movement problems. 2,099,713; Nov. 23.
Wilson, Arlis R., Chicago, Ill. Windshield defroster blade. 2,100,019; Nov. 23.
Wilson Engineering Corporation. (See Wilson, L. F., and Williams, assignors.)
Wilson, James T., Arlington, N. J., assignor to Radio Corporation of America. Electron tube. 2,099,994; Nov. 23.
Wilson, Lyndon F., Chicago, Ill., and R. J. Williams, Detroit, Mich., assignors to Wilson Engineering Corporation, Chicago, Ill. Locomotive steam separator. 2,100,095; Nov. 23.
Wilson, William R. (See Romine, Joseph C., assignor.)
Winckler Engineering Laboratories Incorporated. (See Winckler, Gunnar A. F., assignor.)
Winckler, Gunnar A. F., Worcester, assignor to Winckler Engineering Laboratories Incorporated, Boston, Mass. Automatic electric safety light for lifeboats. 2,099,878; Nov. 23.
Winter, Daniel B., assignor to Crouse-Hinds Company, Syracuse, N. Y. Cover for conduit outlet boxes. 2,099,918; Nov. 23.
Wolff, Robert. (See Elbert, Fritz, assignor.)
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Printing plate cylinder. 2,100,207; Nov. 23.
Wood, Henry A. W., assignor to Wood Newspaper Machinery Corporation, New York, N. Y. Margin bar for printing cylinders. 2,100,208; Nov. 23.
Wood Newspaper Machinery Corporation. (See Wood, Henry A. W., assignor.)
Woodell, Charles E., assignor, by mesne assignments, to The Carborundum Company, Niagara Falls, N. Y. Apparatus for printing and drying. 2,099,879; Nov. 23.
Woodings, Robert T., Oakmont, assignor to Woodings-Verona Tool Works, Verona, Pa. Rail-retaining device. 2,099,786; Nov. 23.
Woodings-Verona Tool Works. (See Woodings, Robert T., assignor.)
Wright, Ellen H. C., executrix. (See Wright, Joseph L.)
Wright, Joseph. (See Beharrell, G. E., Wright, and Trevaskis.)
Wright, Joseph L., deceased, Forest Hills, Long Island; E. H. C. Wright, executrix, assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Radio broadcasting system. 2,099,787; Nov. 23.
Wyche, C. C., et al. (See Floyd, E. P., and Hackney, assignors.)
Youker, Malcolm P., Bartlesville, Okla. Combined circulating and ventilating fan assembly. 2,100,152; Nov. 23.
Young, Hugh E., Chicago, Ill. Current controlling apparatus. 2,099,714; Nov. 23.
Young, Hugh E., Chicago, Ill. Constant current system. 2,099,715; Nov. 23.
Young, Hugh E., Chicago, Ill. Constant current system. 2,099,716; Nov. 23.
Zahn, Rudolf, Wiesbaden, assignor to Kalle & Co. Aktiengesellschaft, Wiesbaden-Biebrich, Germany. Production of tanned pictures. 2,100,063; Nov. 23.
Zalkin, Semlen L. (See Capelliushnicoff, M. A., and Zalkin.)
Zaum, Max. (See Johnson, R. W., Loverch, and Zaum.)
Zhamerman, Alvin K., Akron, Ohio. Internal combustion engine. 2,100,064; Nov. 23.

LIST OF PLANT INVENTIONS

Rose. J. H. Nicolas. 264; Nov. 23.

LIST OF DESIGN INVENTIONS

Badge or similar article. S. Stingel. 107,144; Nov. 23.
Bag or similar article, Coffee. E. Carabillo. 107,065; Nov. 23.
Ball or the like, Golf. F. H. Cabignac. 107,066; Nov. 23.
Base, Lamp. C. B. Ilgenfritz. 107,080; Nov. 23.
Beanpot. C. C. Soule. 107,161–3; Nov. 23.
Box, Jewelry. I. H. Jellinek. 107,081; Nov. 23.
Brooch. A. Philippe. 107,131–4; Nov. 23.
Cabinet, Combined beverage cooling and dispensing. H. W. Ribble. 107,092; Nov. 23.
Cabinet, Phonograph. P. M. Puller. 107,148; Nov. 23.
Cabinet, Radio. R. B. Meller. 107,154–5; Nov. 23.
Cake server or similar article. H. Rietveld. 107,100; Nov. 23.
Card, Playing. R. F. Nekuda. 107,178; Nov. 23.
Case, Clock. M. Schlenker. 107,102; Nov. 23.
Case for a camera, Carrying. R. Sanborn. 107,101; Nov. 23.
Clip. A. Philippe. 107,121–30; Nov. 23.
Clip. A. Philippe. 107,135–43; Nov. 23.
Clip or similar article. A. Katz. 107,110–20; Nov. 23.
Clock. J. J., G. H., and A. J. Paris. 107,091; Nov. 23.
Combinet. J. G. Rideout. 107,093–99; Nov. 23.
Container, Collapsible. H. L. Strongson. 107,164; Nov. 23.
Container, Cosmetic. A. B. Barnhart. 107,145; Nov. 23.
Container, Shaving soap. J. Helleu. 107,151; Nov. 23.
Curtain. G. F. Erhard. 107,068–75; Nov. 23.
Curtain. G. F. Erhard. 107,168; Nov. 23.
Curtain. F. Gentner. 107,189; Nov. 23.
Cutter, Glass. G. C. Wyman. 107,180; Nov. 23.
Dispenser, Salt tablet. R. A. Kelly. 107,173; Nov. 23.
Dress. M. R. Berger. 108,181–2; Nov. 23.
Dress. M. Efantes. 107,185–7; Nov. 23.
Dress. P. Fracchia. 107,169–70; Nov. 23.
Dress. B. Fried. 107,159; Nov. 23.
Dress. B. Fried. 107,188; Nov. 23.
Dress. M. Hall. 107,190–1; Nov. 23.
Dress. J. J. Kushner. 107,174; Nov. 23.
Dress. I. Lampel. 107,192; Nov. 23.
Dress. M. Michelson. 107,195–7; Nov. 23.
Dress. K. Rost. 107,199; Nov. 23.
Dress. C. M. Santore. 107,201; Nov. 23.
Dress. P. Schlessel. 107,202–3; Nov. 23.
Dress. M. Wagner. 107,207; Nov. 23.
Dress. P. Wenett. 107,165; Nov. 23.
Dress ensemble. G. Isaacs. 107,172; Nov. 23.
Fabric, Embroidered. M. Leff. 107,193–4; Nov. 23.
Fabric, Knitted. J. Minoff. 107,086; Nov. 23.
Fabric, Knitted. J. Minoff. 107,177; Nov. 23.
Fabric or similar article, Textile. R. Dannecker. 107,167; Nov. 23.
Fabric, Textile. J. W. H. Brooks. 107,183; Nov. 23.
Fabric, Textile. E. M. Patterson. 107,198; Nov. 23.
Fabric, Textile. N. Tillman. 107,204; Nov. 23.
Fabric, Textile. M. Turpan. 107,205–6; Nov. 23.
File and pipe tamp, Combined nail. H. C. French. 107,147; Nov. 23.
Font of type. H. C. Gatchell and W. C. Hollister. 107,077; Nov. 23.
Game board. A. Schuster. 107,160; Nov. 23.
Goblet or similar article. A. J. Cunningham. 107,067; Nov. 23.
Handbag. S. R. Goldsmith. 107,150; Nov. 23.
Holder or similar article, Flower. H. J. Meyer. 107,176; Nov. 23.
Indicator or similar article, Temperature. R. T. Hedfield and H. Seegers. 107,079; Nov. 23.
Jar. W. E. Mackelfresh, Jr. 107,082; Nov. 23.
Jar. N. F. Steuer. 107,104; Nov. 23.
Nail, Decorative. B. Salzberg. 107,200; Nov. 23.
Opener, Can. J. R. Morgan. 107,090; Nov. 23.
Pedestal head and housing for hair waving machines, Combined. F. V. Schleimer. 107,156; Nov. 23.
Pendant. F. A. Biasi. 107,108; Nov. 23.
Plate, Entree. J. K. Johnson. 107,153; Nov. 23.
Plate or similar article. V. Broomhall. 107,064; Nov. 23.
Pot or similar article, Cooking. L. Guild. 107,078; Nov. 23.
Rack and lighting fixture units, Combined sectional luggage. A. L. Arenberg. 107,062; Nov. 23.
Rack for bread or similar article, Display. E. R. Erickson. 107,076; Nov. 23.
Rack or the like, Necktie. A. R. Brothers. 107,146; Nov. 23.
Radio receiving set and bed lamp, Combined. L. Tulauskas. 107,158; Nov. 23.
Rug. G. E. Mallinson. 107,083–5; Nov. 23.
Rug. G. E. Mallinson. 107,175; Nov. 23.
Shirt, Sport. H. S. Buffett. 107,184; Nov. 23.
Spoon or other similar article. M. Bernstein. 107,063; Nov. 23.
Stand, Display. J. G. Toomey. 107,179; Nov. 23.
Stick or similar article, Clothes. E. F. Thomas. 107,157; Nov. 23.
Store front. K. E. Bemis. 107,107; Nov. 23.
Strap, Lens. H. S. Taylor. 107,106; Nov. 23.
Suit, Bathing. M. Tunick. 107,208; Nov. 23.
Table, Dining. G. M. Jackson. 107,152; Nov. 23.
Tank body, Semitrailer. E. H. Gill. 107,149; Nov. 23.
Toy, Child's. C. E. Garton. 107,171; Nov. 23.
Trough or similar article, Lighting. L. L. Stewart. 107,105; Nov. 23.
Trunks, Knitted. L. Silberman. 107,103; Nov. 23.
Wallpaper or similar article. J. R. Morgan. 107,087–9; Nov. 23.
Wedge, Falling. J. H. Carter. 107,109; Nov. 23.
Wringer head. H. Witmer. 107,166; Nov. 23.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 23D DAY OF NOVEMBER, 1937

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Adjustable body support. O. D. Harris. 2,099,977; Nov. 23.
Adjustable seat. W. A. Parks. 2,100,170; Nov. 23.
Air circulating heater. C. R. Graham. 2,099,883; Nov. 23.
Air conditioning. N. J. Smith and J. C. Chambers. 2,100,110; Nov. 23.
Air conditioning apparatus. C. W. Elber and E. J. Gerondale. 2,100,072; Nov. 23.
Air conditioning means. L. W. Melcher. 2,099,747; Nov. 23.
Air conditioning system for cars. F. L. Murphy. 2,099,702; Nov. 23.
Aircraft. C. H. Havill. 2,099,808; Nov. 23.
Air duct. W. R. Seigle. 2,099,756; Nov. 23.
Alloys, Manufacture of metal. R. Perrin. 2,100,265; Nov. 23.
Ammeter, Thermocouple. J. H. Miller. 2,100,260; Nov. 23.
Amplifier with extra wide band pass characteristics, Linear. N. E. Lindenblad. 2,100,193; Nov. 23.
Anchor system and placing the same, Sea bottom. E. R. Armstrong. 2,100,231; Nov. 23.
Anesthetic tannate. R. Hopkinson and A. V. Tolstoouhov. 2,100,054; Nov. 23.
Anhydrides by the use of ketene, Preparation of. K. T. Steik and A. H. Gleason. 2,099,909; Nov. 23.
Annunciator, Automatic. L. J. Sing and R. M. Waunch. 2,099,868; Nov. 23.
Antenna system. G. B. Bairey. 2,099,671; Nov. 23.
Anthraquinonyl thiazoles. E. E. Beard. 2,099,672; Nov. 23.
Apparel and product thereof, Manufacturing wearing. C. C. Quenelle. 2,100,201; Nov. 23.
Arsenic compounds, Organic. C. S. Hamilton. 2,099,686; Nov. 23.
Article holder. M. P. Reese and C. A. Volf, Jr. 2,099,906; Nov. 23.
Articles, Manufacture of shaped. M. Hagedorn. 2,099,976; Nov. 23.
Articles with zinc, Coating metal. A. H. Williams. 2,100,179; Nov. 23.
Articles, Wrapping of block shaped. T. G. Jackson. 2,100,141; Nov. 23.
Ash tray. E. W. Ekstrand. 2,100,073; Nov. 23.
Ashtray and snuffer, Combined. E. C. Moulton. 2,100,263; Nov. 23.
Automatic chain lock. E. P. Beaumont. 2,100,233; Nov. 23.
Automobiles, Knee action and chassis suspension for. W. B. Gregory. 2,099,807; Nov. 23.
Bailer. E. F. Westall. 2,099,877; Nov. 23.
Bait, Casting. H. F. Khoenle. 2,100,289; Nov. 23.
Battery terminal post clamp. F. M. Reynolds. 2,100,268; Nov. 23.
Bearing: *See*—
  Vehicle bearing.
Bell, Electromagnetic. J. F. Ebert. 2,099,929; Nov. 23.
Belts in high-draft mechanisms, Guiding of the. F. Casablancas. 2,099,970; Nov. 23.
Bench and table structure, Collapsible. W. H. Lykins. 2,099,745; Nov. 23.
Bib: *See*—
  Rock or earth drill bib.
Bicycle. O. Mankki. 2,100,012; Nov. 23.
Binding device. C. E. Emmer. 2,099,881; Nov. 23.
Binding machine. H. F. Gibling. 2,100,004; Nov. 23.
Blade sharpening device. G. Barsch. 2,099,791; Nov. 23.
Blocks, Making concrete building. F. J. Straub. 2,099,946; Nov. 23.
Body of automobile vehicles. L. Saives. 2,099,867; Nov. 23.
Body treatments, Exterior. H. Lohr. 2,099,744; Nov. 23.
Boilers, Increasing the efficiency of. A. Mayer. 2,099,746; Nov. 23.
Boll cotton extracting machine, Self-contained. J. E. Mitchell. 2,100,301–2; Nov. 23.
Bomb protection apparatus. F. Feitosa. 2,100,211; Nov. 23.
Bore comparator, Optical. P. Klamp and R. Kiehl. 2,100,056; Nov. 23.
Bottles together for stacking purposes, such as in displays, Tying. A. A. Merrick. 2,100,035; Nov. 23.
Box: *See*—
  Safety switch box.
Box and amalgamation concentrator, Sluice. A. L. Moorhead. 2,100,262; Nov. 23.
Bracket: *See*—
  Leader bracket. Supporting bracket.
Brake. P. Rufino. 2,100,174; Nov. 23.
Brake control mechanism. E. G. Hill and J. X. Phillips. 2,100,053; Nov. 23.
Brake drum construction. A. S. Van Halteren. 2,099,833; Nov. 23.
Brake for baby carriages. J. Micahl. 2,100,036; Nov. 23.
Brake for trailers. A. C. Lindgren. 2,099,816; Nov. 23.
Breather for temperature rise alarm systems. F. M. Cowan. 2,100,184; Nov. 23.
Bristle for cleaning devices. F. Heldt. 2,100,138; Nov. 23.
Brushes, Making self-sterilizing. W. E. Hill and F. A. Parkhurst. 2,099,888; Nov. 23.
Buffing wheel. W. S. Thomas. 2,099,777; Nov. 23.
Building construction. C. C. Peck. 2,099,941; Nov. 23.
Building construction unit. R. W. McLaughlin, Jr. 2,099,961; Nov. 23.
Bushing for bearings and making the same, Porous. V. Curstädt. 2,100,159; Nov. 23.
Button. R. C. Bangs. 2,099,979; Nov. 23.
Button and clasp construction. J. Matsumoto. 2,100,106; Nov. 23.
Button backer. S. A. Harrison. 2,100,103; Nov. 23.
Cabinet assembly particularly adapted for use in molded radio cabinets, Composition panel. K. E. B. Stenberg. 2,100,226; Nov. 23.
Cabinet, Commodity display. E. D. Davis. 2,100,132; Nov. 23.
Cabinet table. E. C. Groves. 2,100,247; Nov. 23.
Calculating machine. H. C. Robinson. 2,099,754; Nov. 23.
Camera and projector, Cinematographic. C. E. Hillery-Collings. 2,100,000; Nov. 23.
Camera indexing mechanism. R. H. Draeger. 2,099,681; Nov. 23.
Can and valve mechanism, Weigh. H. D. Lathrop. 2,100,142; Nov. 23.
Car, Riot. V. L. Tunaya. 2,100,043; Nov. 23.
Carburetor. C. W. Spohr. 2,100,205; Nov. 23.
Card holder. C. E. Roche. 2,100,269; Nov. 23.
Casing wall construction for boilers. A. R. Smith. 2,099,829; Nov. 23.
Cellar pipe. J. T. Corley. 2,099,799; Nov. 23.
Cellulose derivatives, Manufacture of. R. P. Roberts and E. B. Johnson. 2,099,753; Nov. 23.
Cellulose compounds and of artificial materials thereof, Manufacture of new. L. Lilienfeld. 2,100,010; Nov. 23.
Chain jack. C. O. Nelson. 2,099,940; Nov. 23.
Chair. H. E. Bennett. 2,100,098; Nov. 23.
Cigar bunch trimmer. C. F. Röber. 2,100,108; Nov. 23.
Cigar, Forming a draft passage in the end of a. H. Prager. 2,099,963; Nov. 23.
Circuit breaker. L. W. Dyer and G. D. Gamel. 2,100,102; Nov. 23.
Circuit breaker control system. A. E. Henninger. 2,100,215; Nov. 23.
Circuit breaker with multiple breaks, Compressed fluid. A. Clerc. 2,100,182; Nov. 23.
Circuit, Differentially operated detection. J. J. Stephens. 2,100,206; Nov. 23.
Circuit, Electrical communication. S. Ballantine. 2,100,180; Nov. 23.
Circuits embodying negative impedance. H. Nyquist. 2,099,769; Nov. 23.
Circuits for open wire lines, Shielded. L. Espenschied and H. E. Curtis. 2,099,800; Nov. 23.
Clamp: *See*—
  Battery terminal post clamp.
Cleaner: *See*—
  Suction cleaner. Windshield cleaner.
Cleaning method and apparatus. G. W. Allen and J. S. Farwell. 2,100,286; Nov. 23.
Clip: *See*—
  Continuous column clip.
Clip for fastening roofing. B. C. Kridler. 2,100,254; Nov. 23.
Clock of small diameter, Power. T. V. Moore and W. C. Landry. 2,099,821; Nov. 23.
Closure and spout for containers, Detachable. R. H. Lehew. 2,100,167; Nov. 23.
Closure device. H. E. Rubens. 2,100,173; Nov. 23.
Coal mining machine. J. C. White. 2,100,178; Nov. 23.
Coating apparatus. M. J. Conklin. 2,100,068; Nov. 23.
Coating for tennis strings and the like, Protective. G. V. Heyl. 2,100,250; Nov. 23.
Coffee or the like, Treatment of. P. R. Simpson. 2,099,945; Nov. 23.
Coil body for field coils of electrodynamic loudspeakers. H. Benecke 2,099,997; Nov. 23.
Coil stripper. W. H. Blount. 2,100,046; Nov. 23.

Coin registering and calculating apparatus. U. Sundelin and K. A. T. Granzelius. 2,100,061; Nov. 23.
Collar, Horse. R. McCubbing. 2,099,860; Nov. 23.
Combine, Corn. R. Groves. 2,100,137; Nov. 23.
Composition of matter adapted for increasing the water-resistance of fibrous substances specifically paper products and making same. C. Ellis. 2,099,880; Nov. 23.
Compositions containing esters of formals. G. W. Seymour. 2,099,758; Nov. 23.
Compound feeder. P. D. Blanchard and C. R. Hardy. 2,099,836; Nov. 23.
Compressor. F. M. McCracken. 2,100,014; Nov. 23.
Compressor mechanism. W. A. Joplin. 2,099,934; Nov. 23.
Condensation products, Production of water-soluble. R. Alles. 2,099,717; Nov. 23.
Condenser unit, Electrolytic. R. U. Clark. 2,099,797; Nov. 23.
Confections, Device for making frozen. C. G. Hall. 2,100,031; Nov. 23.
Connecter: *See*—
  Electrical connecter. Pipe connecter.
  Gas line connecter.
Connecter for V-belts. W. P. Taber. 2,099,831; Nov. 23.
Container: *See*—
  Dispensing container.
Container. J. N. Cayo. 2,100,240; Nov. 23.
Container. I. Florman. 2,099,805; Nov. 23.
Container assembling machine. S. Bergstein. 2,100,022; Nov. 23.
Container filling apparatus. T. A. Standley. 2,100,039; Nov. 23.
Containers or parts thereof, Manufacturing. H. M. Kieckhefer. 2,099,936; Nov. 23.
Continuous column clip. D. H. Bitney. 2,099,951; Nov. 23.
Control device. W. H. Richards. 2,099,706; Nov. 23.
Control system. S. A. Morehouse. 2,100,059; Nov. 23.
Controller for a radio receiving set, Automatic. J. F. Dailey. 2,099,971; Nov. 23.
Conveyer mechanism. R. W. Irwin and C. M. Herz. 2,100,253; Nov. 23.
Cooking apparatus. B. Ames. 2,099,788; Nov. 23.
Cooling device for hot seals. E. F. Mertis. 2,099,700; Nov. 23.
Copper and aluminum or copper and magnesium, and making same, Composite body of. C. E. Larson. 2,100,258; Nov. 23.
Cord, Instrument. A. Robertson. 2,100,088; Nov. 23.
Cosmetic products. F. Sommer and M. Nassau. 2,100,090; Nov. 23.
Cotton cleaning and reclaiming machine. J. E. Mitchell. 2,100,300; Nov. 23.
Cotton cleaning and reclaiming machine. J. E. Mitchell. 2,100,303; Nov. 23.
Counter selecting and operating means. W. L. Paden. 2,100,107; Nov. 23.
Coupling: *See*—
  Hose coupling.
Coupling for power drive, Flexible. A. F. Grodhaus. 2,099,848; Nov. 23.
Coupling for radio volume control or the like, Flexible. G. J. Barry. 2,100,232; Nov. 23.
Cover: *See*—
  Tank cover. Tire cover.
Cover for conduit outlet boxes. D. B. Winter. 2,099,918; Nov. 23.
Coverall for ranges. W. D. Teague, Jr. 2,100,293; Nov. 23.
Covering, Wall. J. Tomec. 2,100,175; Nov. 23.
Culinary article. N. Bell. 2,100,021; Nov. 23.
Culinary device. R. W. Rotter. 2,100,271; Nov. 23.
Current controlling apparatus. H. E. Young. 2,099,714; Nov. 23.
Current system, Constant. H. E. Young. 2,099,715–16; Nov. 23.
Curtain fixture. C. A. Plaunt. 2,099,770; Nov. 23.
Curtain fixture, Adjustable window. A. C. Seibel. 2,099,707; Nov. 23.
Cushion filling machine, Adjustable. M. H. Lang. 2,099,897; Nov. 23.
Cushion, Pneumatic. H. C. Stanley and W. H. Smith. 2,099,870; Nov. 23.
Cut-out, Mecurial electric. F. T. Jenkins. 2,100,033; Nov. 23.
Cutting and winding machine. O. I. Judelshon. 2,100,079; Nov. 23.
Cylinder, Printing plate. H. A. W. Wood. 2,100,207; Nov. 23.
Dealkylation of alkyl-aryl ethers. J. M. Tinker and V. M. Weinmayr. 2,100,228; Nov. 23.
Decalcomania. F. W. Humphner. 2,100,140; Nov. 23.
Dehydrator. O. W. Randolph. 2,100,150; Nov. 23.
Delivery mechanism for printing machines. J. E. Meyer. 2,099,820; Nov. 23.
Delivery mechanism for use in delivering the products of printing machines in counted batches. C. G. Quick, D. A. Ball, and W. A. Whitehead. 2,100,016; Nov. 23.
Device for solving relative movement problems. R. Willson. 2,099,713; Nov. 23.
Diffuser. G. A. Marks. 2,099,767; Nov. 23.
Directional gyroscopic indicator. W. A. Reichel. 2,099,705; Nov. 23.
Discharge apparatus, Electric. E. F. Lowry. 2,100,195; Nov. 23.
Diseases, Apparatus and process for treatment of respiratory. D. D. Cook. 2,099,954; Nov. 23.
Dispenser control means. J. M. Gordon. 2,099,732; Nov. 23.
Dispensing apparatus. C. L. Gebauer and W. H. Brown. 2,099,847; Nov. 23.
Dispensing apparatus, Electrically actuated. M. Ferrer. 2,100,212; Nov. 23.
Dispensing container. J. R. Bedell. 2,100,096; Nov. 23.
Dispensing device. P. M. Chernoff. 2,099,839; Nov. 23.
Display device. H. Harrison. 2,100,077; Nov. 23.
Display device. W. Reed. 2,100,223; Nov. 23.
Display sign. F. Stonebraker, Sr. 2,100,111; Nov. 23.
Distributor valve. B. N. Ashton. 2,100,154; Nov. 23.
Door lock. S. Bubes. 2,100,237; Nov. 23.
Dough preparation, Apparatus for. E. J. Lauterbur. 2,099,937; Nov. 23.
Doughnut forming machine. F. Maier. 2,099,900; Nov. 23.
Drafts to cotton slivers, Apparatus for giving. K. Honda. 2,100,139; Nov. 23.
Drill: *See*—
  Rotary core drill.
Drive, Hydraulic. R. Lapsley. 2,100,191; Nov. 23.
Driving mechanism. R. P. Lansing. 2,099,813; Nov. 23.
Driving mechanism. R. M. Nardone. 2,099,768; Nov. 23.
Electric apparatus, Controlling. E. G. Touceda. 2,099,764; Nov. 23.
Electric attachment plug. A. W. Muller. 2,099,986; Nov. 23.
Electric generator. S. G. Dawlen and E. E. W. Anderson. 2,099,972; Nov. 23.
Electric lamp support. R. H. Cunningham. 2,100,241; Nov. 23.
Electrical connecter. J. J. Hardy, Jr. 2,100,009; Nov. 23.
Electrical connecter. E. E. Saxton. 2,099,944; Nov. 23.
Electrical connecting means. H. A. Douglas. 2,100,025; Nov. 23.
Electrical duct feed. M. M. Clayton. 2,100,100; Nov. 23.
Electrical machine inserted in a series network and operating at an adjustable constant speed. J. M. Pestarini. 2,100,171; Nov. 23.
Electricity meter. F. Kurz. 2,099,854; Nov. 23.
Electrolytic apparatus for preparing chemical solutions. R. B. Everson. 2,099,801; Nov. 23.
Electron discharge device. E. F. Lowry. 2,100,196; Nov. 23.
Electron discharge device. C. F. Miller. 2,100,308; Nov. 23.
Electron tube. R. T. Orth. 2,099,749; Nov. 23.
Electron tube. J. T. Wilson. 2,099,994; Nov. 23.
Electrostethograph. M. L. Lockhart. 2,099,938; Nov. 23.
Elevator control system. H. Waters, A. W. Paulson, and M. Troster, Jr. 2,100,176; Nov. 23.
Elevator system. H. Waters, A. W. Paulson, and M. Troster, Jr. 2,100,177; Nov. 23.
Enameling furnace. J. L. McFarland. 2,100,222; Nov. 23.
Engine: *See*—
  Internal combustion engine. Rotary combustion engine.
Engine intake system. A. V. D. Willgoos. 2,099,785; Nov. 23.
Engine starting mechanism. M. J. Finnegan. 2,099,804; Nov. 23.
Escapement device on paper carriages for typewriters. F. Eibert. 2,100,071; Nov. 23.
Esters of formals and preparing them. G. W. Seymour. 2,099,757; Nov. 23.
Ether, Means and compositions for the stabilization of divinyl. R. T. Major and W. L. Ruigh. 2,099,695; Nov. 23.
Extensometer, Indicating. A. B. Kinzell. 2,099,896; Nov. 23.
Extracting and discharging mechanism, Centrifugal. E. L. Miller. 2,099,863; Nov. 23.
Extractor-cleaner machine. J. E. Mitchell. 2,100,198; Nov. 23.
Extractor-cleaner reclaiming machine. J. E. Mitchell. 2,100,199; Nov. 23.
Eyeglass frame. P. Mertens. 2,099,748; Nov. 23.
Fabric, Apparatus for weaving terry. M. Van de Gasteele. 2,099,780; Nov. 23.
Facsimile system. H. Shore. 2,100,204; Nov. 23.
Fan assembly, Combined circulating and ventilating. M. P. Youker. 2,100,152; Nov. 23.

Picture projecting device. C. L. Stephens. 2,100,008; Nov. 23.
Picture system, Sound. E. R. Morton. 2,099,865; Nov. 23.
Pictures, Production of tanned. R. Zahn. 2,100,063; Nov. 23.
Pipe: *See*—
Cellar pipe. Tobacco pipe.
Smoking pipe.
Pipe cleaning tool, 90° bend, flexible. A. J. Carver. 2,099,723; Nov. 23.
Pipe connecter. G. Lundquist. 2,099,984; Nov. 23.
Pipe joint. J. A. Byers. 2,099,722; Nov. 23.
Piston. W. L. Schoengarth. 2,100,203; Nov. 23.
Plaster base. A. V. Spinosa. 2,099,709; Nov. 23.
Plate casting machine, Stereotype. F. A. Foster. 2,100,003; Nov. 23.
Playing racket. H. W. Hall. 2,099,735; Nov. 23.
Plug: *See*—
Electric attachment plug.
Plug adapter, Electric cord. L. J. Wahl. 2,100,094; Nov. 23.
Plug or cork for delivering doses. R. Schubenel. 2,100,038; Nov. 23.
Pneumatic control for a drilling rig, Distant. M. A. Capellushnicoff and S. L. Zalkin. 2,100,131; Nov. 23.
Point, Well. T. F. Moore. 2,100,145; Nov. 23.
Popgun barrel, Forming a. J. Gora. 2,099,806; Nov. 23.
Popper, Corn. H. L. Thompson. 2,099,911; Nov. 23.
Pouch. W. E. Baxter. 2,100,298; Nov. 23.
Power transmission mechanism, Automatically variable. H. F. Hobbs. 2,100,251; Nov. 23.
Precooling apparatus. J. R. Lewis, S. Perkins, and F. J. Lewis. 2,099,815; Nov. 23.

Preparations containing the active constituents of vegetable products, Production of. G. Madaus. 2,100,081; Nov. 23.
Press: *See*—
Offset press.
Printed matter and registering type, Lining up. J. P. Walsh. 2,100,114; Nov. 23.
Printer's gauge. H. F. Johnson. 2,100,217; Nov. 23.
Printing and drying, Apparatus for. C. E. Wooddell. 2,099,879; Nov. 23.
Printing, Color corrected. W. J. Wilkinson. 2,099,916; Nov. 23.
Printing mechanism. M. Garbell. 2,100,213; Nov. 23.
Printing or reproducing color photographs. G. B. Harrison and S. D. Threadgold. 2,100,006; Nov. 23.
Prints and the like, Apparatus for mounting. B. R. Dutcher. 2,099,845; Nov. 23.
Products impermeable to moisture, Manufacture of shaped. W. König. 2,099,812; Nov. 23.
Psoriasis, Treatment of. M. A. Marcus. 2,099,696; Nov. 23.
Pulverizing apparatus. L. V. Andrews. 2,100,020; Nov. 23.
Pump. W. L. Church. 2,099,840; Nov. 23.
Pyorrhea, Method and apparatus for treating. G. F. Webb. 2,100,116; Nov. 23.
Rack: *See*—
Luggage rack.
Radio broadcasting system. J. L. Wright. 2,099,787; Nov. 23.
Rail flaw detector mechanism. W. M. Perry. 2,099,823; Nov. 23.
Rail-retaining device. R. T. Woodings. 2,099,786; Nov. 23.
Recorder: *See*—
Scratch recorder.
Recording the work performed by welders. R. Sarazin. 2,099,965; Nov. 23.
Refrigerator structure. H. W. Blake. 2,099,793; Nov. 23.
Refrigerating apparatus. E. L. Horlacher. 2,100,288; Nov. 23.
Registering and displaying apparatus particularly applicable to totalizators. J. Handley. 2,100,164; Nov. 23.
Remote feed for liquid fuel. A. H. Klesa. 2,099,742; Nov. 23.
Ribbon feed mechanism, Time stamp. J. W. Faris. 2,100,027; Nov. 23.
Rings, Making piston. F. W. Wilkening. 2,099,712; Nov. 23.
Rivet. E. W. Curtis. 2,099,678; Nov. 23.
Road machine. C. A. Gustafson. 2,100,005; Nov. 23.
Rock or earth drill bit. J. P. Cunningham. 2,099,677; Nov. 23.
Roofing, Sheet metal. V. T. Renner. 2,099,752; Nov. 23.
Rotary combustion engine. W. H. Potthast. 2,100,267; Nov. 23.
Rotary core drill, Collapsible. G. A. Macready. 2,099,859; Nov. 23.
Rotary game table. O. Goldberger. 2,100,280; Nov. 23.
Rubber product and making the same, Porous. J. R. Gammeter. 2,100,029; Nov. 23.
Rubber, Production of vulcanized. H. O. Newman. 2,100,085; Nov. 23.
Rule and alignment tester, Combined adjustable straight-edge. D. H. Wieslander. 2,099,784; Nov. 23.
Sack holder. M. Brown. 2,100,235; Nov. 23.
Safety switch box. W. F. Sutherlin. 2,099,761; Nov. 23.
Salts of phthalocyanine-sulphonic acids, Water-insoluble metal. K. Holzach and G. Niemann. 2,099,689; Nov. 23.
Salts of phthalocyanine-sulphonic acids, Water insoluble. K. Holzach and G. Niemann. 2,099,690; Nov. 23.
Sampling valve. G. F. McDougall. 2,099,939; Nov. 23.
Saucer for cups. H. Klayf. 2,099,741; Nov. 23.
Saw handle, Crosscut. D. J. E. Smith. 2,099,966; Nov. 23.
Scale, Fluid transmission. C. R. Edwards. 2,099,955; Nov. 23.
Scanning device. M. M. Stern. 2,099,872; Nov. 23.
Scratch recorder. A. V. de Forest. 2,099,725; Nov. 23.
Screw propeller. E. L. Bellman. 2,099,922; Nov. 23.
Seal, Shaft. R. E. King. 2,100,220; Nov. 23.
Seat: *See*—
Adjustable seat. Swing seat.
Securing device. J. H. Van Uum. 2,100,017; Nov. 23.
Seismic reflection method. L. W. Blau. 2,099,837; Nov. 23.
Selvage forming device. G. H. McRae. 2,100,197; Nov. 23.
Separator: *See*—
Locomotive steam separator.
Separator for incinerators, Gas. G. J. Irsch. 2,100,189; Nov. 23.
Sewing machine. R. W. Johnson, C. I. Loverch, and M. Znum. 2,100,166; Nov. 23.
Shaft and manufacture, Hollow metal. W. W. McMinn. 2,100,307; Nov. 23.
Shaker, Cocktail. J. M. Riegel. 2,100,172; Nov. 23.
Shaver, Electric dry. I. Florman. 2,100,135; Nov. 23.
Shield, Auxiliary glare. F. C. Doody. 2,100,243; Nov. 23.
Shockproof attachment for dial indicators. A. H. Emery. 2,099,930; Nov. 23.
Shoe machine. A. F. Bancroft. 2,099,995; Nov. 23.
Shoes, Making. W. I. Duga and A. H. McNalley. 2,099,974; Nov. 23.
Shovel, Cultivator. H. Chibnik. 2,099,796; Nov. 23.
Showcase and sham construction. L. W. Kennedy. 2,099,935; Nov. 23.
Shower, Tub. C. H. Hagopian. 2,100,186; Nov. 23.
Sign: *See*—
Display sign. Street sign.
Signal: *See*—
Traffic signal.
Signal for automobiles. A. C. and W. Lee. 2,100,105; Nov. 23.
Signal for loaded guns, Safety. M. Skandera. 2,100,273; Nov. 23.
Signaling system for railroads. S. N. Wight. 2,100,295; Nov. 23.
Silencer. L. Haas. 2,100,030; Nov. 23.
Sinker for knitting machines. E. R. Piercy. 2,100,060; Nov. 23.
Ski plane. L. Gelbman. 2,099,731; Nov. 23.
Skip for concrete mixers. J. E. Van Orden. 2,100,229; Nov. 23.
Smoking pipe. J. Torres. 2,100,093; Nov. 23.
Smoking tube. E. Bruder. 2,099,925–6; Nov. 23.
Soap from marine oils, Manufacture of. S. Schmidt-Nielsen and A. Flood. 2,100,146; Nov. 23.
Soap, Manufacturing. K. Braun and H. Plauson. 2,100,047; Nov. 23.
Spark plug core. A. J. Hopkins. 2,099,737; Nov. 23.
Speed limit indicator, Adjustable. E. J. Graham. 2,100,214; Nov. 23.
Spraying device. E. O. Norris. 2,099,988; Nov. 23.
Spring: *See*—
Valve spring.
Spring shackle. A. N. Porter. 2,099,942; Nov. 23.
Spring trailer, Coil. L. Sterling. 2,100,040; Nov. 23.
Spirits, Manufacture of distilled. F. E. Miller. 2,099,864; Nov. 23.
Static limiting device. D. G. McCaa. 2,099,818; Nov. 23.
Steam generator. W. R. Irwin. 2,099,851; Nov. 23.
Steering wheel. H. Oehmen. 2,100,147; Nov. 23.
Stocking. J. Underwood and S. Mack. 2,099,948; Nov. 23.
Stoker, Mechanical. J. A. Hoffman. 2,100,252; Nov. 23.
Stool to be used in the casting of metal. C. H. Aldrich. 2,099,670; Nov. 23.
Strand handling apparatus. L. L. Weaver. 2,099,876; Nov. 23.
Strand winding machine. W. E. Mahoney. 2,099,985; Nov. 23.
Straw dispensing machine. D. Miller. 2,099,862; Nov. 23.
Street sign. B. H. Ernst. 2,099,882; Nov. 23.
Studding shoe. A. H. Bleuel. 2,100,209; Nov. 23.
Suction cleaner. D. G. Smellie. 2,100,089; Nov. 23.
Suit, Bathing. A. M. Hansen. 2,099,885; Nov. 23.
Sulphides and their production, Solubilized higher aliphatic. A. W. Baldwin and H. A. Piggott. 2,100,297; Nov. 23.
Support: *See*—
Adjustable body support. Light support.
Electric lamp support. Undergarment support.
Support for radio tubes and the like, Filament. H. J. McCarthy. 2,100,306; Nov. 23.
Supporting bracket, Venetian blind. F. J. Burns. 2,099,953; Nov. 23.
Swab. H. H. Chandler. 2,100,157; Nov. 23.
Swatter, Fly. L. D. Hokerk. 2,100,032; Nov. 23.
Swellable substance and making same from waxes, Voluminously. H. Cohn and C. Siebert. 2,100,067; Nov. 23.
Swing seat. W. B. Evans, F. C. Garratt, Jr., and E. F. Hoppes. 2,100,002; Nov. 23.
Switch machine for railroads. S. N. Wight. 2,100,296; Nov. 23.
Switchgear, Electrical. G. E. Whitehead. 2,100,230; Nov. 23.
Swivel and feed for rotary well drilling, Suspension hydraulic. G. R. Tremolada. 2,099,779; Nov. 23.
Table: *See*—
Cabinet table. Rotary game table.
Tacking strip. O. Thiel. 2,099,910; Nov. 23.
Tampon. C. A. Fourness. 2,099,931; Nov. 23.
Tank cover, Water. C. C. Isaacson. 2,099,932; Nov. 32.
Target. M. G. Rosengarten. 2,099,908; Nov. 23.
Teapot. L. Beling. 2,099,996; Nov. 23.
Telegraph system, Printing. W. T. Rea. 2,099,771; Nov. 23.
Telephone receiver. A. A. Duncan. 2,099,727; Nov. 23.
Telephone signaling apparatus, Automatic. J. E. Tuscher and M. Spiro. 2,099,913; Nov. 23.
Telepicture translating mechanism. W. G. H. Finch. 2,100,161; Nov. 23.
Television. J. D. McGee. 2,100,259; Nov. 23.
Television. G. W. Walton. 2,100,044; Nov. 23.
Television system. R. H. George and H. J. Helm. 2,100,279; Nov. 23.
Television system. H. E. Ives. 2,099,889; Nov. 23.
Television transmission, Method and apparatus for. H. A. Iams. 2,099,980; Nov. 23.

Temperature control apparatus. H. E. Hartig. 2,099,687; Nov. 23.
Temperature, Controlling superheat. G. P. Jackson. 2,100,190; Nov. 23.
Temperature modifier, Motor vehicle. H. Hueber and E. C. Horton. 2,100,281; Nov. 23.
Temperature rise alarms, Method and apparatus for initiating. F. M. Cowan. 2,100,183; Nov. 23.
Tetraalkyl thiuram monosulphides, Preparation of. N. C. Somers. 2,099,773; Nov. 23.
Textile printing process and printing paste therefor. E. Weiss. 2,099,782; Nov. 23.
Textiles, Finishing. H. D. F. von der Horst, F. Muenz, and A. Vogt. 2,099,765; Nov. 23.
Therapeutic product and making same. E. A. Sharp. 2,099,708; Nov. 23.
Thermal insulation. H. A. Kieselbach. 2,099,740; Nov. 23.
Thermometer. R. T. Hedfield and H. Seegers. 2,099,899; Nov. 23.
Thermostat. H. Sandvoss. 2,100,037; Nov. 23.
Thread cutting chaser. A. F. Breitenstein. 2,099,721; Nov. 23.
Time control system. J. P. Kriechbaum. 2,100,284; Nov. 23.
Time measuring mechanism. E. Spahn. 2,099,759; Nov. 23.
Tire cover, Metal. H. W. Tinker. 2,099,763; Nov. 23.
Tire rim, Demountable. A. Kendzierski. 2,099,895; Nov. 23.
Tire tread, Pneumatic. G. K. McNeill. 2,100,084; Nov. 23.
Tobacco pipe. R. F. Hallstein. 2,100,248; Nov. 23.
Tool: *See*—
Pipe cleaning tool.
Weeding and cultivating tool.
Tools, Orienting device for well. L. F. Bonney and R. B. Moran. 2,099,794; Nov. 23.
Tooth brush and making the same. W. E. Hill and C. L. McArthur. 2,099,688; Nov. 23.
Tooth brush, Electric reversible. G. R. Sawyer. 2,100,272; Nov. 23.
Top, Dispensing bottle. N. S. Martin. 2,100,083; Nov. 23.

Vending machine. P. C. Hughes. 2,100,216; Nov. 23.
Ventilating device for cars and the like. N. L. Willer. 2,099,917; Nov. 23.
Vessels, more particularly lamps, Evacuating. C. Trenzen. 2,099,874; Nov. 23.
Washer placing machine. W. H. Patten. 2,100,015; Nov. 23.
Washing apparatus. T. Krumm. 2,099,692; Nov. 23.
Water (back water) from paper, cellulose, and wood pulp factories, etc., Method and arrangement for filtering waste. O. Qviller. 2,100,149; Nov. 23.
Water closet. C. J. Weaver. 2,099,875; Nov. 23.
Water softener. E. C. Kroeger. 2,099,743; Nov. 23.
Water system, Domestic. W. H. Ryan. 2,100,109; Nov. 23.
Wax, Manufacture of black. A. D. David. 2,100,070; Nov. 23.
Wax mixtures, Treatment of. S. W. Ferris, W. F. Houghton, and H. C. Cowles, Jr. 2,099,683; Nov. 23.
Weatherproofing fastener. H. Rosenberg. 2,099,990; Nov. 23.
Weeding and cultivating tool. J. C. Kofoed. 2,100,221; Nov. 23.
Wheel: *See*—
Buffing wheel. Steering wheel.
Front wheel.
Wheel and axle assembly. A. H. Oelkers. 2,099,822; Nov. 23.
Window construction. F. J. Plym. 2,099,751; Nov. 23.
Windshield cleaner. E. Hansmann. 2,100,188; Nov. 23.
Windshield defroster blade. A. R. Wilson. 2,100,019; Nov. 23.
Windshield for ladder truck trailers, Tillerman's. P. Pirsch. 2,099,905; Nov. 23.
Wire cloth, Method and machine for producing brazed seams in. N. W. Webb. 2,100,294; Nov. 23.
Wrench: *See*—
Line tap stick wrench.
Wrench. R. B. Johnson. 2,099,960; Nov. 23.
Wrench. C. H. Leonard. 2,100,034; Nov. 23.
Wringer release and reset mechanism. N. L. Etten. 2,100,074; Nov. 23.
Yarn and preparing same, Spun. L. W. Weinberg. 2,099,766; Nov. 23.
Zinc and aluminum, Making composite bodies of. C. E. Larson. 2,100,255–6; Nov. 23.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 23, 1937

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number—class, second number—subclass, third number—patent number

1— 10: 2,100,282

Santore, Carolyn, M., New York, N. Y. Dress. 107,304; Nov. 30.
Schaefer, Henry G., Lakewood, Ohio. Combined automobile and trailer. 107,266; Nov. 30.
Scranton Lace Company, The. (See Erhard, Gustave F., assignor.)
Sears, Roebuck and Co. (See Morgan, John R., assignor.)
Sohmer, Jacob, New York, N. Y. Dress. 107,305; Nov. 30.
Sohmer, Jacob, New York, N. Y. Dress. 107,306; Nov. 30.
Stark, Abraham, Brooklyn, N. Y. Button. 107,267; Nov. 30.
Stevens, Clifford B., assignor to William Woods Plankinton, Milwaukee, Wis. Automobile. 107,268; Nov. 30.
Stinson, Zetta, Hammon, Okla. Combined hair comb and curler. 107,283; Nov. 30.
Stirratt, Charles T., Duluth, Minn. Mattress. 107,269; Nov. 30.
Suhadolc, Hamell J., Hoboken, N. J. Combination comb and manicuring implement. 107,284; Nov. 30.
Thomas, Adolph A., New York, N. Y. Tire. 107,285; Nov. 30.
Thomas, Adolph A., New York, N. Y. Tire. 107,286; Nov. 30.
Thomas, Adolph A., New York, N. Y. Tire. 107,287; Nov. 30.
Tilley, Melvin M., San Rafael, assignor to H. C. Little Burner Co., Inc., Rafael, Calif. Air heater unit. 107,270; Nov. 30.
Vavrik, Louis, Rossford, assignor to The Hettrick Manufacturing Company, Toledo, Ohio. Rocking chair. 107,271; Nov. 30.
Vavrik, Louis, Rossford, assignor to The Hettrick Manufacturing Company, Toledo, Ohio. Glider frame. 107,272; Nov. 30.
Vavrik, Louis, Rossford, assignor to The Hettrick Manufacturing Company, Toledo, Ohio. Canopy. 107,273; Nov. 30.
Victor Adding Machine Company. (See Garbell, Max, assignor.)
Whitehouse Fabrics, Inc. (See Ericson, Emile, assignor.)
Wood, Orville T., assignor to Blake Manufacturing Corporation, Clinton, Mass. Flashlight. 107,274; Nov. 30.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 30TH DAY OF NOVEMBER, 1937

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abegg, Walter A., Los Angeles, assignor to Globe Oil Tools Company, Los Nietos, Calif. Reamer. 2,100,621; Nov. 30.
Abegg, Walter A., Los Angeles, assignor to Globe Oil Tools Company, Los Nietos, Calif. Well reamer. 2,100,892; Nov. 30.
Ackroyd, James, and Sons. (See Kellogg, Alfred A., assignor.)
Adams, George R., Los Angeles, Calif. Surface bolt. 2,100,622; Nov. 30.
Agfa Ansco Corporation. (See Heymer, Gerd, assignor.)
Aiken, Walter S., assignor to The Clark-Aiken Company, Lee, Mass. Paper cutting apparatus. 2,100,930; Nov. 30.
Air Controls, Inc. (See Friedman, Arthur, assignor.)
Air Reduction Company. (See Deming, George M., assignor.)
Aktiebolaget Svenska Kullagerfabriken. (See Palmgren, Nils A., assignor.)
Albert, Herman, et al. (See Bates, George A., assignor.)
Alco Valve Company. (See Sparks, Robert L., assignor.)
Allied Engineering Company. (See Grange, E. A., and Schmidt, assignors.)
Allis-Chalmers Manufacturing Company. (See Stivender, Edward H., assignor.)
Almen, John O., Royal Oak, and H. J. Kirschner, Detroit, assignors to General Motors Corporation, Detroit, Mich. Friction clutch. 2,100,464; Nov. 30.
Altheide, Harry F., Chicago, Ill., assignor to The Barrett Company, New York, N. Y. Surface covering. 2,100,830; Nov. 30.
Alvistur, Oscar, San Francisco, Calif. Toy. 2,100,931; Nov. 30.
American Agricultural Chemical Company, The. (See Fischer, Samuel, assignor.)
American Can Company. (See Lindgren, Henry W., assignor.)
American Car & Foundry Company. (See Bradfield, George K., Jr., assignor.)
American Car and Foundry Company. (See Johnson, W. V., and Kepner, assignors.)
American Car and Foundry Company. (See Martin, L. W., and Lehmann, assignors.)
American Centrifugal Corporation. (See Pecker, Joseph S., assignor.)
American Engineering Company. (See Harrison, Clifford E., assignor.)
American Enka Corporation. (See Jansen, Cornelis G., assignor.)
American Enka Corporation. (See Weeldenburg, Johannes C., assignor.)
American Machine & Foundry Company. (See Fincke, Donald M., assignor.)
American Ore Reclamation Company. (See Shallock, Edward W., assignor.)
Amity Leather Products Co. (See Welch, Herman B., assignor.)
Amyot, Louis J. A., Quebec, Quebec, Canada. Brassière and foundation garment. 2,100,932; Nov. 30.
Anderson, Arvid E., Drexel Hill, Pa., assignor to General Electric Company. Automatic reclosing circuit breaker. 2,100,893; Nov. 30.
Anderson, Edward C., assignor to Illinois Watch Case Company, Elgin, Ill. Lipstick container. 2,100,999; Nov. 30.
Anderson, Frank E., Inglewood, assignor to Boyle Manufacturing Company, Inc., Los Angeles, Calif. Canteen. 2,100,894; Nov. 30.
Andler, Robert F., Rutherford, assignor to Electrol Incorporated, Clifton, N. J. Mechanical advertising device. 2,100,690; Nov. 30.
Angelus, Louis, New York, and D. L. Baylis, Bellerose; said Baylis assignor to said Angelus. Dry cleaning apparatus and fluid circulating system therefor. 2,101,014; Nov. 30.
Arquint, Hans, Sursee, Switzerland. Safety gas-burner. 2,100,681; Nov. 30.
Ashjian, A. Ted, et al. (See Wohlfarth, Walter W., assignor.)
Askania-Werke A. G. vormals Central Werkstatt Dessau und Carl Bamberg-Friedenau. (See Rheinlander, Paul, assignor.)
Askania-Werke A. G. vormals Centralwerkstatt-Dessau und Carl Bamberg-Friedenau. (See Wünsch, Guido, assignor.)
Associated Electric Laboratories, Inc. (See Campbell, R. D., and Huebert, assignors.)
Associated Electric Laboratories, Inc. (See Richardson, Rodney G., assignor.)
Associated Electric Laboratories, Inc. (See Saunders, N. H., and Bakker, assignors.)
Associated Electric Laboratories, Inc. (See Sengebusch, Hans, assignor.)
Associated Electric Laboratories, Inc. (See White, Thomas U., assignor.)
Associated Electric Laboratories, Inc. (See Woodruff, A. E., and Sengebusch, assignors.)
Austin, Harold R., South Norwalk, Conn., assignor to The M. W. Kellogg Co., New York, N. Y. Lining for vessels. 2,100,895; Nov. 30.
Autocar Company, The. (See Bachman, Benjamin B., assignor.)
Automatic Signal Corporation. (See Barker, John L., assignor.)
Automobile Ventilation, Inc. (See Young, Leonard A., assignor.)
Automotive Maintenance Machinery Co. (See Zimmerman, Herman W., assignor.)
Babcock & Wilcox Company, The. (See Hardgrove, Ralph M., assignor.)
Bachelder, Le Roy B., Dayton, Ohio. Wall or floor structure and securing means. 2,100,424; Nov. 30.
Bachman, Benjamin B., Philadelphia, assignor to The Autocar Company, Ardmore, Pa. Motor vehicle construction. 2,100,371; Nov. 30.
Baer, Abram K., assignor to The Strouse Baer Company, Baltimore, Md. Outer garment. 2,100,933; Nov. 30.
Baird, Elmer G., et al. (See Bowe, Charles F., assignor.)
Baker, Charles E., Wethersfield, Conn. Variable speed transmission unit. 2,100,465; Nov. 30.
Baker, Rest R., Swissvale, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. System of control for dynamo-electric machines. 2,100,761; Nov. 30.
Bakker, Pier. (See Saunders, N. H., and Bakker.)
Balduf, Bruno E., assignor to United States Gypsum Company, Chicago, Ill. Building construction. 2,101,001; Nov. 30.
Ball Brothers Company. (See Wadsworth, Frank L. O., assignor.)
Barker, John L., White Plains, N. Y., assignor to Automatic Signal Corporation, East Norwalk, Conn. Traffic control system. 2,100,831; Nov. 30.
Barna, Joseph W., Chicago, Ill. Manufacture of shoes. 2,100,794; Nov. 30.
Barrett Company, The. (See Altheide, Harry F., assignor.)
Barton, Armand, Chicago, Ill. Moving toy. 2,100,372; Nov. 30.
Bashford, Frederick G. C., and W. P. McLaren, Montreal, Quebec, Canada. Promoting combustion in internal combustion engines. 2,100,466; Nov. 30.
Bates, George A., assignor of forty per cent to C. V. Lally and twenty per cent to H. Albert, Cambridge, Mass. Decoy. 2,100,623; Nov. 30.
Baumgarten, Harold A., Loganville, Wis. Door controlling mechanism. 2,100,795; Nov. 30.
Baxter, William C. (See De Puy, C. T., and Baxter.)
Baylis, Daniel L. (See Angelus, L., and Baylis.)
Beardsley, Bruce, Brooklyn, N. Y., and M. V. Creedon, Westfield, N. J., assignors to The Western Union Telegraph Company, New York, N. Y. Belt conveyer. 2,100,585; Nov. 30.
Beatrice Creamery Company. (See Drake, Ronald I., assignor.)
Beck, Vernon S., St. Louis, Mo. Heating apparatus. 2,100,373; Nov. 30.
Beck, Vernon S., St. Louis, Mo. Heater. 2,100,772; Nov. 30.
Becker, Joseph, Pittsburgh, Pa., assignor, by mesne assignments, to Koppers Company, Coking retort oven. 2,100,762; Nov. 30.
Beckwith, Charles J., Brooklyn, N. Y., assignor to Keasbey & Mattison Company, Ambler, Pa. Insulating construction. 2,100,624; Nov. 30.
Beers, Royce L., Birmingham, assignor to Detroit Stoker Company, Monroe, Mich. Cinder and ash remover. 2,100,682; Nov. 30.
Behnke, Bertram C., Chicago, Ill. Cotter pin. 2,100,896; Nov. 30.
Bell Telephone Laboratories, Incorporated. (See Blair, Royer R., assignor.)
Bell Telephone Laboratories, Incorporated. (See Goff, Harold W., assignor.)
Bell Telephone Laboratories, Incorporated. (See Heising, Raymond A., assignor.)
Bell Telephone Laboratories, Incorporated, et al. (See Mason, W. P., assignor, Stanton, and Tweeddale.)

Bell Telephone Laboratories, Incorporated. (See Scott, Herbert J., assignor.)
Bell Telephone Laboratories, Incorporated. (See von der Linden, Ernst, assignor.)
Bell Telephone Laboratories, Incorporated. (See Ward, Frank E., assignor.)
Bender, Robert C., Davenport, Iowa. Returnable shipping container. 2,100,309; Nov. 30.
Bennett, Albert E., Green Cove Springs, Fla. Bag holder. 2,100,501; Nov. 30.
Bennett, Maurice D., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Locking system. 2,100,897; Nov. 30.
Bent, Franklin A., and S. N. Wik, Berkeley, and W. Ponig, assignors to Shell Development Company, San Francisco, Calif. Lacquer solvent and thinner. 2,100,425; Nov. 30.
Berger, Arthur F., and M. Voege, assignors to The Master Electric Company, Dayton, Ohio. Electric series-parallel switch. 2,100,426; Nov. 30.
Berges, Donald M., Bloomfield, assignor to Eclipse Aviation Corporation, East Orange, N. J. Aircraft. 2,100,934; Nov. 30.
Behrman, John W., Lincoln Park, and R. L. Robiolio, assignors of forty per cent to Federal Industrial Corporation, Paterson, and sixty per cent to C. W. Brooks, Montclair, N. J. Fuel injector pump. 2,100,318; Nov. 30.
Bernett, Willis J., Kansas City, Mo. Lung exercising toy. 2,100,898; Nov. 30.
Betts, John R., Kearney, Nebr. Power take-off. 2,100,310; Nov. 30.
Bhatnagar, Shanti S., Lahore, India, assignor to Steel Brothers & Company Limited, London, England. Refining of mineral oils. 2,100,707; Nov. 30.
Bierwirth, Edwin A., assignor to Kelsey-Hayes Wheel Company, Detroit, Mich. Die construction. 2,100,683; Nov. 30.
Biever, Edmund J., Kohler, Wis. Filtering assembly for respirators. 2,100,374; Nov. 30.
Birr, Rudolph G., Lombard, and A. C. Grunwald, River Forest, Ill., assignors to Steiner Sales Company, Salt Lake City, Utah. Towel dispensing apparatus. 2,100,729; Nov. 30.
Bixby, Walter. (See Hathaway, E. F., and Bixby.)
Black, Crayton K. (See Carr, J. L., and Black.)
Black, Frank, Christmas, Ariz. Animal clamp. 2,100,730; Nov. 30.
Black, Harold G., assignor to Proctor & Schwartz, Incorporated, Philadelphia, Pa. Air baffle for rayon cake driers. 2,100,935; Nov. 30.
Blackhawk Mfg. Co. (See Mandl, S., and Pfauser, assignors.)
Blair, Royer R., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Gain control. 2,100,375; Nov. 30.
Blakley, Vincent A., and A. N. Lindenmuth, Allentown, Pa. Shoulder strap device. 2,100,708; Nov. 30.
Blaw-Knox Company. (See Chandler, Willard P., Jr., assignor.)
Blocker, Samuel J., Dallas, Tex. Automatic glare shield. 2,100,427; Nov. 30.
Boden, Samuel H. (See Schofield, S. T., and Boden.)
Boeye, Paul F., assignor to Waldorf Paper Products Company, St. Paul, Minn. Container. 2,100,773; Nov. 30.
Boggs, Wilber S., Las Animas, Colo. Moving picture machine. 2,100,535; Nov. 30.
Bold, John W. (See Ryan, W. M., and Bold.)
Bond, Albert J., assignor of forty-nine per cent to L. H. Henry, Mercedes, Tex. Fishing rod and reel. 2,100,428; Nov. 30.
Bonn, Henry H., Jr., Milwaukee, Wis. Speed changing device. 2,100,936; Nov. 30.
Boothroyd, Hubert. (See Clarke, T. B., and Boothroyd.)
Borden, Perry A., assignor to The Bristol Company, Waterbury, Conn. Telemetering system. 2,100,467; Nov. 30.
Borg-Warner Corporation. (See Fawick, Thomas L., assignor.)
Bourne, Roland B., assignor to The Maxim Silencer Company, Hartford, Conn. Sound attenuating device. 2,100,655; Nov. 30.
Bowe, Charles F., assignor of twenty-two and one-half per cent to E. G. Baird, Canton, and twenty-two and one-half per cent to C. W. Traynor, Massillon, Ohio. Ash remover. 2,100,937; Nov. 30.
Bowers, Helen S. (See Fritts, Howard S., assignor.)
Boyer, F. Walter. (See Taylor, Don A., assignor.)
Boyle Manufacturing Company. (See Anderson, Frank E., assignor.)
Bradfield, George K., Jr., Hackensack, N. J., assignor to American Car and Foundry Company, New York, N. Y. Venetian blind. 2,100,625; Nov. 30.
Bradshaw, William M., Summit, N. J., assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Polyphase meter casing. 2,100,731; Nov. 30.
Brandt, Leo L., Savannah, Mo. Mirror for vehicles. 2,100,938; Nov. 30.
Bratring, Kurt, Berlin-Charlottenburg, Germany. Mold for making hollow articles from plastic materials. 2,100,832; Nov. 30.
Bray, Ulric B., Palos Verdes Estates, assignor to Union Oil Company of California, Los Angeles, Calif. Solvent extraction of oils. 2,100,429; Nov. 30.
Breitenstein, Albert F., assignor to The Geometric Tool Company, New Haven, Conn. Taper-thread-cutting tool. 2,100,376; Nov. 30.
Brennan, James G., Baltimore, Md. Duplicator. 2,101,600; Nov. 30.
Brenner, Charles M., Shreveport, La. Hand tool for making joints on tubular members. 2,100,939; Nov. 30.
Brewer-Titchener Corporation, The. (See Wenn, Floyd D., assignor.)
Bricher, Harold D. (See Schmidt, C. A., and Bricher.)
Briggs Manufacturing Company. (See Marshall, William, assignor.)
Briggs Manufacturing Company. (See Wexelberg, Clarence E., assignor.)
Brink, Winfield S., assignor to The Firestone Steel Products Company, Akron, Ohio. Spacer. 2,100,626; Nov. 30.
Bristol Company, The. (See Borden, Perry A., assignor.)
Brooks, Charles W., et al. (See Berhman, J. W., and Robiolio, assignors.)
Brown Company. (See Schur, Milton O., assignor.)
Brown, Harold J., and G. E. Farrell, Dorchester, Mass. Dental or surgical instrument. 2,100,319; Nov. 30.
Browning, George M., Rutherford, N. J. Spark plug. 2,100,320; Nov. 30.
Brubaker, Merlin M., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Article of manufacture and making same. 2,100,377; Nov. 30.
Brubaker, Merlin M., and B. W. Howk, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Catalytic hydrogenation of alkyl substituted phenols. 2,100,468; Nov. 30.
Brückel, Waldemar, Berlin-Wilmersdorf, and K. Haas, Berlin-Britz, Germany, assignors to General Electric Company. Damping device for indicating instruments. 2,100,833; Nov. 30.
Bruckmayer, Friedrich. (See Honigman, E., and Bruckmayer.)
Bruson, Herman A., Elkins Park, assignor to Röhm & Haas Company, Philadelphia, Pa. Preparing esters and products. 2,100,993; Nov. 30.
Buchanan, George T., Detroit, Mich. Reed hook. 2,100,536; Nov. 30.
Buckeye Portable Tool Company, The. (See Ripsch, C. W., and Wuebben, assignors.)
Bucy, Floyd L., and V. A. La Rock, Eau Claire, Wis. Tire vulcanling core. 2,100,627; Nov. 30.
Budlong, Lester G. (See Watson, L. M., Ternes, and Budlong.)
Buffalo Foundry & Machinery Co. (See Lavett, Charles O., assignor.)
Burberrys Limited. (See Watson, William H., assignor.)
Burger, William J., Shaker Heights, and C. M. Mirossay, Cleveland, assignors to The Warner & Swasey Company, Cleveland, Ohio. Machine tool. 2,100,899; Nov. 30.
Burwell, Cornelia, Ann Arbor, Mich. Germicide and fungicide composition. 2,100,469; Nov. 30.
Butler, Ernest L., Lynn, and J. Harrington, Jr., Wenham, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. anufacture of soles. 2,100,430; Nov. 30.
Byron Jackson Co. (See Hertel, Richard K., assignor.)
Cage, Darcy L., Los Angeles, Calif. Draft control means for fireplaces. 2,100,732; Nov. 30.
Campbell, Harry G., assignor to United Pipe & Supply Corporation, Charleston, W. Va. Well cementing device. 2,100,586; Nov. 30.
Campbell, Robert D., Chicago, and W. Huebert, Glen Ellyn, assignors, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Weld testing device. 2,100,502; Nov. 30.
Candee, Allan H. (See Wildhaber, E., and Candee.)
Caputo, James V., Crafton, Pa. Manufacture of pipe blanks. 2,100,503; Nov. 30.
Carbon Interleaved Forms Corporation. (See Fulk, George L., assignor.)
Carr, James L., and C. K. Black, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Azo dyes. 2,100,378; Nov. 30.
Carroll, Monroe W., Beaumont, Tex. Well bridging, cementing, whipstock, and milling apparatus. 2,100,684; Nov. 30.
Carton Container Company. (See Ringler, William A., assignor.)
Carver Cotton Gin Company. (See McLean, Robert W., assignor.)
Casco Products Corporation. (See Cohen, Joseph H., assignor.)
Cash, A. W., Company. (See Terry, Charles M., assignor.)
Case, Nelson P., Great Neck, N. Y., assignor to Hazeltine Corporation. Automatic frequency control. 2,100,733; Nov. 30.
Catland, Alfred C., Alhambra, assignor to Globe Oil Tools Company, Los Nietos, Calif. Core drill. 2,100,311; Nov. 30.
Cavanaugh, George S., Los Angeles, Calif. Lubricating composition. 2,100,685; Nov. 30.
Celanese Corporation of America. (See Congdon, T. B., and Long, assignors.)

Celanese Corporation of America. (See Platt, Herbert, assignor.)
Celanese Corporation of America. (See Whitehead, William, assignor.)
Centrifix Corporation. (See Hawley, Charles G., assignor.)
Cervenka, William F., and F. Miller, Traverse City, Mich. Horticultural implement. 2,100,379; Nov. 30.
Chain Store Products Corporation. (See Hermsdorf, Walter H., assignor.)
Chalker, Kenneth M., Woodbridge, N. J. Apparatus for coating the interior of tubing and the like. 2,100,587; Nov. 30.
Chandler, Willard P., Jr., assignor to Blaw-Knox Company, Pittsburgh, Pa. Furnace cooler. 2,100,628; Nov. 30.
Chapman, Robert L., Erie, Pa., assignor to General Electric Company. Air conditioning system. 2,100,834; Nov. 30.
Chemische Fabrik Buckau. (See Wiedbrauck, Erich, assignor.)
Chenicek, George W., assignor to Standard Oil Company, Chicago, Ill. Truck tank loading apparatus. 2,100,380; Nov. 30.
Cherry-Burrell Corporation. (See Lippold, Adolph J., assignor.)
Chicago-Hutchins Corporation. (See Hawksworth, David W., assignor.)
Chilton, Roland, Ridgewood, N. J. Transmission. 2,100,629; Nov. 30.
Chilton, Roland, Ridgewood, N. J. Transmission. 2,100,630; Nov. 30.
Chilton, Roland, Ridgewood, N. J. Transmission. 2,100,631; Nov. 30.
Chilton, Roland, Ridgewood, N. J. Transmission. 2,100,632; Nov. 30.
Chisholm, Harry L., Jr., assignor to Houde Engineering Corporation, Buffalo, N. Y. Stabilizer structure for automobiles. 2,100,381; Nov. 30.
Church, Lewis H., Westfield, assignor to The Thomas & Betts Co., Elizabeth, N. J. Pipe coupler. 2,100,796; Nov. 30.
Ciamberlini, Ugo, Rome, Italy. Flexible tube. 2,100,835; Nov. 30.
Claborn, Houston V. (See Smith, L. E., and Claborn.)
Clark-Aiken Company, The. (See Aiken, Walter S., assignor.)
Clarke, Thomas B., and H. Boothroyd, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Splitting machine. 2,100,431; Nov. 30.
Claus, Walter, assignor to Zellstofffabrik Waldhof, Mannheim-Waldhof, Germany. Manufacture of wool-like artificial fibers. 2,100,588; Nov. 30.
Clein, Elias, Brooklyn, N. Y. Marcel iron. 2,100,633; Nov. 30.
Clothier, Stewart L., Hasbrouck Heights, and H. C. Hogencamp, Fairlawn, assignors to Kolorama Laboratories, Inc., Newark, N. J. Light modulating cell. 2,100,836; Nov. 30.
Coffey, Douglas F. W., New York, N. Y., assignor to Winnek Stereoscopic Processes, Incorporated, Wilmington, Del. Apparatus for projecting pictures in relief. 2,100,634; Nov. 30.
Coffey, Irven E., Playa del Rey, Calif. Spark meter. 2,100,837; Nov. 30.
Cohen, Joseph H., assignor to Casco Products Corporation, Bridgeport, Conn. Fan guard. 2,100,994; Nov. 30.
Cole, Horton D., Scotia, N. Y. Milk bottle holder. 2,100,589; Nov. 30.
Coleman, John F., Smithboro, N. Y. Loupe. 2,100,940; Nov. 30.
Coleman, William, Johnson City, Tenn., assignor to Scott & Williams, Incorporated, New York, N. Y. Method of and machine for knitting fabric. 2,100,941; Nov. 30.
Collaro, Christopher, London, and D. G. Lewin, Hawdenbury, Tunbridge Wells, England. Talking machine. 2,100,686; Nov. 30.
Collins & Aikman Corporation. (See Hiers, Glen S., assignor.)
Columbia Phonograph Company. (See Gould, Leslie A., assignor.)
Columbus McKinnon Chain Corporation. (See Stahl, Frank E., assignor.)
Columbian Enameling & Stamping Co. (See Nelson, Andrew W., assignor.)
Combustion Engineering Company. (See Crites, Joe, assignor.)
Communication Patents, Inc. (See Nicolson, Alexander McL., assignor.)
Congdon, Thomas B., and C. J. Long, New London, Conn., assignors to Celanese Corporation of America. Weaving device. 2,100,382; Nov. 30.
Continental Can Company. (See Kronquest, Alfred L., assignor.)
Converse Rubber Company. (See Sindler, Jay J., assignor.)
Conway, Martin J., Coatesville, Pa. Ferrous metal. 2,100,537; Nov. 30.
Cope, Kenneth B. (See Smally, Emanuel C., assignor.)
Copenhefer, John B., Louisville, Ky. Hair waving apparatus. 2,100,538; Nov. 30.
Cordiano Can Co. (See Hirshman, bram S., assignor.)
Cornelius, Frank H., Swissvale, Pa. Heating apparatus. 2,100,687; Nov. 30.
Cornell Center Homeopathic Bird Remedy Co. (See Mayer, Frederick, assignor.)
Cotton, Charles H., Kewanee, Ill., assignor to Walworth Patents, Inc., Boston, Mass. Valve. 2,100,470; Nov. 30.
Covalt, Scott, Van Nuys, Calif. Cream dipper. 2,100,471; Nov. 30.
Cox, James H., Los Angeles, Calif. Tire inflation device. 2,100,321; Nov. 30.
Crago, Paul H., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling system. 2,100,432; Nov. 30.
Creedon, Michael V. (See Beardsley, B., and Creedon.)
Crites, Joe, Evanston, Ill., assignor, by mesne assignments, to Combustion Engineering Company, Inc. Mill and classifier. 2,100,734; Nov. 30.
Crone, Francis G., Buffalo, N. Y. Thermostatic regulator for gas heating. 2,100,709; Nov. 30.
Crosley, Lewis M., and J. W. Dunn, assignors to The Crosley Radio Corporation, Cincinnati, Ohio. Restricted flow refrigerant feeding device. 2,100,504; Nov. 30.
Crosley Radio Corporation, The. (See Crosley, L. M., and Dunn.)
Crowe, Thomas B. (See Mills, L. D., Crowe, and Haun.)
Cummings, Carl E. (See Roess, L. C., and Cummings.)
Cutler, Frank W., Portland, Oreg., assignor to Food Machinery Corporation, San Jose, Calif. Washing fruits, vegetables, and other products. 2,100,942; Nov. 30.
Dailey, Raymond, U. S. Army. Folding trunk locker and shoe rack. 2,100,322; Nov. 30.
Dale, Julian K., assignor to A. E. Staley Manufacturing Company, Decatur, Ill. Production of dextrose. 2,100,433; Nov. 30.
D'Alessandro, Frank, Carlisle, Pa. Pump construction. 2,100,943; Nov. 30.
Dallenbach, Walter, Berlin-Charlottenburg, Germany. Electric discharge apparatus. 2,100,797; Nov. 30.
Davies, Richard L., assignor to Pennsylvania Salt Manufacturing Company, Philadelphia, Pa. Making alkali sub-silicates. 2,100,944; Nov. 30.
Davis, Augustine, Jr., Cincinnati, Ohio. Truck tank and cab. 2,100,383; Nov. 30.
Davis, G. Howlett, Jr., Detroit, Mich. Sound-controlled actuating mechanism. 2,100,434; Nov. 30.
Dawson, Albert J., Sewickley, Pa., assignor to The Dravo Contracting Company. Barge. 2,100,472; Nov. 30.
Dawson, John W., East McKeesport, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Electric discharge apparatus. 2,100,735; Nov. 30.
Day, William E., Jr. (See Wirrer, G., and Day.)
De Graff, Wilbur C., Cleveland Heights, assignor to The Warner & Swasey Company, Cleveland, Ohio. Machine tool. 2,100,545; Nov. 30.
De Laval Steam Turbine Company. (See Kennedy, Frank W., assignor.)
De Mey, René, Brussels, Belgium. Suspension arrangement for screw fan rotors. 2,100,946; Nov. 30.
Deming, George M., East Orange, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Oxygen cutting apparatus. 2,100,384; Nov. 30.
Dendel, Lloyd P., Lansing, Mich. Grain elevator alarm switch. 2,100,710; Nov. 30.
De Puy, Charles T., and W. C. Baxter, assignors to Trimble Nurseryland Furniture, Inc., Rochester, N. Y. Guard for children's toilet seats. 2,100,774; Nov. 30.
Despard, Victor R., assignor to Pass & Seymour, Inc., Syracuse, N. Y. Electric switch. 2,100,435; Nov. 30.
Det Norske Aktieselskab for Elektrokemisk Industri. (See Trematore, Raffaele, assignor.)
Detroit Harvester Company. (See Wagner, Robert W., assignor.)
Detroit Lubricator Company. (See Russel, Philip S., assignor.)
Detroit Stoker Company. (See Beers, Royce L., assignor.)
Dettwyler, William. (See Wuertz, A. J., and Dettwyler.)
De Vout, Anson W., La Grange Park, assignor to Industrial Patents Corporation, Chicago, Ill. Drying tunnel. 2,100,838; Nov. 30.
De Vries, Abraham, Amsterdam, Netherlands. Snap fastener. 2,100,635; Nov. 30.
Diamond Expansion Bolt Company. (See Saleh, Gabriel E. R., assignor.)
Diithey, Walther and F. Quint, Bonn-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Condensation products of carbenium compounds and preparing the same. 2,100,798; Nov. 30.
Disbrow, Clarkson A., New Rochelle, N. Y., assignor, by mesne assignments, to Poor & Company. Step joint. 2,100,947; Nov. 30.
Dixon, Reginald G. (See Patterson, W. G., and Dixon.)
Doll Air-Stringer of America, Inc. (See Doll, Laurance C., assignor.)
Doll, Laurance C., assignor to Doll Air-Stringer of America, Inc., Ithaca, N. Y. Apparatus for stringing rackets. 2,100,948; Nov. 30.
Domershausen, Josef, Kansas City, Mo. Container. 2,100,636; Nov. 30.
Donath, Ernst. (See Pier, M., and Donath.)

Donovan, John F., East Cleveland, and F. J. Malloy, Cleveland Heights, Ohio, assignors to General Electric Company. Tabulating machine. 2,100,656; Nov. 30.
Doolittle, John B., Kansas City, Mo. Combination implement. 2,100,637; Nov. 30.
Doolittle, John B., Kansas City, Mo. Implement for cutting cable sheaths. 2,100,638; Nov. 30.
Doolittle, John B., and C. E. Morrison, Kansas City, Mo. Portable oven for drying cable conductors. 2,100,639; Nov. 30.
Dougall, Victor. (See Hayward, A. S., and Dougall.)
Douglas, Fredric E., assignor to Draper Corporation, Hopedale, Mass. Loom shuttle. 2,100,688; Nov. 30.
Drake, Ronald I., Appleton, Wis., assignor to Beatrice Creamery, Chicago, Ill. Container. 2,100,711; Nov. 30.
Drake, Tom G. (See Moore, John N., assignor.)
Draper Corporation. (See Douglas, Fredric E., assignor.)
Dravo Contracting Company, The. (See Dawson, Albert J., assignor.)
Dreyfus, Henry, London, England. Treatment of textile and other materials. 2,100,385; Nov. 30.
Drissen, Wallace W. (See Goldberg, M. W., and Drissen.)
Drysdale, William D., Mount Clemens, Mich., assignor to W. J. Sugden, Boston, Mass. Motor compressor. 2,100,799; Nov. 30.
Dubonnet, André, Neuilly-sur-Seine, France. Elastic suspension system. 2,100,689; Nov. 30.
Dunn, John W. (See Crosley, L. M., and Dunn.)
Du Pont, E. I., de Nemours & Company. (See Brubaker, Merlin M., assignor.)
Du Pont, E. I., de Nemours & Company. (See Brubaker, M. M., and Howk, assignors.)
Du Pont, E. I., de Nemours & Company. (See Carr, J. L., and Black, assignors.)
Du Pont, E. I., de Nemours & Company. (See Kline, Emil, assignor.)
Du Pont, E. I., de Nemours & Company. (See Whelen, Myron S., assignor.)
Du Pont, E. I., de Nemours & Company. (See Williams, Ira, assignor.)
Du Pont, E. I., de Nemours & Company. (See Wuertz, A. J., and Dettwyler, assignors.)
Du Pont, E. I., de Nemours & Company. (See Wuertz, Alexander J., assignor.)
Dürkoppwerke Aktiengesellschaft. (See Pudelko, Hermann, assignor.)
Eames, William F., Pittsburgh, Pa., assignor to Westinghouse Electric Elevator Company, Chicago, Ill. Elevator signaling system. 2,100,736; Nov. 30.
Eclipse Aviation Corporation. (See Berges, Donald M., assignor.)
Edwards, William C., Anderson, Ind., assignor to General Motors Corporation, Detroit, Mich. Switch. 2,100,657; Nov. 30.
Efromson, Philip C., Los Angeles County, assignor to Globe Oil Tools Company, Los Nietos, Calif. Cutter mounting. 2,100,640; Nov. 30.
Egry Register Company, The. (See Stern, M. C., and Pfeiffer, assignors.)
Eidson, Charles G. (See Heffernan, Wilford P., assignor.)
Eisler, Heinrich, et al. (See Honigmann, E., and Bruckmayer.)
Electric and Musical Industries Limited. (See Mitchell, Frank A., assignor.)
Electrical Research Products, Inc., et al. (See Mason, W. P. (Stanton and Tweeddale, assignors).)
Electrol Incorporated. (See Andler, Robert F., assignor.)
Ellis, George, Sudbury, assignor to The General Electric Company Limited, London, England. Electric ship propulsion system. 2,100,839; Nov. 30.
Elmore, Charles E., Chicago, Ill. Motor vehicle licensing system and tag therefor. 2,100,840; Nov. 30.
Emery, George H., Norwalk, Conn. Paper doll's dress. 2,100,386; Nov. 30.
Emmey, Charles, New York, N. Y. Method of, apparatus for coating textile material and a product thereof. 2,100,712; Nov. 30.
Engel, William H., assignor to Shellmar Products Company, Mount Vernon, Ohio. Printing. 2,100,436; Nov. 30.
Engs, William, Oakland, and G. H. van de Griendt, Berkeley, assignors to Shell Development Company, San Francisco, Calif. Production of anhydrous hydrocarbon derivatives. 2,100,437; Nov. 30.
Ensslin, Adolf, North Attleboro, Mass. Hinge. 2,100,473; Nov. 30.
Fabbrica Italiana Magneti Marelli Soc. An. (See Quintavalle, Umberto, assignor.)
Fafnir Company, The. (See Lesiter, F., and Smith, assignors.)
Fanarjian, John, Union City, N. J. Convertible table and cabinet. 2,100,641; Nov. 30.
Farnsworth, Henry S. (See Souther, C. W., and Farnsworth.)
Farnsworth, Philo T., assignor to Farnsworth Television Incorporated, San Francisco, Calif. Image analysis tube. 2,100,841; Nov. 30.
Farnsworth, Philo T., assignor to Farnsworth Television Incorporated, San Francisco, Calif. Charge storage tube. 2,100,842; Nov. 30.
Farnsworth Television Incorporated. (See Farnsworth, Philo T., assignor.)
Farrell, George E. (See Brown, H. J., and Farrell.)
Fawick, Thomas L., Akron, Ohio, assignor to Borg-Warner Corporation, Chicago, Ill. Transmission. 2,100,312; Nov. 30.
Federal Industrial Corporation et al. (See Berhman, J. H., and Robiolio, assignors.)
Federal-Mogul Corporation. (See Harder, Oscar E., assignor.)
Ferguson, William C., St. Louis, Mo. Product for covering highway joints. 2,100,387; Nov. 30.
Ferris, Robert G., assignor to Starline, Inc., Harvard, Ill. Grapple-fork. 2,100,800; Nov. 30.
Fikentscher, Hans, Ludwigshafen-on-the-Rhine, and J. Hengstenberg, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of interpolymerization products. 2,100,900; Nov. 30.
Finch, Stanley W., Washington, D. C. Building-block. 2,100,658; Nov. 30.
Fincke, Donald M., Great Neck, N. Y., assignor to American Machine & Foundry Company. Mounting for slicer blades. 2,101,002; Nov. 30.
Firestone Steel Products Company, The. (See Brink, Winfield S., assignor.)
Fischer, Samuel, New York, N. Y., assignor to The American Agricultural Chemical Company, Newark, N. J. Furnace for treating phosphate material. 2,100,843; Nov. 30.
Fish, John U., Oak Park, Ill., assignor, by mesne assignments, to J. U. Fish Trust. Combined air conditioning and house heating system. 2,100,474; Nov. 30.
Fish, J. U., Trust. (See Fish, John U., assignor.)
Fisher, Ralph K., New York, N. Y., assignor of one-half to Oregon Worsted Company, Portland, Oreg. Holder and method for knitting, crocheting, and analogous purposes. 2,100,388; Nov. 30.
Fitch, Benjamin F., Greenwich, Conn., assignor to Motor Terminals Company, New York, N. Y. Automotive truck body. 2,100,323; Nov. 30.
Fitchburg Grinding Machine Corporation. (See Gould, G. S., and La Fleur, assignors.)
Fitz Gerald, Alan S., Wynnewood, Pa. Traffic control system. 2,100,313; Nov. 30.
Fleming, J. Stuart. (See Morrison, John R., assignor.)
Flint, Hyland C., Grosse Pointe, Mich., assignor to Patent Sales, Inc. Spring seat construction. 2,100,475; Nov. 30.
Flint, Hyland C., Detroit, Mich., assignor to Patent Sales, Inc. Spring seat construction. 2,100,476; Nov. 30.
Fohrer, Friedrich, assignor to Maschinenfabrik Augsburg-Nürnberg A. G., Augsburg, Germany. Welded box frame for vertical internal combustion engines. 2,100,775; Nov. 30.
Food Machinery Corporation. (See Cutler, Frank W., assignor.)
Ford Motor Company. (See Kramer, Clarence F., assignor.)
Ford Motor Company. (See Sorensen, Charles E., assignor.)
Forrester, Edward E., deceased, Denver, Colo., by I. Forrester, executrix. Making stop cocks. 2,100,438; Nov. 30.
Forrester, Irene, executrix. (See Forrester, Edward E.)
Foster Brothers Manufacturing Company. (See Foster, William B., assignor.)
Foster, Waldo E., Minneapolis, Minn. Conditioning of flour. 2,100,691; Nov. 30.
Foster, Walter W., Wichita Falls, Tex. Knee rest for vehicle seats. 2,100,737; Nov. 30.
Foster, William B., assignor to Foster Brothers Manufacturing Company, Utica, N. Y. Mattress tufting machine. 2,100,844; Nov. 30.
Fox, William J., assignor to James R. Kendrick Co., Inc., Philadelphia, Pa. Elastic strand. 2,101,003; Nov. 30.
Fox, William J., assignor to James R. Kendrick Co., Inc., Philadelphia, Pa. Elastic strand. 2,101,004; Nov. 30.
Franz, Ehrhart, Leipzig, and M. Hardtmann, Naunhof, near Leipzig, Germany. Product for increasing the slip of textile materials. 2,100,845; Nov. 30.
Fray-Mershon, Inc. (See Mershon, Lester E., assignor.)
Frevert, Albert A., Alma, Mich. Seed cleaning machine. 2,100,738; Nov. 30.
Friedman, Arthur, Shaker Heights, assignor to Air Controls, Inc., Cleveland, Ohio. Blower or fan. 2,100,439; Nov. 30.
Fritts, Howard S., assignor of one-half to H. S. Bowers, Washington, N. J. Antiskid device. 2,100,539; Nov. 30.
Fritz, Adam, and R. J. McCarthy, Philadelphia, Pa. Washrag holder. 2,100,477; Nov. 30.
Fulk, George L., Berkeley, Calif., assignor to Carbon Interleaved Forms Corporation, Norwalk, Ohio. Machine and making manifold forms. 2,100,776; Nov. 30.
Gagne, Augustin. (See Lawson, R. H., and Gagne.)
Galveston Buckle Company. (See Voigt, A. P. J., and Still, assignors.)
Galvin Manufacturing Corporation. (See Mitchell, Donald H., assignor.)
Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Rock drill rotation means. 2,100,324; Nov. 30.

Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Pressure fluid motor. 2,100,325; Nov. 30.
Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Pressure fluid motor. 2,100,540; Nov. 30.
Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Pressure fluid motor. 2,100,541; Nov. 30.
Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Rock drill hole cleansing means. 2,100,949; Nov. 30.
Gavin, Gordon P., Kohler, Wis. Flow control for urinals and the like. 2,100,389; Nov. 30.
General Electric Company. (See Anderson, Arvid E., assignor.)
General Electric Company. (See Brückel, W., and Haas, assignors.)
General Electric Company. (See Chapman, Robert L., assignor.)
General Electric Company. (See Donovan, J. F., and Malloy, assignors.)
General Electric Company Limited, The. (See Ellis, George, assignor.)
General Electric Company. (See Kaufmann, Richard H., assignor.)
General Electric Company. (See Linde, Leonard J., assignor.)
General Electric Company. (See Lord, Harold W., assignor.)
General Electric Company. (See Mansur, Clarence W., assignor.)
General Electric Company. (See Olson, Olaf M., assignor.)
General Electric Company. (See Schneider, Elbert D., assignor.)
General Electric Company. (See Smith, Richard E., assignor.)
General Electric Company. (See Stansel, Numan R., assignor.)
General Electric Company. (See Suits, Chauncey G., assignor.)
General Electric Company. (See Umansky, Leonid A., assignor.)
General Electric Company. (See van Liempt, Johannes A. M., assignor.)
General Motors Corporation. (See Almen, J. O., and Kirschner, assignors.)
General Motors Corporation. (See Edwards, William C., assignor.)
General Motors Corporation. (See Geyer, Harvey D., assignor.)
General Motors Corporation. (See Rasmussen, Olaf, assignor.)
General Motors Corporation. (See Rippingille, Edward V., assignor.)
General Motors Corporation. (See Wellman, Charles E., assignor.)
Geometric Tool Company, The. (See Breitenstein, Albert F., assignor.)
Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Pasteurization of milk. 2,100,326; Nov. 30.
Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Pasteurizing system. 2,100,327; Nov. 30.
Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Electrical pasteurizing process. 2,100,328; Nov. 30.
Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Pasteurizing system, etc. 2,100,329; Nov. 30.
Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Pasteurizing apparatus. 2,100,330; Nov. 30.
Geyer, Harvey D., Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich. Gear shift lever and resilient mount therefor. 2,100,642; Nov. 30.
Geyer, Harvey D., Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich. Radio antenna for automobiles. 2,100,643; Nov. 30.
Giblett, Catherine T., Detroit, Mich. Deflector means for toilet mechanisms. 2,100,950; Nov. 30.
Gilfillan, Paul M., Chicago, Ill., assignor to Shellmar Products Company, Mount Vernon, Ohio. Container machine. 2,100,739; Nov. 30.
Gimeno, Harold, Norman, Okla. Tile roofing. 2,100,505; Nov. 30.
Glass, Willie F., and M. G. Sibley, Gulfport, Miss. Filter. 2,100,951; Nov. 30.
Gleason Works. (See Wildhaber, E., and Candee, assignors.)
Globe Machinery & Supply Company. (See Thompson, Elmer B., assignor.)
Globe Oil Tools Company. (See Abegg, Walter A., assignor.)
Globe Oil Tools Company. (See Catland, Alfred C., assignor.)
Globe Oil Tools Company. (See Efromson, Philip C., assignor.)
Goff, Harold W., Great Neck, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Call transmitter. 2,100,390; Nov. 30.
Goldberg, Max W., and W. W. Drissen, assignors to Modern Equipment Company, Port Washington, Wis. Covered ladle. 2,100,713; Nov. 30.
Goodley, Harry, Nottingham, England. Jacquard mechanism and textile machine employing such mechanism. 2,100,952; Nov. 30.
Görisch, Rolf, Berlin-Lichtenberg, assignors to Klangfilm G. m. b. H., Berlin, Germany. Making variable area sound film with low background noise. 2,100,740; Nov. 30.
Gorton, George, and P. M. Henkes, assignors to George Gorton Machine Co., Racine, Wis. Engraving and related machines. 2,100,953; Nov. 30.
Gorton, George Machine Co. (See Gorton, G., and Henkes, assignors.)
Gössler, Dietrich, Heidenheim (Brenz), Germany. Lateral fluid container for hydraulic transmissions. 2,100,440; Nov. 30.
Gould, Gardner S., Lunenberg, and E. D. La Fleur, Lancaster, assignors to Fitchburg Grinding Machine Corportion, Fitchburg, Mass. Grinding wheel truing device. 2,100,954; Nov. 30.
Gould, Leslie A., assignor to Columbia Phonograph Company, Inc., Bridgeport, Conn. Radio apparatus. 2,100,659; Nov. 30.
Grady, Sylvester C., Chester, N. J. Toy airplane. 2,100,590; Nov. 30.
Graham, Julius B., Shubuta, Miss. Rack. 2,100,331; Nov. 30.
Grange, Edward A., and E. J. Schmidt, assignors to Allied Engineering Company, Chicago, Ill. Wheel with rubber-like tread. 2,100,542; Nov. 30.
Grange, Leo O., assignor to Safety Vulcanizer Company, Chicago, Ill. Full-circle tire retreading vulcanizer. 2,100,478; Nov. 30.
Grassl, Georg. (See Pier, M., Simon, and Grassl.)
Green, Burton M., Brooklyn, N. Y. Air-flow ventilator. 2,100,801; Nov. 30.
Green, Harry A., Portland, Oreg. Cable clamp. 2,100,777; Nov. 30.
Greene, Chester W., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Drier. 2,100,441; Nov. 30.
Greiner, Max, Berlin-Charlottenburg, Germany. Electromagnetic tool of the percussion type. 2,100,660; Nov. 30.
Grimm, Hans G., Heidelberg, and P. Huppert, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Vitreous compositions or glasses. 2,100,391; Nov. 30.
Groene, William F., assignor to The R. K. LeBland Machine Tool Company, Cincinanti, Ohio. Chuck for camshafts and the like. 2,100,955; Nov. 30.
Groves, Frederick H., Dormont, Pa. Hinged carton. 2,100,644; Nov. 30.
Grunwald, Albert C. (See Birr, R. G., and Grunwald.)
Haas, Karl. (See Brückel, W., and Haas.)
Haberstump, Alfred, Detroit, Mich. Combined locking and supporting means for doors. 2,100,591; Nov. 30.
Haddock, Norman H., Prestwich, and C. H. Lumsden, Gatley, England, assignors to Imperial Chemical Industries Limited. Alkylarylanthraquinone dyestuffs. 2,100,392; Nov. 30.
Halstead, Merle E., Owego, N. Y. Cutter for sheet material. 2,100,846; Nov. 30.
Halstead, Merle E., Owego, N. Y. Die structure. 2,100,847; Nov. 30.
Hamilton, Lawrence H., assignor to National Standard Company, Niles, Mich. Bedspring. 2,100,393; Nov. 30.
Hamilton, Lawrence H., assignor to National Standard Company, Niles, Mich. Spring structure. 2,100,543; Nov. 30.
Hamilton, Lawrence H., assignor to National Standard Company, Niles, Mich. Spring structure. 2,100,544; Nov. 30.
Henkes, Peter M. (See Gorton, G., and Henkes.)
Hanlon, Claude F., Wewahitchka, Fla. Printer's miter gauge. 2,100,506; Nov. 30.
Hansen, Sven S., and T. M. E. Wendt, Rasunda, Sweden. Film stretching device. 2,100,802; Nov. 30.
Harder, Oscar E., Columbus, Ohio, assignor, by mesne assignments, to Federal-Mogul Corporation, Detroit, Mich. Liner for bearings. 2,100,314; Nov. 30.
Hardgrove, Ralph M., Westfield, assignor to The Babcock & Wilcox Company, Newark, N. J. Feeder control mechanism. 2,100,848; Nov. 30.
Hardtmann, Max. (See Franz, E., and Hardtmann.)
Harman, Marion W., Nitro, W. Va., assignor, by mesne assignments, to Monsanto Chemical Company, Wilmington, Del. Vulcanizing rubber and product produced thereby. 2,100,692; Nov. 30.
Harper, Elmer E., Kansas City, Mo. Weighing feeder. 2,100,315; Nov. 30.
Harper, Elmer E., Kansas City, Mo. Weight controlled feeding means. 2,100,316; Nov. 30.
Harrington, Joseph, Jr. (See Butler, E. L., and Harrington.)
Harris, Henry H., Champaign, Ill. Making a carburizing box with centrifugally cast side walls. 2,100,901; Nov. 30.
Harris, Henry H., Champaign, Ill. Carburizing box with centrifugally cast side walls. 2,100,902; Nov. 30.
Harris, Morton, Anniston, Ala., assignor, by mesne assignments, to Monsanto Chemical Company. 4-aminodiphenyl compounds. 2,100,803; Nov. 30.

Harrison, Clifford E., assignor to American Engineering Company, Philadelphia, Pa. Material feeding mechanism. 2,100,741; Nov. 30.
Hartman, Thomas L., assignor of one-third to E. J. W. Keagy; one-third to H. M. Young, and one-third to Reymer & Brothers, Inc., Pittsburgh, Pa. Process and apparatus for beverage dispensing. 2,100,742; Nov. 30.
Harvey, Herbert, assignor to L. M. Harvey, Los Angeles, Calif. Tying machine. 2,100,801; Nov. 30.
Harvey, Leo M. (See Harvey, Herbert.)
Hasbrouck, John C., assignor of one-half to F. Weidman, Detroit, Mich. Propeller. 2,100,592; Nov. 30.
Hathaway, Edgar F., Wellesley, and W. Bixby, Dorchester, Mass. Wear testing, measuring, and recording apparatus and method. 2,100,332; Nov. 30.
Haun, Joye C. (See Mills, L. D., Crowe, and Haun.)
Hawksworth, David W., Birmingham, Mich., assignor to Chicago, Hutchins Corporation. Hatch frame construction for car roofs. 2,100,903; Nov. 30.
Hawley, Charles G., Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio. Liquid purifier. 2,100,661; Nov. 30.
Hayward, Arthur S., and V. Dougall, Altrincham, assignors to Linotype and Machinery Limited, London, England. Typographical slug casting machine. 2,100,507; Nov. 30.
Hazeltine Corporation. (See Case, Nelson P., assignor.)
Hazeltine Corporation. (See Lyons, Walter, assignor.)
Heffernan, Wilford P., Humble, assignor of one-fourth to C. G. Eidson, Houston, Tex. Pump jack. 2,100,509; Nov. 30.
Heid, Jacob B., assignor to Universal Oil Products Company, Chicago, Ill. Conversion of hydrocarbon oils. 2,100,849; Nov. 30.
Heidbrink, Jay A., Minneapolis, Minn. Gas administering machine. 2,100,778; Nov. 30.
Heinitz, Karl R., Dresden, Germany. Drive for calculating machines, bookkeeping machines, and the like. 2,100,804; Nov. 30.
Heising, Raymond A., Summit, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Reception of frequency modulated waves and circuits therefor. 2,100,394; Nov. 30.
Hemmert, Frank B., St. Marys, Ohio. Farming implement. 2,100,956; Nov. 30.
Hemphill Company. (See Lawson, R. H., and Gagne, assignors.)
Hemphill Company. (See Lawson, Robert H., assignor.)
Henderson, Albert, assignor to W. P. Witherow, Pittsburgh, Pa. Apparatus and method of making expanded cement articles. 2,100,479; Nov. 30.
Henderson, Charles R. (See Lockhead, Elmer C., assignor.)
Hendley, James A., assignor to The Russell Manufacturing Company, Middletown, Conn. Corded tape for slide fasteners and the like. 2,100,645; Nov. 30.
Hengstenberg, Josef. (See Fikentscher, H., and Hengstenberg.)
Henry, Lewie H. (See Bond, Albert J., assignor.)
Herbert, Frank B., Westwood, N. J. Dropping board and roost for poultry. 2,100,508; Nov. 30.
Hercules Powder Company. (See Spurlin, Harold M., assignor.)
Hermsdorf, Walter H., assignor to Chain Store Products Corporation, Chicago, Ill. Hair curler. 2,100,850; Nov. 30.
Hermsdorf, Walter H., assignor to Chain Store Products Corporation, Chicago, Ill. Hair curler. 2,100,851; Nov. 30.
Herrmann, Carl, assignor to the firm of Carl Zeiss, Jena, Germany. Reflecting system for objectives of reproduction cameras. 2,100,442; Nov. 30.
Hertel, Richard K., Vernon, assignor to Bryon Jackson Co., Huntington Park, Calif. Latch for safety hooks. 2,100,779; Nov. 30.
Hess, Jack W., Dallas, Tex., assignor to The Richardson Company. Storage battery. 2,100,333; Nov. 30.
Hessel, Georg, and H. Maier, Frankfort-on-the-Main, Germany. Preparing a substance increasing the blood pressure. 2,100,593; Nov. 30.
Heymann, Roy D., Woodbridge, Conn., assignor, by mesne assignments, to Pulp Products Company, Inc., New York, N. Y. Molding of pulp. 2,100,395; Nov. 30.
Heymann, Roy D., Woodbridge, Conn., assignor, by mesne assignments, to Pulp Products Company, Inc., New York, N. Y. Hydro-pneumatic pulp molding. 2,100,396; Nov. 30.
Heymer, Gerd, Dessau-in-Anhalt, Germany, assignor to Agfa Ansco Corporation, Binghamton, N. Y. Color photography. 2,100,594; Nov. 30.
Hickman, Clarence N., Jackson Heights, N. Y. Bow. 2,100,317; Nov. 30.
Hiemke, Hugo W., assignor to A. O. Smith Corporation, Milwaukee, Wis. Welding electrode. 2,100,545; Nov. 30.
Hiers, Glen S., Bala-Cynwyd, assignor to Collins & Aikman Corporation, Philadelphia, Pa. Rubber composition and making the same. 2,100,714; Nov. 30.
Hilliler, Gerald O., Berkeley, assignor, by mesne assignments, to Oliver United Filters Incorporated, San Francisco, Calif. Tube thickener. 2,100,646; Nov. 30.
Hirshman, Abram S., assignor to Cordiano Can Co., Inc., Brooklyn, N. Y. Making containers. 2,100,480; Nov. 30.
Hoefert, Reinhold, Berlin-Gatow, and K. Wollack, Berlin, assignors to Siemens & Halske Aktiengesellschaft, Siemenstadt, near Berlin, Germany. Telephone system. 2,100,510; Nov. 30.
Hoffman, George P., Jacksonville, Fla. Metal building structure. 2,100,957; Nov. 30.
Hogencamp, Harold C. (See Clothier, S. L., and Hogencamp.)
Hollander, Erik E., Kearny, N. J. Pocket cigarette roller. 2,100,397; Nov. 30.
Holm, Melvin M. (See Lyman, A. L., and Holm.)
Holzwarth Gas Turbine Co. (See Schaper, Georg, assignor.)
Honigmann, Erich, and F. Bruckmayer, Vienna, Austria, assignors to N. H. Moos, London, England, and Heinrich Eisler, Vienna, Austria. Dry masonry. 2,100,958; Nov. 30.
Hookless Fastener Company. (See Wintritz, George, assignor.)
Hopwood, John M. (See Specht, James E., assignor.)
Horton, Erwin C., Hamburg, assignor to Trico Products Corporation, Buffalo, N. Y. Indicator. 2,100,334; Nov. 30.
Houde Engineering Corporation. (See Chisholm, Harry L., Jr., assignor.)
Houde Engineering Corporation. (See Peo, R. F., Lautz, and Magrun, assignors.)
Howden, William H., Glasgow, Scotland, assignor to B. F. Sturtevant Company, Hyde Park, Mass. Fan. 2,100,481; Nov. 30.
Howk, Benjamin W. (See Brubaker, M. M., and Howk.)
Huebert, William. (See Campbell, R. D., and Huebert.)
Huffman, Mervin C., Claremont, N. H., assignor to Sullivan Machinery Company. Pressure fluid motor. 2,100,904; Nov. 30.
Hufford, Raymond, assignor to Monarch Governor Company, Detroit, Mich. Engine governor. 2,100,805; Nov. 30.
Huhn, Paul J., St. Paul, Minn. Abrading device. 2,100,780; Nov. 30.
Huppert, Paul. (See Grimm, H. G., and Huppert.)
Hurst, Robert O. (See Paulson, K., and Hurst.)
Hurxthal, Alpheus O., assignor to Protor & Schwartz, Incorporated, Philadelphia, Pa. Cork insert girt. 2,100,959; Nov. 30.
I. G. Farbenindustrie Aktiengesellschaft. (See Dilthey, W., and Quint.)
I. G. Farbenindustrie Aktiengesellschaft. (See Fikentscher, H., and Hengstenberg.)
I. G. Farbenindustrie Aktiengesellschaft. (See Grimm, H. G., and Huppert, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Pier, M., and Donath, assignors.)
I. G. Farbenindustrie Aktiengesellschaft. (See Pier, M., Simon, and Jacob, assignors.)
Illinois Watch Case Company. (See Anderson, Edward C., assignor.)
Imperial Chemical Industries Limited. (See Haddock, N. H., and Lumsden, assignors.)
Imperial Chemical Industries Limited. (See Linstead, R. P., and Lowe, assignors.)
Industrial Patents Corporation. (See De Vout, Anson W., assignor.)
International Patents Development Company. (See Kelling, Alfred H., assignor.)
Inter-Outer Telephone Corporation. (See Varley, Richard, assignor.)
Irgens, Finn T., Wauwatosa, assignor to Outboard Motors Corporation, Milwaukee, Wis. Outboard motor. 2,100,559; Nov. 30.
Irvin, Leslie L., Letchworth, England, assignor to Irving Air Chute Company, Inc., Buffalo, N. Y. Parachute pack fastening and releasing mechanism. 2,100,693; Nov. 30.
Irwine, Robert L., Union, assignor to Motor Improvements, Inc., Newark, N. J. Filter. 2,100,482; Nov. 30.
Irving Air Chute Company. (See Irvin, Leslie L., assignor.)
Jacob, Paul. (See Pier, M., Simon, and Jacob.)
Jacobson, Arthur G., assignor to The Miehle Printing Press and Manufacturing Company, Chicago, Ill. Printing press. 2,100,852; Nov. 30.
Jacoby, Herbert, Croton-on-Hudson, N. Y. Combination dentifrice dispenser and toothbrush holder. 2,100,960; Nov. 30.
James, Roy L., North Platte, Nebr. Shoe repair device. 2,100,335; Nov. 30.
Jansen, Cornelis G., Arnhem, Netherlands, assignor to American Enka Corporation, Enka, N. C. Manufacture of artificial silk. 2,100,595; Nov. 30.
Jenks, Harold C., Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Energizing system. 2,100,715; Nov. 30.
Jennings, O. D., & Company. (See Jennings, Ode D., assignor.)
Jennings, Ode D., assignor to O. D. Jennings & Company, Chicago, Ill. Display device. 2,100,853; Nov. 30.
Jesser, Albert E., Apollo, Pa. Stacking drum. 2,100,483; Nov. 30.

Johnson, Frederick B., Murrysville, Pa., assignor to Westinghouse Electric & Manufacturing Company. Circuit breaker. 2,100,743; Nov. 30.
Johnson, Warren V., and R. C. Kepner, Bloomsburg, Pa., assignors to American Car and Foundry Company, New York, N. Y. End construction for mine cars. 2,100,602; Nov. 30.
Jones, Raymon P., and W. A. White, Scarbro, W. Va. Rail bender. 2,100,961; Nov. 30.
Joy, Joseph F., Claremont, N. H., assignor to Sullivan Machinery Company. Mining apparatus. 2,100,336; Nov. 30.
Judd, Irving H., Dearborn, assignor to Whitehead & Kales Company, River Rouge, Mich. Skid carrier for motor vehicle transports. 2,100,694; Nov. 30.
Juntunen, Gust, Hancock, Mich. Ventilating apparatus for toilets. 2,100,962; Nov. 30.
Kaech, O. A. (See Le Compte, Frank H., assignor.)
Karl, Edward W., and J. H. White, Painesville, Ohio. Pen. 2,100,647; Nov. 30.
Kaufmann, Richard H., Schenectady, N. Y., assignor to General Electric Company. Generator regulation. 2,100,854; Nov. 30.
Kaupp, Raymond T., Portland, Oreg. Antiseptic for the treatment of genitourinary infections. 2,100,781; Nov. 30.
Keagy, E. J. L. W., et al. (See Hartman, Thomas L., assignor.)
Keasbey & Mattison Company. (See Beckwith, Charles J., assignor.)
Kelling, Alfred H., Chicago, Ill., assignor to International Patents Development Company, Wilmington, Del. Manufacture of starch. 2,100,744; Nov. 30.
Kellogg, Alfred A., Troy, assignor to James Ackroyd and Sons, Albany, N. Y. Skylight. 2,100,782; Nov. 30.
Kellogg, Glenn E. (See Weinhart, Theodore P., assignor.)
Kellogg, M. W., Co., The. (See Austin, Harold R., assignor.)
Kelly, Norval R., Douglaston, Long Island, N. Y. Oil applicator. 2,100,855; Nov. 30.
Kelsey-Hayes Wheel Company. (See Bierwirth, Edwin A., assignor.)
Kelty, Harry A., New Castle, Pa. Charge forming device. 2,100,511; Nov. 30.
Kendrick, James R., Co. (See Fox, William J., assignor.)
Kendrick, James R., Co. (See Kendrick, Arthur B., assignor.)
Kendrick, Arthur B., East Orange, N. J., assignor to James R. Kendrick Co., Inc., Philadelphia, Pa. Surgical belt. 2,100,964; Nov. 30.
Kennedy, Frank W., assignor to De Laval Steam Turbine Company, Trenton, N. J. Deep well pump. 2,100,560; Nov. 30.
Kennon, L. H. (See Snell, Owens C., assignor.)
Kepner, Robert C. (See Johnson, W. V., and Kepner.)
Kern, Bernard, Syracuse, N. Y. Carpet and floor cleaner. 2,100,806; Nov. 30.
Kersenbrock, William J., Brentwood, Mo. Trotline rack. 2,100,763; Nov. 30.
Keyser, Merriel D., Edgewood Arsenal, Md. Artificial lure. 2,100,963; Nov. 30.
Killefer Manufacturing Corporation. (See Killefer, Robert, assignor.)
Killefer, Robert, Los Angeles, Calif., assignor, by mesne assignments, to Killefer Manufacturing Corporation. Revolving ripper. 2,100,856; Nov. 30.
King, George E., Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Motor operated feed control. 2,100,745; Nov. 30.
Kinley, Myron M., Tulsa, Okla. Apparatus for cleaning the screen in a well. 2,100,807; Nov. 30.
Kintzele, Julius H., St. Louis, Mo. Bottle emptying and beverage reclaiming device. 2,100,443; Nov. 30.
Kinzie, Charles J., Niagara Falls, assignor to The Titanium Alloy Manufacturing Company, New York, N. Y. Zirconium oxide opacifier and making same. 2,100,337; Nov. 30.
Kirkland, Andrew J., West Palm Beach, Fla. Grinder and sharpener attachment for meat grinders. 2,100,808; Nov. 30.
Kirschner, Henry J. (See Ahnen, J. O., and Kirschner.)
Klangfilm G. m. b. H. (See Görisch, Rolf, assignor.)
Kleb, Earl A., and J. C. Metzger, St. Louis, Mo. Deodorizer. 2,100,764; Nov. 30.
Kliesrath, Victor W., South Bend, Ind., assignor to The Steel Wheel Corporation, Chicago, Ill. Vehicle. 2,100,561; Nov. 30.
Kline, Emil, Buffalo, N. Y., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del. Regenerated cellulose structure and preparing same. 2,100,398; Nov. 30.
Knapp, Leland G., Chicago, Ill. Crankcase assembly and making the same. 2,100,603; Nov. 30.
Knowles, Dewey D., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Photosensitive apparatus. 2,100,765; Nov. 30.
Knox, Harry A., Washington, D. C. Suspension for vehicles. 2,100,338; Nov. 30.
Koch, Lawrence E. (See Phelan, L. A. M., and Koch.)
Koenig, Walter J., assignor to Sloane-Blabon Corporation, Trenton, N. J. Composition and drying of the same. 2,100,484; Nov. 30.
Koffman, Phillip. (See Wachowski, George A., assignor.)
Kollsman, Paul, New York, N. Y. Instrument mounting. 2,100,604; Nov. 30.
Kolorama Laboratories, Inc. (See Clothier, S. L., and Hogencamp, assignors.)
Koppers Company. (See Becker, Joseph, assignor.)
Koppers Company. (See Van Ackeren, Paul, assignor.)
Kotowski, Stephen K., assignor to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Glass sheet supporting means. 2,100,512; Nov. 30.
Kozlowski, Wladyslaw, Torrington, Conn. Exhaust valve for internal combustion engines. 2,100,783; Nov. 30.
Kramer, Clarence F., Detroit, assignor to Ford Motor Company, Dearborn, Mich. Automobile seat track construction. 2,100,546; Nov. 30.
Kronquest, Alfred L., Syracuse, assignor to Continental Can Company, Inc., New York, N. Y. Machine for assembling cap valves for containers. 2,100,596; Nov. 30.
Kuskie, Ralph, Grant, Nebr. Pitman. 2,100,965; Nov. 30.
Lackey, John W., North Creek, N. Y. Automatic safety lighting system. 2,100,695; Nov. 30.
La Fleur, Elphege D. (See Gould, G. S., and La Fleur.)
Laing, David A. S., Montreal, Quebec, Canada, assignor to Western Electric Company, Incorporated, New York, N. Y. Powdered material applying apparatus. 2,100,399; Nov. 30.
Lally, Charles V., et al. (See Bates, George A., assignor.)
Lambert, Joseph, Pittsburg, Kans. Insect trap. 2,100,966; Nov. 30.
Landis Machine Company. (See Nell, Frederic, assignor.)
Lang, Boris M., Fairfield, Conn. Device and method for acquiring rhythm in study of music. 2,100,857; Nov. 30.
Larocca, James, Chicago, assignor to Speedway Manufacturing Company, Cicero, Ill. Self-starting single phase alternating current induction motor. 2,100,809; Nov. 30.
La Rock, Vela A. (See Bucy, F. L., and La Rock.)
Lautz, Carl F. (See Peo, R. F., Lautz, and Magrum.)
Lavett, Charles O., assignor to Buffalo Foundry & Machine Co., Buffalo, N. Y. Rotary drier. 2,100,444; Nov. 30.
Lawson, Gottfrid C., and C. Lindquist, Cleveland, Ohio. Fastener. 2,100,648; Nov. 30.
Lawson, Robert H., Pawtucket, assignor to Hemphill Company, Central Falls, R. I. Knitting machine. 2,101,005; Nov. 30.
Lawson, Robert H., Pawtucket, and A. Gagne, assignors to Hemphill Company, Central Falls, R. I. Yarn change mechanism for knitting machines. 2,101,006; Nov. 30.
Le Bleu, Charles, Los Angeles, Calif. Trail builder. 2,100,445; Nov. 30.
Le Blond, R. K., Machine Tool Company. (See Groene, William F., assignor.)
Le Compte, Frank H., assignor of one-half to O. A. Keach, Wichita, Kans. Gas burner. 2,100,995; Nov. 30.
Leece, Bennett M., Shaker Heights, assignor to The Leece-Neville Company, Cleveland, Ohio. Generator regulation. 2,100,905; Nov. 30.
Leece-Neville Company, The. (See Leece, Bennett M., assignor.)
Lefkowitz, Emil, Comstock, N. Y. Seat and seat cover actuating mechanism for toilets. 2,100,906; Nov. 30.
Lehmann, Arthur E. (See Martin, L. W., and Lehmann.)
Leister, Fayette, and J. W. Smith, assignors to The Fafnir Bearing Company, New Britain, Conn. Bearing seal. 2,101,013; Nov. 30.
Lenk, Ernest A., assignor of one-half to G. H. Morningstar, Philadelphia, Pa. Container. 2,100,858; Nov. 30.
Leonard, John R. (See McCormack, J. F., and Leonard.)
Levy, Howard S. (See Levy, Lionel F., assignor.)
Levy, Lionel F., Philadelphia, assignor of fifty one-hundredths to H. S. Levy, Feasterville, Pa. Camera. 2,100,967; Nov. 30.
Lewin, Desmond G. (See Collard, C., and Lewin.)
Libbey-Owens-Ford Glass Company. (See Kotowski, Stephen K., assignor.)
Libbey-Owens-Ford Glass Company. (See White, Gerald, assignor.)
Lillemoen, Thorwald. (See Stahle, John A., assignor.)
Lilienfeld, Leon, Vienna, Austria. Manufacture of organic sulphur compounds. 2,100,968; Nov. 30.
Lilienfeld, Leon, Vienna, Austria. Making artificial threads. 2,100,969; Nov. 30.
Linde, Leonard J., Aldan, Pa., assignor to General Electric Company. Clamping and sealing device. 2,100,859; Nov. 30.
Lindemann, Peter A., Downsville, N. Y. Drain valve for compressed air reservoirs and the like. 2,100,485; Nov. 30.
Lindenmuth, Arlington N. (See Blakley, V. A., and Lindenmuth.)
Lindgren, Henry W., Waukegan, Ill., assignor to American Can Company, New York, N. Y. Opening device. 2,100,339; Nov. 30.
Lindquist, Carl. (See Lawson, G. C., and Lindquist.)
Line Material Company. (See Steinmayer, Alwin G., assignor.)
Linotype and Machinery Limited. (See Hayward, A. S., and Dougall, assignors.)

Linsell, Alfred A., London, England, assignor to Radio Corporation of America. Radio receiving system. 2,100,605; Nov. 30.
Linstead, Reginald P., South Kensington, London, and A. R. Lowe, Blackley, Manchester, England, assignors to Imperial Chemical Industries Limited. Manufacture of ortho- and peri-aryl dinitriles. 2,100,401; Nov. 30.
Lipman, Carl E. L., assignor to Lipman Patents Corporation, Chicago, Ill. Motor-compressor unit for refrigerating apparatus. 2,100,716; Nov. 30.
Lipman Patents Corporation. (See Lipman, Carl E. L., assignor.)
Lippitt, Stephen W., Cleveland, Ohio. Buffing wheel. 2,100,340; Nov. 30.
Lippold, Adolph J., Milwaukee, Wis., assignor to Cherry-Burrell Corporation, Chicago, Ill. Overload clutch. 2,100,502; Nov. 30.
Livermore, William T., Westfield, N. J. Transmission. 2,100,810; Nov. 30.
Lobley, Frederick A., assignor to Dr. Miles Laboratories, Inc., Elkhart, Ind. Tablet crushing and dispensing device. 2,100,860; Nov. 30.
Lockhead, Elmer C., assignor of one-half to C. R. Henderson, Moberly, Mo. Knitted fabric. 2,100,861; Nov. 30.
Lock Joint Pipe Company. (See Trickey, William W., assignor.)
Loeb, H., & Co. (See Oscard, Robert S., assignor.)
Loeb, Joseph B., Brookline, Mass. Necktie. 2,100,696; Nov. 30.
Loewe, Siegmund, Berlin, Germany. Braun tube and producing braun tubes. 2,100,697; Nov. 30.
Lofton, Herbert M., Chattanooga, Tenn. Fire hydrant. 2,100,862; Nov. 30.
Lohr, Raymond, Erie, Pa., assignor to Louis Marx & Company, Inc., New York, N. Y. Dancing figure toy. 2,100,486; Nov. 30.
Long, Charles J. (See Congdon, T. B., and Long.)
Lord, Harold W., Schenectady, N. Y., assignor to General Electric Company. Electric valve circuit. 2,100,863; Nov. 30.
Louisville Electric Manufacturing Co. (See McFerran, John B., Jr., assignor.)
Lowe, Arthur R. (See Linstead, R. P., and Lowe.)
Lowell, Percival D., Chevy Chase, Md., assignor to Radio Corporation of America, New York, N. Y. Superheterodyne receiving system. 2,100,606; Nov. 30.
Ludeman, Clifford G. (See Pevere, E. F., and Ludeman.)
Luhnow, Harold W. (See McGehee, W. L., and Luhnow.)
Lumsden, Colin H. (See Haddock, N. H., and Lumsden.)
Lute, Carl, Hammond, Ind., assignor, by mesne assignments, to The Youngstown Steel Door Company, Cleveland, Ohio. Car door support. 2,100,784; Nov. 30.
Lydon-Bricher Mfg. Co. (See Schmidt, C. A., and Bricher, assignors.)
Lyman, Arthur L., and M. M. Holm, Berkeley, assignors to Standard Oil Company of California, San Francisco, Calif. Dewaxing petroleum oils. 2,100,662; Nov. 30.
Lyons, Walter, Flushing, N. Y., assignor to Hazeltine Corporation. Multiband inductance unit. 2,100,402; Nov. 30.
Mabee, Alexander C., Villa Park, assignor to Oakes Products Corporation, North Chicago, Ill. Automobile lock. 2,100,717; Nov. 30.
Mabee, Alexander C., Villa Park, assignor to Oakes Products Corporation, North Chicago, Ill. Automobile lock. 2,100,718; Nov. 30.
Macdonald, Murdock, Cleveland Heights, Ohio. Coin register. 2,100,446; Nov. 30.
Mack Manufacturing Corporation. (See Wirrer, G., and Day, assignors.)
MacKenzie, Wilbur L., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Shoe bottom coating machine. 2,100,341; Nov. 30.
MacKenzie, Wilbur L., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Nozzle for extruding machines. 2,100,342; Nov. 30.
MacMullen, John S., San Francisco, Calif. Automatic safety brake for motor vehicles. 2,100,970; Nov. 30.
Macpherson, John M., and J. A. Stodgell, North Bay, Ontario, Canada. Brake applying and equalizing mechanism for motor cars. 2,100,503; Nov. 30.
Macwhyte Company. (See Russell, William C., assignor.)
Maddox, Robert D., Cincinnati, Ohio. Invalid lifter. 2,100,663; Nov. 30.
Magrum, Gervase M. (See Peo, R. F., Lautz, and Magrum.)
Mahaffey, Lester L., Carrier, Okla. Trailer hitch. 2,100,447; Nov. 30.
Maher, Charles J., Los Angeles, Calif. Well reamer. 2,101,007; Nov. 30.
Maier, Hans. (See Hessel, G., and Maier.)
Malloy, Frank J. (See Donovan, J. F., and Malloy.)
Mancuso, Ralph J., Brooklyn, assignor, by mesne assignments, to Carl Percy, Inc., New York, N. Y. Display device. 2,100,403; Nov. 30.
Mandl, Siegmund, and E. M. Pfauser, assignor to Blackhawk Mfg. Co., Milwaukee, Wis. Producing a pulling stress and hydraulic pulling mechanism. 2,100,564; Nov. 30.
Mansur, Clarence W., Malden, Mass., assignor to General Electric Company. Golf club and making same. 2,100,864; Nov. 30.
Marcott, Albert F., San Diego, Calif. Automatic change speed transmission. 2,100,565; Nov. 30.
Marlow, Alfred S. (See Stratton, Albert C., assignor.)
Marsden, John E., Philadelphia, Pa. Coffee maker. 2,100,487; Nov. 30.
Marsh, Jas. P., Corporation. (See Seegers, Hans, assignor.)
Marshall, William, assignor to Briggs Manufacturing Company, Detroit, Mich. Refrigerator cabinet. 2,100,811; Nov. 30.
Marshall, William, assignor to Briggs Manufacturing Company, Detroit, Mich. Trim panel assembly. 2,100,812; Nov. 30.
Martin, Clarence V., Toledo, Ohio, assignor to The National Supply Company, Pittsburgh, Pa. Supplementary controlled draft for fuel burners. 2,100,547; Nov. 30.
Martin, Louis W., St. Louis, and A. E. Lehmann, St. Charles, Mo., assignors to American Car and Foundry Company, New York, N. Y. Convertible coach and sleeper. 2,100,607; Nov. 30.
Marx, Louis, & Company. (See Lohr, Raymond, assignor.)
Maschinenfabrik Augsburg-Nurnberg A. G. (See Fohrer, Friedrich, assignor.)
Mason, Warren P., East Orange, N. J., G. T. Stanton, Mamaroneck, N. Y., and J. E. Tweeddale, Newark, N. J.; said Mason assignor to Bell Telephone Laboratories, Incorporated; said Stanton and said Tweeddale, assignors to Electrical Research Products, Inc., New York, N. Y. Fluid transmission. 2,100,404; Nov. 30.
Master Electric Company, The. (See Berger, A. F., and Voege.)
Mathieson Alkali Works, Inc., The. (See Taylor, M. C., and White, assignors.)
Maxim Silencer Company, The. (See Bourne, Roland B., assignor.)
Maxin, David J., assignor to Smith, Kline & French, Inc., Philadelphia, Pa. Display rack. 2,100,548; Nov. 30.
Maxwell, J. & W., Limited. (See Wilson, Arthur, assignor.)
Maycen, Othmar, New York, N. Y., assignor to Clarence N. Wheeler, Glen Ridge, N. J. Fluid actuated device. 2,100,343; Nov. 30.
Mayer, Frederick, assignor to Cornell Center Homeopathic Bird Remedy Co., Inc., New York, N. Y. Mite killer attachment for bird cage perches. 2,101,008; Nov. 30.
McCarthy, Richard J. (See Fritz, A., and McCarthy.)
McClure, Ernest H. (See Wayman, Albert J., assignor.)
McClure, Robert E., assignor, by mesne assignments, to The Wean Engineering Co., Inc., Warren, Ohio. Clock controlled contact mechanism. 2,100,664; Nov. 30.
McCormack, John F., New Haven, and J. R. Leonard, Gales Ferry, Conn. Temperature controlled safety electric switch. 2,100,665; Nov. 30.
McCutcheon, William A., East Williston, assignor to Muzak Corporation, New York, N. Y. Coin selection program system. 2,100,608; Nov. 30.
McDerment, James H., assignor to The Swartwout Company, Cleveland, Ohio. Ridge ventilator. 2,100,785; Nov. 30.
McDonald, John, Brooklyn, N. Y. Plate glass carrying truck. 2,100,971; Nov. 30.
McFerran, John B., Jr., assignor to Louisville Electric Manufacturing Co., Louisville, Ky. Motor driven food churning device. 2,100,549; Nov. 30.
McGehee, Wallace L., and H. W. Luhnow, Kansas City, Mo. Apparatus for manufacturing dried feed. 2,100,907; Nov. 30.
McKemie, Will, Sr. (See Scheurer, Paul P., assignor.)
McLaren, William P. (See Bashford, F. G. C., and McLaren.)
McLean, Robert W., Bridgewater, assignor to Carver Cotton Gin Company, East Bridgewater, Mass. Gin. 2,100,786; Nov. 30.
Medart, Gustav H., Los Angeles, Calif. Buffing hood. 2,100,344; Nov. 30.
Merdan, Alexander, New York, N. Y. Combined light and fire alarm casing. 2,100,908; Nov. 30.
Merrill Company, The. (See Mills, L. D., Crowe, and Haun, assignors.)
Mershon, Lester E., assignor to Fray-Mershon, Inc., Los Angeles, Calif. Vise. 2,100,513; Nov. 30.
Metallbillard A. G. (See Seifert, Richard, assignor.)
Metzger, Joseph C. (See Kleb, E. A., and Metzger.)
Mishaels, Louis J., Dayton, Ky. Air compressor. 2,100,972; Nov. 30.
Micro-Westco, Inc. (See Petskeyes, Charles H., assignor.)
Miehle Printing Press and Manufacturing Company, The. (See Jacobson, Arthur G., assignor.)
Miles, Dr., Laboratories, Inc. (See Lobley, Frederick A., assignor.)
Miller, Elmer E., and H. L. Miller, Millersburg, Pa. Sliding cheek piece for guns. 2,100,514; Nov. 30.
Miller, Fred. (See Cervenka, W. F., and Miller.)
Miller, Henry J., Maplewood, N. J., and E. W. Schafer, New York, N. Y., assignors, by mesne assignments, to Radio Corporation of American. Gettering vacuum tube. 2,100,746; Nov. 30.
Miller, Howard L. (See Miller, Elmer E. and H. L.)
Miller, Max C., Cumberland, R. I. Knitting machine. 2,100,345; Nov. 30.
Mills, Louis D., and T. B. Crowe, Palo Alto, and J. C. Haun, assignors to The Merrill Company, San Francisco, Calif. Cyanide process. 2,100,865; Nov. 30.
Mirossay, Chrysanth M. (See Burger, W. J., and Mirossay.)

Misuraca, William N., Merrick, N. Y., assignor to Photocylinder Corporation. Intaglio printing elements and producing the same. 2,100,346; Nov. 30.
Mitchell, Donald H., assignor to Galvin Manufacturing Corporation, Chicago, Ill. Radio tuning apparatus. 2,101,009; Nov. 30.
Mitchell, Frank A., London, assignor to Electric and Musical Industries Limited, Hayes, Middlesex, England. Control means. 2,100,609; Nov. 30.
Modern Equipment Company. (See Goldberg, M. W., and Drissen, assignors.)
Modine Manufacturing Company. (See Perkins, Charles T., assignor.)
Monach Governor Company. (See Hufford, Raymond, assignor.)
Monsanto Chemical Company. (See Harman, Marion W., assignor.)
Monsanto Chemical Company. (See Harris, Morton, assignor.)
Monsanto Chemical Company. (See Sibley, Robert L., assignor.)
Monsanto Chemical Company. (See Thomas, Charles A., assignor.)
Moore, Daniel F., North Bend, and M. A. Wicks, Seattle, Wash. Fireproofing wood, and products therefrom. 2,100,787; Nov. 30.
Moore, John N., assignor of one-half to T. G. Drake, Oklahoma City, Okla. Gate valve. 2,100,996; Nov. 30.
Moore, Wesley W., Hobbs, N. Mex., assignor to The Texas Company, New York, N. Y. Emergency shut-off valve. 2,100,550; Nov. 30.
Moos, N. H., et al. (See Honigmann, E., and Bruckmayer, assignors.)
Mora, Arnufo, El Paso, Tex. Automatic roach trap. 2,100,909; Nov. 30.
Morgan, Andrew L., Houston, Tex. Tank cleaner. 2,100,813; Nov. 30.
Mörner, Eric G., Stockholm, Sweden. Grenade. 2,100,698; Nov. 30.
Morningstar, George H. (See Lenk, Ernest A., assignor.)
Morris, Howard A., Toledo, Ohio. Manufacture of oleomargarine. 2,100,866; Nov. 30.
Morris, Joseph C., Verdun, Quebec, Canada, assignor to Western Electric Company, Incorporated, New York, N. Y. Coating apparatus. 2,100,405; Nov. 30.
Morrison, Charles E. (See Doolittle, J. B., and Morrison.)
Morrison, John R., Newport News, Va., assignor, by mesne assignments, to J. Stuart Fleming, Niagara Falls, N. Y. Manifolding book. 2,100,814; Nov. 30.
Morrison, Willard L., Lake Forest, Ill. Air deflecting device for automobiles. 2,100,406; Nov. 30.
Moses, Graham L. (See Willby, N. H., and Moses.)
Mossberg, Harold F., assignor to O. F. Mossberg & Sons, Inc., New Haven, Conn. Audible indicating adjusting device. 2,100,649; Nov. 30.
Mossberg, O. F., & Sons, Inc. (See Mossberg, Harold F., assignor.)
Motor Improvements, Inc. (See Irwine, Robert L., assignor.)
Motor Terminals Company. (See Fitch, Benjamin F., assignor.)
Mouromtseff, Ilia E., Wilkinsburg, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Recirculating water jacket. 2,100,747; Nov. 30.
Moyer, Amos F., assignor to Toro Manufacturing Corporation of Minnesota, Minneapolis, Minn. Gang lawn mower. 2,100,910; Nov. 30.
Müller, Alfred, Munich, Germany. Skibinding. 2,100,666; Nov. 30.
Munding, Oscar L., Glendale, Calif. Router. 2,100,566; Nov. 30.
Muzak Corporation. (See McCutcheon, William A., assignor.)
Nanfeldt, William, Clifton, assignor to World Bestos Corporation, Paterson, N. J. Woven brake lining, yarn, and process for making same. 2,100,347; Nov. 30.
National Drug Company, The. (See Paisley, E. S., and Peters, assignors.)
National Parkhurst Systems, Inc. (See Parkhurst, Layton M., assignor.)
National Supply Company, The. (See Martin, Clarence V., assignor.)
Natural Food Products Company. (See Souther, C. W., and Farnsworth, assignors.)
National Standard Company. (See Hamilton, Lawrence H., assignor.)
National Standard Company. (See Hamilton, Lawrence H., assignor.)
Naylor, Clayton W., Eaton Rapids, Mich. Internal brake. 2,100,973; Nov. 30.
Neilson, Raymond F., Detroit, Mich. Soldering preparation. 2,100,974; Nov. 30.
Nell, Frederic, assignor to Landis Machine Company, Waynesboro, Pa. Collapsible tap. 2,100,448; Nov. 30.
Nell, Frederic, assignor to Landis Machine Company, Waynesboro, Pa. Thread forming mechanism. 2,100,449; Nov. 30.
Nelson, Adolph L., Detroit, Mich. Piston. 2,100,719; Nov. 30.
Nelson, Andrew W., assignor to Columbian Enameling & Stamping Co., Inc., Terre Haute, Ind. Knob attaching means. 2,100,567; Nov. 30.
Nelson, Peter, San Francisco, Calif., assignor to Stauffer Chemical Company. Carboy cap construction. 2,100,450; Nov. 30.
Neumann, Leopold, Vienna, Austria, assignor to Ronag A.-G., Chur, Switzerland. Sound recording. 2,100,975; Nov. 30.
Nichols, A. S., Western Company. (See Stilson, Herbert A., assignor.)
Nickels & Lauber. (See Phillips, Joseph, assignor.)
Nicolson, Alexander McL., assignor to Communication Patents, Inc., New York, N. Y. Light beam transmission system. 2,100,348; Nov. 30.
Norrid, James H., Detroit, Mich. Shingle. 2,100,699; Nov. 30.
Norris, Jabez H., Covington, Ky. Combination fixture and wall unit with joints and trims therefor. 2,100,568; Nov. 30.
Norton, Chester H., Louisville, Ky. Venetian shade. 2,100,976; Nov. 30.
Oakes Products Corporation. (See Mabee, Alexander C., assignor.)
O'Connor, Raymond C., assignor to Union Railway Equipment Company, Chicago, Ill. Hand brake mechanism. 2,100,349; Nov. 30.
Oliver United Filters Incorporated. (See Hillier, Gerald O., assignor.)
Oliver, Walter E., Somerville, Mass. Autographic register. 2,100,911; Nov. 30.
Oliver, Walter E., Somerville, Mass. Autographic register. 2,100,912; Nov. 30.
Olson, Olaf M., Margate, N. J., assignor to General Electric Company. Air conditioning system. 2,100,867; Nov. 30.
Olsson, Eric, Jersey City, N. J. Nonglare head lamp. 2,100,913; Nov. 30.
Oppenheimer, Arthur, Jr., New York, N. Y. Slip cover for furniture. 2,100,868; Nov. 30.
Oregon Worsted Company. (See Fisher, Ralph K., assignor.)
Orsino, Joseph A., East Cleveland, assignor to Willard Storage Battery Company, Cleveland, Ohio. Storage battery. 2,100,914; Nov. 30.
Oscard, Robert S., assignor to H. Loeb & Co., Inc., New York, N. Y. Garment. 2,100,869; Nov. 30.
Osgood, Charles F., Claremont, N. H., assignor to Sullivan Machinery Company. Mining apparatus. 2,100,350; Nov. 30.
Outboard Motors Corporation. (See Irgens, Finn T., assignor.)
Pabodie, Robert R., assignor to J. F. Pritchard & Company, Kansas City, Mo. Cooling tower. 2,100,667; Nov. 30.
Page, John H., assignor to The Shaw-Walker Company, Muskegon, Mich. Letter tray. 2,100,720; Nov. 30.
Paisley, Ellwood S., and A. F. Peters, assignors to The National Drug Company, Philadelphia, Pa. Gas filter. 2,100,610; Nov. 30.
Palmgren, Nils A., assignor to Aktiebolaget Svenska Kullagerfabriken, Goteborg, Sweden. Radial plain bearing. 2,100,608; Nov. 30.
Paper Sacks Limited. (See Robinson, Foster G., assignor.)
Papoutsis, Konstantinos S., Chicago, Ill. Heater. 2,100,766; Nov. 30.
Parkhurst, Layton M., assignor to National Parkhurst Systems, Inc., Lackawanna, N. Y. Building construction. 2,100,451; Nov. 30.
Parks-Cramer Company. (See Reavell, James A., assignor.)
Parsons, Donald E. (See Pickle, M. McD., and Parsons.)
Parsons, John S., Swissvale, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Buried type distribution transformer. 2,100,721; Nov. 30.
Pass & Seymour, Inc. (See Despard, Victor R., assignor.)
Patentaktiebolaget Ambia. (See Pettersson, Hjalmar L., assignor.)
Patent Button Company, The. (See Purinton, Forrest G., assignor.)
Patent Sales, Inc. (See Flint, Hyland C., assignor.)
Patrick, Joseph C., Trenton, N. J. Making plastic substances and product obtained. 2,100,351; Nov. 30.
Patterson, William G., Mottingham, and R. G. Dixon, Eltham, assignors to Siemens Brothers & Company Limited, London, England. Telephone system. 2,100,515; Nov. 30.
Paulson, Kristian, Farrell, and R. O. Hurst, Sharon, assignors to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Switch operating mechanism. 2,100,722; Nov. 30.
Pecker, Joseph S., Philadelphia, Pa., assignor to American Centrifugal Corporation, New York, N. Y. Centrifugal separating machine and treating sludges. 2,100,669; Nov. 30.
Pennsylvania Salt Manufacturing Company. (See Davies, Richard L., assignor.)
Peo, Ralph F., C. F. Lautz, and G. M. Magrum, assignors to Houde Engineering Corporation, Buffalo, N. Y. Valving assembly for hydraulic shock absorbers. 2,100,407; Nov. 30.
Percy, Carl, Inc. (See Mancuso, Ralph J., assignor.)

Perkins, Charles T., assignor to Modine Manufacturing Company, Racine, Wis. Grille structure. 2,100,767; Nov. 30.
Perry, Elvis E. (See Pond, H. A., and Perry.)
Peters, Allen F. (See Paisley, E. S., and Peters.)
Peters, Andrew. (See Talbot, C. H., and Peters.)
Petrie, Edward R. and N. M., New York, N. Y. Necktie. 2,100,870; Nov. 30.
Petrie, Nellie M. (See Petrie, Edward R. and N. M.)
Petroleum Conversion Corporation. (See Sachs, Albert P., assignor.)
Petskeyes, Charles H., Davenport, assignor to Micro-Westco, Inc., Bettendorf, Iowa. Bread slicing machine. 2,101,010; Nov. 30.
Pettersson, Hjalmar L., assignor to Patentaktiebolaget Ambla, Stockholm, Sweden. Testing metal articles. 2,100,977; Nov. 30.
Pevere, Ernest F., Beacon, assignor to The Texas Company, New York, N. Y. Removal of wax from hydrocarbon oil. 2,100,915; Nov. 30.
Pevere, Ernest F., and C. G. Ludeman, Beacon, assignors to The Texas Company, New York, N. Y. Removal of wax from hydrocarbon oil. 2,100,916; Nov. 30.
Pfauser, Edward M. (See Mandl, S., and Pfauser.)
Pfeiffer, William C. (See Stern, M. C., and Pfeiffer.)
Phelan, Louis A. M., Chicago, Ill., and L. E. Koch, Beloit, Wis. Cabinet. 2,100,871; Nov. 30.
Phillips, Joseph, assignor to Nickels & Lauber, Philadelphia, Pa. Mechanism for the automatic selection and operation of flat knitting machine thread carrier bars. 2,100,611; Nov. 30.
Phillips, Roy, Dallas, Tex. Structure for supporting plaster coating. 2,100,650; Nov. 30.
Photo-Cylinder Corporation. (See Misuraca, William N., assignor.)
Pickle, Marion McD., and D. E. Parsons, Knoxville, Tenn. Combined chair and desk. 2,100,597; Nov. 30.
Pier, Mathias, Heidelberg, W. Simon, and P. Jacob, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Catalytic reaction. 2,100,352; Nov. 30.
Pier, Mathias, Heidelberg, and E. Donath, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Production of hydrocarbons of low boiling point. 2,100,353; Nov. 30.
Pier, Mathias, Heidelberg, W. Simon, and G. Grassl, Ludwigshafen-on-the-Rhine, Germany, assignors to Standard-I. G. Company, Linden, N. J. Treatment with hydrogenating gases of distillable carbonaceous materials. 2,100,354; Nov. 30.
Pitt Corporation, The. (See Pitt, William P. and F. D., assignors.)
Pitt, Frederick D. (See Pitt, William P. and F. D.)
Pitt, William P. and F. D., assignors to The Pitt Corporation, Kansas City, Mo. Fare receptacle. 2,101,011; Nov. 30.
Platt, Herbert, Cumberland, Md., assignor to Celanese Corporation of America. Finish for fabrics of organic derivatives of cellulose. 2,100,408; Nov. 30.
Plumb, Roy A. (See Woodhead, H., Plumb, and Sindelar.)
Pond, Hoyt A., and E. E. Perry, Port Arthur, Tex., assignors to The Texas Company, New York, N. Y. Cleaning of filter surfaces. 2,101,012; Nov. 30.
Ponig, William. (See Bent, F. A., Wik, and Ponig.)
Poor & Company. (See Disbrow, Clarkson A., assignor.)
Porter, Amyas L., Oakland, Calif. Bicycle lock. 2,100,917; Nov. 30.
Porter, Donald C., San Diego, Calif. Vehicle direction signal. 2,100,409; Nov. 30.
Potts, Charles R., Klamath Falls, Oreg. Trailer. 2,100,612; Nov. 30.
Pray Research Corporation. (See Pray, William O., assignor.)
Pray, William O., assignor to Pray Research Corporation, De Beque, Colo. Method and apparatus for utilizing molten material in heat treatment of liquids not miscible with the molten material. 2,100,355; Nov. 30.
Prince, David C., Swarthmore, Pa. Power transmission. 2,100,748; Nov. 30.
Pritchard, J. F., & Company. (See Pabodie, Robert R., assignor.)
Proctor & Schwartz, Incorporated. (See Black, Harold G., assignor.)
Proctor & Schwartz, Incorporated. (See Hurxthal, Alpheus O., assignor.)
Proctor & Schwartz, Inc. (See Schwartz, Walter M., assignor.)
Public, Dedicated to the Free Use of the. (See Smith, L. H., and Claborn.)
Pudelko, Hermann, assignor to Dürkoppwerke Aktiengesellschaft, Bielefeld, Germany. Cutting device for buttonhole or other sewing machines. 2,100,815; Nov. 30.
Pugsley, Edwin, assignor to Winchester Repeating Arms Company, New Haven, Conn. Take-down firearm. 2,100,410; Nov. 30.
Pulp Products Company. (See Heymann, Roy D., assignor.)
Purinton, Forrest G., assignor to The Patent Button Company, Waterbury, Conn. Fastening device for locking juxtaposed members together. 2,100,816; Nov. 30.
Quinn, Ada, Ogden, Utah. Apron. 2,100,817; Nov. 30.
Quint, Ferdinand. (See Dilthey, W., and Quint.)
Quintavalle, Umberto, assignor to Fabbrica Italiana Magneti Marelli Soc. An., Milan, Italy. Tuning dial for radio sets. 2,100,453; Nov. 30.
Radio Corporation of America. (See Linsell, Alfred A., assignor.)
Radio Corporation of America. (See Lowell, Percival D., assignor.)
Radio Corporation of America. (See Miller, H. J., and Schafer, assignors.)
Radio Corporation of America. (See Runge, Frank E., assignor.)
Radio Corporation of America. (See Salzberg, Bernard, assignor.)
Radio Corporation of America. (See Shepard, Francis H., Jr., assignor.)
Radio Corporation of America. (See Siemens, Rudolph H., assignor.)
Radioaktiengesellschaft D. S. Loewe. (See von Ardenne, Manfred, assignor.)
Ranco Incorporated. (See Raney, Estel C., assignor.)
Randall, Karl C., Edgewood, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Circuit breaker. 2,100,749; Nov. 30.
Randall, Meredith S., assignor to Woodall Industries Incorporated, Detroit, Mich. Visor construction. 2,100,872; Nov. 30.
Raney, Estel C., assignor to Ranco Incorporated, Columbus, Ohio. Circuit breaker. 2,100,788; Nov. 30.
Rasmussen, Olaf, Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich. Brake adjustment. 2,100,488; Nov. 30.
Raw, George, Ravenswood, Low Fell, England. Apparatus for the separation of solid materials of different specific gravities. 2,100,670; Nov. 30.
Read, Robert E., Watertown, N. Y. Container. 2,100,516; Nov. 30.
Reavell, James A., Westminster, London, England, assignor to Parks-Cramer Company, Fitchburg, Mass. Liquid circulation heating system. 2,100,671; Nov. 30.
Redier Conveyor Company. (See Sinden, Alfred D., assignor.)
Redman, Allen B., assignor to T. C. Wheaton Co., Millville, N. J. Glass doorknob. 2,100,818; Nov. 30.
Reiter, Daniel I., New York, N. Y. Radiator cover clip. 2,100,551; Nov. 30.
Rentier, Joseph, Columbus, Ohio. Identification device for automobiles. 2,100,598; Nov. 30.
Renleaux, Otto, assignor to Vereinigte Leichtmetall-Werke Gesellschaft mit beschrankter Haftung, Hanover, Germany. Increasing the corrosion resistance of aluminum alloys and products resulting therefrom. 2,100,411; Nov. 30.
Reymer & Brothers, Inc., et al. (See Hartman, Thomas L., assignor.)
Rheinlander, Paul, Hagen, in Westphalia, Germany, assignor to Askania-Werke A. G. vormals Central Werkstatt Dessau und Carl Bamberg-Friedenau. Apparatus for measuring and delivering gas quantities reduced to a normal condition. 2,100,978; Nov. 30.
Richards-Wilcox Manufacturing Company. (See Tamsitt, Joseph C., assignor.)
Richardson Company, The. (See Hess, Jack W., assignor.)
Richardson, Earl L., assignor to B. F. Sturtevant Company, Hyde Park, Mass. Fan. 2,100,489; Nov. 30.
Richardson, Rodney G., assignor, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Automatic telephone switch. 2,100,517; Nov. 30.
Richmond Screw Anchor Co. (See Schenk, Tamis C., assignor.)
Ringler, William A., Wayne, assignor to Carton Container Company, Philadelphia, Pa. Foldable box and blank therefor. 2,100,750; Nov. 30.
Ringman, Paul, St. Albans, N. Y. Adjustable nonslip ladder protector. 2,100,918; Nov. 30.
Rinkow, Otto, assignor to Siemens & Halske Aktiengesellschaft, Siemensstadt near Berlin, Germany. Impulse sender mechanism. 2,100,518; Nov. 30.
Rippingille, Edward V., assignor to General Motors Corporation, Detroit, Mich. Cooling system. 2,100,490; Nov. 30.
Ripsch, Charles W., and B. H. Wuebben, assignors to The Buckeye Portable Tool Company, Dayton, Ohio. Clutch mechanism for power operated portable tools. 2,100,532; Nov. 30.
Riszdorfer, Ödön, Budapest, Hungary. Photographic camera. 2,100,672; Nov. 30.
Ritenour, William H., Pittsburgh, Pa. Press bed lock-up. 2,100,356; Nov. 30.
Roberts, Clifford, Winchester, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Cementing machine. 2,100,452; Nov. 30.
Roberts, Russell M., Detroit, Mich. Dowel structure. 2,100,873; Nov. 30.
Robertson, Almon F., Kirkland Lake, Ontario, Canada. Gloves and mittens for miner's use. 2,100,491; Nov. 30.
Robinson, Foster G., assignor of one-half to Paper Sacks Limited, Bristol, England. Bag and like tubing machine. 2,100,519; Nov. 30.
Robinson, William R., Niles, Ohio. Equipment for making artificial ice. 2,100,520; Nov. 30.
Robinson, William R., Niles, Ohio. Ice can with integral air tube. 2,100,521; Nov. 30.

Robiolio, Raymond L. (See Berhman, J. W., and Robiolio.)
Roess, Louis C., and C. E. Cummings, Beacon, assignors to The Texas Company, New York, N. Y. Observation chamber for flowing liquids. 2,100,919; Nov. 30.
Rogers, William H., Washington, D. C. Unitary structure for supporting photoprinting apparatus. 2,100,920; Nov. 30.
Röhm & Haas Company. (See Bruson, Herman A., assignor.)
Rolph, Samuel W., Cleveland Heights, assignor to Willard Storage Battery Company, Cleveland, Ohio. Storage battery. 2,100,921; Nov. 30.
Ronag A.-G. (See Neumann, Leopold, assignor.)
Rosborough, William McL., Charlotte, N. C. Castellated nut blank. 2,100,357; Nov. 30.
Rowe, Allen W., Binghamton, N. Y. Foldable seat. 2,100,979; Nov. 30.
Rowntree, Leonard G., Philadelphia, Pa. Clinical surface thermometer. 2,100,613; Nov. 30.
Royse, James S., and P. R. Turner, assignors to Thomson Symon Co., Terre Haute, Ind. Paperboard printing plate and making same. 2,100,358; Nov. 30.
Runge, Frank E., Oaklyn, N. J., assignor to Radio Corporation of America. Record moving mechanism. 2,100,751; Nov. 30.
Russel, Philip S., assignor to Detroit Lubricator Company, Detroit, Mich. Pressure control device. 2,100,997; Nov. 30.
Russell, Harlow M., Chelsea, and M. H. Sidebotham, West Newton, assignors to Specialty Automatic Machine Company, Medford, Mass. Manufacture of printed paper articles. 2,100,522; Nov. 30.
Russell Manufacturing Company, The. (See Hendley, James A., assignor.)
Russell, William C., assignor to Macwhyte Company, Kenosha, Wis. Thimble for rope slings. 2,100,569; Nov. 30.
Ryan Coffee Corporation. (See Ryan, W. M., and Bold, assignors.)
Ryan, William M., and J. W. Bold, assignors to Ryan Coffee Corporation, Brooklyn, N. Y. Automatic weighing and feeding machine. 2,100,874; Nov. 30.
S K F Industries, Incorporated. (See Styri, Haakon, assignor.)
Sachs, Albert P., assignor to Petroleum Conversion Corporation, New York, N. Y. Cracking hydrocarbons. 2,100,922; Nov. 30.
Saeta, Samuel, Los Angeles, Calif. Device for filling containers with liquids. 2,100,359; Nov. 30.
Safety Vulcanizer Company. (See Grange, Leo O., assignor.)
Saleh, Gabriel E. R., New York, N. Y., assignor to Diamond Expansion Bolt Company, Inc., Garwood, N. J. Anchoring device. 2,100,570; Nov. 30.
Salley, Thomas P., Roselle, N. J. Skid chain applying device. 2,100,819; Nov. 30.
Salzberg, Bernard, East Orange, N. J., assignor, by mesne assignments, to Radio Corporation of America. Electron discharge device. 2,100,723; Nov. 30.
Saunders, Norman H., and P. Bakker, assignors, by mesne assignments, to Associated Electric Laboratories, Inc., Chicago, Ill. Automatic telephone system. 2,100,523; Nov. 30.
Scantlebury, Francis H., Brooklyn, N. Y. Illuminated measuring device. 2,100,875; Nov. 30.
Schafer, Elwood W. (See Miller, H. J., and Schafer.)
Schaper, Georg, Muelheim-Ruhr-Broich, Germany, assignor to Holzwarth Gas Turbine Co., San Francisco, Calif. Nozzle channel construction. 2,100,360; Nov. 30.
Schenk, Tamis C., assignor to Richmond Screw Anchor Co., Inc., Brooklyn, N. Y. Form tie. 2,100,614; Nov. 30.
Scheurer, Paul P., assignor to W. McKemie, Sr., Wichita Falls, Tex. Merchandising machine and apparatus. 2,100,752; Nov. 30.
Schlesinger, Kurt, Berlin, Germany. Relaxation oscillation generator. 2,100,700; Nov. 30.
Schlesinger, Kurt, Berlin, Germany. Braun tube. 2,100,701; Nov. 30.
Schlesinger, Kurt, Berlin, Germany. Arrangement for producing relaxation oscillations. 2,100,702; Nov. 30.
Schlesinger, Kurt, Berlin, Germany. Braun tube and producing the same. 2,100,703; Nov. 30.
Schmidt, Carl A., and H. D. Bricher, assignors to Lydon-Bricher Mfg. Co., St. Paul, Minn. Fan with collapsible support. 2,100,923; Nov. 30.
Schmidt, Erwin J. (See Grange, E. A., and Schmidt, assignors.)
Schneider, Elbert D., Scotia, N. Y., assignor to General Electric Company. Control device. 2,100,876; Nov. 30.
Schofield, Stanley T., Wilkinsburg, and S. H. Boden, Turtle Creek, assignors to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Circuit interrupter. 2,100,753; Nov. 30.
Schroeder, Simon E., Chicago, Ill. Humidifier. 2,100,454; Nov. 30.
Schuknecht, Julius, Middle Village, N. Y. Envelope closure. 2,100,768; Nov. 30.
Schulthess, Oskar, and C. Theiler, assignors to the firm of Society of Chemical Industry in Basle, Basel, Switzerland. Mixing and grinding mill. 2,100,599; Nov. 30.
Schur, Milton O., assignor to Brown Company, Berlin, N. H. Manufacture of curviform hollow articles from binder-impregnated water-laid felts. 2,100,651; Nov. 30.
Schutt, William A., Litchfield, Ill. Face mask and button type pad. 2,100,553; Nov. 30.
Schwander, Erwin F., assignor to Societe d'Etudes des Vehicules "Sev", Reichshoffen, France. Device for the combined control of the admision of air and of fuel in automatic heavy-oil furnaces. 2,100,673; Nov. 30.
Schwartz, Walter M., assignor to Proctor & Schwartz, Incorporated, Philadelphia, Pa. Disk fan. 2,100,980; Nov. 30.
Scott, Herbert J., Oakland, Calif., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Temperature-compensated device. 2,100,412; Nov. 30.
Scott & Williams, Incorporated. (See Coleman, William, assignor.)
Seegers, Hans, assignor to Jas. P. Marsh Corporation, Chicago, Ill. Pressure gauge. 2,100,754; Nov. 30.
Seifert, Richard, Vienna, Austria, assignor to Metallbillard A. G., Chur, Switzerland. Construction of billiard tables. 2,100,981; Nov. 30.
Sengebusch, Hans. (See Woodruff, A. E., and Sengebusch.)
Sengebusch, Hans, Villa Park, assignor to associated Electric Laboratories, Inc., Chicago, Ill. Switch mechanism. 2,100,524; Nov. 30.
Severance, Myron, Rochester, Mich. Milk stool. 2,100,877; Nov. 30.
Shallock, Edward W., assignor to American Ore Reclamation Company, Chicago, Ill. Sintering system. 2,100,878; Nov. 30.
Shaw-Walker Company, The. (See Page, John H., assignor.)
Shealy, Heyward, Hendersonville, N. C. Lug strap holder. 2,100,820; Nov. 30.
Shell Development Company. (See Bent, F. A., Wik, and Ponig, assignors.)
Shell Development Company. (See Engs, W., and van de Griendt, assignors.)
Shell Development Company. (See Welikanov, Alexander G., assignor.)
Shellmar Products Company. (See Engel, William H., assignor.)
Shellmar Products Company. (See Gilfillan, Paul M., assignor.)
Shepard, Francis H., Jr., Rutherford, N. J., assignor, by mesne assignments, to Radio Corporation of America. Photometer. 2,100,755; Nov. 30.
Shepard, Francis H., Jr., Rutherford, N. J., assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Alternating current control. 2,100,756; Nov. 30.
Shimer, Calvin J., Toledo, Ohio. Tape machine. 2,100,652; Nov. 30.
Shoup, David M., Bremerton, Wash. Device for blacking sights of weapons. 2,100,982; Nov. 30.
Sibley, Milton, G. (See Glass, W. F., and Sibley.)
Sibley, Robert L., Nitro, W. Va., assignor, by mesne assignments, to Monsanto Chemical Company, St. Louis, Mo. Preservation of rubber. 2,100,998; Nov. 30.
Sidebotham, Melvin H. (See Russell, H. M., and Sidebotham.)
Siemens Brothers & Company Limited. (See Patterson, W. G., and Dixon, assignors.)
Siemens & Halske Aktiengesellschaft. (See Hoefert, R., and Wollack, assignors.)
Siemens & Halske Aktiengesellschaft. (See Rinkow, Otto, assignor.)
Siemens & Halske, Aktiengesellschaft. (See Walter, Hans, assignor.)
Siemens, Rudolph H., Richmond Hill, assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Tuning indicator circuits. 2,100,769; Nov. 30.
Sigman, Myer, Cleveland, Ohio. Nonrefillable container. 2,100,983; Nov. 30.
Sim, La, New Orleans, La. Macaroni trimming and drying apparatus. 2,100,821; Nov. 30.
Simmons, Leon E., Claremont, N. H., assignor to Sullivan Machinery Company. Mining machine. 2,100,361; Nov. 30.
Simon, Walter. (See Pier, M., Simon, and Grassl.)
Simon, Walter. (See Pier, M., Simon, and Jacob.)
Sindelar, Thomas A. (See Woodhead, H., Plumb, and Sindelar.)
Sinden, Alfred D., Aurora, Ill., assignor, by mesne assignments, to Redier Conveyor Company, Quincy, Mass. Conveyer. 2,100,924; Nov. 30.
Sindler, Jay J., assignor to Converse Rubber Company, Malden, Mass. Pneumatic sheet material and making. 2,100,492; Nov. 30.
Sloane-Blabon Corporation. (See Koenig, Walter J., assignor.)
Slotta, Max A., Chicago, Ill. Screw threading die. 2,100,724; Nov. 30.
Smallwood, Charles, Washington, N. C. Back-band buckle. 2,100,600; Nov. 30.
Smally, Emanuel C., assignor of one-half to K. B. Cope, Canton, Ohio. Adapter for incandescent bulbs. 2,100,984; Nov. 30.

Snally, Emanuel C., assignor of one-half to K. B. Cope, Canton, Ohio. Molding apparatus. 2,100,985; Nov. 30.
Smith, A. O., Corporation. (See Hlemke, Hugo W., assignor.)
Smith, Howard A., and M. E. Smith, Fairfield, Conn. Body molding garment. 2,100,986; Nov. 30.
Smith, John W. (See Leister, F., and Smith.)
Smith, Kline & French, Inc. (See Maxin, David J., assignor.)
Smith, Lloyd E., and H. V. Claborn, Washington, D. C., Dedicated to the Free Use of the Public. Insecticide. 2,100,493; Nov. 30.
Smith, May E. (See Smith, Howard A., and M. E.)
Smith, Richard E., East Cleveland, Ohio, assignor to General Electric Company. Electric lamp. 2,100,879; Nov. 30.
Snell, Owens C., assignor of one-half to L. H. Kennon, Houston, Tex. Drill. 2,100,615; Nov. 30.
Societe d'Etudes des Vehicules "Ser". (See Schwander, Erwin F., assignor.)
Societe of Chemical Industry in Basle. (See Schulthess, O., and Theller, assignors.)
Sorensen, Charles E., Detroit, assignor to Ford Motor Company, Dearborn, Mich. Piston. 2,100,525; Nov. 30.
Souther, Channing W., Laguna Beach, and H. S. Farnsworth, Santa Ana, assignors to Natural Food Products Company, Orange, Calif. Fruit splitter. 2,100,455; Nov. 30.
Spánel, Abraham N., Rochester, N. Y. Method of and apparatus for making rubber or latex articles. 2,100,571; Nov. 30.
Spánel, Abraham N., Rochester, N. Y. Form for making latex articles. 2,100,572; Nov. 30.
Spánel, Abraham N., Rochester, N. Y. Flat sheet latex article. 2,100,573; Nov. 30.
Spánel, Abraham N., Rochester, N. Y. Form for making pouches. 2,100,574; Nov. 30.
Spánel, Abraham N., Rochester, N. Y. Form for making rubber articles. 2,100,575; Nov. 30.
Spánel, Abraham N., Rochester, N. Y. Form for making rubber articles. 2,100,576; Nov. 30.
Spánel, Abraham N., Rochester, N. Y. Method and apparatus for making relatively long lengths of latex sheeting. 2,100,577; Nov. 30.
Spánel, Abraham N., Rochester, N. Y. Form for making garments. 2,100,578; Nov. 30.
Sparks, Robert L., Clayton, assignor to Alco Valve Company, Inc., St. Louis, Mo. Equalizing connection for refrigeration systems. 2,100,494; Nov. 30.
Specialty Automatic Machine Company. (See Russell, H. M., and Sidebotham, assignors.)
Specht, James E., Orrville, Ohio, assignor to J. M. Hopwood, Dormont, Pa. Electric gauge and controlling the current output of grid controlled glow discharge tubes. 2,100,460; Nov. 30.
Speedway Manufacturing Company. (See Larocca, James, assignor.)
Spensley Vincent H., Albuquerque, N. Mex. Medicinal carrying tube. 2,100,456; Nov. 30.
Spielman, Adolph, assignor to Sarah Spielman, Philadelphia, Pa. Pinking mechanism for sewing machines. 2,100,987; Nov. 30.
Spielman, Sarah. (Spielman, Adolph, assignor.)
Spurlin, Harold M., assignor to Hercules Powder Company, Wilmington, Del. Continuous process for production of aralkyl halides. 2,100,822; Nov. 30.
Stahl, Frank E., assignor to Columbus McKinnon Chain Corporation, Tonawanda, N. Y. Convertible hoist. 2,100,674; Nov. 30.
Stahle, John A., Boston, assignor of one-half to T. Lillemoen, Watertown, Mass. Clutch construction. 2,100,382; Nov. 30.
Staley, A. E., Manufacturing Company. (See Dale, Julian K., assignor.)
Standard-I. G. Company. (See Pier, M., Simon, and Grassl, assignors.)
Standard Oil Company. (See Chenicek, George W., assignor.)
Standard Oil Company of California. (See Lyman, A. L., and Holm, assignors.)
Stansel, Numan R., Schenectady, N. Y., assignor to General Electric Company. Flash welding. 2,100,880; Nov. 30.
Stanton, George T. (See Mason, W. P., Stanton, and Tweeddale.)
Starline, Inc. (See Ferris, Robert G., assignor.)
Stauffer Chemical Company. (See Nelson, Peter, assignor.)
Steel Brothers & Company Limited. (See Bhatnagar, Shanti S., assignor.)
Steel Wheel Corporation, The. (See Kliesrath, Victor W., assignor.)
Steiner Sales Company. (See Birr, R. G., and Grunwald, assignors.)
Steinmayer, Alwin G., Milwaukee, assignor to Line Material Company, South Milwaukee, Wis. Fuse link for expulsion fuses. 2,100,413; Nov. 30.
Stern, Milton C., and W. C. Pfeiffer, assignors to The Egry Register Company, Dayton, Ohio. Manifolding device. 2,100,579; Nov. 30.
Stevenson, Wilbur W., Pittsburgh, Pa. Fluid meter. 2,100,495; Nov. 30.
Still, Lawrence M. (See Voigt, A. P. J., and Still.)
Stilson, Herbert A., Chicago, Ill. Animal trap. 2,100,363; Nov. 30.
Stilson, Herbert A., assignor of one-half to A. S. Nichols Western Company, Chicago, Ill. Animal trap. 2,100,925; Nov. 30.
Stilson, Herbert A., Chicago, Ill. Animal trap. 2,100,926; Nov. 30.
Stivender, Edward H., West Allis, assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis. Control system. 2,100,364; Nov. 30.
Stodgell, James A. (See Macpherson, J. M., and Stodgell.)
Stratton, Albert C., Lincoln Park, assignor to Alfred S. Marlow, Ridgewood, N. J. Self-priming impeller pump for gas and fluid mixtures. 2,100,365; Nov. 30.
Strouse Baer Company, The. (See Baer, Abram K., assignor.)
Sturtevant, B. F., Company. (See Howden, William H., assignor.)
Sturtevant, B. F., Company. (See Richardson, Earl L., assignor.)
Styri, Haakon, assignor to S K F Industries, Incorporated, Philadelphia, Pa. Locking device for attaching a part having a bore to a shaft. 2,100,725; Nov. 30.
Sugden, Walter J. (See Drysdale, William D., assignor.)
Sults, Chauncey G., Schenectady, N. Y., assignor to General Electric Company. Signal system. 2,100,881; Nov. 30.
Sullivan Machinery Company. (See Gartin, Elmer G., assignor.)
Sullivan Machinery Company. (See Huffman, Mervin C., assignor.)
Sullivan Machinery Company. (See Joy, Joseph F., assignor.)
Sullivan Machinery Company. (See Osgood, Charles F., assignor.)
Sullivan Machinery Company. (See Simmons, Leon E., assignor.)
Swain, Joseph G., Akron, and A. W. Woodward, Kent, Ohio, assignor to Wingfoot Corporation, Wilmington, Del. Wheel and rim mounting. 2,100,654; Nov. 30.
Swartwood, Kenneth, assignor to Universal Oil Products Company, Chicago, Ill. Conversion of hydrocarbon oils. 2,100,414; Nov. 30.
Swartwout Company, The. (See McDerment, James H., assignor.)
Swazey, Edward S., assignor to Trimble Nurseryland Furniture, Inc., Rochester, N. Y. Portable play pen for children. 2,100,789; Nov. 30.
Sweet, J. B., et al. (See Wohlfarth, Walter W., assignor.)
Swingle, Ralph H., Pittsburgh, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Circuit breaker. 2,100,757; Nov. 30.
Talbot, Charles H., and A. Peters, Coscob, Conn. Sash mounting. 2,100,616; Nov. 30.
Tamsitt, Joseph C., assignor to Richards-Wilcox Manufacturing Company, Aurora, Ill. Elevator gate. 2,100,882; Nov. 30.
Tanner, George L., Dacula, Ga. Smoking pipe. 2,100,988; Nov. 30.
Tauer, Edward, Bellerose, N. Y. Apparatus for cooling systems. 2,100,883; Nov. 30.
Tavani, Gennaro, Brooklyn, N. Y. Brooch and clips combination. 2,100,554; Nov. 30.
Taylor, Don A., assignor of one-half to F. W. Boyer, Wadsworth, Ohio. Machine gun mount. 2,100,790; Nov. 30.
Taylor, Maurice C., and J. F. White, Niagara Falls, assignors to The Mathieson Alkali Works, Inc., New York, N. Y. Bleaching of cellulosic materials. 2,100,496; Nov. 30.
Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H. (See Urtel, Rudolf, assignor.)
Ternes, Raymond F. (See Watson, L. M., Ternes, and Budlong.)
Terry, Charles M., assignor to A. W. Cash Company, Decatur, Ill. Steam pressure regulator. 2,100,555; Nov. 30.
Texas Company, The. (See Moore, Wesley W., assignor.)
Texas Company, The. (See Pevere, Ernest F., assignor.)
Texas Company, The. (See Pevere, E. F., and Ludeman, assignors.)
Texas Company, The. (See Pond, H. A., and Perry, assignors.)
Texas Company, The. (See Roess, L. C., and Cummings, assignors.)
Theller, Casimir. (See Schulthess, O., and Theller.)
Theodorsen, Olav T., Oslo, Norway. Wood joining article. 2,100,415; Nov. 30.
Thoma, Dieter, Munich, Germany. Double governor for turbines. 2,100,580; Nov. 30.
Thomas & Betts Co., The. (See Church, Lewis H., assignor.)
Thomas, Charles A., Dayton, Ohio, assignor, by mesne assignments, to Monsanto Chemical Company. Method and apparatus for performing pyrogenetic reactions. 2,100,823; Nov. 30.
Thompson, Elmer B., assignor to Globe Machinery & Supply Company, Des Moines, Iowa. Automobile lift. 2,100,617; Nov. 30.
Thompson, Howard A., Edgewood, assignor to The Union Switch & Signal Company, Swissvale, Pa. Multiple control apparatus. 2,100,791; Nov. 30.

Thomson Symon Co. (See Royse, J. S., and Turner, assignors.)
Titanium Alloy Manufacturing Company, The. (See Kinzie, Charles J., assignor.)
Tomlinson, Obadiah N., Howell, Ga. Twine holder, 2,100,989; Nov. 30.
Torbert, John E., Jr., National City, Calif. Safety device for aircraft and other conveyances. 2,100,416; Nov. 30.
Toro Manufacturing Corporation of Minnesota. (See Moyer, Amos F., assignor.)
Townsend, Frank E., Bartlesville, Okla. Sulphur dioxide recovery process. 2,100,792; Nov. 30.
Traynor, Charles W., et al. (See Bowe, Charles F., assignor.)
Traynor, Robert M. J., Summit, N. J. Fruit and vegetable washer. 2,100,675; Nov. 30.
Trematore, Raffaele, Mori, Trento, Italy, assignor to Det Norske Aktieselskab for Elektrokemisk Industri, Oslo, Norway. Continuous anode for electrolytic cells for the production of aluminium. 2,100,927; Nov. 30.
Trickey, William W., Verona, assignor to Lock Joint Pipe Company, East Orange, N. J. Apparatus for making branch connections. 2,100,884; Nov. 30.
Trico Products Corporation. (See Horton, Erwin C., assignor.)
Trimble Nurseryland Furniture, Inc. (See De Puy, C. T., and Baxter, assignors.)
Trimble Nurseryland Furniture, Inc. (See Swazey, Edward S., assignor.)
Trott, Arthur J., Greensburg, Pa., assignor to Walworth Patents Inc., Boston, Mass. Valve. 2,100,457; Nov. 30.
Trumble, John T., Detroit, Mich. Producing metallic wheels. 2,100,885; Nov. 30.
Trumbull Electric Manufacturing Company, The. (See Getchell, Benjamin E., assignor.)
Truscon Steel Company. (See Woodhead, H., Plumb, and Sindelar, assignors.)
Trussell, Homer A., Detroit, Mich. Fuel system for combustion engines. 2,100,676; Nov. 30.
Turner, Paul R. (See Royse, J. S., and Turner.)
Tweeddale, John E. (See Mason, W. P., Stanton, and Tweeddale.)
Tyler, Stephen L., Garden City, N. Y. Valve. 2,100,366; Nov. 30.
Umansky, Leonid A., Schenectady, N. Y., assignor to General Electric Company. Control system. 2,100,653; Nov. 30.
Union Oil Company of California. (See Bray, Ulric B., assignor.)
Union Railway Equipment Company. (See O'Connor, Raymond C., assignor.)
Union Switch & Signal Company, The. (See Crago, Paul H., assignor.)
Union Switch & Signal Company, The. (See Thompson, Howard A., assignor.)
United Pipe & Supply Corporation. (See Campbell, Harry G., assignor.)
United Shoe Machinery Corporation. (See MacKenzie, Wilbur L., assignor.)
United Shoe Machinery Corporation. (See Butler, E. L., and Harrington, assignors.)
United Shoe Machinery Corporation. (See Clarke, T. B., and Boothroyd, assignors.)
United Shoe Machinery Corporation. (See Greene, Chester W., assignor.)
United Shoe Machinery Corporation. (See Roberts, Clifford, assignor.)
United States Gypsum Company. (See Balduf, Bruno E., assignor.)
United States Rubber Products, Inc. (See Watson, L. M., Ternes, and Budlong, assignors.)
Universal Oil Products Company. (See Held, Jacob B., assignor.)
Universal Oil Products Company. (See Swartwood, Kenneth, assignor.)
Urschel, William E., Valparaiso, Ind. Vegetable peeler. 2,100,793; Nov. 30.
Urtel, Rudolf, assignor to Telefunken Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Cathode ray apparatus. 2,100,618; Nov. 30.
Valentine, Leonard W., Baltimore, Md. Liquid dispensing apparatus. 2,100,990; Nov. 30.
Van Ackeren, Paul, Essen, Germany, assignor, by mesne assignments, to Koppers Company, Pittsburgh, Pa. Continuous-vertical coking retort oven. 2,100,758; Nov. 30.
Van Ackeren, Paul, Essen, Germany, assignor, by mesne assignments, to Koppers Company, Pittsburgh, Pa. Leveling beam for horizontal chamber ovens. 2,100,759; Nov. 30.
Van de Griendt, Gerald H. (See Engs, W., and van de Griendt.)
Van Fleet, Vincent E., Detroit, Mich. Weather strip. 2,100,556; Nov. 30.
Van Llempt, Johannes A. M., Eindhoven, Netherlands, assignor to General Electric Company. Electric incandescent lamp. 2,100,886; Nov. 30.
Varley, Richard, St. George, Staten Island, N. Y., assignor to Inter-Outer Telephone Corporation, Dover, Del. Interior telephone equipment. 2,100,887; Nov. 30.
Vereinigte Leichtmetall-Werke Gesellschaft mit beschrankter Haftung. (See Releaux, Otto, assignor.)
Viggers, Maggie T., Lafayette, Colo. Hair waver. 2,100,417; Nov. 30.
Vine, Oscar L., New York, N. Y. Collapsible paper funnel construction. 2,100,888; Nov. 30.
Voege, Max. (See Berger, A. F., and Voege.)
Voigt, Albert P. J., and L. M. Still, Galveston, Tex., assignor to Galveston Buckle Company. Buckle. 2,100,526; Nov. 30.
Von Ardenne, Manfred, Berlin, assignor to Radioaktiengesellschaft D. S. Loewe, Berlin-Steglitz, Germany. Television reception arrangement with Braun tubes. 2,100,704; Nov. 30.
Von der Linden, Ernst, Millburn, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 2,100,400; Nov. 30.
Wachowski, George A., Flint, assignor of one-half to P. Koffman, Bay City, Mich. Steak tenderizing and dicing tool. 2,100,770; Nov. 30.
Wadsworth, Frank L. O., Pittsburgh, Pa., assignor to Ball Brothers Company, Muncie, Ind. Method and apparatus and feeding thermoplastic material. 2,100,760; Nov. 30.
Wagner, Robert W., assignor to Detroit Harvester Company, Detroit, Mich. Power take-off attachment for motor vehicles. 2,100,677; Nov. 30.
Wagner, Robert W., assignor to Detroit Harvester Company, Detroit, Mich. Power take-off attachment for motor vehicles. 2,100,678; Nov. 30.
Waldorf Paper Products Company. (See Boeye, Paul F., assignor.)
Walter, Hans, Berlin-Siemensstadt, assignor to Siemens & Halske, Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Electrical circuit with modulating or rectifying devices. 2,100,458; Nov. 30.
Walworth Patents, Inc. (See Cotton, Charles H., assignor.)
Walworth Patents Inc. (See Trott, Arthur J., assignor.)
Ward, Frank E., Williston Park, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electric discharge device. 2,100,367; Nov. 30.
Ware, Stanley D., London, England. Jigging machine for concentrating ores and other materials. 2,100,459; Nov. 30.
Warner & Swasey Company, The. (See Burger, W. J., and Mirossay, assignors.)
Warner & Swasey Company, The. (See De Graff, Wilbur C., assignor.)
Wassenhove, Antoine, Brussels, Belgium. Lock. 2,100,679; Nov. 30.
Watson, Lisle M., and R. F. Ternes, Detroit, Mich., and L. G. Budlong, Mount Vernon, N. Y., assignors to United States Rubber Products, Inc., New York, N. Y. Apparatus for cutting tire molds. 2,100,461; Nov. 30.
Watson, William H., Bradford, assignor to Burberrys Limited, London, England. Wearing apparel. 2,100,991; Nov. 30.
Way, Walter R., Quincy, Mass. Closure for wall openings. 2,100,928; Nov. 30.
Wayman, Albert J., Youngstown, assignor of one-half to E. H. McClure, East Palestine, Ohio. Electric cable connecter. 2,100,824; Nov. 30.
Wean Engineering Co., The. (See McClure, Robert E., assignor.)
Weeldenburg, Johannes G., Arnhem, Netherlands, assignor to American Enka Corporation, Enka, N. C. Spinneret treatment in the manufacture of artificial silk. 2,100,581; Nov. 30.
Wehry, Oscar H., Rockford, Ill. Clothespin. 2,100,825; Nov. 30.
Weidman, Fred. (See Hasbrouck, John C., assignor.)
Weinhart, Theodore P., Ankeny, assignor of seventy-five percent to G. E. Kellogg, Des Moines, Iowa. Dolly for washing machines and the like. 2,100,929; Nov. 30.
Welch, Herman B., assignor to Amity Leather Products Co., West Bend, Wis. Combined billfold and key holder. 2,100,771; Nov. 23.
Welikanov, Alexander G., assignor to Shell Development Company, San Francisco, Calif. Orienting device for borehole deflecting tools. 2,100,418; Nov. 30.
Wellman, Charles E., Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich. Hydraulic wheel cylinder brake. 2,100,462; Nov. 30.
Wendt, Terrence M. E. (See Hansen, S. S., and Wendt.)
Wenn, Floyd D., Binghamton, assignor to The Brewer-Titchener Corporation, Cortland, N. Y. Making pawl or detent means. 2,100,619; Nov. 30.
Western Electric Company. (See Laing, David A. S., assignor.)
Western Electric Company. (See Morris, Joseph C., assignor.)
Western Union Telegraph Company, The. (See Beardsley, B., and Creedon, assignors.)
Westinghouse Electric Elevator Company. (See Eames, William F., assignor.)
Westinghouse Electric Elevator Company. (See White, Kenneth M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Baker, Rest R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Bradshaw, William M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Dawson, John W., assignor.)

Westinghouse Electric & Manufacturing Company. (See Jenks, Harold C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Johnson, Frederick B., assignor.)
Westinghouse Electric & Manufacturing Company. (See King, George E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Knowles, Dewey D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Mouromtseff, Ilia E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Parsons, John S., assignor.)
Westinghouse Electric & Manufacturing Company. (See Paulson, K., and Hurst, assignors.)
Westinghouse Electric & Manufacturing Company. (See Randall, Karl C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Schofield, S. T., and Boden, assignors.)
Westinghouse Electric & Manufacturing Company. (See Swingle, Ralph H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Willby, Norman H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Willby, N. H., and Moses, assignors.)
Wexelberg, Clarence E., assignor to Briggs Manufacturing Company, Detroit, Mich. Water closet. 2,100,826; Nov. 30.
Weyman, James P., San Antonio, Tex. Handkerchief simulation. 2,100,368; Nov. 30.
Wheaton, T. C., Co. (See Redman, Allen B., assignor.)
Wheeler, Clarence N. (See Mayeen, Othmar, assignor.)
Whelen, Myron S., Milwaukee, Wis., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Preparation of amino-halogen anthraquinones. 2,100,527; Nov. 30.
White, Gerald, assignor to Libbey-Owens-Ford Glass Company, Toledo, Ohio. Tong. 2,100,497; Nov. 30.
White, James F. (See Taylor, M. C., and White.)
White, Jesse H. (See Karl, E. W., and White.)
White, Kenneth M., Tenafly, N. J., assignor to Westinghouse Electric Elevator Company, Chicago, Ill. Timing system. 2,100,726; Nov. 30.
White, Thomas U., assignor to Associated Electric Laboratories, Inc., Chicago, Ill. Signal control circuits. 2,100,498; Nov. 30.
White, Walter A. (See Jones, R. P., and White.)
Whitehead & Kales Company. (See Judd, Irving H., assignor.)
Whitehead, William, Cumberland, Md., assignor to Celanese Corporation of America. Textile materials and making same. 2,100,369; Nov. 30.
Whitehead, William F., Bassfield, Miss. Harrow. 2,100,499; Nov. 30.
Whitmer, Joe V., Los Angeles, Calif. Attachment for type casting machines. 2,100,528; Nov. 30.
Wickman, Axel C., Coventry, England. Speed changing mechanism. 2,100,889; Nov. 30.
Wicks, Max A. (See Moore, D. F., and Wicks.)
Wiedbrauck, Erich, Essen-Ruhr, assignor to Chemische Fabrik Buckau, Ammendorf (Saalkreis), Germany. Production of potassium formate. 2,100,827; Nov. 30.
Wik, Simon N. (See Bent, F. A., Wik, and Ponig.)
Wildhaber, Ernest, and A. H. Candee, assignors to Gleason Works, Rochester, N. Y. Producing tapered gears. 2,100,705; Nov. 30.
Willard Storage Battery Company. (See Orsino, Joseph A., assignor.)
Willard Storage Battery Company. (See Rolph, Samuel W., assignor.)
Willby, Norman H., Irwin, and G. L. Moses, Pittsburgh, assignors to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Motor control system. 2,100,727; Nov. 30.
Willby, Norman H., Irwin, assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Motor control system. 2,100,728; Nov. 30.
Williams, Ira, Woodstown, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Vulcanization of rubber. 2,100,370; Nov. 30.
Williams, Shepp A., Bristol, Va. Casket placer. 2,100,582; Nov. 30.
Wilson, Arthur, Silloth, assignor to J. & W. Maxwell Limited, Carlisle, England. Apparatus for preparing superphosphate. 2,100,583; Nov. 30.
Winchester Repeating Arms Company. (See Pugsley, Edwin, assignor.)
Wingfoot Corporation. (See Swain, J. G., and Woodward, assignors.)
Winnek Stereoscopic Processes, Incorporated. (See Coffey, Douglas F. W., assignor.)
Winskill, John W., Widecombe, Barming Woods, Maidstone, England. Multi-ply paper sack. 2,100,828; Nov. 30.
Wintritz, George, Springdale, Conn., assignor to Hookless Fastener Company. Separable fastener. 2,100,557; Nov. 30.
Wirrer, Gottfried, and W. E. Day, Jr., Plainfield, N. J., assignors to Mack Manufacturing Corporation, Long Island City, N. Y. Valve insert. 2,100,620; Nov. 30.
Wirth, Emil H., Wirkmaschinenfabrik. (See Wirth, Emil H., assignor.)
Wirth, Emil H., Hartmannsdorf, assignor to the firm Emil Wirth, Wirkmaschinenfabrik, Hartmannsdorf, near Chemnitz, Germany. Thread delivery device for warp knitting machines. 2,100,680; Nov. 30.
Witherow, William P. (See Henderson, Albert, assignor.)
Witkower, Max, Santa Monica, Calif. Brassière. 2,100,890; Nov. 30.
Wohlfarth, Walter W., San Francisco, assignor to A. T. Ashjian and J. B. Sweet, Fresno, Calif. Vehicle construction. 2,100,463; Nov. 30.
Wollack, Kurt. (See Hoefert, R., and Wollack.)
Woodall Industries Incorporated. (See Randall, Meredith S., assignor.)
Woodall Industries, Incorporated. (See Zinser, Paul R., assignor.)
Woodhead, Harry, R. A. Plumb, and T. A. Sindelar, Cleveland, assignors to Truscon Steel Company, Youngstown, Ohio. Refrigerator structure. 2,100,992; Nov. 30.
Woodruff, Albert E., Oak Park, and H. Sengebusch, Villa Park, assignors to Associated Electric Laboratories, Inc., Chicago, Ill. Telephone unit. 2,100,500; Nov. 30.
Woodward, Alva W. (See Swain, J. G., and Woodward.)
Woolsey, Ernest L., Council Bluffs, Iowa. Mail pouch catcher. 2,100,529; Nov. 30.
Woolsey, Ernest L., Council Bluffs, Iowa. Lock for mail catcher arm supporting bars. 2,100,530; Nov. 30.
World Bestos Corporation. (See Nanfeldt, William, assignor.)
Wright, Jesse C., Los Angeles, Calif. Drill collar for well drilling strings. 2,100,419; Nov. 30.
Wright, Jesse C., Los Angeles, Calif. Drill collar for drilling strings. 2,100,420; Nov. 30.
Wuebben, Bernard H. (See Ripsch, C. W., and Wuebben.)
Wuertz, Alexander J., Carrollville, and W. Dettwyler, Milwaukee, Wis., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Mixed chloro-fluoro anthraquinone acridones. 2,100,531; Nov. 30.
Wuertz, Alexander J., Carrollville, and W. Dettwyler, Milwaukee, Wis., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Fluoro compounds of anthraquinone-2,1-benzacridone. 2,100,532; Nov. 30.
Wuertz, Alexander J., Carrollville, Wis., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Condensation products of 1-aminoanthraquinone 2-phenol azomethine. 2,100,533; Nov. 30.
Wünsch, Guido, Berlin-Steglitz, Germany, assignor to Askania-Werke A. G. vormals Centralwerkstatt-Dessau und Carl Bamberg-Friedenau. Altitude measuring apparatus. 2,100,706; Nov. 30.
Wupper, Benjamin F., Park Ridge, Ill. Game. 2,100,421; Nov. 30.
Wylie, Robert, Corvallis, Oreg. Roller skate. 2,100,584; Nov. 30.
Wyssbrod, Herman, Louisville, Ky. Preserving and wrapping cheese. 2,100,422; Nov. 30.
Yale & Towne Manufacturing Company, The. (See Bennett, Maurice D., assignor.)
Young, Harold M., et al. (See Hartman, Thomas L., assignor.)
Young, Leonard A., assignor, by mesne assignments, to Automobile Ventilation, Inc., Detroit, Mich. Draftless ventilating window. 2,100,829; Nov. 30.
Youngstown Steel Door Company, The. (See Lute, Carl, assignor.)
Zeigler, Maxwell T., assignor, by mesne assignments, to Zeigler Packaged Ice Machinery Corporation, Huntington Park, Calif. Delivery mechanism for ice vending machines. 2,100,423; Nov. 30.
Zeigler Packaged Ice Machinery Corporation. (See Zeigler, Maxwell T., assignor.)
Zeiss, Carl. (See Herrmann, Carl, assignor.)
Zellstoffabrik Waldhof. (See Claus, Walter, assignor.)
Zimmerman, Herman W., assignor to Automotive Maintenance Machinery Co., North Chicago, Ill. Piston fixture. 2,100,534; Nov. 30.
Zinser, Paul R., assignor to Woodall Industries, Incorporated, Detroit, Mich. Drawing fibrous thermoplastic sheet material. 2,100,891; Nov. 30.
Zivanow, Dimitrije M., New York, N. Y. Airtight cover releaser for containers. 2,100,538; Nov. 30.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 30TH DAY OF NOVEMBER, 1937

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Acid sulphates and the like compounds, Packing. L. Löwenstein. 20,563; Nov. 30.
Chair back. C. C. Adelsperger. 20,559; Nov. 30.
Clutch and brake control, Combined. E. G. Staude. 20,565; Nov. 30.
Heating unit, Electrical. E. L. Wiegand. 20,566; Nov. 30.
Lubricator, Journal. H. B. Cunningham and J. W. Tucker. 20,562; Nov. 30.
Product packaging. L. L. Salfisberg. 20,564; Nov. 30.
Rubber articles, Curing. F. L. Bucy and V. A. La Rock. 20,561; Nov. 30.
Saw tooth, Abrasive. F. Bley. 20,560; Nov. 30.

LIST OF DESIGN INVENTIONS

Ashtray. G. R. Debnam. 107,219; Nov. 30.
Automobile. C. B. Stevens. 107,268; Nov. 30.
Automobile and trailer, Combined. H. G. Schaefer. 107,266; Nov. 30.
Bedspread. C. M. Jones. 107,292; Nov. 30.
Board, Food cutting. L. M. Luteran and A. P. Brunell. 107,246; Nov. 30.
Bottle. J. H. Funkey. 107,225–6; Nov. 30.
Bottle. G. D. Runnels. 107,261; Nov. 30.
Box, File display. R. C. R. Noren. 107,251; Nov. 30.
Bracelet, Watch. J. Sand. 107,264–5; Nov. 30.
Button. A. Stark. 107,267; Nov. 30.
Canopy. L. Vavrik. 107,273; Nov. 30.
Case, Piano. W. M. Day. 107,289; Nov. 30.
Case, Vanity. A. Most and J. Fogel. 107,249; Nov. 30.
Chair. J. D. Rogers. 107,282; Nov. 30.
Chair, Rocking. L. Vavrik. 107,271; Nov. 30.
Charm or similar article, Fraternal. W. E. Holler. 107,232; Nov. 30.
Christmas tree, Illuminated artificial. O. Charette. 107,217; Nov. 30.
Comb and curler, Combined hair. Z. Stinson. 107,283; Nov. 30.
Comb and manicuring implement, Combination. H. J. Suhadolc. 107,284; Nov. 30.
Curtain. G. F. Erhard. 107,290; Nov. 30.
Dress. I. Bucholz. 107,295–7; Nov. 30.
Dress. E. Fisk. 107,299; Nov. 30.
Dress. H. Goldman. 107,300; Nov. 30.
Dress. A. Kaplan. 107,301–2; Nov. 30.
Dress. H. Kushner. 107,303; Nov. 30.
Dress. I. Lampel. 107,279; Nov. 30.
Dress. L. Penaroli. 107,298; Nov. 30.
Dress. C. M. Santore. 107,304; Nov. 30.
Dress. J. Sohmer. 107,305–6; Nov. 30.
Fabric, Brocatelle. E. Ericson. 107,224; Nov. 30.
Fabric, Textile. W. F. Kaplan. 107,239; Nov. 30.
Feeder, Multiple trough outdoor weatherproof. H. R. Ray. 107,280; Nov. 30.
Feeder, Outdoor weatherproof. H. R. Ray. 107,281; Nov. 30.
Flashlight. O. T. Wood. 107,274; Nov. 30.
Floor covering, Textile. W. O. Dewsbury. 107,220–1; Nov. 30.
Floor covering, Textile. W. O. Dewsbury. 107,276–7; Nov. 30.
Frame for a railway coach or bus chair, Upholstery supporting. W. R. Elsey. 107,223; Nov. 30.
Frame, Glider. L. Vavrik. 107,272; Nov. 30.
Game apparatus, Putting. F. W. Preece. 107,254; Nov. 30.
Glove, Archer's. F. B. Bear. 107,294; Nov. 30.
Guard for a bicycle, Skirt. H. L. Kraeft. 107,241; Nov. 30.
Handbag. I. Pichel. 107,293; Nov. 30.
Handbag, Lady's. M. Samuelson. 107,263; Nov. 30.
Handbag or the like. W. F. Bowen. 107,216; Nov. 30.
Hat. E. O. Crocker. 107,288; Nov. 30.
Heater unit, Air. M. M. Tilley. 107,270; Nov. 30.
Mat or similar article, Floor. W. G. Grossman and H. F. Carpenter. 107,278; Nov. 30.
Mattress. C. T. Stirratt. 107,269; Nov. 30.
Mounting plate, Coin chute. E. C. Grunig. 107,229; Nov. 30.
Ornament for Christmas trees, Tinsel. L. L. Raymond. 107,255–8; Nov. 30.
Padlock. C. H. Nehls. 107,250; Nov. 30.
Plaque. S. L. Hefter. 107,230–1; Nov. 30.
Rack, Real estate photograph display. H. W. Joline. 107,238; Nov. 30.
Roofing or siding. J. J. Batell. 107,209; Nov. 30.
Sanding machine. F. O. Albertson. 107,275; Nov. 30.
Scale. M. Garbell. 107,227; Nov. 30.
Shaver, Electric. H. Landsiedel. 107,243; Nov. 30.
Shoe. B. Benjamin. 107,211–2; Nov. 30.
Shoe. D. S. Cohen. 107,218; Nov. 30.
Shoe. A. Hurzeler. 107,233; Nov. 30.
Shoe. C. Kelly. 107,240; Nov. 30.
Shoe or similar article. D. E. Levin. 107,245; Nov. 30.
Shoe or similar article. M. Rosenston. 107,259–60; Nov. 30.
Skirt. J. Fuld. 107,291; Nov. 30.
Sole, Shoe. O. M. Pick. 107,253; Nov. 30.
Spectacle frame. M. R. McDanal. 107,247; Nov. 30.
Spread or similar article. C. S. Jacobs. 107,234–7; Nov. 30.
Stand, Picture frame. W. H. Ott. 107,252; Nov. 30.
Stand, Smoker's ash. J. I. Russakov. 107,262; Nov. 30.
Store. H. I. Kuebler. 107,242; Nov. 30.
Sweater. H. Boepple. 107,213–14; Nov. 30.
Tire. A. A. Thomas. 107,285–7; Nov. 30.
Tooth brush. L. Goodman. 107,228; Nov. 30.
Towel bar post or similar article. H. Lang. 107,244; Nov. 30.
Toy telephone. G. Dobrusin. 107,222; Nov. 30.
Vending machine. D. S. Bond. 107,215; Nov. 30.
Vending machine and scale, Combination. W. G. Behling 107,210; Nov. 30.
Wallpaper or similar article. J. R. Morgan. 107,248; Nov. 30.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 30TH DAY OF NOVEMBER, 1937

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abrading device. P. J. Huhn. 2,100,780; Nov. 30.
Adapter for incandescent bulbs. E. C. Smally. 2,100,984; Nov. 30.
Adjusting device, Audible indicating. H. F. Mossberg. 2,100,640; Nov. 30.
Advertising device, Mechanical. R. F. Andler. 2,100,690; Nov. 30.
Air and of fuel in automatic heavy-oil furnaces, Device for the combined control of the admission of. E. F. Schwander. 2,100,673; Nov. 30.
Air compressor. L. J. Michaels. 2,100,972; Nov. 30.
Air conditioning and house heating system, Combined. J. U. Fish. 2,100,474; Nov. 30.
Air conditioning system. R. L. Chapman. 2,100,834; Nov. 30.
Air conditioning system. O. M. Olson. 2,100,867; Nov. 30.
Aircraft. D. M. Berges. 2,100,934; Nov. 30.
Air deflecting device for automobiles. W. L. Morrison. 2,100,406; Nov. 30.
Air-flow ventilator. B. M. Green. 2,100,801; Nov. 30.
Alarm switch, Grain elevator. L. P. Dendel. 2,100,710; Nov. 30.
Alkali sub-silicates, Making. R. L. Davies. 2,100,944; Nov. 30.
Alternating current induction motor, Self-starting single phase. J. Larocca. 2,100,809; Nov. 30.
Altitude measuring apparatus. G. Wünsch. 2,100,706; Nov. 30.
Amino-halogen anthraquinones, Preparation of. M. S. Whelen. 2,100,527; Nov. 30.
Anchoring device. G. E. R. Saleb. 2,100,570; Nov. 30.
Animal clamp. E. Black. 2,100,730; Nov. 30.
Animal trap. H. A. Stilson. 2,100,363; Nov. 30.
Animal trap. H. A. Stilson. 2,100,925–6; Nov. 30.
Anode for electrolytic cells for the production of aluminium, Continuous. R. Trematore. 2,100,927; Nov. 30.
Antenna for automobiles, Radio. H. D. Geyer. 2,100,643; Nov. 30.
Antiseptic for the treatment of genitourinary infections. R. T. Kaupp. 2,100,781; Nov. 30.
Antiskid device. H. S. Fritts. 2,100,539; Nov. 30.
Apparatus for making branch connections. W. W. Trickey. 2,100,884; Nov. 30.
Apparatus for the separation of solid materials of different specific gravities. G. Raw. 2,100,670; Nov. 30.
Apparel, Wearing. W. H. Watson. 2,100,991; Nov. 30.
Apron. A. Quinn. 2,100,817; Nov. 30.
Aralkyl halides, Continuous process for production of. H. M. Spurlin. 2,100,822; Nov. 30.
Article of manufacture and making same. M. M. Brubaker. 2,100,377; Nov. 30.
Ash remover. C. F. Bowe. 2,100,937; Nov. 30.
Attachment for type casting machines. J. V. Whitmer. 2,100,528; Nov. 30.
Automobile lock. A. C. Mabee. 2,100,717–18; Nov. 30.
Baffle for rayon cake driers, Air. H. G. Black. 2,100,935; Nov. 30.
Bag and like tubing machine. F. G. Robinson. 2,100,519; Nov. 30.
Bag holder. A. E. Bennett. 2,100,501; Nov. 30.
Barge. A. J. Dawson. 2,100,472; Nov. 30.
Battery: *See*—
Storage battery.
Beam for horizontal chamber ovens, Leveling. P. van Ackeren. 2,100,759; Nov. 30.
Bearing: *See*—
Radial plain bearing.
Bedspring. L. H. Hamilton. 2,100,393; Nov. 30.
Belt, Surgical. A. B. Kendrick. 2,100,964; Nov. 30.
Beverage dispensing, Process and apparatus for. T. L. Hartman. 2,100,742; Nov. 30.
Bicycle lock. A. L. Porter. 2,100,917; Nov. 30.
Billfold and key holder, Combined. H. B. Welch. 2,100,771; Nov. 30.
Blind, Venetian. G. K. Bradfield, Jr. 2,100,625; Nov. 30.
Block: *See*—
Building block.
Blower or fan. A. Friedman. 2,100,439; Nov. 30.
Board and roost for poultry, Dropping. F. B. Herbert. 2,100,508; Nov. 30.
Bolt, Surface. G. R. Adams. 2,100,622; Nov. 30.
Book, Manifolding. J. R. Morrison. 2,100,814; Nov. 30.
Bottle emptying and beverage reclaiming device. J. H. Klintzele. 2,100,443; Nov. 30.
Bow. C. N. Hickman. 2,100,317; Nov. 30.
Box and blank therefor, Foldable. W. A. Ringler. 2,100,750; Nov. 30.

Box with centrifugally cast side walls, Carburizing. H. H. Harris. 2,100,902; Nov. 30.
Box with centrifugally cast side walls, Making a carburizing. H. H. Harris. 2,100,901; Nov. 30.
Brake: *See*—
Hydraulic wheel cylinder brake. Internal brake.
Brake adjustment. O. Rasmussen. 2,100,488; Nov. 30.
Brake applying and equalizing mechanism for motor cars. J. M. Macpherson and J. A. Stodgell. 2,100,563; Nov. 30.
Brake for motor vehicles, Automatic safety. J. S. MacMullen. 2,100,970; Nov. 30.
Brake lining, yarn, and making same, Woven. W. Nanfeldt. 2,100,347; Nov. 30.
Brake mechanism, Hand. R. C. O'Connor. 2,100,349; Nov. 30.
Brassière. M. Witkower. 2,100,890; Nov. 30.
Brassière and foundation garment. L. J. A. Amyot. 2,100,932; Nov. 30.
Braun tube. K. Schlesinger. 2,100,701; Nov. 30.
Bread slicing machine. C. H. Petskeyes. 2,101,010; Nov. 30.
Brooch and clips combination. G. Tavani. 2,100,554; Nov. 30.
Buckle. A. P. J. Voigt and L. M. Still. 2,100,526; Nov. 30.
Buckle, Back-band. C. Smallwood. 2,100,600; Nov. 30.
Buffing hood. G. H. Medart. 2,100,344; Nov. 30.
Buffing wheel. S. W. Lippitt. 2,100,340; Nov. 30.
Building block. S. W. Finch. 2,100,658; Nov. 30.
Building construction. B. E. Balduf. 2,101,001; Nov. 30.
Building construction. L. M. Parkhurst. 2,100,451; Nov. 30.
Burner: *See*—
Gas-burner.
Cabinet. L. A. M. Phelan and L. E. Koch. 2,100,871; Nov. 30.
Cabinet, Refrigerator. W. Marshall. 2,100,811; Nov. 30.
Cable clamp. H. A. Green. 2,100,777; Nov. 30.
Call transmitter. H. W. Goff. 2,100,390; Nov. 30.
Camera. L. F. Levy. 2,100,967; Nov. 30.
Camera, Photographic. Ö. Riszdorfer. 2,100,672; Nov. 30.
Can with integral air tube, Ice. W. R. Robinson. 2,100,521; Nov. 30.
Canteen. F. E. Anderson. 2,100,894; Nov. 30.
Cap construction, Carboy. P. Nelson. 2,100,450; Nov. 30.
Car door support. C. Lute. 2,100,784; Nov. 30.
Carpet and floor cleaner. B. Kern. 2,100,806; Nov. 30.
Carrier for motor vehicle transports, Skid. I. H. Judd. 2,100,694; Nov. 30.
Carton, Hinged. F. H. Groves. 2,100,644; Nov. 30.
Casket placer. S. A. Williams. 2,100,582; Nov. 30.
Catalytic reaction. M. Pier, W. Simon, and P. Jacob. 2,100,352; Nov. 30.
Cathode ray apparatus. R. Urtel. 2,100,618; Nov. 30.
Cellulose structure and preparing same, Regenerated. E. Kline. 2,100,398; Nov. 30.
Cellulosic materials, Blenching of. M. C. Taylor and J. F. White. 2,100,496; Nov. 30.
Cement articles, Apparatus and method of making expanded. 2,100,479; Nov. 30.
Cementing machine. C. Roberts. 2,100,452; Nov. 30.
Centrifugal separating machine and treating sludges. J. S. Pecker. 2,100,669; Nov. 30.
Chain applying device, Skid. T. P. Salley. 2,100,819; Nov. 30.
Chair and desk, Combined. M. M. Pickle and D. E. Parsons. 2,100,597; Nov. 30.
Charge forming device. H. A. Kelty. 2,100,511; Nov. 30.
Charge storage tube. P. T. Farnsworth. 2,100,842; Nov. 30.
Cheek piece for guns, Sliding. E. E. and H. L. Miller. 2,100,514; Nov. 30.
Cheese, Preserving and wrapping. H. Wyssbrod. 2,100,422; Nov. 30.
Chloro-fluoro anthraquinone acridones, Mixed. A. J. Wuertz and W. Dettwyler. 2,100,531; Nov. 30.
Chuck for camshafts and the like. W. F. Groene. 2,100,955; Nov. 30.
Cinder and ash remover. R. L. Beers. 2,100,682; Nov. 30.
Circuit breaker. F. B. Johnson. 2,100,743; Nov. 30.
Circuit breaker. K. C. Randall. 2,100,749; Nov. 30.
Circuit breaker. E. C. Raney. 2,100,788; Nov. 30.
Circuit breaker. R. H. Swingle. 2,100,757; Nov. 30.
Circuit breaker system, Automatic reclosing. A. E. Anderson. 2,100,893; Nov. 30.

Circuit, Electric valve. H. W. Lord. 2,100,863; Nov. 30.
Circuit interrupter. S. T. Schofield and S. H. Boden. 2,100,753; Nov. 30.
Circuit with modulating or rectifying devices, Electrical. H. Walter. 2,100,458; Nov. 30.
Circuits, Signal control. T. U. White. 2,100,498; Nov. 30.
Circuits, Tuning indicator. R. H. Siemens. 2,100,769; Nov. 30.
Clamp: *See*—
Animal clamp. Cable clamp.
Clamping and sealing device. L. J. Linde. 2,100,859; Nov. 30.
Cleaner: *See*—
Carpet and floor cleaner. Tank cleaner.
Cleaning apparatus and fluid circulating system therefor, Dry. L. Angelus and D. L. Baylis. 2,101,014; Nov. 30.
Clip: *See*—
Radiator cover clip.
Closure, Envelope. J. Schuknecht. 2,100,768; Nov. 30.
Closure for wall openings. W. R. Way. 2,100,928; Nov. 30.
Clothespin. O. H. Wehry. 2,100,825; Nov. 30.
Club and making same, Golf. C. W. Mansur. 2,100,864; Nov. 30.
Clutch: *See*—
Friction clutch. Overload clutch.
Clutch construction. J. A. Stahle. 2,100,362; Nov. 30.
Clutch mechanism for power operated portable tools. C. W. Ripsch and B. H. Wuebben. 2,100,552; Nov. 30.
Coach and sleeper, Convertible. L. W. Martin and A. E. Lehmann. 2,100,607; Nov. 30.
Coating apparatus. J. C. Morris. 2,100,405; Nov. 30.
Cocks, Making stop. E. F. Forrester. 2,100,438; Nov. 30.
Coffee maker. J. E. Marsden. 2,100,487; Nov. 30.
Coin selection program system. W. A. McCutcheon. 2,100,608; Nov. 30.
Combustion in internal combustion engines, Promoting. F. G. C. Bashford. 2,100,466; Nov. 30.
Composition and drying of the same. W. J. Koenig. 2,100,484; Nov. 30.
Condensation products of 1-aminoanthraquinone 2-phenol azomethine. A. J. Wuertz. 2,100,533; Nov. 30.
Condensation products of carbenium compounds and preparing the same. W. Dilthey and F. Quint. 2,100,798; Nov. 30.
Connecter: *See*—
Electric cable connecter.
Connection for refrigeration systems, Equalizing. R. L. Sparks. 2,100,494; Nov. 30.
Contact mechanism, Clock controlled. R. E. McClure. 2,100,664; Nov. 30.
Container: *See*—
Lipstick container. Returnable shipping container.
Nonrefillable container.
Container. P. F. Boeye. 2,100,773; Nov. 30.
Container. J. Domershausen. 2,100,636; Nov. 30.
Container. R. I. Drake. 2,100,711; Nov. 30.
Container. E. A. Lenk. 2,100,858; Nov. 30.
Container. R. E. Read. 2,100,516; Nov. 30.
Container for hydraulic transmissions, Lateral fluid. D. Gössler. 2,100,440; Nov. 30.
Container machine. P. M. Gilfillan. 2,100,739; Nov. 30.
Containers, Making. A. S. Hirshman. 2,100,480; Nov. 30.
Containers with liquids, Device for filling. S. Saeta. 2,100,359; Nov. 30.
Control apparatus, Multiple. H. A. Thompson. 2,100,791; Nov. 30.
Control device. E. D. Schneider. 2,100,876; Nov. 30.
Control means. F. A. Mitchell. 2,100,609; Nov. 30.
Control system. E. H. Stivender. 2,100,364; Nov. 30.
Control system. L. A. Umansky. 2,100,653; Nov. 30.
Conveyer. A. De L. Sinden. 2,100,924; Nov. 30.
Conveyer, Belt. B. Beardsley and M. V. Creedon. 2,100,585; Nov. 30.
Cooler: *See*—
Furnace cooler.
Cooling system. E. V. Rippingille. 2,100,490; Nov. 30.
Cooling systems, Apparatus for. E. Tauer. 2,100,883; Nov. 30.
Core drill. A. C. Catland. 2,100,311; Nov. 30.
Corrosion resistance of aluminum alloys and products resulting therefrom, Increasing the. O. Reuleaux. 2,100,411; Nov. 30.
Cotter pin. B. C. Behnke. 2,100,896; Nov. 30.
Coupler, Pipe. L. H. Church. 2,100,796; Nov. 30.
Cover for furniture, Slip. A. Oppenheimer, Jr. 2,100,868; Nov. 30.
Cover releaser for containers, Airtight. D. M. Zivanow. 2,100,558; Nov. 30.
Crankcase assembly and making the same. L. G. Knapp. 2,100,603; Nov. 30.
Current control, Alternating. F. H. Shepard, Jr. 2,100,756; Nov. 30.
Curviform hollow articles from binder-impregnated water-laid felts, Manufacture. M. O. Schur. 2,100,651; Nov. 30.
Cutter for sheet material. M. E. Halstead. 2,100,846; Nov. 30.
Cutting device for buttonhole- or other sewing machines. H. Pudelko. 2,100,815; Nov. 30.
Cyanide process. L. D. Mills, T. B. Crowe, and J. C. Haun. 2,100,865; Nov. 30.
Damping device for indicating instruments. W. Brückel and K. Haas. 2,100,833; Nov. 30.
Decoy. G. A. Bates. 2,100,623; Nov. 30.
Deep well pump. F. W. Kennedy. 2,100,560; Nov. 30.
Deflector means for toilet mechanisms. C. T. Giblette. 2,100,950; Nov. 30.
Delivery mechanism for ice vending machines. M. T. Zeigler. 2,100,423; Nov. 30.
Dental or surgical instrument. H. J. Brown and G. E. Farrell. 2,100,319; Nov. 30.
Deodorizer. E. A. Kleb and J. C. Metzger. 2,100,764; Nov. 30.
Dextrose, Production of. J. K. Dale. 2,100,433; Nov. 30.
Dial for radio sets, Tuning. U. Quintavalle. 2,100,453; Nov. 30.
Die: *See*—
Screw threading die.
Die construction. E. A. Bierwirth. 2,100,683; Nov. 30.
Die structure. M. E. Halstead. 2,100,847; Nov. 30.
Dinitriles, Manufacture of ortho- and peri-aryl. R. P. Linstead and A. R. Lowe. 2,100,401; Nov. 30.
Dipper, Cream. S. Covalt. 2,100,471; Nov. 30.
Discharge apparatus, Electric. J. W. Dawson. 2,100,735; Nov. 30.
Dispenser and toothbrush holder, Combination dentifrice. H. Jacoby. 2,100,960; Nov. 30.
Display device. O. D. Jennings. 2,100,853; Nov. 30.
Display device. R. J. Mancuso. 2,100,403; Nov. 30.
Display rack. D. J. Maxin. 2,100,548; Nov. 30.
Dolly for washing machines and the like. T. P. Weinhart. 2,100,929; Nov. 30.
Door controlling mechanism. H. A. Baumgarten. 2,100,795; Nov. 30.
Doorknob, Glass. A. B. Redman. 2,100,818; Nov. 30.
Dowel structure. R. M. Roberts. 2,100,873; Nov. 30.
Draft control means for fireplaces. D. L. Cage. 2,100,732; Nov. 30.
Draft for fuel burners, Supplementary controlled. C. V. Martin. 2,100,547; Nov. 30.
Dress, Paper doll's. G. H. Emery. 2,100,386; Nov. 30.
Drier: *See*—
Rotary drier.
Drier. C. W. Greene. 2,100,441; Nov. 30.

Core drill.
Drill. O. C. Snell. 2,100,615; Nov. 30.
Drill collar for drilling strings. J. C. Wright. 2,100,420; Nov. 30.
Drill collar for well drilling strings. J. C. Wright. 2,100,419; Nov. 30.
Drill hole cleansing means, Rock. E. G. Gartin. 2,100,949; Nov. 30.
Drill rotation means, Rock. E. G. Gartin. 2,100,324; Nov. 30.
Drive for calculating machines, bookkeeping machines, and the like. K. R. Heinitz. 2,100,804; Nov. 30.
Drum, Stacking. A. E. Jesser. 2,100,483; Nov. 30.
Duplicator. J. G. Brennan. 2,101,000; Nov. 30.
Dyes, Azo. J. I. Carr and C. K. Black. 2,100,378; Nov. 30.
Dyestuffs, Alkylarylanthraquinone. N. H. Haddock and C. H. Lumsden. 2,100,392; Nov. 30.
Dynamo-electric machines, System of control for. R. R. Baker. 2,100,761; Nov. 30.
Elastic strand. W. J. Fox. 2,100,003–4; Nov. 30.
Elastic suspension system. A. Dubonnet. 2,100,689; Nov. 30.
Electric cable connecter. A. J. Wayman. 2,100,824; Nov. 30.
Electric discharge apparatus. W. Dallenbach. 2,100,797; Nov. 30.
Electric discharge device. F. E. Ward. 2,100,367; Nov. 30.
Electric lamp. R. E. Smith. 2,100,879; Nov. 30.
Electric switch. V. R. Despard. 2,100,435; Nov. 30.
Electrode, Welding. H. W. Hiemke. 2,100,545; Nov. 30.
Electron discharge device. B. Salzberg. 2,100,723; Nov. 30.
Elevator gate. J. C. Tamsitt. 2,100,882; Nov. 30.
Elevator signaling system. W. F. Eames. 2,100,736; Nov. 30.
End construction for mine cars. W. V. Johnson and R. C. Kepner. 2,100,602; Nov. 30.
Energizing system. H. C. Jenks. 2,100,715; Nov. 30.
Engraving and related machines. G. Gorton and P. M. Henkes. 2,100,953; Nov. 30.
Esters and products, Preparing. H. A. Bruson. 2,100,993; Nov. 30.
Fabric: *See*—
Knitted fabric.
Fabric, Method of and machine for knitting. W. Coleman. 2,100,941; Nov. 30.
Fan. W. H. Howden. 2,100,481; Nov. 30.
Fan. E. L. Richardson. 2,100,489; Nov. 30.
Fan, Desk. W. M. Schwartz. 2,100,980; Nov. 30.
Fan with collapsible support. C. A. Schmidt and H. D. Bricher. 2,100,923; Nov. 30.
Fare receptacle. W. P. and F. D. Pitt. 2,101,011; Nov. 30.
Farming implement. F. B. Hemmert. 2,100,956; Nov. 30.

Fastener: *See*—
Snap fastener. Separable fastener.
Fastener. G. C. Lawson and C. Lindquist. 2,100,648; Nov. 30.
Fastening device for locking juxtaposed members together. F. G. Purinton. 2,100,816; Nov. 30.
Feed, Apparatus for manufacturing dried. W. L. McGehee and H. W. Luhnow. 2,100,907; Nov. 30.
Feed control, Motor operated. G. E. King. 2,100,745; Nov. 30.
Feeder: *See*—
Weighing feeder.
Feeder control mechanism. R. M. Hardgrove. 2,100,848; Nov. 30.
Feeding means, Weight controlled. E. E. Harper. 2,100,316; Nov. 30.
Fibers, Manufacture of wool-like artificial. W. Claus. 2,100,588; Nov. 30.
Film stretching device. S. S. Hansen and T. M. E. Wendt. 2,100,802; Nov. 30.
Film with low background noise, Making variable area sound. R. Görisch. 2,100,740; Nov. 30.
Filter: *See*—
Gas filter.
Filter. W. F. Glass and M. G. Sibley. 2,100,951; Nov. 30.
Filter. R. L. Irwine. 2,100,482; Nov. 30.
Filter surfaces, Cleaning of. H. A. Pond and E. E. Perry. 2,101,012; Nov. 30.
Filtering assembly for respirators. E. J. Biever. 2,100,374; Nov. 30.
Finish for fabrics of organic derivatives of cellulose. H. Platt. 2,100,408; Nov. 30.
Firearm, Take-down. E. Pugsley. 2,100,410; Nov. 30.
Fixture and wall unit with joints and trims therefor, Combination. J. H. Norris. 2,100,568; Nov. 30.
Flexible tube. U. Ciamberlini. 2,100,835; Nov. 30.
Flour, Conditioning of. W. E. Foster. 2,100,691; Nov. 30.
Flow control for urinals and the like. G. P. Gavin. 2,100,389; Nov. 30.
Fluid actuated device. O. Maycen. 2,100,343; Nov. 30.
Fluid meter. W. W. Stevenson. 2,100,495; Nov. 30.
Fluid transmission. W. P. Mason, G. T. Stanton, and J. E. Tweeddale. 2,100,404; Nov. 30.
Fluoro compounds of anthraquinone-2,1-benzacridone. A. J. Wuertz and W. Dettwyler. 2,100,532; Nov. 30.
Foldable seat. A. W. Rowe. 2,100,979; Nov. 30.
Food churning device, Motor driven. J. B. McFerran, Jr. 2,100,549; Nov. 30.
Form for making garments. A. N. Spánel. 2,100,578; Nov. 30.
Form for making latex articles. A. N. Spánel. 2,100,572; Nov. 30.
Form for making pouches. A. N. Spánel. 2,100,574; Nov. 30.
Form for making rubber articles. A. N. Spánel. 2,100,575–6; Nov. 30.
4-aminodiphenyl compounds. M. Harris. 2,100,803; Nov. 30.
Frame for vertical internal combustion engines, Welded box. F. Fohrer. 2,100,775; Nov. 30.
Frequency control, Automatic. N. P. Case. 2,100,733; Nov. 30.
Friction clutch. J. O. Almen and H. J. Kirschner. 2,100,464; Nov. 30.
Fruit and vegetable washer. R. M. J. Traynor. 2,100,675; Nov. 30.
Fruit splitter. C. W. Souther and H. S. Farnsworth. 2,100,455; Nov. 30.
Fruits, vegetables, and other products, Washing. F. W. Cutler. 2,100,942; Nov. 30.
Fuel injector pump. J. W. Berbman and R. L. Robiolio. 2,100,318; Nov. 30.
Fuel system for combustion engines. H. A. Trussell. 2,100,676; Nov. 30.
Funnel construction, Collapsible paper. O. L. Vine. 2,100,888; Nov. 30.
Furnace cooler. W. P. Chandler, Jr. 2,100,628; Nov. 30.
Furnace for treating phosphate material. S. Fischer. 2,100,843; Nov. 30.
Fuse link for expulsion fuses. A. G. Steinmayer. 2,100,413; Nov. 30.
Gain control. R. R. Blair. 2,100,375; Nov. 30.
Game. B. F. Wupper. 2,100,421; Nov. 30.
Garment. R. S. Oscard. 2,100,869; Nov. 30.
Garment, Body molding. H. A. and M. E. Smith. 2,100,986; Nov. 30.
Garment, Outer. A. K. Baer. 2,100,933; Nov. 30.
Gas administering machine. J. A. Heidbrink. 2,100,778; Nov. 30.
Gas burner. F. H. LeCompte. 2,100,995; Nov. 30.
Gas-burner, Safety. H. Arquint. 2,100,681; Nov. 30.
Gas filter. E. S. Paisley and A. F. Peters. 2,100,610; Nov. 30.
Gas quantities reduced to a normal condition, Apparatus for measuring and delivering. P. Rheinlander. 2,100,978; Nov. 30.
Gases of distillable carbonaceous materials, Treatment with hydrogenating. M. Pier, W. Simon, and G. Grassl. 2,100,354; Nov. 30.
Gate: *See*—
Elevator gate.
Gate valve. J. N. Moore. 2,100,996; Nov. 30.
Gauge: *See*—
Pressure gauge. Printer's miter gauge.
Gauge and method for controlling the current output of grid controlled glow discharge tubes, Electric. J. E. Specht. 2,100,460; Nov. 30.
Gears, Producing tapered. E. Wildhaber and A. H. Candee. 2,100,705; Nov. 30.
Generator: *See*—
Relaxation oscillation generator.
Generator regulation. R. H. Kaufmann. 2,100,854; Nov. 30.
Generator regulation. B. M. Leece. 2,100,905; Nov. 30.
Germicide and fungicide composition. C. Burwell. 2,100,469; Nov. 30.
Gettering vacuum tube. H. J. Miller and E. W. Schafer. 2,100,746; Nov. 30.
Gin. R. W. McLean. 2,100,786; Nov. 30.
Girt, Cork insert. A. O. Hurxthal. 2,100,959; Nov. 30.
Glass sheet supporting means. S. K. Kotowski. 2,100,512; Nov. 30.
Gloves and mittens for miner's use. A. F. Robertson. 2,100,401; Nov. 30.
Governor, Engine. R. Hufford. 2,100,805; Nov. 30.
Governor for turbines, Double. D. Thoma. 2,100,580; Nov. 30.
Grapple-fork. R. G. Ferris. 2,100,800; Nov. 30.
Grenade. E. G. Mörner. 2,100,698; Nov. 30.
Grille structure. C. T. Perkins. 2,100,767; Nov. 30.
Grinder and sharpener attachment for meat grinders. A. J. Kirkland. 2,100,808; Nov. 30.
Guard, Fan. J. H. Cohen. 2,100,994; Nov. 30.
Guard for children's toilet seats. C. T. De Puy and W. C. Baxter. 2,100,774; Nov. 30.
Gun mount, Machine. D. A. Taylor. 2,100,790; Nov. 30.
Hair curler. W. H. Hermsdorf. 2,100,850–1; Nov. 30.
Hair waver. M. T. Viggers. 2,100,417; Nov. 30.
Hair waving apparatus. J. B. Copenhefer. 2,100,538; Nov. 30.
Handkerchief simulation. J. P. Weyman. 2,100,368; Nov. 30.
Harrow. W. F. Whitehead. 2,100,499; Nov. 30.
Hatch frame construction for car roofs. D. W. Hawksworth. 2,100,903; Nov. 30.
Head lamp, Nonglare. E. Olsson. 2,100,913; Nov. 30.
Heater. V. S. Beck. 2,100,772; Nov. 30.
Heater. K. S. Papoutsis. 2,100,766; Nov. 30.
Heating apparatus. V. S. Beck. 2,100,373; Nov. 30.
Heating apparatus. F. H. Cornelius. 2,100,687; Nov. 30.
Heating system, Liquid circulation. J. A. Reavell. 2,100,671; Nov. 30.
Hinge. A. Enaslin. 2,100,473; Nov. 30.
Hoist, Convertible. F. E. Stahl. 2,100,674; Nov. 30.
Holder: *See*—
Bag holder. Twine holder.
Log strap holder. Washrag holder.
Milk bottle holder.
Holder and method for knitting, crocheting, and analogous purposes. R. K. Fisher. 2,100,388; Nov. 30.
Hook: *See*—
Reed hook.
Horticultural implement. W. F. Cervenka and F. Miller. 2,100,379; Nov. 30.
Humidifier. S. E. Schroeder. 2,100,454; Nov. 30.
Hydrant, Fire. H. M. Lofton. 2,100,862; Nov. 30.
Hydraulic wheel cylinder brake. C. E. Wellman. 2,100,462; Nov. 30.
Hydrocarbon derivatives, Production of anhydrous. W. Engs and G. H. van de Griendt. 2,100,437; Nov. 30.
Hydrocarbons, Cracking. A. P. Sachs. 2,100,922; Nov. 30.
Hydrocarbons of low boiling point, Production of. M. Pier and E. Donath. 2,100,353; Nov. 30.
Ice, Equipment for making artificial. W. R. Robinson. 2,100,520; Nov. 30.
Identification device for automobiles. J. Rentler. 2,100,598; Nov. 30.
Image analysis tube. P. T. Farnsworth. 2,100,841; Nov. 30.
Implement, Combination. J. B. Doolittle. 2,100,637; Nov. 30.
Implement for cutting cable sheaths. J. B. Doolittle. 2,100,638; Nov. 30.
Impulse sender mechanism. O. Rinkow. 2,100,518; Nov. 30.
Incandescent lamp, Electric. J. A. M. van Liempt. 2,100,886; Nov. 30.
Indicator. E. C. Horton. 2,100,334; Nov. 30.
Insect trap. J. Lambert. 2,100,966; Nov. 30.
Insecticide. L. E. Smith and H. V. Claborn. 2,100,493; Nov. 30.
Insulating construction. C. J. Beckwith. 2,100,624; Nov. 30.
Intaglio printing elements and producing the same. W. N. Misuraca. 2,100,346; Nov. 30.
Internal brake. C. W. Naylor. 2,100,973; Nov. 30.
Interpolymerization products, Production of. H. Fikentscher and J. Hengstenberg. 2,100,900; Nov. 30.
Invalid lifter. R. D. Maddox. 2,100,663; Nov. 30.
Iron, Marcel. E. Clein. 2,100,633; Nov. 30.
Jack: *See*—
Pump jack.
Jacket. Recirculating water. I. E. Mouromtseff. 2,100,747; Nov. 30.

Jacquard mechanism for textile machine employing such mechanism. H. Goodley. 2,100,952; Nov. 30.
Jigging machine for concentrating ores and other materials. S. D. Ware. 2,100,459; Nov. 30.
Joint: *See*—
Step joint.
Knitted fabric. E. C. Lockhead. 2,100,861; Nov. 30.
Knitting machine. R. H. Lawson. 2,101,005; Nov. 30.
Knitting machine. M. C. Miller. 2,100,345; Nov. 30.
Knob attaching means. A. W. Nelson. 2,100,567; Nov. 30.
Lacquer solvent and thinner. F. A. Bent, S. N. Wik, and W. Ponig. 2,100,425; Nov. 30.
Ladder protector, Adjustable nonslip. P. Ringman. 2,100,918; Nov. 30.
Ladle, Covered. M. W. Goldberg and W. W. Drissen. 2,100,713; Nov. 30.
Lamp: *See*—

Wall or floor structure and securing means. Le R. B. Bachelder. 2,100,424; Nov. 30.
Washer: *See*—
Fruit and vegetable washer.
Washrag holder. A. Fritz and R. J. McCarthy. 2,100,477; Nov. 30.
Water closet. C. E. Wexelberg. 2,100,826; Nov. 30.

Waves and circuits therefor, Reception of frequency modulated. R. A. Heising. 2,100,394; Nov. 30.
Wax from hydrocarbon oil, Removal of. E. F. Pevere. 2,100,915; Nov. 30.
Wax from hydrocarbon oil, Removal of. E. F. Pevere and C. G. Ludeman. 2,100,916; Nov. 30.
Wear testing, measuring, and recording apparatus and method. E. F. Hathaway and W. Bixby. 2,100,332; Nov. 30.
Weatherstrip. V. E. Van Fleet. 2,100,556; Nov. 30.
Weaving device. T. B. Congdon and C. J. Long. 2,100,382; Nov. 30.
Weighing and feeding machine, Automatic. W. M. Ryan and J. W. Bold. 2,100,874; Nov. 30.
Weighing feeder. E. E. Harper. 2,100,315; Nov. 30.
Weld testing device. R. D. Campbell and W. Huebert. 2,100,502; Nov. 30.
Welding, Flash. N. R. Stansel. 2,100,880; Nov. 30.
Well bridging, cementing, whipstock, and milling apparatus. M. W. Carroll. 2,100,684; Nov. 30.
Well cementing device. H. G. Campbell. 2,100,586; Nov. 30.
Well reamer. C. J. Maher. 2,101,007; Nov. 30.
Wheel: *See*—
Buffing wheel.
Wheel truing device, Grinding. G. S. Gould and E. D. LaFleur. 2,100,954; Nov. 30.
Wheel with rubber-like tread. E. A. Grange and E. J. Schmidt. 2,100,542; Nov. 30.
Wheels, Producing metallic. J. T. Trumble. 2,100,885; Nov. 30.
Window, Draftless ventilating. L. A. Young. 2,100,829; Nov. 30.
Wood, and products therefrom, Process for fireproofing. D. F. Moore and M. A. Wicks. 2,100,787; Nov. 30.
Wood joining article. O. T. Theodorsen. 2,100,415; Nov. 30.
Yarn change mechanism for knitting machines. R. H. Lawson and A. Gagne. 2,101,006; Nov. 30.
Zirconium oxide opacifier and making same. C. J. Kinzie. 2,100,337; Nov. 30.

CLASSIFICATION OF PATENTS

ISSUED NOVEMBER 30, 1937

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number—class, second number—subclass, third number—patent number

Patents Nos. 2,097,426 to 2,098,212

THE OFFICIAL GAZETTE

OF THE

United States Patent Office

Vol. 484—No. 1 TUESDAY, NOVEMBER 2, 1937 Price—$16 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $16.00 per annum, including annual index, $18.75; single numbers, 35 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Adjudicated Patents

(D. C. Calif.) Angle patent, No. 1,584,501, for orthodontic appliance, *Held* valid and infringed. *Angle* v. *Richardson*, 19 F. Supp. 1002.

(D. C. Calif.) Richardson and Boyd patent, No. 1,976,141, for method of producing orthodontic band brackets, claim 2 *Held* valid and infringed. *Id.*

Transfer of Classes

ORDER No. 3409

U. S. PATENT OFFICE, *Washington, D. C., Oct. 20, 1937.*

The following transfers, to take effect Monday, October 25, 1937, are hereby ordered:

Class 213, Railway Draft Appliances, from Div. 39 to Div. 34.

Class 225, Dispensing Beverages, from Div. 44 to Div. 39.

CONWAY P. COE,
Commissioner.

Adverse Decisions in Interference

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,937,484, Charles Bogin, Architectural lacquer system, decided September 22, 1937, claims 5, 6, and 8.

Pat. 1,969,518, F. J. Moles, Measuring circuit, decided September 21, 1937, claims 1, 2, 3, 4, and 5.

Pat. 2,035,880, H. R. Goodale, Parking device for motor vehicles, decided October 12, 1937, claims 3, 4, and 7.

Pat. 2,043,770, F. W. Oltmanns, Ornament, decided September 10, 1937, claims 1, 2, and 3.

Interference Notice

U. S. PATENT OFFICE, *Washington, D. C., Oct. 8, 1937.*

John O. Lewis, his assigns or legal representatives, take notice:

An interference having been declared by this Office between the application for patent of Melvin M. Warren, R. F. D. #1, Geneva, Ohio, and patent granted March 10, 1936, No. 2,033,142, to John O. Lewis, 556 Sixteenth Street, Brooklyn, N. Y., and a notice of such declaration sent by registered mail to said Lewis at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said Lewis, his assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

JUSTIN W. MACKLIN,
First Assistant Commissioner.

Notice of Cancellation

U. S. PATENT OFFICE, *Washington, D. C., Oct. 4, 1937.*

Patrick J. Dervin, his assigns or legal representatives take notice:

An application for cancellation having been filed in this Office by Chicago Pharmacal Co., Chicago, Ill., to effect the cancellation of trade-mark registration of Patrick J. Dervin, 219 East 28th Street, New York, N. Y., No. 155,404, dated May 30, 1922, and the notice of such proceeding sent by registered mail to the said Patrick J. Dervin at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Patrick J. Dervin, his assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the cancellation will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

JUSTIN W. MACKLIN,
First Assistant Commissioner.

Condition of Applications Under Examination at Close of Business October 16, 1937

Room No.	(Total number of applications awaiting action, excluding Trade-Mark Division, 42,088; Trade-Mark Division, 1,422. Oldest new case, April 24, 1937; oldest amended, April 24, 1937.) DECISIONS IN PATENT AND TRADE-MARK CASES

U. S. Court of Customs and Patent Appeals

BERNARD *v.* WHITE

No. 3,766. Decided March 29, 1937

[88 F.(2d) 741]

1. INTERFERENCE—PRIORITY—RIGHT TO MAKE CLAIM.

Record reviewed and *Held* that B. is entitled to an award of priority since the claim in issue cannot be read on the disclosure of W. without disregarding many limitations contained therein.

2. SAME—ISSUE—CONSTRUCTION.

"It is true that counts of an interference should be given a broad construction. It is also true that express limitations cannot be disregarded."

APPEAL from the Patent Office. Reversed.

Mr. Donald M. Carter for Bernard.

Mr. Cleon J. Sawyer for White.

GRAHAM, *P. J.*:

This is an appeal from the decision of the Board of Appeals of the United States Patent Office in an interference proceeding instituted between the appellant, David G. Bernard, and the appellee, Bruce C. White. The interference was declared between a reissue application of the party White, seeking a reissue of a patent granted April 26, 1932, on an application filed June 20, 1923, and a patent of the party Bernard, granted December 12, 1933, upon an application filed January 16, 1932.

The single count of the interference was claim 5 from the Bernard patent, and is as follows:

> A paper delivering device comprising a belt, means for driving said belt, a roll supporting device in proximity to said belt, and carrying a plurality of rolls of paper adapted to be successively brought into contact with said belt while the paper is being delivered therefrom, means for utilizing the same belt for bringing the new roll of paper up to the speed of the web being delivered from the expiring roll, and a pressure device separate from said belt for pressing the web of the expiring roll and the new roll together to connect them, the new roll having adhesive on the web to facilitate this connection.

Bernard filed a preliminary statement, alleging conception of the subject matter of the issue about March 2, 1928, the first written description on the same date, a disclosure of the same to others on the same date, and a reduction of his invention to practice on or about September 1, 1931. Bernard then moved to dissolve the interference on the grounds that White could not make the count, and that there was, in fact, no interference.

The Examiner denied the motion to dissolve and priority was awarded to the party White. On appeal, the Board of Examiners affirmed the award of priority. The party Bernard has appealed.

The sole question involved is whether the count of the interference will read on the disclosure of the party White.

The Bernard patent, from which the count of the interference is taken, relates to "paper delivering devices particularly adapted to deliver paper to printing presses and the like." It is stated in the patent that in the prior art, in delivering paper to power presses, it has been necessary to slow down the presses when the delivery of paper was changed from one roll to another, and that the object of this invention was to make possible the changing of delivery from an old to a new roll while the presses were running at full speed. In order to accomplish this object, Bernard provides a reel with three arms to hold three rolls of paper for successive use.

A set of endless belts is so arranged over direction changing devices that a portion of the set, which acts as one belt, is held in contact with the exterior of the roll being fed to the press, and rotates the roll. The belt is held taut by proper weighting devices. When the web of the old roll is about exhausted, a pressure device presses the web of the expiring roll against the web of the new roll with sufficient pressure to cause a portion of the new roll which is provided with paste to adhere to the expiring roll, and immediately thereafter a severing device cuts off the paper on the old roll back of the paster. The new web then runs until the roll is almost exhausted, when the reel again revolves and another roll is presented, being first brought into motion by contact with the belt or series of belts.

While the Bernard application was under consideration, it appears that claim 5, here in issue, was rejected on White, also here in issue. It was represented, however, to the office, that in White there were two sets of belts, and that White, therefore, did not have Bernard's inventive idea. Thereupon this rejection was apparently withdrawn as to claim 5.

White's application discloses a roll changer mechanism, the object being to change rolls and paste webs while the presses are in full motion. White's roll changer holds two rolls and uses two belts. The partly exhausted roll is mounted in one arm of a two arm holder, and is being fed into the presses by a traction belt which is in contact with the outside of the roll. A new roll is then inserted into the other arm or holder. When the old roll is approaching exhaustion, another belt is lowered upon the new roll to set it in motion. When the new roll is running at full speed, a valve is turned which lowers the pasting roll and presses the old web upon the new roll and makes a paster. A knife then severs the old web, and the web proceeds from the new roll. When the new roll has been reduced to about one-half its original diameter, or one-quarter of its original weight or contents, the reel is revolved, finally bringing the active roll into the former position of the expiring roll. It is quite apparent, from the specification and drawings, that two complete feed rolls cannot be held by the reel at the same time, but that the old roll must be largely exhausted before the new roll can be finally dropped in place.

At the time Bernard entered the field, the art knew only the two belt feed in making high speed

pasters. The record contains several patents which show this: Wood, No. 1,843,436, Hammer, No. 1,738,002, and the former White patent, No. 1,855,503. Bernard was evidently trying to better this state of the art and to substitute one continuously moving belt for two that were intermittent in their action. As insisted by counsel for appellant, Bernard went contrary to the accepted practice of his art and seems to have made a real contribution thereto.

[1] In our opinion, the count of the interference does not read upon the White disclosure. The count specifically provides that the device shall contain *a belt*. The White device uses two belts and requires them for its operation. Without two belts, it could not be successfully operated. Again the count recites,

"a roll supporting device in proximity to *said belt*, and carrying a *plurality* of rolls of paper adapted to be successively brought into contact with *said belt while the paper is being delivered therefrom*." [Italics ours.]

It is impossible to disregard the many limitations contained in this language as the tribunals below have done. The roll supporting device is not in proximity to one traction belt at all times. The reel does not carry a plurality of rolls of paper, but never more than one complete roll and a partially exhausted one. The rolls of paper, whether complete or partial, are not adapted to be brought into contact with the one traction belt while the paper is being delivered therefrom, but are changed from one traction belt to another while this delivery is being made.

"Means for utilizing *the same belt for bringing the new roll of paper* up to the speed of the web being delivered from the expiring roll." [Italics ours.]

is not found in White's disclosure.

[2] It is true that counts of an interference should be given a broad construction. It is also true that express limitations cannot be disregarded. *In re Bijur*, 17 C. C. P. A. (Patents) 1134, 40 F.(2d) 999, 398 O. G. 355; *Stephen D. Hartog* v. *Elmer C. Long et al.*, 18 C. C. P. A. (Patents) 993, 47 F.(2d) 365, 408 O. G. 587; *William E. Moore* v. *Albert E. Greene*, 18 C. C. P. A. (Patents) 1317, 48 F.(2d) 960, 411 O. G. 820; *Henry Dreyfus* v. *Leon Lilienfeld*, 18 C. C. P. A. (Patents) 1526, 49 F.(2d) 1055, 413 O. G. 857; *Garrett W. Mudd* v. *Otto A. Schoen*, 19 C. C. P. A. (Patents) 840, 54 F.(2d) 959, 417 O. G. 847.

In the opinion of the court, the party White cannot make the count, and the decision of the Board of Appeals is reversed.

Reversed.

Hatfield, J., did not participate in this case.

U. S. Court of Customs and Patent Appeals

IN RE WILLOUGHBY

No. 3,734. Decided March 22, 1937

[88 F.(2d) 482]

1. PATENTABILITY—COASSIGNED, COPENDING APPLICATIONS.

Where two copending applications of different inventors for patents on improvements in mine cars were assigned to the same company and a patent was issued on one of them *Held* that claims could not be allowed in the other unless they show patentable matter not embraced in the claims of the patent.

2. SAME—SAME—PROSECUTION.

Where a patent was issued on one of two applications of different inventors which were owned by the same assignee, neither the Patent Office officials nor the court should be required to speculate as to the line of patentable division and it was "incumbent upon appellant clearly to point out what patentable matter, if any, is contained in his claims that was not covered by the patent claims."

APPEAL from the Patent Office. Affirmed.

Mr. Donald U. Rich, Mr. Charles E. Riordon, Mr. C. Russell Riordon, and *Messrs Riordon & Riordon* for Willoughby.

Mr. R. F. Whitehead and *Mr. Howard S. Miller* for the Commissioner of Patents.

GARRETT, *J.*:

Appellant brings before us for review a decision of the Board of Appeals of the United States Patent Office affirming the decision of the Examiner rejecting fifteen claims (numbered 6, 7, 9, 12, 13, 14, 23, 29, 31, 32, 49, 52, 55, 56, and 59) of an application for patent filed June 8, 1925, for improvement in "Mine Car." Twenty-one claims stand allowed.

Claims 6 and 31 are illustrative of the subject matter of the rejected claims. They read:

6. In a mine car, flanged sills, a floor portion carried by said sill flanges, axles passing through said sill webs and above said floor portion, axle housings connecting said sills and secured to said floor portion and tie plates connecting said sill flanges.

31. In a railway car, side sills, axles extending therethrough, means connecting said sills, a floor comprising longitudinally extending planks and an inverted channel-shaped metallic buffer beam extending below said axles, and means covering said axles and contributing to the support of said planks.

The reference cited is Patent 1,649,396, issued to H. P. Field November 15, 1927, upon an application filed April 9, 1926.

It will be noted from the filing dates of the respective parties that the applications were co-pending from April 9, 1926, until the issuance of the Field patent November 15, 1927, and that appellant was first to file. There was no declaration of interference, however, evidently for the reason that both applications were owned by a common assignee, the American Car and Foundry Company, which now owns both the patent and the application at issue and which, therefore, is the real party in interest in the case.

That the claims at issue read upon the patent is virtually conceded, but appellant contends that they are generic to the structure in the patent and

"are directed to combinations of elements different from the claims of the Field patent."

In his statement the Examiner, after analyzing claim 6 of the application and referring to claims 10 and 16 of the patent, said:

Under these circumstances it appears obvious that to grant a patent on the present application including claim 6 would obviously result in double patenting and an extension of the monopoly which the assignee of the present case already enjoys.

Other claims of the application were then compared with other claims of the patent, and the Examiner's statement continued:

The above examples obviously show that there is no proper line of division between the cases [application and patent] and it is therefore believed that the final rejection should be affirmed.

The Board made no reference to "double patenting", but affirmed the decision of the Examiner, saying:

It is our opinion that, where a plurality of applications are assigned to the same assignee and there is overlapping disclosure, it is incumbent upon the assignee to clearly point out the respective inventions of the parties. We do not consider that those who may be interested in the patents or the officials of this Office should be required to speculate as to the line.

For the purpose of comparison the Board quoted, in connection with claim 31, supra, claim 5 of the patent as follows:

5. In a mine car, wheel axles, sills having flanges formed at the bottom thereof, ties between said sills, a floor located below the wheel axles and mounted on said flanges and ties, a longitudinal buffer beam forming a part of said floor, and axle housings mounted on the floor and connected to said sills.

In the brief on behalf of appellant rejected claims 29, 31, 32, 55, and 56 are compared with claims 2, 5, 6, 7, 12, 15, and 16 of the patent, and rejected claims 6, 7, 9, 12, 13, 14, 15, 49, 52, and 59 are compared with claims 8 to 11, inclusive, and 17 to 24, inclusive, of the patent. To enable comparison with the second group, therefore, claim 10 of the patent is here quoted:

10. In a mine car, wheel axles, sill plates having bottom flanges thereon below the wheel axles, a floor supported on said sill flanges, and axle housings mounted on said floor and connected to said sills, said housings having a gradual slope on one side thereof.

Much of appellant's brief is devoted to the subject of double patenting, the insistence being that the doctrine is not here applicable. As has been said, the Board made no reference to double patenting, and it is conceded by the Solicitor for the Patent Office that it does not apply here. We infer from the statements in the Solicitor's brief that it is his view that the Examiner in referring to double patenting did not use the phrase in the sense in which it is commonly used in patent parlance. The brief says:

If two different inventors each obtain a patent for the same invention, that invention has been patented twice, that is, it has been patented doubly and in one sense there may be double patenting. This is not the sense, however, in which double patenting is usually referred to in patent parlance.

Appellant in his brief apparently uses double patenting in the sense of two patents granted to the same inventor. It is obvious that this doctrine is not involved in the instant case because the two inventors are different. • • •

Whatever may have been the thought of the Examiner in using the term "double patenting", we are of the opinion that the rule as to double patenting is not here involved, and the same will not be further considered by us.

As we view the case, the broad question before us, upon the record presented, is whether the common assignee, having elected to take patent upon the Field (the junior) application, is now entitled to receive a patent upon claims in the Willoughby (the senior) application, the subject matter of which claims was disclosed but not claimed in the same, or substantially the same, phraseology in the patent.

In the case of *In re Leon Mann and Morris Koppelman*, 18 C. C. P. A. (Patents) 1020, 47 F.(2d) 370, 408 O. G. 7, we were confronted with an issue quite similar to that with which we are here confronted. Mann and Koppelman filed a joint application October 21, 1921. On April 15, 1922, the same Koppelman and one Cooper filed another joint application which resulted in the issuance of a patent which, at the time of issuance, was shown to have been assigned to Mann and Koppelman, the prosecution of whose application of April 15, 1922, was continued. The patent claimed an invention upon subject matter found to be disclosed in the senior application. Citing *In re Dunbar*, 51 App. D. C. 251, 300 O. G. 201, we pointed out that obviously no interference should have been declared between the respective applications

"because there were no adverse interests, the beneficiaries of both applications being the same parties."

We found that the claims of the application read upon the disclosure of the patent and further held expressly as to the single feature of the claims in the application alleged to differentiate from the claims of the patent, that no invention would be involved in modifying the patent structure to meet that feature, and affirmed the decision of the Board rejecting the claims.

Appellant contends that the decision in the Mann et al. case, supra, was erroneous and that our decision in the subsequent case of *In re George E. Howard*, 19 C. C. P. A. (Patents) 759, 53 F.(2d) 896, 414 O. G. 826, decided December 7, 1931, had the effect of overruling the Mann et al., supra, decision.

We are unable to agree to either of these contentions. Expressions in judicial opinions, even upon purely legal questions, are naturally influenced by the particular state of facts presented in the case under consideration. It is possible that in our decision in the Mann et al. case, supra, expressions may be found where we compared the claims at issue with the disclosures of the patent, which standing alone and considered apart from the finding as to lack of invention in the differences between the claims, might be interpreted in a manner not intended by the court. For example, counsel for appellant suggest the possible effect of the decision, as a precedent, in cases involving divisional applications, as when structural claims are contained in one application and method claims in another with identical disclosure in both applications as is usually the case. We had no occasion to consider such a situation in the Mann et al. case, supra, nor in the Howard case, supra; nor is there any occasion to do so here. The mind of this court is entirely open upon that question. That this court recognized that there might be exceptions to the general rule applied in the Mann et al. case, supra, is quite clearly evidenced by the following statement there made:

In certain cases, where there are two applications by different inventors, but held by a common assignee, and there is a disclosure of the same basic invention in both applications, but in one of which it is asserted that the applicant is the inventor only of an improvement in the basic invention disclosed, a patent issued upon the improvement claim in such last named application is not a bar to a patent upon the other application; but the case before us is not one of that character.

It was not intended by the foregoing which, in a sense, was obiter in the Mann et al. case, supra, elicited, however, by certain arguments there made, to suggest that the exception there named was the

only exception to the rule. We realized that there might be other exceptions.

The facts appearing in the Howard case, supra, led us to the conclusion that it presented grounds which excepted it from the rule, and accordingly we there sustained appellant's contention and reversed the decision of the Board of Appeals, but there was no overruling of the Mann et al., supra, decision, either directly or by implication.

We think the decision in the Mann et al. case, supra, was in entire harmony with the decision in the Dunbar case, supra, which latter, as we understand it, has been consistently followed by the Patent Office ever since its rendition, and we adhere to the principle stated.

The question here, therefore, is whether the facts presented render this an exceptionnl case, or does it fall within the general rule?

It seems to us that the fair interpretation of the decision below is that the rejected claims of the application do not, in their terms, as expressed, so distinguish from the *claims* of the patent as to show patentable matter not embraced in the latter claims. As has been said, it is virtually conceded that the rejected claims read upon the disclosure of the patent, but the insistence is, in effect, that more might have been claimed in the patent than was claimed, and that the rejected claims here cover such unclaimed matter and are, therefore, allowable.

[1] If this be true and patentable distinction exists, the case would be an exception to the general rule, but it does not follow simply because no claims are contained in the patent in the same, or substantially the same, phraseology as that of the rejected claims that an exception should be made. It is a matter of substance rather than of form, and it must be made clear that the rejected claims contain inventive subject matter which the patent claims did not cover. We are unable to agree that this is shown. Careful attention has been given to appellant's analysis and comparison of the claims, but we fail to find any satisfactory showing of distinctive patentable subject matter. The Examiner's analysis and comparison of the rejected claims and patent claims show an overlapping. Some of the rejected claims are broader than some of the patent claims and vice versa. It is needless to draw this opinion out to undue length by repeating or paraphrasing the discussions of this matter by either appellant or the Examiner.

[2] We concur in the thought expressed by the Board that neither the portion of the public interested in the patents, nor the Patent Office officials (to whom we may add the courts) should be required to speculate as to the line of patentable division. It was incumbent upon appellant clearly to point out what patentable matter, if any, is contained in his claims that was not covered by the patent claims and this he has not done to our satisfaction. It has been noted that many claims stand allowed. In those we have no interest. Presumably they do distinguish from the patent claims. We rest our decision here not simply upon a comparison of the rejected claims with the disclosures of the patent but upon comparison with the claims of the patent.

Since our conclusion upon the main issue is decisive of the case, there is no occasion for the consideration of any of the collateral questions raised in the reasons of appeal.

The decision of the Board of Appeals is affirmed.

Affirmed.

HATFIELD, *J.*, did not participate in the decision of this case.

IN RE CARROLL

No. 3,763. Decided March 22, 1937

[88 F.(2d) 687]

1. PATENTABILITY—NEW MATTER—COMPOUND MASTER CYLINDER FOR A VEHICLE BRAKING SYSTEM.

Claims for a compound master cylinder for a vehicle braking system which include the limitation "large and small pistons in said large and small bores respectively, the small piston being operable by the larger piston" *Held* not patentable since the limitation is not disclosed in the application as filed.

2. SAME—SAME—THEORY OF DETERMINING INFRINGEMENT NOT CONTROLLING.

The principle that infringement is not avoided by consolidation of two elements into one part may be well settled but the rule is different where the question of patentability is involved in the ex parte prosecution of an application for patent.

APPEAL from the Patent Office. Affirmed.

Mr. Jerome R. Cox, Mr. M. W. McConkey, Mr. N. D. Parker, Jr., and *Mr. F. P. Keiper* for Carroll.

Mr. R. F. Whitehead and *Mr. Howard S. Miller* for the Commissioner of Patents.

GARRETT, *J.:*

This is an appeal from a decision of the Board of Appeals of the United States Patent Office affirming the decision of the Examiner holding appellant not entitled to make two claims (Nos. 29 and 30) of his application, Serial No. 365,405, for "Hydraulic Brake Apparatus." Claim 29 is illustrative and the same is quoted with the feature at issue italicized:

29. A compound master cylinder for a vehicle braking system including a housing having a pair of axially aligned communicating bores therein and a communicating outlet, one of said bores being smaller in diameter than the other, *large and small pistons in said large and small bores respectively, the small piston being operable by the larger piston,* means for moving the larger piston, yieldable packing means contacting with and coacting with the small piston for allowing the passage of fluid displaced by the larger piston to said outlet during only a portion of the stroke of said larger piston, and means for relieving the pressure created by the large piston when the passage of fluid from the large bore to said outlet is discontinued.

The Examiner rejected the counts upon two grounds, viz., double patenting and lack of disclosure of the feature above italicized. The Board held the ground of double patenting "unwarranted", but affirmed upon the second ground, saying:

Claims 29 and 30 are held not warranted by appellant's disclosure inasmuch as these claims also call for large and small pistons, the small piston being operable by the larger piston.

It may be said that, before the Examiner and the Board, another claim, copied from a patent for interference purposes, was involved. This claim was disallowed and it was not included in the appeal to us. References were cited in connection with the issue of double patenting but none in connection with lack of disclosure, which is the only issue to be determined here.

Appellant's specification makes no affirmative reference to the disputed feature and reliance is placed upon the drawings for disclosure. Even the drawings need not here be described in detail. Figure 1 thereof discloses as a part of a somewhat complicated device a tubular element referred to throughout the specification as a "plunger." This plunger consists of a *unitary* member, the inner end of which is smaller than the outer end. Means are provided for a connection between the outer end of the member and the element (probably, in common parlance, a foot pedal) against which pressure is applied to operate the plunger. When the pressure is applied the plunger is moved forward and, through the operation of requisite means, unnecessary to be described, liquid is forced forward to act upon the brakes mechanism. The large end of the plunger passes through a larger bore than does the small end.

[1] Appellant's claim is that the unitary member, having a large end and a small end, constitutes a large piston and a small piston within the meaning of the claims, and the theory is advanced that the small end is "operable" by the large end. It is urged that the claims should be given the broadest interpretation possible and that, in view of certain authorities cited, it is immaterial whether the parts be made integral or separate.

We find ourselves unable to concur in appellant's contentions, either as to the unitary member being two pistons, or as to the small end being operable by the large end. The feature is a unit and is operated as a unit, the whole moving forwardly as a result of the pressure placed upon the outer end and backwardly when the pressure is released. If a post is being driven into the ground, it could not very reasonably be contended that the lower end of the post is operable by its upper end. The entire post is operated upon and moved as a unit by the force which strikes its upper end.

[2] Appellant quotes excerpts from the cases of *Nathan et al.* v. *Howard*, 143 Fed. 889; *Stockland* v. *Russell Grader Mfg. Co.*, 222 Fed. 906, and *Parker* v. *Automatic Mach. Co.*, 227 Fed. 449, as illustrative of the principle that *infringement* is not avoided by consolidating two elements of a patent into one part. This principle may be taken as quite well settled in infringement proceedings, but the rule is different where the question of patentability is involved in a proceeding in the Patent Office upon an ex parte application. The case of *In re Key*, 22 C. C. P. A. (Patents) 1098, 76 F.(2d) 398, 459 O. G. 5, cited in the brief of the Solicitor for the Patent Office, seems directly in point in the instant case.

The decision of the Board of Appeals is affirmed.

Affirmed.

HATFIELD, *J.*, did not participate in this decision.

Mr. R. F. Whitehead and *Mr. Howard S. Miller* for the Commissioner of Patents.

GARRETT, *J.:*

This is an appeal from a decision of the Board of Appeals of the United States Patent Office affirming the Examiner's rejection of claims 2, 4, 6, 14, and 15 of an application for patent relating to "Improvements in Capacitor-Motor Fan." Appellant divides the claims into two groups, numbers 2, 4, and 6 in one group and 14 and 15 in the other. Claims 4 and 15 are quoted as illustrative of the respective groups:

4. A fan comprising a supporting pedestal having a supporting column and an enlarged base, a variable-speed self-starting, single-phase induction motor mounted on the supporting column of said pedestal and comprising a stator member having dephase primary windings, and a rotor member having closed-circuited secondary windings, fan blades driven by said rotor member, circuit-connections for cooperating with said primary windings to provide a common, unbranched circuit-portion and two branch-circuit portions for energizing the two primary windings, respectively, from a common single-phase source, and a capacitor, an adjustable transformer, and a control handle for said adjustable transformer all mounted in the base of said pedestal, an adjustable portion of said transformer being connected in series circuit relation to the common, unbranched portion of the circuit, a constant portion of said transformer being connected in series circuit relation to one of the branch-circuit portions of the circuit, and a larger constant portion of said transformer being connected across said capacitor.

15. A single-phase, capacity-motor fan, comprising a supporting pedestal having a supporting column and an enlarged base, a self-starting, single-phase, induction motor mounted on the top of the supporting column of said pedestal and comprising a stator member having dephased primary windings, and a rotor member having closed-circuited secondary windings, fan blades driven by said rotor member, a capacitor mounted in said enlarged base, and connections for starting and running said motor on its dephased primary windings as a capacitor motor, whereby the size and weight of the motor at the top of said supporting pedestal is materially reduced over that of an ordinary single-phase induction motor, and whereby the masses at the top and bottom of the pedestal are more agreeably balanced relative to each other.

The rejection was for lack of patentability of the combination over prior art, the single reference cited by the Examiner being a patent to one Jennings, No. 1,433,725, October 31, 1922.

The brief on behalf of appellant approves the

description of his device given by the Board in its decision as follows:

The claims on appeal are directed to alleged improvements in pedestal fans, such alleged improvement residing in the use of a motor of a particular type which is said to be lighter for the required horsepower and which requires for its operation certain accessories which are disposed in the base of the pedestal with a resultant change of balance, as compared with previous fans over which it is claimed to be a marked improvement.

The motor employed is of the so-called capacitor single phase induction type, the capacitor being associated with the starting winding for dephasing the same with respect to the primary windings. Inductance elements are also associated with the two windings to further assist in dephasing and increasing the efficiency, one of these inductances being tapped for cooperation with a speed controlled switch which is also located in the pedestal base.

Appellant's brief states:

The patent to Jennings is issued to the same assignee as the present application, and shows a pedestal fan including a single-phase induction motor of the squirrel-cage type. The motor is mounted at the top of the fan pedestal, and the speed-controlling switch and an auto-transformer are mounted in the base of the pedestal.

From the foregoing description it becomes immediately obvious that broadly the combination of elements in the Jennings device is the same as the combination of elements in the device of appellant. That is to say, Jennings shows a device consisting of a fan connected with and operated by a single-phase induction motor mounted upon a pedestal, in the base of which pedestal are contained elements which broadly correspond to the elements in the base of appellant's pedestal. It may be added that the several general features of the application are combined in substantially the same relationship as that of the corresponding general features of the patent.

Under this state of facts it was held, in substance, that whatever patentable novelty was presented in the application resided in the motor (several claims relating thereto being allowed), and that the claims at issue should be and they were rejected upon the ground of exhausted combination.

As we understood the facts of the case, from the record, what appellant did was to take a capacitor-motor which has long been known, and make certain modifications therein to adapt it for use with what, in common parlance, is called an "electrical fan", particularly that type of fan which is used on desks and the like. These modifications result in the production of a lighter motor, and certain changes in the elements which go into the base of the pedestal—elements which connect with the motor—render the base somewhat heavier.

For such modifications of the motor as were found to involve invention claims have been allowed, but appellant seeks to go further and obtain claims for the combination which resulted from substituting the capacitor-motor, of course including such of its concomitant elements as are located in the base of the pedestal, for the type of motor, including its corresponding concomitant elements, formerly used. The result claimed for the combination by the substitution so provided is, as expressed in claim 15, supra, that

"the size and weight of the motor at the top of said supporting pedestal is materially reduced over that of an ordinary single-phase induction motor, and * * * the masses at the top and bottom of the pedestal are more agreeably balanced relative to each other."

It is argued on behalf of appellant, in substance, that, although both the capacitor-motors art and the pedestal-fan art are very old and both prolific in inventions, and although the result obtained by appellant's combination is one which has long been desirable, he is the first to accomplish it; that the numerous persons skilled in these respective arts have not presented a combination which produced the desirable result and that

"invention is involved in the perception of the fact that the capacitor motor, with its control, involves a reproportioning of weight between the motor and the control, so that it offers the possibility of very materially improving the 'balance' of the pedestal fan, by bringing the weights of the head and the base more nearly together, thus resulting in a reduction in the weight of the head and a slight increase in the weight of the base of the pedestal, as compared to prior-art designs."

The argument thus made applies to both groups of claims.

As to the group consisting of claims 2, 4, and 6, it is argued that they are allowable for the reason

"that they recite, word for word, an admittedly novel combination in respect to the control of the capacitor-motor element, as defined in the allowed claims 1, 3, and 5, respectively."

In the final analysis, however, the argument as to this group is really based upon the result of increasing the weight of the pedestal base and reducing the weight of the motor whereby the top of the fan pedestal is lightened, and better balance secured.

Appellant cited numerous authorities in his brief and others were referred to in the oral argument on his behalf and supplied in a memorandum furnished the court after the argument was concluded. These we have examined and considered in connection with the arguments.

[1] We are unable to trace the result which appellant claims to have obtained to any source except the alterations or modifications made in the motor. Appellant has introduced a motor into his combination different from the prior art motor, but he has not made any combination which differs in any material respect from the combination shown by the Jennings patent, although the desirable result of better balance may be obtained.

[2] That merely substituting a new element for an old one does not render the combination into which the new element is introduced patentable if the combination be not thereby rendered novel is certainly well settled in patent law. *In re The Germantown Trust Co., executor of the estate of Charles E. Vawter, deceased*, 19 C. C. P. A. (Patents) 1140, 57 F.(2d) 365, 421 O. G. 857.

We find no error in the decision of the Board of Appeals and the same is affirmed.

Affirmed.

HATFIELD, *J.*, did not participate in the decision of this case.

U. S. Court of Customs and Patent Appeals

IN RE ADAMS

No. 3,759. Decided March 22, 1937

[88 F.(2d) 495]

PATENTABILITY—METHOD OF PRODUCING ILLUMINATION FOR STAGE AUDITORIUMS, ETC.

Claims for a method of producing illumination for stage auditoriums, etc., *Held* not patentable over the prior art.

APPEAL from the Patent Office. Affirmed.

Mr. Samuel E. Darby, Jr., and *Mr. Floyd H. Crews* for Adams.

Mr. R. F. Whitehead and *Mr. Howard S. Miller* for the Commissioner of Patents.

LENROOT, *J.*:

This is an appeal from a decision of the Board of Appeals of the United States Patent Office, affirming a decision of the Examiner, rejecting claims numbered 25, 27, 28, 29, and 31 to 34, inclusive, of appellant's application. No claims were allowed. The ground of rejection was lack of invention in view of the prior cited art.

The claims may be divided into two groups, claims 25, 28, 31, and 33 constituting the first group, and claims 27, 29, 32, and 34 constituting the second group.

Claim 25 is illustrative of the first group and reads as follows:

25. In a method of producing illumination approximating the color characteristics and qualities of sunlight most effective for stage and photographic lighting, the step which consists in energizing a high powered incandescent lamp, which at normal operating voltage consumes in excess of one thousand watts, with a current having a voltage not more than 75% of said normal operating voltage.

Claim 34 is illustrative of the second group and reads as follows:

34. The method of producing full illumination for stage, auditorium and photographic lighting which consists in energizing a high powered incandescent lamp with a current having a voltage of not more than 75% of that at which said lamp is normally designed to operate to produce its maximum intensity of emitted light, to produce the emission of a light which is deficient in blue rays, and then supplying to the emitted light the deficiency in blue rays from an independent source of light which is rich in blue rays, whereby the color characteristics of sunlight at a preselected hour of the day are approximated.

The references cited are: Hewitt, 901,294, October 13, 1908; Steinmetz, 945,990, January 11, 1910; D'Humy, 1,324,008, December 2, 1919; Falge, 1,924,714, August 29, 1933.

The alleged invention is sufficiently described in the quoted claims. It will be observed that the distinction between the two groups of claims is that, in the second group, there is an element not found in the first group, said element embracing a second source of light.

The principal reference is the patent to Falge. It relates to methods of using incandescent lamps so as to increase the life of the lamp. The invention is particularly directed to automobile headlamps, but the patent states that

"it is to be understood that the broad principles of the invention may be applied to lamps used for other purposes."

The patent discloses that, if the bulb of the lamp be used at a lower voltage and lower current than its capacity, the life of the bulb will be prolonged. The patent states:

* * * The reduction in the amount of light emitted is, of course, undesirable, and the observer also finds the change in color of the light to be undesirable as candlepower for candlepower, it seems to reduce the visibility of the objects illuminated.

* * * * * * *

To overcome this difficulty I have incorporated in my bulb means for removing the excess red rays so that the emitted light will have for all practical purposes the same color value as that obtained from conventional bulbs. This may be done in a number of ways but I have preferred to use a bulb made of glass sufficiently blue in color to absorb the excess red rays and produce a relatively white beam. It is of course essential that the glass be colored as little as is necessary for the colored glass absorbs the rays and reduces the efficiency of the lamp.

Claim 2 of the patent reads as follows:

2. A method of illumination which comprises operating an electric lamp filament at a current density and temperature below its usual rated capacity to cause it to emit light having an excess of red rays, and filtering out the excess of red rays to cause the resulting light to be substantially white.

The patents to Hewitt, Steinmetz, and D'Humy were relied upon by the Examiner as showing that the use of a source of light rich in blue rays to supplement a source of light deficient in these rays was well known to the art.

The Board of Appeals in its decision stated:

There appears to be no doubt but that the efficiency of a lighting system is very much reduced by appellant's procedure but if one desires to extend the length of the life of the lamps at the expense of efficiency, we are convinced that the teachings of Falge would suggest the low voltage current with high-powered lamps as well as those usually employed on automobiles. The question before us, therefore, as we see it, is whether in carrying out an obvious operation, an unobvious result has been produced of such a nature as to afford a proper basis for patent monopoly.

It is not clear to us why there should be any difference between the results of reducing the voltage employed with low- and high-powered lamps. We believe that it is merely a matter of degree and that, in reducing the intensity of the light, more or less of the yellow light will be produced, as taught by Falge.

In the absence, therefore, of convincing evidence that illumination of a substantially superior and unexpected nature is to be attained by dropping the voltage on high-powered lamps, and only on lamps which are designed to consume in excess of 1,000 watts, we do not feel justified in holding that appellant has discovered an unexpected result of such a nature as to warrant patent protection.

Appellant contends that a new and unexpected result has been secured in reducing the voltage of high-powered lamps to not more than 75% of their normal operating voltage, a result that would not be secured or expected from similarly operating low-power lamps as disclosed in the patent to Falge. High-power lamps are described in appellant's application as follows:

* * * Furthermore, by the term "high-powered" as used herein is meant lamps of from 1 K. W. to 100 K. W. rating, although the broad concept of the invention is applicable to other sizes of lamps.

The only statement that we can find in the application tending to support the claim that a result different in kind is secured in operating high-powered lamps at a reduced voltage is the following:

* * * However, ordinary small power lamps, for example 500 watts or the like even when operated at less than rated voltage are incapable of giving off this soft yellowish light or in sufficient power to be useful practically. * * *

It is appellant's contention also that the yellow light produced by reducing the voltage of high-power lamps is very desirable and useful for stage, auditorium, and photographic light, whereas the patent to Falge states that the yellow light produced by reducing the voltage of low-power lamps is undesirable.

We agree with the Patent Office tribunals that the first group of claims are unpatentable over the patent to Falge alone. We do not think that the statement found in appellant's application with respect to the inability of low-power lamps, when operated at less than the rated voltage, to produce the soft yellowish light produced by appellant's method in high-power lamps, is sufficient to establish that appellant has secured a new and unex-

pected result; but, however this may be, we think that the patent to Falge teaches that by reducing the voltage of incandescent lamps of any size the life of such lamps will be prolonged. The claims of Falge's patent embrace electric lamp filaments without limitation, and we think any licensee of Falge would have the right to use the method disclosed and claimed by him, in electric lamps of any size, and when his patent expires the public will have the same right. It is true that Falge had a very different object than the object of appellant, but the methods of both are identical so far as the first group of claims is concerned.

With respect to the second group of claims, we also agree with the Patent Office tribunals that they lack invention over Falge in view of the patents to Hewitt, Steinmetz, and D'Humy. Taking the additional step embraced in the second group of claims would clearly be obvious to one skilled in the art, in view of the references last named.

We agree with the conclusion of the Board of Appeals upon all of the rejected claims, and its decision is affirmed.

Affirmed.

HATFIELD, *J.*, did not participate in this decision.

IN RE LANSING AND HAUSAMANN

No. 3,764. Decided March 22, 1937

[88 F.(2d) 487]

PATENTABILITY—ENGINE STARTING APPARATUS.

Claims for an engine starting apparatus *Held* unpatentable since "there was no invention in substituting a portable motor to supply mechanical power to rotate the flywheel instead of handpower applied through a crank, as disclosed by Chilton."

APPEAL from the Patent Office. Affirmed.

Messrs. McConkey & Smith, Mr. Martin J. Finnegan, and *Mr. N. D. Parker, Jr.,* for Lansing and Hausamann.

Mr. R. F. Whitehead and *Mr. Howard S. Miller* for the Commissioner of Patents.

LENROOT, *J.:*

This appeal brings before us for review a decision of the Board of Appeals of the United States Patent Office, affirming a decision of the Examiner rejecting, in view of the cited prior art, claims 20, 24, 26, 27, and 31 of appellants' application. No claims were allowed.

Claims 20 and 26 are illustrative of all of the involved claims and read as follows:

20. In an accelerator for starters of the character employing an inertia member adapted to be rotated to high speed for storage therein of energy to be subsequently transferred to a member of an engine to be started, a method of accelerating said inertia member to a speed far in excess of the starting speed of said engine member consisting of connecting a portable driving shaft therewith, and energizing said driving shaft by application thereof of power taken from a source external of said engine and inertia member.

26. In engine starting apparatus, a flywheel adapted for high speed rotation, a clutch member adapted to engage a member of an engine to be started, a gear train drivably connecting said flywheel and clutch member, means for energizing said flywheel including a power driven manually transportable accelerator, and means for drivably connecting said accelerator with said gear train.

A large number of references were cited; some of them were relied upon for the rejection of claims not involved in this appeal. The references relied upon by the Board of Appeals with respect to the claims before us are as follows: Foster, 1,417,508, May 30, 1922; Knipfer, 1,504,766, August 12, 1924; Chilton, 1,561,506, November 17, 1925; Chilton, 1,660,953, February 28, 1928; Fentress, 1,352,803, September 14, 1920; Moretti, 1,702,742, February 19, 1929; Levedahl, 1,684,633, September 18, 1928; Levedahl, 1,757,125, May 6, 1930.

The claimed invention embraced in the involved claims relates to aircraft engine starting mechanism. Appellants' application states:

For starting internal combustion engines, and particularly air-ship engines, inertia starters are used. In these, an inertia mass such as a flywheel is set in very rapid rotation, say of the order of 20,000 R. P. M., and then is connected with a member of the engine to be started, properly to apply the kinetic energy of the flywheel to cranking the engine. Speed-changing gearing of high order of reduction is interposed between the flywheel and that driving member of the starter which is to be engaged with the engine to crank it and commonly the starter is hand-operable, either as the sole manner of accelerating the flywheel or supplementally to the provision of an electric starting motor, the hand-cranking shaft being usually operatively connected with a low speed member of the reduction gearing.

A primary purpose of the present invention is to provide desirable and effective means for accelerating inertia starters by power taken from an outside source of electrical supply, thus to avoid necessity for hand-cranking, or the use of the air-ship's storage battery for starting purposes where the starter is of the motor-powered type.

Further objects of the invention are to provide a motor-unit of the accelerator equipment in the convenient form of a hand-tool which will be of simple, effective and durable construction, and to combine with such motor-unit such electrical control-equipment as will both safeguard the motor and insure its effective operation to deliver proper initial torque to, and effect sustained acceleration of, the starter for promptly, safely and efficiently bringing its flywheel speed up to the desired maximum.

The patents to Chilton disclose inertia starters in which a flywheel is connected by suitable gearing to a shaft which carries a driving clutch. Power by means of a hand crank is applied to rotate the shaft which, through gearing, rotates the flywheel to high speed, after which the clutch is moved manually into engagement with a member of the engine to be started.

The patent to Foster states:

This invention relates to improvements in starting devices for internal combustion engines, and more particularly to a device for starting, or cranking the engines of aeroplanes or the like; the principal object of the invention being to provide a portable, electrically driven device of this character, comprising a cranking shaft, having telescoping sections that may be extended and removably attached to the propeller of an aeroplane, and may be driven to effect starting of the aeroplane engine, and which will automatically detach itself from the propeller after the engine has been started.

The drawings show the device as mounted upon a truck.

The patent to Knipfer discloses a somewhat similar cranking device for aeroplanes, also mounted upon a truck.

The patent to Fentress relates to an inertia starting device. A flywheel is rotated manually and when, in the judgment of the operator, a sufficient speed has been obtained, connection is made to the crank shaft through additional gearing.

The patents to Moretti and Levedahl show small portable motors with reduction gearing, used in connection with tools whose shafts are provided with suitable fittings to perform the work for which the tools are designed.

The Board of Appeals in its decision concisely states the only issue before us as follows:

The claims on appeal present the broad question of whether the substitution of a portable motor for the manual expedient contemplated by the prior art amounts to invention, especially in view of the use of a portable motor in the art for starting purposes.

The Board held that claim 20 was so broad as to read directly upon the Chilton patents, as it does not exclude power applied through a crank operated by hand, and that, even if the phrase "power taken from a source external of said engine and inertia member" contained in the claim be construed to mean mechanical power, the claim is unpatentable over Chilton in view of Knipfer and Foster. With respect to the remaining claims before us, the Board held that while they are more specific with respect to the source of power rotating the flywheel, they are unpatentable over the references Chilton, Knipfer, Foster, Moretti, and Levedahl.

In other words, the Board held that, in view of the references there was no invention in substituting a portable motor to supply mechanical power to rotate the flywheel instead of hand-power applied through a crank as disclosed by Chilton. We think the Board came to the right conclusion.

While it is true that the portable motors disclosed by Foster and Knipfer were no doubt large and heavy and mounted upon trucks, because the power was applied directly to the crankshaft of the engine, nevertheless we are of the opinion that it would be obvious to one skilled in the art, with the last named patents before him, that smaller motors could be used to transmit power to the flywheel disclosed by Chilton, in lieu of hand-power applied through a crank.

For the reasons herein stated, the decision of the Board of Appeals is affirmed.

HATFIELD, *J.*, did not participate in this decision.

Affirmed.

U. S. Court of Customs and Patent Appeals

IN RE WENZEL

No. 3,767. Decided March 22, 1937

[88 F.(2d) 501]

1. PATENTABILITY—PUBLICATION TWO YEARS BEFORE APPLICATION FILED.

A publication is a bar to the granting of a patent on an application filed more than two years thereafter, for any invention disclosed in said publication even though that invention was made prior to the date of the publication.

2. SAME—SAME.

Such a two year publication is a bar to the grant of any claim which does not define an invention over what is disclosed therein even though it be necessary to cite prior patents or publications to show that the necessary modification would have been obvious.

3. SAME—SAME—INVENTION.

Claim for a method of insulating walls, ceilings, etc. *Held* unpatentable as stating no invention in view of a prior patent over what was disclosed in a publication of a date more than two years prior to the filing of applicant's application.

APPEAL from the Patent Office. Affirmed.

Mr. Ralph W. Brown and *Mr. E. E. Weaver* for Wenzel.

Mr. R. F. Whitehead and *Mr. Howard S. Miller* for the Commissioner of Patents.

LENROOT, *J.:*

This is an appeal from a decision of the Board of Appeals of the United States Patent Office, affirming a decision of the Examiner rejecting claims 18, 19, 20, and 22 of appellant's application for lack of invention over the cited prior art. Certain claims were allowed by the Examiner. Appellant's application was filed on December 6, 1929.

Claim 18 is illustrative of the subject-matter involved and reads as follows:

18. The method of insulating walls, ceilings and the like which consists in diffusively spraying into the space therein a substantially dry flocculent material, and floating the particles thereof into light mutual contact to form a loose non-compacted mass substantially filling the space within the wall.

The references cited are: Kalkite ad.; page 7, "The Wheaton Illinoian," July 15, 1927; Chase, 318,870, May 26, 1885.

The reference last above named was not cited by the Examiner, but was cited by the Board of Appeals.

Appellant's application relates to a process of insulating hollow walls, ceilings, and the like by pneumatically spraying therein flocculent material in a dry state.

The references are accurately described in appellant's brief as follows:

The Kalkite advertisement (Record p. 22D) is a printed publication, conceded to have been published on July 15, 1927, slightly more than two years prior to the filing date, (December 6, 1929) of appellant's application.

It refers to an insulating material termed Kalkite, consisting of "vegetable fibre bounded with gypsum", which is introduced into a wall space through a pneumatic hose in a manner to form a substantially rigid slab within the wall space. The ad states that the "gypsum bond converts the Kalkite into a monolithic barrier against the passage of useful heat and the entrance of unwanted cold". It is described as "having a cork-like structure" and is said to "add strength to the house walls and help to prevent settling and undue sagging".

* * * * * * * *

The Chase patent, No. 381,870, issued May 26, 1885 (Record p. 22A, 22B, and 22C) relates to a specially constructed refrigerator wall filled with "mill-shavings, cut straw, granulated cork, or other light and elastic non-conducting material". * * *

The insulating material employed by appellant differs from that described in the Kalkite advertisement in that appellant's material is comminuted, dry, and when in place is a loose non-compacted mass, while in the Kalkite advertisement the material when in place forms a solid mass. However, the material disclosed in the Chase patent for insulating purposes is similar to the material employed by appellant.

It will be noted that the date of the Kalkite advertisement is July 15, 1927, which was more than two years prior to the date of the filing of appellant's application.

It is established by the record that the invention claimed by appellant was conceived and reduced to practice by her as early as 1924.

Three principal contentions are made by appellant, as follows:

1. That the Kalkite advertisement is not a proper reference because appellant made the invention here involved before the date of its publication, and said publication is not a statutory bar because ap-

pellant employs a different insulating material than that disclosed in said advertisement.

2. That because appellant made the claimed invention before the date of the Kalkite advertisement, it was error upon the part of the Board of Appeals to combine the disclosure of said advertisement with the disclosure of the Chase patent as a basis for finding that the involved claims lacked invention.

3. That appellant's claims are patentable, even though said references be combined.

With respect to appellant's first contention, we would observe that the Examiner made no reference to this point in his statement, nor did the Board in its original decision. Upon a motion for reconsideration, however, the Board in a second decision did discuss this point, saying:

> Appellant's main contention is that this invention was reduced to practice by this applicant long prior to July 15, 1927, the date of the Kalkite publication as established in interference No. 59,408. Yet appellant recognizes that the date of the publication is more than two years prior to the filing date of his application so that the publication is a statutory bar as to all that it discloses.
>
> It seems to be appellant's position that to defeat the appealed claims, the publication must disclose a method substantially that defined in the claims and the publication cannot be used as a primary reference with which a secondary reference is combined to meet the terms of the claims. We know of no authority in support of such contention and appellant has cited none. It is our view that the Kalkite advertisement is a proper reference as used by us.

[1] We are of the opinion that the Kalkite publication is a statutory bar against the patenting of any invention disclosed in said publication, when the date of application for patent is more than two years subsequent to the date of the publication, even though the invention sought to be patented was made prior to the date of publication. Clearly, to constitute such bar the invention disclosed in the publication need not be described in the exact terms used to describe the invention sought to be patented. It is sufficient if the same inventive concept is found in both. Were this not so a statutory bar would have little scope as barring an invention made earlier than the date of a publication, but for which an application for patent is filed more than two years after the date of the publication.

The gist of appellant's claimed invention is the diffusively spraying of dry flocculent insulating material into the wall-space of a building. The Kalkite publication discloses a similar spraying of insulating material of a different character into the wall-space of a building. If the kind of material sprayed by appellant is disclosed by the prior art, and not a part of the inventive concept, then the real invention, if any, is the spraying of insulating material into the wall-space of a building, and in such case the Kalkite publication would be a statutory bar to the allowance of appellant's claims because her application was filed more than two years after the date of said publication.

On the other hand, if the kind of material used was a part of the inventive concept because it would not be obvious to one skilled in the art to substitute it for the material disclosed in the Kalkite publication, then it might be that said publication would not constitute a statutory bar to the allowance of appellant's claims. However, the publication is certainly a statutory bar to all that it discloses.

Counsel for appellant have cited the case of *Klein* v. *Russell*, 86 U. S. 433, which they state is the only case they can find bearing upon this point. That case involved in part the question of two years' public use of a novel treatment for lamb skins by the use of a fat liquor. Upon the trial in the lower court the defendant [Klein] requested the trial judge to charge the jury as follows:

> 7th. That if fat liquor had been used substantially in the manner specified in the plaintiff's patent, for the purpose of rendering any kind of leather soft and supple, more than two years [before the plaintiff applied for a patent], the plaintiff cannot recover, even though it had not been so used in dressing bark-tanned lamb or sheep skins.

It further appears that the trial judge refused so to charge the jury, and that the basis of his refusal was the words "before the plaintiff applied for a patent." Exception to this refusal was taken. In the opinion the Supreme Court did not discuss this exception with particularity; with respect to a number of exceptions, including the one under consideration, the court contented itself with the following statement:

> "We are satisfied with the rulings of the learned judge who tried the case as to each and all of them."

The law then, as now, expressly provided that two years' public use of an invention before the date of the *application for a patent* would constitute a statutory bar, and we are of the opinion that the affirmance of the refusal of the trial court so to instruct must have been an inadvertence. At any rate, we are of the opinion that the Supreme Court would not now make a like holding, and we cannot accept the decision relied upon by appellant as controlling here.

We next come to appellant's contention that, conceding that the Kalkite publication is a statutory bar as to all that it discloses, inasmuch as appellant made the invention prior to the date of the Kalkite publication, it was error upon the part of the Board to combine its disclosure with the disclosure of the Chase patent. Upon this point the Board stated that it knew of no authority to support this contention and that appellant had cited none.

[2] Where there is a basic reference, and other patents or publications are relied upon to show that any modification of such basic reference to make it conform to the disclosure of an application would be obvious to one skilled in the art, it is merely establishing that the basic reference constitutes the entire invention for which an applicant seeks a patent, and in such case it seems to us that the basic reference would constitute a statutory bar to an application if such reference were issued or published more than two years prior to the application.

Applying the foregoing to the case at bar, we are of the opinion that the Kalkite publication discloses the entire inventive concept of appellant's prior invention. The Chase patent, issued in 1885, disclosed the use of

> "dry mill shavings, cut straw, granulated cork, or other light and elastic non-conducting material."

This certainly describes "dry flocculent material" claimed in appellant's process.

We have the Kalkite publication disclosing the invention of spraying by pneumatic means of insulating material of a certain character into the wall-spaces of buildings; at the time of said publication, and at the time appellant made her invention, the public knew through the Chase patent that dry flocculent material was excellent for insulation purposes. Therefore, the public was for more than two years prior to appellant's application in full possession of appellant's invention, unless the substitution of dry flocculent material in the Kalkite process involved the exercise of the inventive faculty. We are of the opinion that, for more than two years prior to appellant's application, to one skilled in the art it would be obvious from the prior art that dry flocculent material is desirable for insulating purposes, and that it could be sprayed into wall-spaces by the method disclosed in the Kalkite publication. Therefore, in our judgment the Kalkite publication involved the entire inventive concept that is here involved; in other words, the said publication discloses the entire invention that appellant had made prior thereto, and said publication is a statutory bar against the allowance of appellant's claims.

[3] With respect to appellant's third contention that, even if the references be combined, irrespective of the date of appellant's invention, they do not negative patentability of appellant's claims, what we have already said with respect to the two references is applicable here, and it follows that we must hold that appellant's claims are not patentable over the references.

For the reasons stated, the decision of the Board of Appeals is affirmed.

Affirmed.

HATFIELD, *J.*, did not participate in this decision.

TRADE-MARKS

OFFICIAL GAZETTE, NOVEMBER 2, 1937

[VOL. 484. No. 1]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 1 of said act, a fee of ten dollars must accompany each notice of opposition.

CLASS 1

Raw or Partly Prepared Materials

Ser. No. 393,866. MINNESOTA MINING & MANUFACTURING COMPANY, St. Paul, Minn. Filed June 9, 1937.

MINNESOTA MINING & MFG CO. · 3MC · B-A · SINCE 1828 · ST. PAUL, MINN.

The words "St. Paul, Minn." are disclaimed apart from the mark.

For Quartz, Quartzite, Digester, Filter, and Sandpaper Quartz, Aggregate, Plaster, Gravel, Sand, Sand Filler, Silica Flour, Silica, Bird, Pigeon and Chick Grit, Run of Quarry, Garnet, Corundum, and Roofing Granules.

Claims use since December, 1929.

Ser. No. 394,697. COMMERCIALE ITALIANA SOCIETÀ ANONIMA PER IL RAYON CISA-RAYON, Rome, Italy. Filed June 30, 1937.

The words "Rayon" and "Roma" are disclaimed apart from the mark.

For Artificial Textile Fibres.

Claims use since 1934.

Ser. No. 396,034. GARDEN STATE TANNING CO., New York, N. Y. Filed Aug. 5, 1937.

FRENCH PROCESS SUEDE

The drawing is lined for blue. The words "French Process Suede" are disclaimed apart from the mark.

For Raw Hides.

Claims use since January, 1936.

Ser. No. 396,457. EZ-FIRE COMPANY, Ludowici, Ga. Filed Aug. 16, 1937.

EZ-FIRE

The word "fire" is disclaimed apart from the mark.

For Kindling Blocks.

Claims use since June 20, 1937.

Ser. No. 397,008. TENNESSEE EASTMAN CORPORATION, Kingsport, Tenn. Filed Sept. 1, 1937.

TECA

For Synthetic Staple Fiber.

Claims use since July 31, 1937.

Ser. No. 397,021. ANDREW G. CLUNE, doing business as National Fur Institute, Brooklyn, N. Y. Filed Sept. 2, 1937.

HUDSON SEAL

The words "Hudson Seal" are disclaimed apart from the mark.
For Hudson Seal Fur.
Claims use since February, 1937.

Ser. No. 397,093. VERZA TANNING CO., Peabody, Mass. Filed Sept. 3, 1937.

VELBUK

For Partly-Prepared and Finished Leathers.
Claims use since Nov. 12, 1935.

Ser. No. 397,230. WILLARD HELBURN, INC., Salem, Mass. Filed Sept. 9, 1937.

SYLVAR

For Leather.
Claims use since Aug. 1, 1937.

Ser. No. 397,394. VERZA TANNING CO., Peabody, Mass. Filed Sept. 13, 1937.

VELSKIN

For Partly-Prepared and Finished Leathers.
Claims use since March, 1917.

CLASS 2

Receptacles

Ser. No. 391,480. LAMCOTE, INCORPORATED, Chicago, Ill. Filed Apr. 17, 1937.

LAMCOTE

For Cartons, Packages, Boxes, and Bags Formed of a Multi-Ply Product Comprising Essentially a Ply of Paper or Fiberboard Having Adhesively United Thereto a Ply of Transparent Material.
Claims use since Nov. 12, 1936.

Ser. No. 397,111. ELECTRO-COSMIC, INC., Chicago, Ill. Filed Sept. 4, 1937.

PRESERVO Silk Sax ODORPROOF CONTAINERS

The words "silk odorproof containers" are disclaimed.
For Odorproof Containers Made of Oil Silk.
Claims use since Aug. 4, 1937.

CLASS 3

Baggage, Animal Equipments, Portfolios, and Pocketbooks

Ser. No. 394,155. LELIUS C. ZANDER, doing business as Valzan Manufacturing Company, Van Nuys, Calif. Filed June 16, 1937.

Hip-o-Kit

The word "Kit" is disclaimed apart from the mark.
For Salesmen's Portfolios Containing Sales Forms, Order Pads, and Order Books.
Claims use since May 17, 1937.

Ser. No. 395,645. MARATHON PAPER MILLS COMPANY, doing business as Marathon Chemical Company, Rothschild, Wis. Filed July 26, 1937.

MARATHON
EXTRACT

The word "Extract" is disclaimed apart from the mark.
For Tannery Materials and Extracts in Both Liquid and Solid Forms, Both of which Contain Lignin-Sulphonic Acid Compounds.
Claims use since July 19, 1937.

Ser. No. 395,723. SHARP & DOHME, INCORPORATED, Philadelphia, Pa. Filed July 28, 1937.

DEPROPANEX

For Pancreatic Extract Freed of Insulin and Other Proteins.
Claims use since July 22, 1937.

Ser. No. 395,843. STANDARD OIL DEVELOPMENT COMPANY, Linden, N. J. Filed July 30, 1937.

PARASHADE

For Dye for Oils.
Claims use since July 9, 1937.

Ser. No. 395,889. WALGREEN CO., doing business as Carrel, Chicago, Chicago, Ill. Filed July 31, 1937.

· TIDY ·

For Deodorant.
Claims use since September, 1928.

Ser. No. 395,916. FRANK J. HEILMANN, doing business as Heilmann's, Los Angeles, Calif. Filed Aug. 2, 1937.

HEILMANN'S
FORMULA
"99"

The word "Formula" is disclaimed apart from the mark.
For Gout and Rheumatic Medicine.
Claims use since Apr. 6, 1936.

Ser. No. 395,917. FRANK J. HEILMANN, doing business as Heilmann's, Los Angeles, Calif. Filed Aug. 2, 1937.

HEILMANN'S
FORMULA
"40"

The word "Formula" is disclaimed apart from the mark.
For Laxative Preparation.
Claims use since Apr. 6, 1936.

Ser. No. 395,951. NOVOCOL CHEMICAL MFG. CO., INC., Brooklyn, N. Y. Filed Aug. 3, 1937.

MONOCAINE

For Local Anesthetic Material Made in Solution, Powdered, or Tablet Forms.
Claims use since Mar. 12, 1937.

Ser. No. 395,952. NOVOCOL CHEMICAL MFG. CO., INC., Brooklyn, N. Y. Filed Aug. 3, 1937.

TABESTHESIN

For Material for Use as a Surface Anesthetic, by Combining the Same with Thymol and Benzocaine, Such Material Being in Paste or Powdered Forms.
Claims use since July 9, 1937.

Ser. No. 395,999. THE MALTINE COMPANY, New York, N. Y. Filed Aug. 4, 1937.

Maltine's

For Medicinal Compounds, More Particularly Bile Salts Tablets, Ferrous Sulfate Tablets, Hematinic Capsules, and Cod Liver Oil Concentrate Tablets.
Claims use since May 15, 1935.

Ser. No. 396,056. JAYMAR'S INC., Denver, Colo. Filed Aug. 3, 1937.

JAYMAR'S

For Skin Lotions.
Claims use since June 28, 1937.

Ser. No. 396,119. BEAUMONT S. CORNELL, Fort Wayne, Ind. Filed Aug. 7, 1937.

Anamin

For Preparation for the Treatment of Neoplasms.
Claims use since Aug. 5, 1937.

Ser. No. 396,286. C. F. VAN DAM, Los Angeles, Calif. Filed Aug. 11, 1937.

FELTABS

For Bile Tablets for the Purpose of Arousing Intestinal Activity and Relieving Constipation.
Claims use since June 11, 1937.

Ser. No. 396,301. JOSEPH DI MAURO, Ansonia, Conn. Filed Aug. 12, 1937.

POLYPUF

For Medicinal Preparation for the Treatment of Piles and Hemorrhoids.
Claims use since June 1, 1937.

Ser. No. 396,347. NATHAN BARON, Jamaica, N. Y. Filed Aug. 13, 1937.

NAZ-DROW

For Cough Mixture for Children, Cough Mixture for Adults, and Liniments.
Claims use since March, 1935.

Ser. No. 396,351. CLEVELAND CHEMICAL ASSOCIATES, INCORPORATED, Cleveland, Ohio. Filed Aug. 13, 1937.

Creamalin

For Colloidal Cream of Aluminum Hydroxide for the Treatment of Peptic Ulcer, To Be Taken Internally.
Claims use since August, 1932.

Ser. No. 396,421. THE NORWICH PHARMACAL COMPANY, Norwich, N. Y. Filed Aug. 14, 1937.

Zyloxin

For Organic Mercurial Antiseptic.
Claims use since May 13, 1937.

Ser. No. 396,478. PAUL ROSEN, doing business as Rid Company, New York, N. Y. Filed Aug. 16, 1937.

RID

For Mouth Deodorant.
Claims use since July 16, 1937.

Ser. No. 396,532. EVER-PLASTICS CORPORATION, New York, N. Y. Filed Aug. 18, 1937.

GRAFTEX

For Preparation for Use in the Grafting and Dressing of Trees and Plants.
Claims use since Aug. 11, 1937.

Ser. No. 396,576. ROBERT J. PIERCE, INC., New York, N. Y. Filed Aug. 19, 1937.

PierSol

For Anodyne Tablets for Use in Aiding Comfort During Menstruation and Also for Use in Common Colds for Reducing the Fever Which Usually Accompanies the Same, as well as for the Treatment of Pain from Simple Headaches and Neuralgia.
Claims use since July 21, 1937.

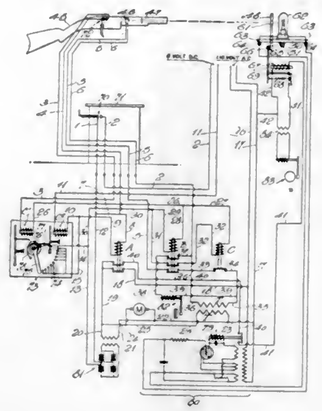
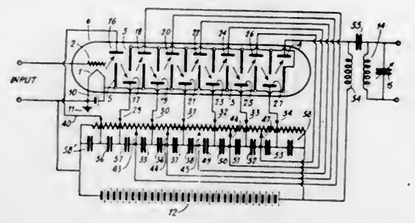
REISSUES

NOVEMBER 2, 1937



20,543
SEPARATOR
Joe Crites, Evanston, Ill., assignor, by mesne assignments, to Combustion Engineering Company, Inc., a corporation of Delaware
Original No. 2,070,650, dated February 16, 1937, Serial No. 31,856, July 17, 1935. Application for reissue June 4, 1937, Serial No. 146,450
27 Claims. (Cl. 209—139)

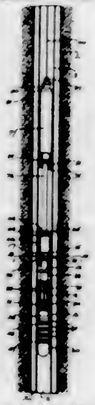
20. In combination, an upright casing, means for causing an air stream to flow upwardly through the casing carrying finely divided solid material in suspension, said casing having an annular top wall surrounding a centrally positioned outlet for the air stream, a rotary deflector pivoted about the central vertical axis of the casing and projecting at its periphery into proximity to the casing wall, the deflector being formed with openings in its outer portion for the passage of the air stream, means for rotating the deflector, a non-rotary annular member carried by the casing and spaced downwardly from the top wall of the casing and cooperating with the deflector to provide an inwardly open annular separating space in which the air stream whirls, and adjustable damper means positioned to be projected to selected positions in the separating space.



20,544
SHOOTING GALLERY
Charles W. Griffith, Tulsa, Okla., assignor, by mesne assignments, to Rayolite Rifle Range Company, Tulsa, Okla., a corporation of Oklahoma
Original No. 2,007,083, dated July 2, 1935, Serial No. 738,767, August 6, 1934. Application for reissue February 23, 1937, Serial No. 127,181
30 Claims. (Cl. 273—101.1)

12. A shooting gallery comprising a movable target and means for moving the target, said target including a drop member, means for holding the drop member in raised position, said drop member being provided with an aperture, a light sensitive cell associated with the target and movable therewith, said cell being alined with said aperture, and being positioned to be struck by a flash of light accurately directed at the target, and means for actuating said drop holding means

for causing said drop member to fall when a flash of light impinges on said cell.



20,545
ELECTRON TUBE
Kenneth W. Jarvis, New Rochelle, N. Y., and Russell M. Blair, Teaneck, N. J.
Original No. 1,903,569, dated April 11, 1933, Serial No. 135,604, September 15, 1926. Application for reissue April 8, 1935, Serial No. 16,108
36 Claims. (Cl. 179—171)

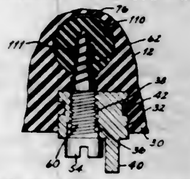
5. An electron discharge device, comprising an evacuated vessel, a cathode to emit primary electrons, a plurality of electrodes, a collector plate electrode mounted to emit secondary electrons under bombardment of primary electrons, an output plate electrode positioned with respect to said collector plate to receive the secondary elec-

tron emission from said collector plate electrode, and a shielding element connected with said cathode and disposed adjacent said output plate for substantially shielding the output plate electrode from all electrodes except the collector plate electrode.

20,546
WELL TOOL
Herbert C. Otis, Dallas, Tex.
Original No. 1,920,103, dated July 25, 1933, Serial No. 499,372, December 1, 1930. Application for reissue June 7, 1935, Serial No. 26,671
30 Claims. (Cl. 166—13)

13. In a well tool including an obstructive device arranged to be run into and out of a well on a wire line, the combination of a mandrel carrying an expansible sealing means to prevent flow around the mandrel, detachable means to restrict rate of fluid passage through the mandrel, means for positioning the tool at any desired depth in the tubing, and means for engagement with a removing tool runnable on a wire line, whereby the well tool may be removed through the tubing on said wire line.

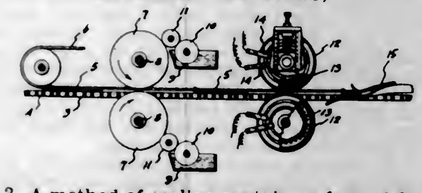
20,547
METHOD OF MAKING CRYSTALLINE ALUMINA AND A PRODUCT CONTAINING THE SAME
Raymond R. Ridgway, Niagara Falls, N. Y., assignor to Norton Company, Worcester, Mass., a corporation of Massachusetts
No Drawing. Original No. 2,003,867, dated June 4, 1935, Serial No. 690,589, September 22, 1933. Application for reissue January 8, 1936, Serial No. 58,235
31 Claims. (Cl. 23—142)



1. The process of producing crystalline alumina in large discrete particles by a single furnacing operation from impure aluminous ores containing one or more of the oxides of silicon, titanium and zirconium, comprising the steps of melting and purifying the alumina in an electric furnace at a high temperature by means of a carbonaceous reducing agent and a limited quantity of not over 5% by weight of a sulfide of a metal of the group consisting of alkali metals and alkaline earth metals which are so proportioned that the solidified melt will consist of crystallized alumina held in a matrix of a water disintegratable glass containing the residual unreduced titanium, zirconium and iron impurities, and slowly cooling the melt to produce large crystals of alumina, the major portion of which are over 100 grit size and thereafter disintegrating the matrix by treating the mass with water and separating the alumina crystals from the impurities.

31. A composition of matter comprising crystalline alumina grains crystallized from a matrix containing the sulfide of a metal of the group consisting of alkali metals and alkaline earth metals, the major portion of which grains are larger than 100 grit size and are well formed, polyhedral, non-fractured, discrete crystals of alumina having plane faces forming both exterior and re-entrant dihedral angles and which are substantially devoid of inclusions of droplets of metal or a glassy phase and analyzing within the following composition range in percentages by weight: Al_2O_3—99.64 to 98.9%; TiO_2—0.2 to 0.6%; SiO_2—nil; Fe_2O_3—0.05 to 0.1%; ZrO_2—0.05 to 0.2%; CaO—0.02 to 0.1%; MgO—0.04 to 0.1%; and Na_2O—nil.

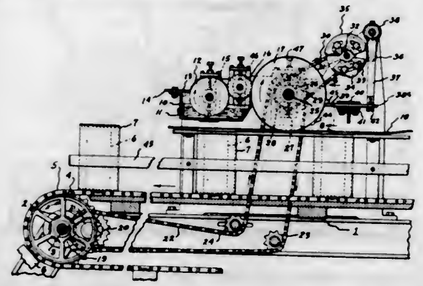
PATENTS



GRANTED NOVEMBER 2, 1937

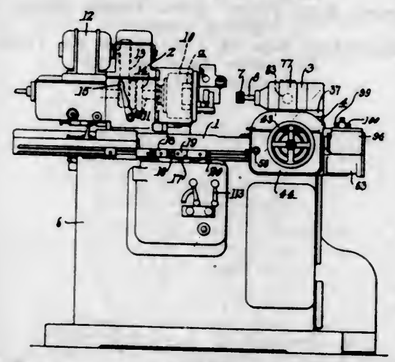
2,097,426
DISTRIBUTOR CAP
James L. Arthur and William D. Schrope, Anderson, Ind., assignors to General Motors Corporation, Detroit, Mich., a corporation of Delaware
Application August 10, 1935, Serial No. 35,603
7 Claims. (Cl. 173—340)

1. A terminal support for an insulated cable comprising in combination, a body of molded insulating material having a relatively thick wall, conductive members secured within the end wall as inserts with the material of the body molded about recess portions of the inserts, said end wall having bores extending inwardly from the peripheral edge surface, each to end after passing over one of the inserts, and bi-pitch threaded members each threaded through an insert and projecting laterally across the inner end of the respective bore.



2,097,427
ART OF SEALING CONTAINERS
Robert Morris Bergstein, Cincinnati, Ohio, assignor to Edna May Bergstein and himself, as trustees
Application August 23, 1935, Serial No. 37,553
14 Claims. (Cl. 93—35)

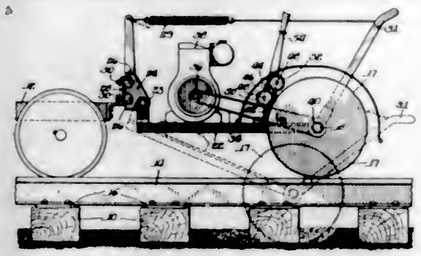
2. A method of sealing containers formed from flexible sheet material permeable to the solvent to be used which consists as an initial step, coating the inner surfaces at least of the portions to be sealed, with a drying adhesive, then forming the material into containers, then bringing together the portions to be sealed together with the adhesive coated inner surfaces into overlying relation, and moistening the outer surfaces of the portions with a solvent which permeates the sheet material and softens the dry adhesive coated surfaces, and finally heating and pressing the portions to be sealed together.



2,097,428
MECHANISM FOR SEALING PACKAGES HERMETICALLY
Samuel Bergstein, Cincinnati, Ohio, assignor to Edna May Bergstein and Robert Morris Bergstein, as trustees
Application February 14, 1935, Serial No. 6,537
12 Claims. (Cl. 91—50)

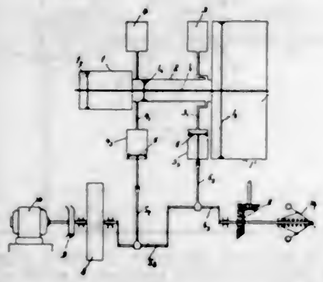
1. For use with a carton flap sealing machine having an adhesive spreading doctor roller, an adhesive applying roller, and feeding means for moving a carton so that a flap thereof comes into surface engagement with a coating of adhesive evenly spread on said roller, mechanism comprising reciprocating scraper means so positioned with respect to said adhesive applying roller as

to engage said roller after it has carried adhesive thereon past the high point in its arc of peripheral movement and for engaging the surface of said roller whereby an excess of adhesive is built up on said roller and whereby with the withdrawal of said means said excess is deposited in a predetermined position on said carton flap.



2,097,429
GRINDING MACHINE
Harold L. Blood, Worcester, Mass., assignor to The Heald Machine Company, Worcester, Mass., a corporation of Massachusetts
Application January 13, 1937, Serial No. 120,419
10 Claims. (Cl. 51—95)

1. In a grinding machine, a wheel supporting member having a wheel thereon, a work-supporting member having a workpiece mounted therein, means for procuring a relative movement between said members to bring the wheel and workpiece into engagement, means responsive to engagement between the wheel and the workpiece for procuring a movement of one of said members relative to the supporting structure therefor, means responsive to said last movement for procuring a change in the grinding operation, and hydraulically actuated means for preventing fur-

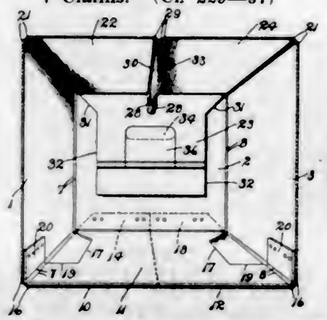


ther movement of said movable member relative to the supporting structure after the wheel and workpiece are in engagement.

2,097,430
TIE REMOVER
Hugh S. Brown, Harvey, Ill., assignor to Hubron Company, Inc., Somerville, N. J., a corporation of New Jersey
Application October 12, 1933, Serial No. 693,241
4 Claims. (Cl. 143—43)

3. Apparatus for removing railroad ties comprising suitable framework supported for pivotal movement in a vertical plane, a soft steel saw disc rotatably mounted on said framework, said saw disc being capable of movement into cutting engagement with the ties upon pivotal movement of said framework, means carried by said framework for rotating said saw disc, an upstanding support secured to said framework adjacent the saw disc, and means carried by said upstanding support for forming teeth on said saw disc, said teeth forming means being shiftable into and out of engagement with the saw disc.

2,097,431
STABILIZING DEVICE FOR TWO-STROKE FREE PISTON ENGINES
Georges Jean Pierre Jules Joseph Brun, St. Etienne, France
Application June 19, 1935, Serial No. 27,292
In France June 20, 1934
15 Claims. (Cl. 230—56)

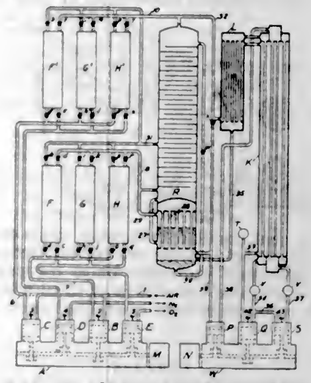


1. In a two-stroke free piston engine, the combination comprising a working cylinder, a compressor cylinder, a rod, adapted to move freely inside said cylinders, a working piston and a compressor piston movable in said cylinders and keyed in tandem on said rod, a stabilizing device, comprising a rotatable shaft, a fly-wheel on said shaft, and means for elastically connecting said shaft with said free rod.

2,097,432
ACETATE ARTIFICIAL SILK DYESTUFFS
Peter George Carter and Reginald Harold Sennett, Blackley, Manchester, England, and Cecil Shaw, Grangemouth, Scotland, assignors to Imperial Chemical Industries Limited, a corporation of Great Britain
No Drawing. Application November 5, 1935, Serial No. 48,442. In Great Britain November 12, 1934
2 Claims. (Cl. 8—5)

1. The process for coloring materials comprising cellulose acetate which comprises applying thereto an aqueous dispersion of Bz-1-methoxybenzanthrone.

2,097,433
SHIPPING CASE
Lloyd G. Clark and Merrill A. Grogel, Grand Rapids, Mich., assignors to American Box Board Company, Grand Rapids, Mich., a corporation of Michigan
Application August 10, 1936, Serial No. 95,158
7 Claims. (Cl. 229—37)

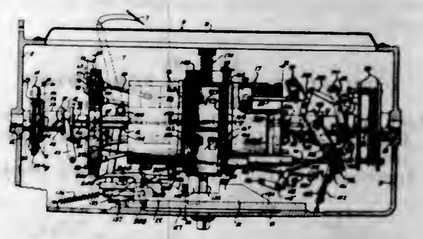


2. A shipping case having vertical sides and ends connected together, bottom sections hinged to the lower edges of said sides extending horizontally inward toward each other and meeting at their free longitudinal edges, means for securing said bottom sections to the ends of the case, auxiliary sections hinged to the lower edges of said ends and extending inwardly toward each other and substantially meeting at their free end edges, and means for securing said auxiliary bottom sections to the sides of the case.

3. A shipping case having vertical sides and ends, and a horizontal bottom, and sections hingedly connected to the upper edges of the ends of said case and extending downwardly at the inner sides of said ends, each of said ends having an opening for hand insertion therethrough, and each of said sections including an integral flap in the body of the section severed from said section at its upper and vertical edges and hinged to the section at its lower edge, said flaps being adapted to cover the adjacent openings in the ends of the case.

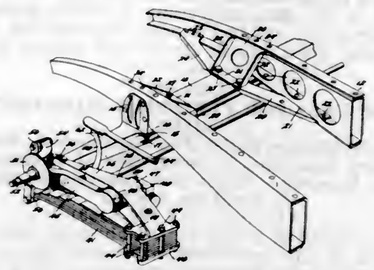
2,097,434
APPARATUS FOR COOLING AND RECTIFYING MIXED GASES
William Lane De Baufre, Lincoln, Nebr.
Application November 9, 1935, Serial No. 49,075
24 Claims. (Cl. 62—122)

16. Apparatus for cooling and rectifying mixed gases including regenerators for cooling the mixed gases and for warming the products of rectification, and positive displacement means driven in synchronism for withdrawing said products of rectification in measured quantities, whereby the quantities of said products of rectification are



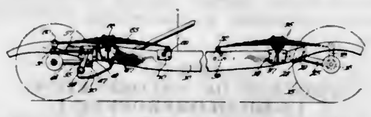
maintained in substantially the same ratio irrespective of the operating capacity of the apparatus.

2,097,435
THIOPHTHALIDE AND PROCESS OF MAKING THE SAME
Paul R. Austin and Paul L. Salzberg, Wilmington, Del., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application June 19, 1935, Serial No. 27,385
15 Claims. (Cl. 260—16)



12. A thiophthalide wherein at least one hydrogen atom is replaced by an aromatic substituent.

2,097,436
TRANSMISSION
David S. Bennetch, Sheridan, Pa.
Application May 26, 1933, Serial No. 673,086
12 Claims. (Cl. 60—53)



5. In a variable speed transmission, a motor unit and a pump unit, each comprising a rotary cylinder block and a tiltable swash plate rotating therewith, a mechanical clutch for connecting said units, a manually operated brake element for manually moving said motor swash plate from erect position, means immediately moving said motor swash plate to full tilt position irrespective of the extent of operation of said brake element, and means controlled by said brake element for throttling the fluid compressed by the motor unit to obtain braking action.

2,097,437
MOTOR VEHICLE
Frank C. Best, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a corporation of Michigan
Application March 6, 1933, Serial No. 659,879
Renewed July 7, 1937
5 Claims. (Cl. 280—124)

2. In a motor vehicle, the combination with a vehicle frame, of a steering knuckle carried by said frame, said knuckle being provided with a rearwardly extending substantially horizontal arm, a road wheel assembly located substantially laterally of said knuckle, a link supporting said assembly and extending rearwardly and forwardly therefrom, said link being pivotally connected to said knuckle arm for movement with respect thereto in a substantially vertical plane, and a leaf spring assembly carried by said knuckle toward the rear of said knuckle arm and connected to said wheel assembly supporting link at a point forward of said assembly to resist relative vertical movement of said arm and link.

2,097,438
MOTOR VEHICLE
Frank C. Best, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a corporation of Michigan
Application December 20, 1933, Serial No. 703,306
Renewed July 7, 1937
8 Claims. (Cl. 280—124)

1. In a motor vehicle, the combination with a vehicle frame, of a road wheel assembly, and means supporting said wheel assembly for rising and falling movement about an axis extending transversely of the frame, said means comprising a member carrying said wheel assembly, said member extending generally longitudinally of the vehicle toward the mid-portion of the frame and being journalled for rotation on the latter about a transverse axis, a longitudinally extending leaf spring assembly acting between said frame and said member to yieldingly resist rising and falling movement of the latter and of the wheel assembly, said spring assembly being connected to said frame on that side of the axis of rotation of said member remote from said wheel assembly, and a shock absorbing mechanism carried by said frame and including an operating shaft, said shaft being rigidly connected with said member to afford a fulcrum for the latter.

2,097,439

THERAPEUTIC PREPARATION AND PROCESS OF MAKING THE SAME

Reinhard Beutner, Louisville, Ky.

No Drawing. Application February 9, 1934, Serial No. 710,529. In Germany August 21, 1933
6 Claims. (Cl. 167—65)

1. A therapeutic preparation capable of producing analgesia and vaso-constriction when applied to the skin, comprising a phenol aldehyde condensation product whose condensation was arrested while still in the alcohol soluble state.

2,097,440

PROCESS FOR PURIFYING MAHOGANY SOAP

Manuel Blumer, Butler, Pa., assignor to L. Sonneborn Sons, Inc., a corporation of Delaware

No Drawing. Application October 16, 1934, Serial No. 748,453
4 Claims. (Cl. 260—159)

1. Process of purifying a mahogany soap obtained in the neutralization of acid treated oil and containing inorganic impurities which consists in the steps of forming a mixture of such soap, water, an alcohol containing not more than three carbon atoms, and sufficient alkali-metal hydroxide to cause separation of the mixture into a first liquid phase substantially free from inorganic salts in excess of 1% and consisting principally of mahogany soap and alcohol, and at least one more liquid phase, and recovering said first liquid phase.

2,097,441

AROMATIC POLYETHER CHLORIDES

Herman A. Bruson, Philadelphia, Pa., assignor to Röhm & Haas Company, Philadelphia, Pa.

No Drawing. Application May 14, 1936, Serial No. 79,718
16 Claims. (Cl. 260—150)

1. An aromatic polyether chloride having the formula

$$R—O—CH_2—CH_2—O—CH_2—CH_2—O—CH_2—CH_2Cl$$

in which R is an aromatic radical obtainable from a monohydric phenol.

3. An aromatic polyether chloride having the formula

$$R—O—CH_2—CH_2—O—CH_2—CH_2—O—CH_2—CH_2Cl$$

in which R is a phenyl radical containing as a nuclear substituent a monovalent hydrocarbon group.

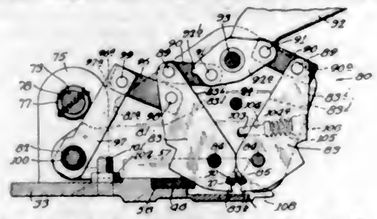
2,097,442

PROCESS OF CHLORINATING 1,1-DICHLORPROPENE-1

Oliver W. Cass, Niagara Falls, N. Y., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware

No Drawing. Application May 13, 1935, Serial No. 21,301
6 Claims. (Cl. 260—162)

1. A process for preparing chlorinated derivatives of propane which comprises reacting chlorine and 1,1-dichlorpropene-1 in the liquid phase in the dark at a temperature within the range 0–30° C.



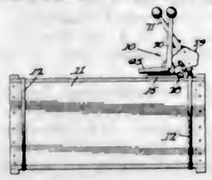
2,097,443

STRAP STRETCHING AND SEALING DEVICE

William C. Childress, Oak Park, Ill., assignor to Acme Steel Company, Chicago, Ill., a corporation of Illinois

Application August 22, 1932, Serial No. 629,798
16 Claims. (Cl. 81—9.1)

1. The combination in a sealing device, of a base plate, a movable head mounted on said base plate, a pair of relatively movable jaws mounted on said head, means for causing said jaws to hold an open seal inserted between them, means for effecting relative movement of said jaws to



bend said seal about overlapping strap ends, and means including a toggle connection between one of said jaws and said base plate for preventing relative movement of said jaws until a predetermined movement of said head has taken place.

2,097,444

STRAP STRETCHING DEVICE

William C. Childress, Oak Park, Ill., assignor to Acme Steel Company, Chicago, Ill., a corporation of Illinois

Original application February 10, 1932, Serial No. 592,050. Divided and this application January 30, 1934, Serial No. 708,986. Renewed February 25, 1937.
11 Claims. (Cl. 140—93)

1. The combination in a strap stretching device, of a pair of blocks having relative linear movement, gripping means carried by said blocks for gripping the opposite ends of a strap, and operating means for moving said blocks toward each other to draw said strap taut around a package, said operating means comprising relatively movable parts adapted to yield after a predetermined tension has been set up in said strap.

2,097,445

WHEEL SUSPENSION FOR MOTOR VEHICLES

John M. Christman, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a corporation of Michigan

Application March 11, 1933, Serial No. 660,416
10 Claims. (Cl. 280—124)

1. In a motor vehicle, the combination with a vehicle frame, of a steerable road wheel, means supporting said road wheel on said frame for substantially horizontal steering movement and for substantially vertical movement in response to irregular road conditions with respect to said frame, said means consisting of a steering knuckle and longitudinally extending leaf spring means connected between said knuckle and said wheel for steering the latter and for resisting vertical movement thereof, and manually operable steering apparatus supported solely by and movable with said frame and operatively connected with said means for effecting steering movement of said wheel.

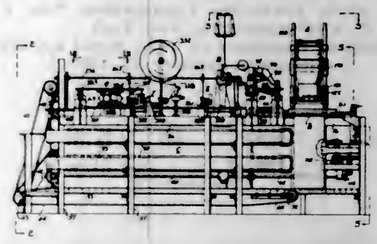
2,097,446

PHOSPHATE-SULPHUR FERTILIZER AND PROCESS OF MAKING SAME

John T. Claiborne, Jr., New York, N. Y., and Paul D. Peterson, New Brunswick, N. J., assignors, by mesne assignments, to Freeport Sulphur Company, a corporation of Delaware

No Drawing. Application December 21, 1935, Serial No. 55,564
14 Claims. (Cl. 71—33)

2. The method of making a phosphate-sulphur fertilizer comprising mixing molten sulphur with phosphate rock particles and pelletizing the mixture at the temperature of the dark viscous stage of molten sulphur.



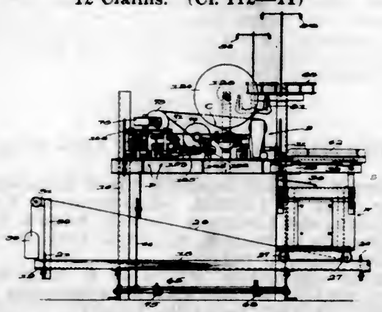
3. The method of making a phosphate-sulphur fertilizer comprising mixing molten sulphur with phosphate rock particles of a size which will pass through a twenty mesh screen and pelletizing the mixture at a temperature between about 220° C. and 260° C.

2,097,447

APPARATUS FOR FILLING, SEWING, AND SEALING BAGS

Robert N. Cundall, Lackawanna, and Lincoln A. Cundall, Buffalo, N. Y., assignors to Bagpak, Inc., New York, N. Y., a corporation of Delaware

Application April 14, 1933, Serial No. 666,114
20 Claims. (Cl. 226—53)



1. In combination, a device for filling open-mouth bags, a continuously moving conveyor arranged to advance the filled bags in upright position from adjacent said filling device through a plurality of stations, devices at said stations for stitching the mouths of the bags and taping the mouths to seal the same and the stitch holes formed by the stitching operation, and means for transferring the filled bags from said filling device to said continuously moving conveyor, said means operating to present the mouths of the filled bags in collapsed form to be stitched and taped and said conveyor and said means being so positioned with respect to each other that the collapsed conditon of the mouth of each bag is simultaneously maintained by both said conveyor and said means during a portion of the operation of said means, said means operating at the speed of the conveyor during the time when the bag is contacted by said conveyor and said means.

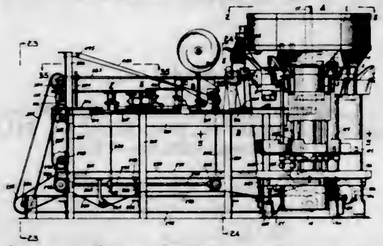
2,097,448

APPARATUS FOR CLOSING BAGS

Robert N. Cundall, Lackawanna, and Lincoln A. Cundall, Buffalo, N. Y., assignors to Bagpak, Inc., New York, N. Y., a corporation of Delaware

Application July 15, 1933, Serial No. 680,538
12 Claims. (Cl. 112—11)

2. In a filled bag closing machine, means to convey a filled bag through the machine, means to stitch through the open end of the bag, means to apply a strip of adhesive tape over the stitched end, and means to press the tape against the sides of the bag, said conveying means having grippers so mounted and constructed as to continuously engage the end of the bag and maintain the same in a straight line of travel during the presentation of the bag to each of said means and during the operation of each of said means upon the bag.



3. In a filled bag closing machine, a carriage to convey a filled bag therethrough, said carriage having bag end gripping jaws thereon mounted to oscillate in the direction of travel.

2,097,449

APPARATUS FOR FILLING, SEWING, AND SEALING BAGS

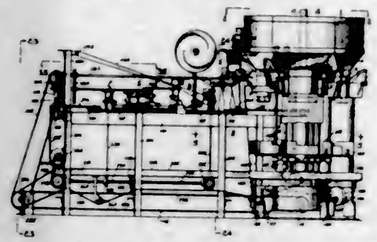
Robert N. Cundall, Lackawanna, and Lincoln A. Cundall, Buffalo, N. Y., assignors to Bagpak, Inc., New York, N. Y., a corporation of Delaware

Application September 9, 1933, Serial No. 688,816
50 Claims. (Cl. 226—53)

1. In a machine for filling and closing open-mouth bags, in combination, a continuously moving device comprising a plurality of grippers to receive and grip the upper corners of a series of upright open-mouth bags, means located above the path of the bags on said device to deliver predetermined quantities of material to said bags, a continuously moving conveyor comprising means to grip the upper ends of said bags and to advance the mouths of said bags in definite alignment, and means located along said conveyor for closing said bags, said grippers presenting said bags to said conveyor at spaced intervals

with their mouths in proper alignment with said closing means.

32. In a machine for filling open-mouth bags, in combination, a filling spout adapted to enter the mouth of the bag, means for gripping the upper and outer corners of the bag on either side of said spout, means for delivering a predetermined quantity of material to said bag while so gripped, and means adapted to lower and spread said gripping means to effect the withdrawal of the spout from the mouth of the bag and to close the mouth of the bag.



2,097,450

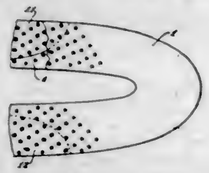
APPARATUS FOR SEWING AND SEALING FILLED BAGS

Robert N. Cundall, deceased, late of Lackawanna, by Luta L. Cundall, administratrix, Lackawanna, and Lincoln A. Cundall, Buffalo, N. Y., assignors to Bagpak, Inc., New York, N. Y., a corporation of Delaware

Original application September 9, 1933, Serial No. 688,816. Divided and this application February 12, 1937, Serial No. 125,416

5 Claims. (Cl. 112—11)

1. In a machine for closing open-mouth filled bags; a conveyor adapted continuously to progress a series of bags, means on said conveyor to hold the mouths of said bags rigidly closed, a sewing machine pivotally mounted above said conveyor and comprising stitching mechanism located in the path of the conveyed bags, means to drive said sewing machine to stitch the mouths of the bags, and a cam connected to said driving means and to said sewing machine to cause rocking of the sewing machine in stitch-length strokes at each stitch formation and in the direction of the conveyor path.



2,097,451

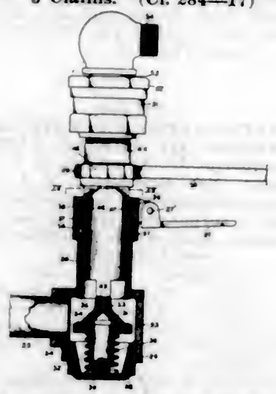
SHOE

Claude H. Daniels, Wellesley Hills, Mass.

Application August 24, 1934, Serial No. 741,197

9 Claims. (Cl. 12—146)

1. In the art of making shoes the process comprising, securing a stiffening element of the counter type to the rear portion of a quarter section in the flat, perforating the assembly, and conforming the assembly to the general contour of the heel end of a last prior to the usual lasting operation.



2,097,452

AUTOMATIC VALVE FOR SPRINKLER SYSTEMS

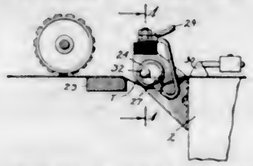
Eugene L. Dearborn, Fairfield, Calif.

Application August 14, 1934, Serial No. 739,793

3 Claims. (Cl. 284—17)

1. A valve operating means including a water outlet having a neck; a hollow plunger adapted to enter said neck; a flexible hose attached to said plunger; a bayonet connection between said plunger and neck; a valve in said outlet arranged to be opened by the entry of said plunger into said neck; a spring urging said valve into closed position and urging said plunger outward from said neck and a handle on said plunger arranged to rotate said plunger to release said bayonet connection; a cord having its ends attached to said handle and said hose respectively.

2,097,453



STOCK QUOTATION PROJECTING MACHINE

August D. Eitzen, Rockville Centre, N. Y., assignor to News Projection Corporation, New York, N. Y., a corporation of New York

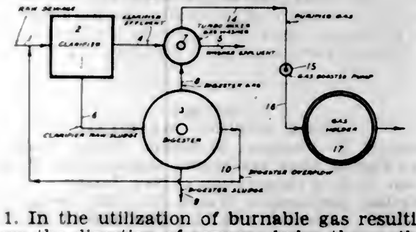
Application December 31, 1931, Serial No. 584,147

Renewed January 23, 1937

10 Claims. (Cl. 200—52)

1. The combination with a fluid mercury switch controlled by a tape having two substantially parallel but spaced rows of printed matter consisting of a pivotally mounted glass container disposed transversely of said tape and extending over said printed matter, of fluid mercury in said container, contacts mounted in said container to be electrically connected by the fluid mercury when said container is swung into one position to enable said fluid mercury to extend from one contact to another and to be electrically disconnected when said container is swung into another position to enable said fluid mercury to flow out of engagement with said contacts, and a medially disposed tape engaging ridge formed on said container to engage the tape at the space between the rows of printed matter and to respond to deflections in the tape so as to move the container either into circuit establishing position or circuit interrupting position.

2,097,454



PURIFICATION AND UTILIZATION OF SEWAGE SLUDGE DIGESTER GAS

Anthony J. Fischer, Jackson Heights, N. Y., assignor to The Dorr Company, Inc., New York, N. Y., a corporation of Delaware

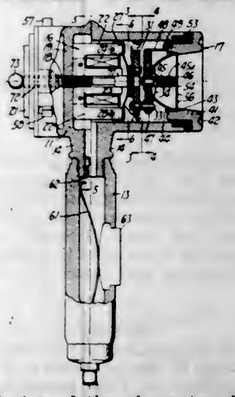
Application January 17, 1934, Serial No. 706,923

Renewed January 14, 1937

7 Claims. (Cl. 23—3)

1. In the utilization of burnable gas resulting from the digestion of sewage sludge the method which comprises collecting and thereafter passing the gas in intimate contact with raw sewage so as to substantially remove from the gas the hydrogen sulphide (H_2S) and carbon dioxide (CO_2) content of the gas.

2,097,455



MASSAGE DEVICE

Leonard Fisher, San Francisco, Calif.

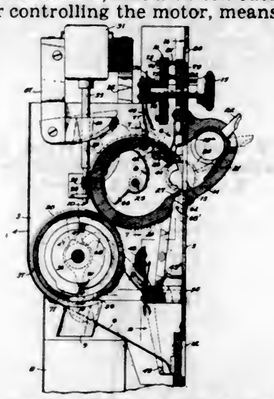
Application September 9, 1935, Serial No. 39,772

Renewed January 21, 1937

6 Claims. (Cl. 128—24.2)

3. In a device of the character described, an apertured annular member to be placed against a surface, electromagnetic means for vibrating said member, a reflector secured to said member and substantially closing the aperture in said member, and a heat source within the confines of said reflector and providing a source of infra red rays for direct reflection through said aperture onto said surface during operation of said vibrating means.

2,097,456



COIN RECEIVER

Clifford H. Green, Grand Rapids, Mich., assignor to Automatic Instrument Company, Grand Rapids, Mich., a corporation of Michigan

Application May 10, 1934, Serial No. 724,896

39 Claims. (Cl. 194—9)

1. A coin receiver comprising a slot for receiving a coin, a movable carrier normally in communication with the slot, an electric motor for operating the carrier, and a switch outside of the carrier for controlling the motor, means adjacent

the carrier for closing the switch, and a lever on the carrier operable by a coin inserted through the slot onto the carrier to engage the said means and to close the switch.

2,097,457

NITROGENOUS FERTILIZER AND PROCESS OF MAKING SAME

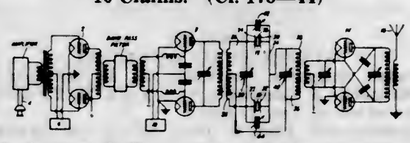
Ernest F. Grether, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a corporation of Michigan

Application August 15, 1935, Serial No. 36,435

9 Claims. (Cl. 71—24)

	Original Charge				Conditions		Product			
1	—	500	Ammonium Carbamate	Equiv. to 1 Part	140°	2	300	10.5	5.0	Toxic	Non-Toxic
2	20	0	Urea and 18% Formaldehyde	5.0 (27.8 cc.)	140°	1	330	25.0	11.5	Toxic	Non-Toxic
3	—	0	Saturated Solution Ammonium Sulphate	As Much as Needed	380°	2	Atm.	15.0	10.5	Toxic	Non-Toxic
4	60	0	Urea	40	225° then 230°	Some time	Atm.	14.14	11.28	Toxic	Non-Toxic
5	50	88	Urea and $Al_2(SO_4)_3$ (conc.)	23	225° then 390°	2 min. 1	Atm.	15.23	11.03	Toxic	Non-Toxic

1. A process of treating a nitrogenous fertilizer, prepared by heating a compound selected from the class consisting of ammonia and its derivatives with a solid porous organic material, said fertilizer containing its nitrogen largely but not completely in water-insoluble form and also containing a plant-toxic material, which comprises washing the fertilizer with sufficient water effectively to remove the plant-toxic material without completely removing the water-soluble nitrogen compounds contained in the fertilizer.

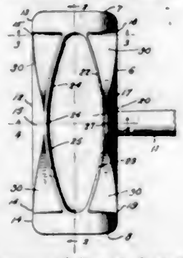


2,097,458

FILTER

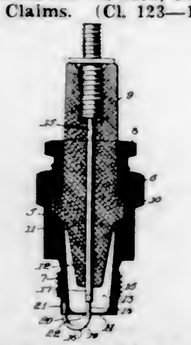
Clarence W. Hansell, Port Jefferson, N. Y., assignor to Radio Corporation of America, a corporation of Delaware

Original application September 24, 1931, Serial No. 564,770. Divided and this application April 4, 1935, Serial No. 14,559



10 Claims. (Cl. 178—44)

1. A crystal filter comprising a plurality of crystals having overlapping resonance curves,



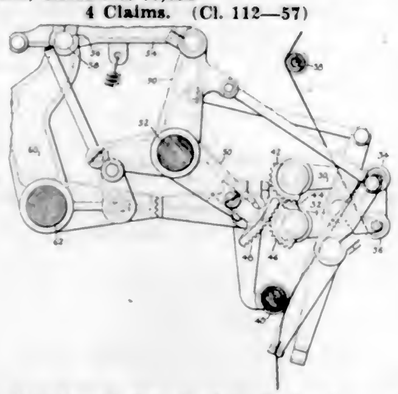
means connecting an electrode of each of the crystals directly together, and means connecting other electrodes of the crystals in phase opposition, and a high-frequency utilization circuit connected between said direct connecting means and between said phase opposition connecting means.

2,097,459
MALLET
Elmer E. Hosler, Delaware Water Gap, Pa.
Application May 18, 1936, Serial No. 80,435
8 Claims. (Cl. 273—83)

8. A mallet comprising a head and a handle, said head having circular parallel striking faces, a pair of diametrically opposite truss members connected to said faces substantially on the plane of the handle, and a second pair of diametrically opposite truss members connected to said striking faces in planes substantially perpendicular to the plane of the handle.

2,097,460
SPARK PLUG
Walter P. Innes, Jr., Wichita, Kans.
Application December 12, 1934, Serial No. 757,206
6 Claims. (Cl. 123—169)

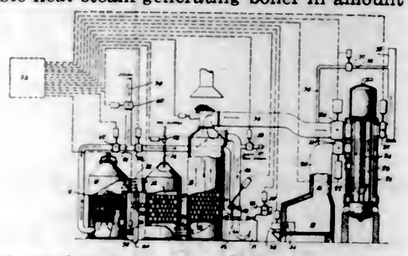
1. A spark plug comprising a shell having a chamber formed therein, a wall portion adjacent the end of said plug providing an end wall for said chamber, said end wall having an opening formed therein adjacent the longitudinal center line of the plug, a central electrode extending into said chamber, and a substantially U-shaped ground electrode extending across the outer side of said end wall to adjacent the central portion of the plug and thence into said chamber to adjacent said central electrode.



2,097,461
SURGICAL HAND BRUSH
Edward Johnson, Montclair, N. J., assignor to Meinecke & Company, New York, N. Y., a corporation of New Jersey
Application June 6, 1935, Serial No. 25,203
3 Claims. (Cl. 15—160)

1. A surgical hand brush having a depression for retaining soap on the under-side thereof, bristles within said depression, bristles on the sides and ends of the plane surface of the under

side of the brush, the height of the bristles on the depressed portion corresponding to the height of the bristles on the edge portion of the brush so as to form an even surface of bristles.

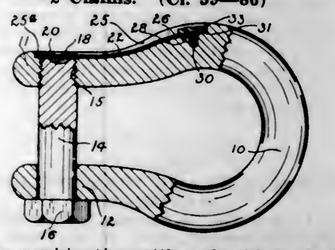


2,097,462
SHOE SEWING MACHINE
Bernard T. Leveque, Wenham, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Original application March 12, 1935, Serial No. 10,621. Divided and this application May 12, 1936, Serial No. 79,284
4 Claims. (Cl. 112—57)

1. A lockstitch sewing machine having, in combination, with the other stitch forming devices, a take-up comprising two pivotally mounted arms, a thread take-up guide on each arm, and means for oscillating the arms through substantially equal arcs to move the guides in substantially the same plane towards and from each other.

2,097,463
GAS GENERATING SYSTEM
George H. Magee, Nutley, N. J.
Application May 31, 1930, Serial No. 458,674
1 Claim. (Cl. 48—204)

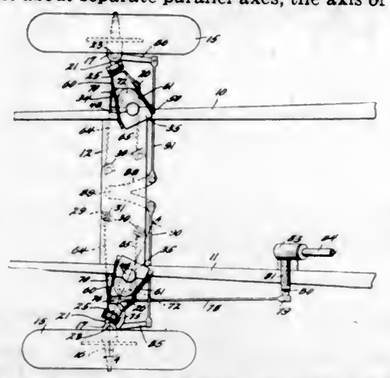
The method of operating a water gas set which includes a generator containing a bed of fuel therein, a single waste heat steam generating boiler connected with the said water gas set, and an auxiliary furnace having a fluid fuel fired burner therein, said furnace being arranged to supply products of combustion to said single waste heat steam generating boiler, which process comprises blasting the fuel bed with air and passing the resultant blast gases through the said single waste heat boiler to generate steam and alternately passing steam through said fuel bed to make water gas, withdrawing the resultant water gas from the water gas set without passing the same through the said waste heat steam generating boiler and simultaneously with the passage of the steam through the fuel bed, burning fluid fuel in said auxiliary furnace and passing the resultant products of combustion through the said waste heat steam generating boiler, thereby continuously generating steam in the said single waste heat steam generating boiler in amount at



least equal to the amount of steam required by the water gas set.

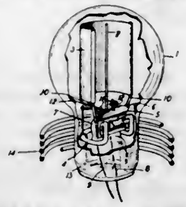
2,097,464
HAZE FREE CELLULOSE ACETATE AND ITS PREPARATION
Carl J. Malm, Rochester, N. Y., assignor, by mesne assignments, to Eastman Kodak Company, Jersey City, N. J., a corporation of New Jersey
No Drawing. Application April 25, 1935, Serial No. 18,215
8 Claims. (Cl. 260—101)

1. An acetyl cellulose having a turbidity in its esterification mixture of not more than 35 parts per million and having the general properties of a product produced by the process in which cellulose is presoaked in a bath essentially consisting of acetic acid and then substantially fully acylated in a bath 3–25% of the acyl content of which is fatty acid groups of 3–4 carbon atoms.



2,097,465
LOCKABLE PIN SHACKLE
William D. Morrison, Seattle, Wash.
Application April 1, 1936, Serial No. 72,216
2 Claims. (Cl. 59—86)

1. The combination with a shackle including a pair of substantially parallel ends each provided with an eye and one of said eyes having interior threads, of a pin for said eyes having an enlarged head at one end and a threaded portion at its other end for co-action with said threaded eye and having notches in the face of said threaded end and a central counterbore in said face, and means exterior of said shackle adapted to engage said notches and bridge said counterbore.

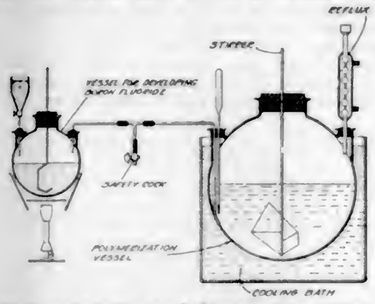


2,097,466
MOTOR VEHICLE
Clyde R. Paton, Birmingham, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a corporation of Michigan
Application November 29, 1933, Serial No. 700,289
17 Claims. (Cl. 280—124)

1. In a motor vehicle, the combination with a vehicle frame, of a pair of road wheels disposed adjacent one end of the frame at opposite sides thereof, means supporting each of said wheels on said frame for rising and falling movement with respect to said frame independently of the other wheel, said means consisting of two pairs of laterally extending wheel supporting links, the links of each pair being pivotally mounted at their inner ends on said frame for swinging movement about separate parallel axes, the axis of one

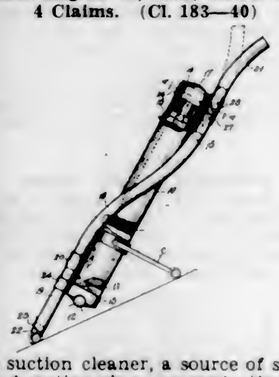
of the links of each pair being disposed above the axis of the other link of the pair, said axes being inclined at an acute angle with respect to the vertical plane containing the longitudinal axis of the vehicle and being inclined with respect to a horizontal plane, members carrying said road wheels and having pivotal connections with the links of each pair, and means for yieldingly resisting upward pivotal movement of the links.

2,097,467
PHOTOELECTRIC TUBE
Charles H. Prescott, Jr., New York, N. Y., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application August 11, 1930, Serial No. 474,441
28 Claims. (Cl. 250—27.5)



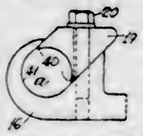
1. A method of preparing a cathode member of a photoelectric tube for the reception of electron emitting material which comprises surrounding the member with oxygen, and causing a series of periodic discharges of a fixed amount of electricity to said member to oxidize its surface.

2,097,468
PRODUCTION OF HYDROCARBONS OF HIGH MOLECULAR WEIGHT
Hans Rabe, Mannheim, and Michael Otto, Ludwigshafen-on-the-Rhine, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany
Application January 19, 1933, Serial No. 652,566
In Germany January 30, 1932
4 Claims. (Cl. 196—78)



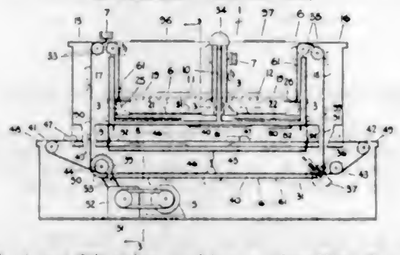
1. A product having a molecular weight of at least 800 and resulting from the polymerization,

in the presence of a volatilizable inorganic halide of the Friedel-Crafts type and at a temperature below 10° below zero C., of a normally liquid



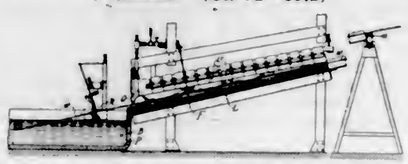
product containing isoolefines and resulting from cracking a from solid to liquid hydrocarbon product of essentially paraffinic nature.

2,097,469
AIR FLOW CONTROL IN AN AIR-METHOD CLEANER
Daniel Benson Replogle, Berkeley, Calif., assignor to Citizens Trust Company, as trustee, Toledo, Ohio, a corporation of Ohio
Application August 10, 1936, Serial No. 95,229
4 Claims. (Cl. 183—40)



3. In a suction cleaner, a source of suction, an open ended suction pipe communicating intermediate its ends with the source of suction, and adapted to be connected at either end with suction tools, and valve means in said pipe for controlling the flow of air and operated by moving a section of the pipe with reference to the remainder of the pipe.

2,097,470
ELECTRICAL CONNECTER
James C. Richardson, Brooklyn, N. Y., assignor to Royal Switchboard Co., Inc., New York, N. Y., a corporation of New York
Application November 27, 1935, Serial No. 51,746
8 Claims. (Cl. 173—259)



7. A clamp for an electrical conductor comprising a clamping jaw formed substantially in a semicircle with parallel sides tangent to the circle, a wedge having parallel sides sliding in said jaw and having its inner face formed in a semicircle complementary to the jaw, the parallel sides being rounded where they meet the semicircular face to the radius of the jaw to permit the wedge to contract the aperture of the jaw and means for forcing the wedge into the jaw.

2,097,471
MACHINE AND METHOD FOR COOKING A COMPLETE MEAL
Walter R. Scharsch, Portland, Oreg.
Application May 22, 1935, Serial No. 22,766
19 Claims. (Cl. 53—15)

1. A machine for cooking a plurality of components of a meal, requiring heat treatment for different lengths of time, comprising a plurality of conveyors, one for each such component, means to guide and advance the several conveyors through fixed paths of different lengths, each from a given feed point to a given delivery point, the length of each path being so correlated with the speed of each conveyor that different components started substantially simultaneously each from its feed point will arrive substantially simultaneously each at its delivery point, and means disposed along each path, and regulated in accordance with time and distance of exposure of the component traveling along such path, to supply sufficient heat at the temperature and for the time required for each particular component, to complete its cooking and to prepare it for serving by the time it is discharged at its delivery point.

2,097,472
PROCESS OF FLAME TREATING COATED MATERIALS
Julian L. Schueler, Kokomo, Ind., assignor, by mesne assignments, to C. W. La Porte, Peoria, Ill., and J. L. Schueler, Kokomo, Ind., trustees
Application October 4, 1934, Serial No. 746,859
5 Claims. (Cl. 91—59.1)

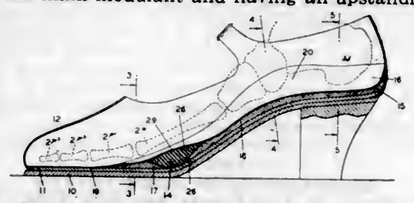
5. The process of treating metal coated materials having an iron base to produce a coating of superior smoothness and evenness, which comprises regulating the weight of coating upon the base, moving such regulated coated base throughout a flame treating zone of predetermined length and at a speed dependent upon the weight of coating material on said base, and progressively reducing by a differential range of 300 to 700 degrees F. the temperature of flame treatment in the direction of movement of the coated base, the lower limit of said range being above the melting point of said coating material.

2,097,473
RUBBER COMPOSITION AND METHOD OF PRESERVING RUBBER
Waldo L. Semon, Cuyahoga Falls, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a corporation of New York
No Drawing. Application March 20, 1931, Serial No. 524,217
20 Claims. (Cl. 18—50)

1. The method of preserving rubber which comprises treating rubber with a compound selected from the class consisting of arylamino substituted ethers in which both hydrocarbon groups attached to the ether oxygen or sulphur are aromatic hydrocarbon groups.

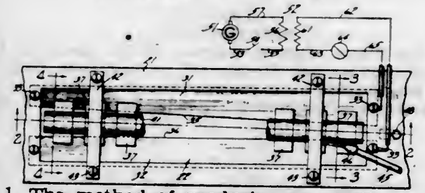
2,097,474
RUBBER COMPOSITION AND METHOD OF PRESERVING RUBBER
Waldo L. Semon, Silver Lake Village, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a corporation of New York
No Drawing. Original application March 20, 1931, Serial No. 524,217. Divided and this application March 26, 1935, Serial No. 13,086
6 Claims. (Cl. 18—50)

1. The method of preserving rubber which comprises treating rubber with an aromatic diamine in which each amino group is substituted only by a single alkoxy-aryl group.



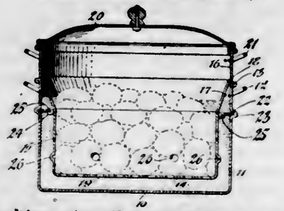
2,097,475
TAPE FOR SLIDE FASTENERS
David Silberman, New York, N. Y., assignor to Ideal Fastener Corporation, New York, N. Y., a corporation of New York
Application July 24, 1936, Serial No. 92,359
8 Claims. (Cl. 24—205)

1. In a slide fastener assembly, a pair of single ply fabric tapes, each tape having a plurality of beads on opposite sides thereof, one at the edge of the tape and the other adjacent the edge of the tape, fastener elements having jaw portions, the bead adjacent the edge of the tape being clamped within the jaw portions and the bead at the edge of the tape serving to overlie the other portions of the fastener elements.



2,097,476
INSERT SOLE FOR SHOES
Benjamin J. Silver, New York, N. Y.
Application February 27, 1935, Serial No. 8,525
13 Claims. (Cl. 36—71)

13. An insert for a shoe comprising a main modulant having a sole engaging bottom portion and an upstanding side flange integral with the bottom portion, a supplemental modulant having a bottom portion overlapping the bottom portion of the main modulant and having an upstanding

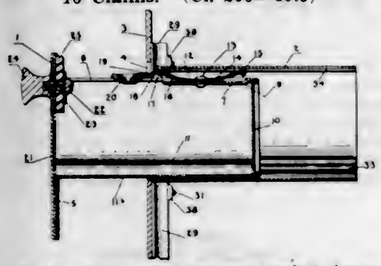


side flange integral with its bottom portion, and a projection from the bottom portion of one modulant intruded into a similarly shaped socket in the bottom portion of the other modulant.

2,097,477
METHOD OF PRODUCING ELECTRICAL DISRUPTIVE DISCHARGES
Godfrey Steerup, Maywood, Ill., assignor to American Can Company, New York, N. Y., a corporation of New Jersey
Application April 24, 1931, Serial No. 532,450
4 Claims. (Cl. 250—34)

1. The method of producing penetrating and sterilizing light waves, which includes the steps of atomizing water to form a leakage path, passing electrical energy along said leakage path as conductor thereby producing a discharge, and projecting a flow of air across said discharge to produce a spacial extension of said light waves.

2,097,478
COOKING UTENSIL
Minnie Gertrude Struble, Kenmore, N. Y., assignor to Kettleworth Mfg. Co. Inc., Buffalo, N. Y., a corporation of New York
Application October 5, 1936, Serial No. 103,957
5 Claims. (Cl. 53—2)



1. A cooking utensil comprising an outer lower imperforate vessel adapted to contain a heating liquid, and an inner upper vessel movable vertically in said outer vessel and having perforations in its lower part, the lower part of said inner vessel being of comparatively small diameter and the upper part thereof being of relatively large diameter and forming an annular shoulder at the lower end of the upper large diameter part which is adapted to engage the upper edge of the wall of said outer vessel for supporting the inner vessel in a position in which

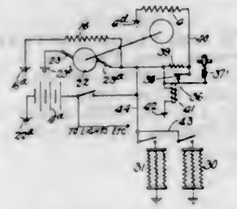
its bottom is spaced from the bottom of said outer vessel and the wall of said outer vessel and the small lower part of said inner vessel being provided with cooperating surfaces for supporting said inner vessel in an elevated position in which the shoulder of said inner vessel is raised out of engagement from the upper edge of the wall of said outer vessel and the bottom of the inner vessel is lifted a greater distance from the bottom of the outer vessel.

2,097,479
REMOVING SKIN FROM FRUITS
Robert B. Taylor, near Knoxville, Tenn.
No Drawing. Application October 14, 1936, Serial No. 105,527
2 Claims. (Cl. 146—219)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. Process of preparing fruits for use as a comestible, which comprises, quick freezing the fruit so that only the outer portion of the flesh is solidified, leaving the portion around the pit or core unfrozen; defrosting to the extent that substantially only the skin is thawed out; abrading the skin from the fruit so defrosted; and removing the pit or core.

2,097,480
ASH RECEIVER
John Visser, Grand Rapids, Mich., assignor to Grand Rapids Metalcraft Corporation, Grand Rapids, Mich., a corporation of Michigan
Application December 21, 1935, Serial No. 55,568
16 Claims. (Cl. 206—19.5)

11. In a sliding drawer concealed type ash receiver the combination of a supporting panel having a front and rear side, the front side being provided with a finished decorative surface, an opening in said panel, a laterally extending member secured to said panel on its rear side and adjacent said opening, tracks in said member, a sliding drawer type receptacle mounted for sliding movement within said opening and along said tracks, an opening in the upper side of said receptacle for the admission of ashes or the like, said receptacle being provided with a front panel larger than the opening in said supporting panel, the perimeter of said front panel being formed into a rearwardly extending flange, said front panel and said flanged perimeter having a finished decorative surface, means movable with said receptacle whereby the rear edge of said flange on said front panel is prevented from contacting the said finished decorative surface of said supporting panel, a leaf spring attached to said receptacle and provided with means for detachably locking said receptacle in its forward position, a portion of said spring extending forwardly beyond the decorative surface of said supporting panel whereby said spring may be actuated to release said receptacle for further forward movement to enable it to be entirely removed from its mounting for emptying its contents.

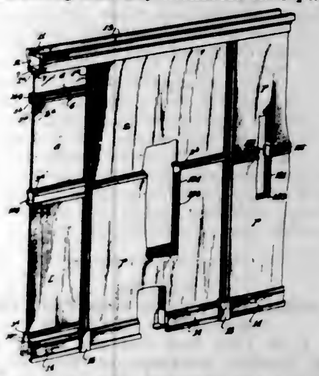


2,097,481
RUBBER
Leo Wallerstein, New York, N. Y.
No Drawing. Application January 9, 1933, Serial No. 650,892. Renewed January 26, 1937
16 Claims. (Cl. 18—50)

1. A process of producing substantially deproteinized rubber from rubber latex comprising providing an alkaline latex, reacting an active enzyme preparation with the latex, coagulating with an acid and then washing, the enzyme preparation being used in such concentrations as to solubilize about 66% the protein in 12 to 24 hours.

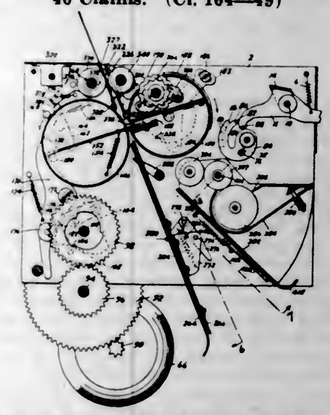
2,097,482
PROCESS FOR THE PRODUCTION OF BORON TRICHLORIDE
Harold C. Weber, Milton, Mass., and August Guyer, Zurich, Switzerland
No Drawing. Application October 1, 1935, Serial No. 43,048
8 Claims. (Cl. 23—205)

1. A process for producing boron trichloride which comprises passing chlorine gas through a mixture of an oxygen-containing boron compound and free carbon heated to a temperature within the range of about 400° C. to about 700° C., the proportion by weight of oxygen-containing boron compound to free carbon being within the range of about 0.6 to about 1.5.



2,097,483
ELECTRICAL HEATING SYSTEM
Jarl M. Weydell, Chicago, Ill.
Application May 17, 1935, Serial No. 21,965
7 Claims. (Cl. 219—20)

1. An electrical heating system for automobiles comprising an electrical generator, a driving device therefor out of mechanical connection with the generator, throughout the entire operation of the device, a variable speed motor for driving the automobile, said generator and driving device fixed in position on the automobile in proximity to said motor, a driving connection from said motor to said driving device, an electric heater mounted on said automobile, an electrical connecting device for connecting said electrical heater in circuit with said generator, and means for causing the speed of the generator to fall behind the speed of the driving device as the speed of the driving device increases, whereby a substantially constant potential is maintained for the current passing to said heater.

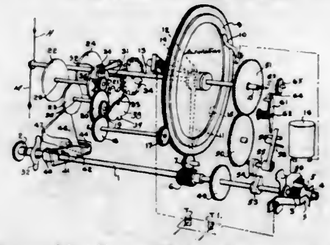


2,097,484
STRUCTURAL ASSEMBLY
Edward Nicholas Winslow, Shaker Heights, Ohio, assignor to The Mills Company, a corporation of Ohio
Application May 27, 1932, Serial No. 613,801
46 Claims. (Cl. 189—34)

1. A structural post including in combination, a plurality of independent key members, channels connecting said key members into pairs, and

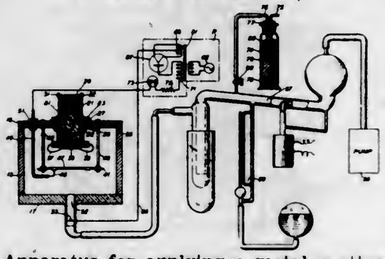
clip devices connecting said pairs together to form a post.

2,097,485
TICKET ISSUING MACHINE
Reuben H. Heisel, Long Island City, N. Y., assignor to General Register Corporation, Brooklyn, N. Y., a corporation of Pennsylvania
Application April 10, 1933, Serial No. 665,386
46 Claims. (Cl. 164—49)



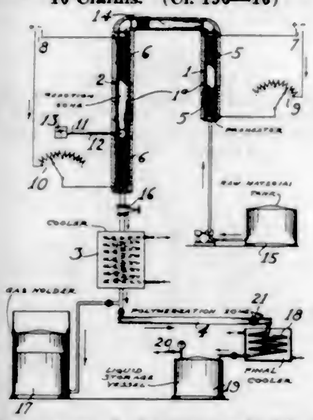
1. A ticket issuing machine comprising means for delivering at least one ticket in a cycle of operation; a member controlling the cycle of operation urged in one direction by a spring; a detent holding said member in opposition to the spring; an element operable to disengage the detent from the member to release it for movement by the spring; means arranged to engage the ticket; devices for moving said means to prevent its engagement with an advancing ticket; and connections whereby the element is moved to cause the detent to assume its operative position when said last named means is moved to prevent its engagement with an advancing ticket.

2,097,486
FIRE EXTINGUISHING COMPOSITION
John A. Henricks, Jr., Chicago, Ill., assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application June 29, 1934, Serial No. 732,995
6 Claims. (Cl. 23—11)



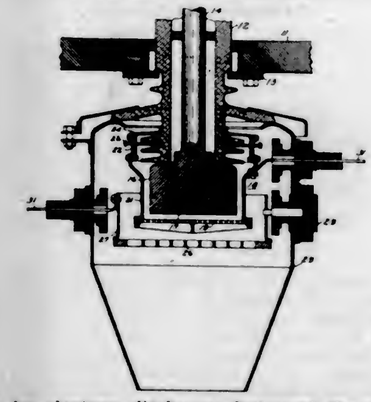
3. A component of a foaming fire extinguishing composition comprising a grain steep water and a gas producing material, the said component being adapted to produce a foaming fire extinguishing composition when admixed with a second component which will react with said components to generate a gas.

2,097,487
ALARM CLOCK
James Edward Kinnear, London, England
Application February 6, 1936, Serial No. 62,646
In Great Britain February 13, 1935
7 Claims. (Cl. 58—38)



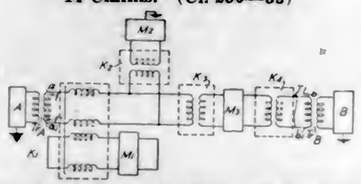
1. In combination with an alarm clock mechanism, an apertured clock front, means for closing the apertures in said clock front, an alarm time indicating means, marked with figures to represent hours and minutes, rotatably mounted at the rear of the clock front, an alarm time setting means, a single control member axially movable and rotatable and adapted to be manually operated from the front of the clock for operating said closing means, a member on said control member for rotating the alarm time setting means, and gearing for rotating the alarm time indicating means simultaneously with the rotation of the alarm time setting means by said control member.

2,097,488
PIEZOELECTRIC DEVICE
Thomas G. Kinsley, Bloomfield, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application January 31, 1936, Serial No. 61,674
2 Claims. (Cl. 91—12.2)



1. Apparatus for applying a metal coating to Rochelle salt crystals by the vacuous dispersion of electrodes comprising a chamber, a removable cover for said chamber, means for evacuating said chamber, an anode and a cathode, a source of suitable electrical potential connecting said anode and said cathode, a second chamber mounted on said removable cover, a portion of said second chamber being within said first chamber and another portion of said second chamber being outside said first chamber when said cover is in closing position, and means for removably supporting a Rochelle salt crystal on the first-mentioned portion of said second chamber.

2,097,489
PROCESS OF GASIFYING OILS AND COALS
Stephen A. Kiss, Brooklyn, N. Y.
Application February 1, 1934, Serial No. 709,360
10 Claims. (Cl. 196—10)

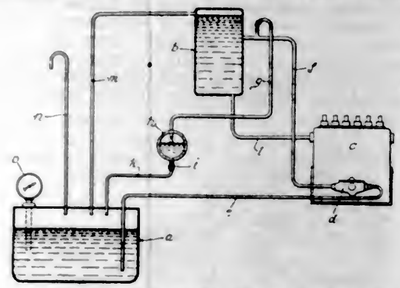


1. The process of obtaining valuable products from a raw material of oil, tar or coal, said raw material containing cyclic hydrocarbons, which comprises quickly heating the raw material to a temperature above about 800° C. under a pressure of several atmospheres, maintaining said raw material at said temperature and pressure until it is substantially completely transformed into products which are gaseous at normal temperature and pressure, and cooling the gaseous products.

2,097,490
ELECTRON DISCHARGE DEVICE
Ernst Kobel, Ennetbaden, Switzerland, assignor to Aktiengesellschaft Brown Boveri & Cie., Baden, Switzerland, a joint-stock company of Switzerland
Application December 21, 1933, Serial No. 703,349
In Germany December 24, 1932
8 Claims. (Cl. 250—27.5)

1. An electron discharge device of the vapor arcing type having an electron emitting cathode in contact with a body of ionizable vapor, an anode positioned to receive electrons from said cathode ionizing said vapor and constituting with said cathode spaced electrodes for the flow of current by way of arcs through said vapor, and means for controlling said flow of current by interruption of said arcs while the said anode is subjected to potential of sign and magnitude sufficient to maintain said arcs comprising a control electrode spaced from said anode by approximately the mean free path of said electrons and having apertures therethrough of a total cross-section area of approximately forty percent of the arcing surface of said anode, and having a total area in contact with the space contained between the control electrode and said anode, plus the total area of the surfaces forming said apertures, of not less than two and a half times the total cross-section area of said apertures.

2,097,491
TRANSMISSION LINE FOR ELECTRICAL SIGNALING SYSTEMS
Julien J. B. Lair and Georges E. M. Perroux, Paris, France, assignors to Western Electric Company, Incorporated, New York, N. Y., a corporation of New York
Application February 6, 1932, Serial No. 591,429
In Great Britain April 1, 1931
14 Claims. (Cl. 250—33)

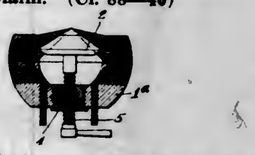


1. In combination, a main transmission line conveying in-phase currents of one frequency and oppositely-phased currents of another frequency, a plurality of auxiliary lines each equal in length to a half wave-length or a multiple thereof of said in-phase currents and having one end short-circuited and grounded, said auxiliary lines being bridged across the main line at points spaced a quarter wave-length or an odd multiple thereof of said in-phase currents, each auxiliary line being short-circuited at a point located a quarter wave-length or an odd multiple thereof of said oppositely-phased currents from said main line, a plurality of conductors each equal in length to an odd multiple of a quarter wave-length of the in-phase currents, one of the conductors being connected to the grounded end of one auxiliary line and another of said conductors being connected to the grounded end of another auxiliary line, and a utilization circuit connected to the line at one pair of the first mentioned points.

2,097,492
FUEL FEED MEANS
Franz Lang, Munich, Germany, assignor, by mesne assignments, to Lanova Corporation, New York, N. Y., a corporation of Delaware
Application September 6, 1935, Serial No. 39,427
In Germany September 8, 1934
4 Claims. (Cl. 158—36.4)

3. In combination in fuel feed means, a main fuel tank, an injection pump, an auxiliary fuel tank above said main tank and said pump and connected to the latter, a feed pump having its intake connected to said main tank for withdrawing fuel therefrom, a supply pipe connected to the discharge of said feed pump and to said auxiliary tank for delivering fuel to the latter above the connection between said auxiliary tank and said injection pump, a first fuel return pipe connected to said supply pipe extending upward

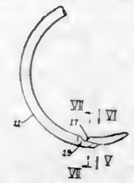
to a point above said supply pipe and thence to said main tank, visual fuel flow indicating means in said return pipe, and a second fuel return pipe connected to said auxiliary tank above the con-



nection between the latter tank and said supply pipe and above the highest point of said first fuel return pipe, said second fuel return pipe being connected to said main tank for return thereto of surplus fuel.

2,097,493
PREPARATION OF POLYHYDROXY COMPOUNDS FROM FURAN COMPOUNDS
Gerald J. Leuck, Evanston, Joseph Pokorny, Chicago, and Fredus N. Peters, Jr., Evanston, Ill., assignors to The Quaker Oats Company, Chicago, Ill., a corporation of New Jersey
No Drawing. Application February 12, 1934, Serial No. 710,888
22 Claims. (Cl. 260—156.5)

1. A process of treating furan derivatives to produce 1,4-polyhydroxy-compounds by a reaction comprising breaking the furan ring in the presence of a hydrolyzing agent and maintaining the reacting material under elevated temperature and superatmospheric pressure conditions such as are favorable to hydrogenation, and then separating said compounds.



2,097,494
ILLUMINATING DEVICE FOR MICROSCOPES
Erwin Lihotzky, Wetzlar, Germany, assignor to Ernst Leitz, G. m. b. H., Wetzlar, Germany
Application November 27, 1935, Serial No. 51,755
In Germany November 29, 1934
1 Claim. (Cl. 88—40)

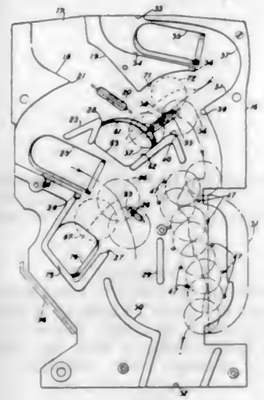
Illuminating device for microscopes comprising a shutter, a glass body condenser having a central bore, a threaded guide in said bore, a threaded axle passed through the threaded bore in said guide and connected to said shutter, and an operating member on the other end of said axle to move the shutter axially and relatively to the condenser.

2,097,495
SEWING MACHINE NEEDLE
Rowland Augustus Lineham and George Clarke, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application June 2, 1936, Serial No. 83,056
In Great Britain July 6, 1935
3 Claims. (Cl. 112—222)

1. A curved hooked needle for use in chain-stitch shoe sewing machines comprising a stem curved in the arc of a circle and provided with

a barb located on the side of the needle away from which the work is to be fed and directed towards the axis of curvature of the needle stem.

2,097,496
RESERVOIR MARKING INSTRUMENT
Siegfried Lunzer, London, England
Application May 25, 1936, Serial No. 81,744
In Great Britain May 28, 1935
1 Claim. (Cl. 120—43)



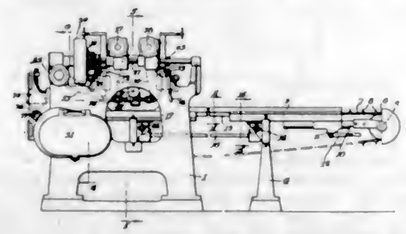
A marking instrument comprising a barrel carrying sac-actuating mechanism and whereto is fitted a section having a through passage; a tubular member forming an outward extension of said section; a collapsible ink sac disposed within said barrel and attached to said section and with which said section-passage and tubular extension communicate; a nozzle encompassing the tubular extension and removably fitted to the section; and an absorbent marking tip fixedly secured to said nozzle and to the inner end of which tip the adjacent end of said tubular extension makes contact: the arrangement and disposition of the parts being such that when said sac is compressed by means of the actuating mechanism, a charge of ink is ejected to saturate said absorbent tip.

2,097,497
COIN CHUTE FOR COIN COLLECTORS
Percy E. Mills, Towaco, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application June 16, 1936, Serial No. 85,448
6 Claims. (Cl. 194—97)

1. A coin chute comprising a longitudinally inclined coin channel having top, bottom and side walls, said bottom wall having an aperture for discharging genuine coins and a rotatable toothed wheel mounted on one of said side walls and projecting transversely into said channel for causing legitimate coins to be diverted into said aperture while permitting a perforated slug

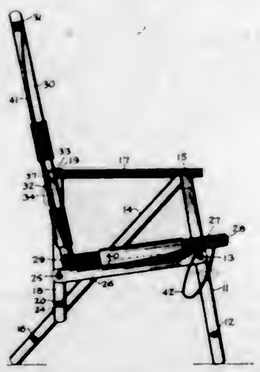
to pass said aperture, the center of said wheel from the standpoint of the direction of coin travel

being located substantially above the far end of said aperture.



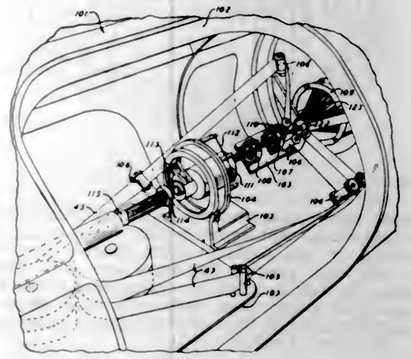
2,097,498
COIN CHUTE FOR COIN COLLECTORS
Percy E. Mills, Towaco, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Original application June 16, 1936, Serial No. 85,448. Divided and this application October 10, 1936, Serial No. 104,972
4 Claims. (Cl. 194—103)

1. In a coin operated device, a longitudinally inclined coin chute having opposed side walls and a bottom wall down which a deposited coin rolls on its edge, said bottom wall having an aperture sufficient to receive a coin of standard dimensions and a pivoted member having an arm extending completely across said chute above said aperture whereby coins of less than predetermined weight will be deflected into said aperture, the coin contacting portion of said arm normally lying in a plane substantially at right angles to one of said side walls.



2,097,499
STAPLING MACHINE
Walter F. Newhouse, Benton Harbor, Mich.
Application August 22, 1932, Serial No. 629,795
Renewed February 11, 1937
47 Claims. (Cl. 1—8.1)

1. In a stapling machine, the combination of instrumentalities for feeding the work longitudinally of the machine, in a horizontally disposed plane, to receive successive groups of staples in rows from the front end of each unit of work to the rear end thereof, a gang of staplers disposed over said plane, to insert successive staples in longitudinal rows in the work to fasten the materials thereof together, and another gang of staplers disposed in front of said first-mentioned gang, to insert other longitudinal rows of staples, whereby each stapler inserts a row of successively driven staples in each unit of work, with all of the staples driven by one gang in transverse rows spaced from but parallel with the transverse rows of all of the staples driven by the other gang,

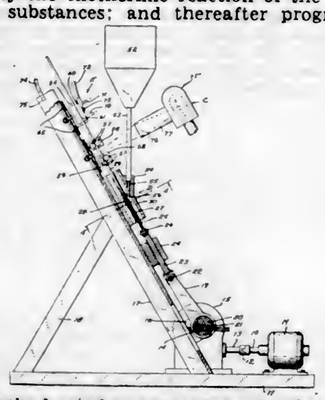


the members of each gang being adjustable transversely of the machine, and the two gangs being adjustable toward and away from each other, whereby to change or vary the relative positions of the staples on the work, so that said instrumentalities are operative to present the work for successive operations of both gangs in unison upon the same unit of work, with each said operation in rear of the previous operation on the work, or for operation of one gang on one unit while the other gang is operating on another unit.

2,097,500
CHAIR
Carl H. Oermann, York, Pa.
Application February 19, 1936, Serial No. 64,647
2 Claims. (Cl. 155—116)

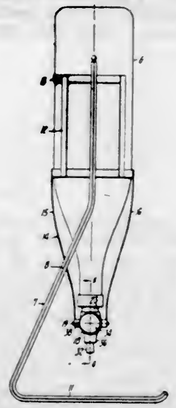
1. A chair of the type described comprising pivotally connected front and rear legs, arm rests also connected to said leg pivots, brace members pivotally connected to said arm rests and detachably connected to the rear legs near the lower ends thereof, substantially horizontally disposed seat supporting bars connected to said front legs and to said brace members, pivotally connected back and seat frames of which the latter rests wholly on said seat supporting bars, said seat frame being adapted to slide forwardly and backwardly on its supporting bars without any part separating therefrom, links pivotally connected to the arm rests, pins projecting from the back frame, slots formed in said links, and notches formed in said slots for receiving said pins for retaining the back frame in a plurality of positions.

2,097,501
ELECTRICAL CABLE AND A METHOD OF MAKING THE SAME
Lester O. Reichelt, Cranford, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a corporation of New York
Application July 12, 1933, Serial No. 680,037
6 Claims. (Cl. 173—264)



1. The method of forming an electric cable, which comprises applying a strip of dried crinkled paper longitudinally of a dried group of insulated conductors, forming the paper transversely of and over the conductors, simultaneously twisting the paper and the conductors, binding the paper covered insulated conductors, and applying a protective covering over the strand bound paper covered conductors, each of these steps being carried on while excluding moisture.

4. The method of making an electric cable which comprises the steps of storing a group of insulated conductors in a drying chamber to remove moisture thereupon, storing a supply of crinkled paper tape in a drying chamber to remove moisture thereupon, combining the group of insulated conductors with the tape as a cover while withdrawing both from the chamber and while excluding access of moisture, and extruding a seamless sheath of metal over the paper while continuing the exclusion of access of moisture.

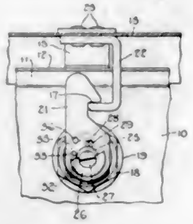


2,097,502
METHOD OF AND APPARATUS FOR PRODUCING RODS AND THE LIKE OF COMMINUTED MATERIAL
George T. Southgate, Forest Hills, N. Y., assignor, by mesne assignments, to Union Carbide and Carbon Corporation, a corporation of New York
Application March 18, 1933, Serial No. 661,493
22 Claims. (Cl. 75—22)

1. The method of producing rods of comminuted material including substances which combine with an exothermic reaction, which comprises compressing the material into the form of a rod; progressively heating successive portions of the rod to a fusing temperature after it is formed; at least a portion of such heat being supplied by the exothermic reaction of the comminuted substances; and thereafter progressively

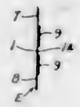
cooling the heated portions of the rod below their fusing temperature.

2,097,503
LIQUID DISPENSER
Herman T. Weeg, San Francisco, Calif., assignor to Western Research & Development Co., a syndicate composed of Herman T. Weeg, Alfred Whittell, Ronald Tilton, and John Dinwiddie, San Francisco, Calif.
Application December 12, 1936, Serial No. 115,567
1 Claim. (Cl. 221—117)



A liquid dispenser comprising a housing, means on said housing for engaging a container of liquid to be dispensed, a plug cock having a hollow interior rotatably mounted within said housing, a hollow plug movable into and out of said plug cock for varying the interior volume thereof, a pair of means of different length for establishing communication between the interior of said plug cock and said container in one position of said plug cock, and means effective in another position of said plug cock for admitting air to the interior of said plug cock and releasing liquid therefrom.

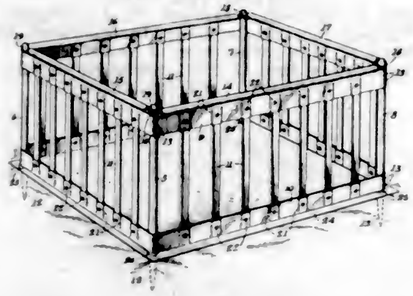
2,097,504
LOCK LATCH
Milton H. Wells, Scarsdale, N. Y.
Application May 29, 1936, Serial No. 82,409
2 Claims. (Cl. 70—367)



1. An improved cylinder lock comprising a casing, a plug rotatively mounted therein, means for

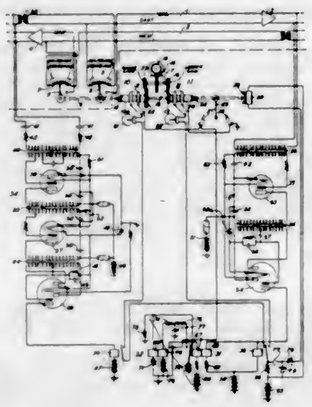
limiting the rotative movement of the plug with respect to the casing, a latch member rotatively mounted on the plug, a stop member on the plug, a recess in the latch member housing the stop member and cooperating therewith to limit the rotative movement of the latch member with re-

spect to the plug in either direction, a coil spring housed within the casing, a projection on the latch member engaging with one end of said coil spring whereby said coil spring is compressed upon rotative movement of the latch member in one direction and whereby said spring acts to rotate the latch member in the opposite direction.



2,097,505
ENVELOPE CONSTRUCTION
Leonard D. Arp, Sherburne, and Walter H. Fischer, Pipestone, Minn.
Application September 17, 1936, Serial No. 101,262
4 Claims. (Cl. 229—85)

1. A sheet of material folded to form a mailing envelope including a front wall and a rear wall and having edges constituted by folds in said sheet, a portion of one of said walls adjoining and partially defined by an edge of said envelope being removed to expose the inner side of a corresponding portion of the second of said walls, and a portion of the second of said walls adjoining and partially defined by said edge and situated out of registration with said first mentioned portion being removed to expose a corresponding portion of the inner side of said first wall.



2,097,506
PLAY PEN
Frank Auty, Little Neck, N. Y.
Application February 11, 1936, Serial No. 63,333
1 Claim. (Cl. 256—25)

A play pen comprising corner posts adapted to be driven into the ground, a lower flexible strip secured to the lower portions of said posts and limiting the separation of the same when the posts are driven into the ground, an upper flexible strip secured to the upper portions of said posts and similarly limiting the spreading movement of the upper ends of the posts, vertical slats secured in spaced relation to said upper and lower flexible strips to form with said strips open side walls about the pen, rigid top bars separate from the upper flexible connecting strip and of a length to fit between the corner posts in the spaced relation of the same, loops at the opposite ends of said top bars to pass down over the upper ends of the corner posts and detent means for holding said loops thus engaged over the corner posts but readily releasable to permit the removal of the top bars and the bundling together of the

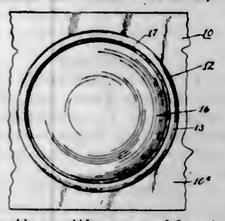
corner posts connected by said upper and lower flexible strips, said upper flexible strips being positioned on the posts to form flexible supports for said post spacing top bars and said detent means including members projecting from the corner posts and engageable over said loops to retain the spacing bars thus yieldingly supported on the upper flexible strips.

2,097,507
CONTROL CIRCUIT
Harold L. Barney, St. Louis, Mo., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application February 28, 1936, Serial No. 66,229
16 Claims. (Cl. 178—44)

1. In gain adjusting circuits for a transmission line, an amplifier on said line, a potentiometer having a movable contact arm for controlling the gain of said amplifier, and means controlled according to the volume of the signals on the line for operating said contact arm at one fixed rate to raise the volume and for operating said contact arm at another fixed rate to lower the volume.

2,097,508
ANODE
Howard H. Blouch, Cleveland, Ohio, assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
Application April 7, 1934, Serial No. 719,453
5 Claims. (Cl. 204—4)

1. An anode of the type described comprising a spine with anode material cast thereupon, the spine being provided with struck-out hooks.



2,097,509
FIREPROOFING
Ernest R. Boller, Euclid, Ohio, assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application February 1, 1935, Serial No. 4,523
5 Claims. (Cl. 21—20)

1. In a process of fireproofing vegetable materials, the step comprising subjecting the material to the action of a solution of an ammonium salt and urea.

2,097,510
PRIMING MIXTURE
Willi Brün, Stratford, Conn., assignor to Remington Arms Company, Inc., a corporation of Delaware
No Drawing. Application August 3, 1935, Serial No. 34,637
4 Claims. (Cl. 52—4)

1. An ammunition priming composition containing a silver salt of styphnic acid.

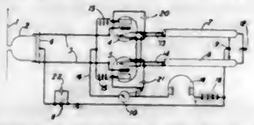
2,097,511
RETAINING MEANS FOR BEZELS AND ESCUTCHEON PLATES
Charles E. Caestecker, Chicago, Ill., assignor to Accurate Spring Mfg. Company, Chicago, Ill., a corporation of Illinois
Application August 25, 1936, Serial No. 97,794
3 Claims. (Cl. 189—78)

1. In combination with a panel having an opening, a bezel for said opening including a flange for engaging the front face of the panel surrounding the opening and a substantially cylindrical body portion extending through the opening beyond the rear face of the panel, said body portion beyond the rear face of the panel being formed with a continuous shoulder, and a single coil of spring wire surrounding said body portion, said wire being formed with a plurality of circumferentially spaced-apart inset portions of substantial arcuate extent adapted to resiliently engage said body portion and seat against said shoulder, and the portions of said wire intermediate said inset portions being disposed in axially offset relation thereto and adapted to engage the rear face of the panel, whereby said flange is maintained firmly seated against the front face of the panel.

2,097,512
INHIBITOR
Fred C. Carlson, Lakewood, Ohio, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application November 28, 1936, Serial No. 113,264
6 Claims. (Cl. 148—8)

6. An inhibitor comprising the product produced by mixing a cinchona bark alkaloid, sulfur and sulfuric acid and heating the mixture to cause chemical interaction.

2,097,513
DECORATIVE ARTICLE
Irene M. Casey, Oakland, Calif.
Application December 31, 1936, Serial No. 118,599
7 Claims. (Cl. 41—10)



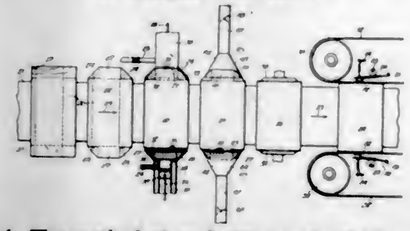
6. A decorative tree shaped article comprising, a base support, an upright member secured thereto, a plurality of substantially square sheets of various sizes and each folded by gathering the sheet at substantially the center portion thereof with the outer portions of the sheet disposed in rolled substantially uncreased form and with the corners of the sheet spaced from each other, said gathered center portions being bent at substantially right angles to the remainder of the folded sheet portion and mounted in substantially parallel relation against said member with said folded sheets disposed in circumferentially spaced relation around said member and in substantially abutting relation longitudinally of said member, and means wound as a continuous spiral length around said sheet portions and said member to secure said sheets to said member.

2,097,514
ELECTRON DISCHARGE SYSTEM FOR ULTRASHORT WAVES
Joseph G. Chaffee, Hackensack, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application October 10, 1935, Serial No. 44,321
8 Claims. (Cl. 250—20)

1. An ultra-short wave circuit comprising an electron discharge device having an anode, a

cathode, and an impedance control element, means for polarizing said anode and said impedance control element, means for heating said cathode, a closed tuned loop, two leads connecting the loop to the impedance control element and cathode, at least one of said leads including a series reactance equivalent to a fractional wave-length line whereby the impedance presented at the driving terminals of said leads is effectively increased over that which would be presented by the path between the input electrodes, a tunable circuit connected to said cath-

ode heating means, means for tuning said tunable circuit to cause the circuit, together with the cathode heating means, to simulate a short-circuited half-wave length path whereby the potential drop which the heating means tends to produce in the lead from the cathode to the closed tuned loop is eliminated thus permitting the full driving electromotive-force impressed through the series reactance of the leads to be effective between the cathode and the impedance control element, and an output path connected to the output electrodes.



2,097,515

METHOD OF AND MACHINE FOR PACKAGING GOODS

Ersyl F. Chambless, Chicago, Ill., assignor, by mesne assignments, to The Cracker Jack Co., Chicago, Ill., a corporation of Illinois

Application December 12, 1935, Serial No. 54,020

13 Claims. (Cl. 93—2)

1. The method of packaging goods which consists in wrapping the goods in a flexible waxed wrapper, spraying a film of additional wax on a portion of said wrapper, blowing a heating fluid on the portion of the wrapper upon which said additional wax is sprayed, and subsequently sealing said portion of the wrapper.

2,097,516

PROCESS FOR PRESERVING OILS AND FATS

Mayne R. Coe, Washington, D. C., dedicated to the free use of the Public in the United States of America

No Drawing. Application January 30, 1935, Serial No. 4,097

5 Claims. (Cl. 87—12)

(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. The process of preventing rancidity in commodities containing oils and fats which comprises incorporating substantially pure catalase in such oil-bearing commodities.

3. The process of preventing rancidity in commodities containing oils or fats which comprises incorporating ripened cheese in such oil-bearing commodities.

2,097,517

SOLUBLE HYPOCHLORITE COMPOSITION

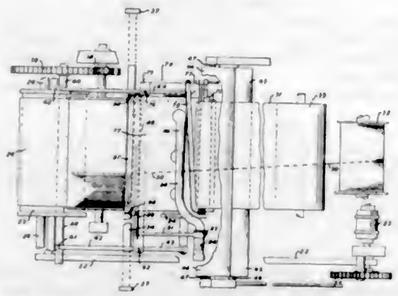
Charles B. Durgin, Anniston, Ala., assignor, by mesne assignments, to Monsanto Chemical Company, a corporation of Delaware

No Drawing. Application November 23, 1932, Serial No. 644,079

28 Claims. (Cl. 87—5)

7. A hypochlorite composition comprising a calcium hypochlorite compound and sodium metaphosphate, the metaphosphate being present in such proportion as to render the hypochlorite soluble in alkaline solutions.

12. A hypochlorite composition comprising a calcium hypochlorite compound, a soluble sodium metaphosphate and soap, said metaphosphate being present in such proportion as to render said composition soluble in aqueous solutions having a pH greater than 7.0.



2,097,518

APPARATUS FOR WINDING MATERIAL

Erwin E. Franz, Cranford, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a corporation of New York

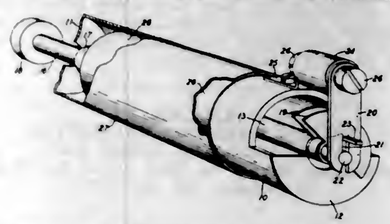
Original application February 9, 1935, Serial No. 5,743. Divided and this application December 11, 1935, Serial No. 53,958

3 Claims. (Cl. 242—157)

1. In an apparatus for winding strand material on articles and having means to support an article to be wound, means to distribute strand material thereon in successive spirally wound layers, in combination with means to reverse the spiral at the end of each layer, the said reversing means comprising a freely reciprocable rod of rigidly resilient material having a perforation therein through which the strand being wound passes and thereby reciprocates the same in a direction transverse to the strand, said rod being operated at such a speed as to result in a rebound at the end of its traverse in either direction and a stop member positioned to be abutted against by the rod when the spiral is to be reversed.

2,097,519

SIGNAL TRANSMISSION SYSTEM



John C. Gabriel, New York, and George Rodwin, Randall Manor, N. Y., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York

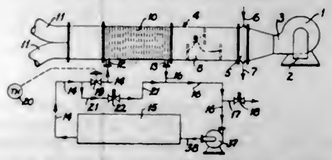
Application September 5, 1935, Serial No. 39,280

8 Claims. (Cl. 178—44)

1. A tuning device comprising a pair of conductors disposed one within the other, the inner of said members constituting an inductance element, a metallic member slidably mounted on the inner of said conductors, said metallic mem-

ber contacting with and electrically connecting said conductors, and plate members carried by

and electrically connected to said conductors and forming a condenser.



2,097,520

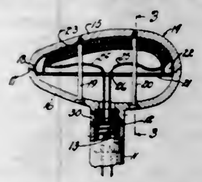
APPARATUS FOR CONDITIONING AIR

Jesse A. Guyer, Mount Vernon, Ill., assignor to J. P. Devine Manufacturing Co., Inc., Mount Vernon, Ill., a corporation of Illinois

Application January 16, 1936, Serial No. 59,336

7 Claims. (Cl. 62—91.5)

1. In an air conditioning system, a cooling unit, and a chamber, said chamber containing a substance in its solid phase which passes, upon the absorption of heat, directly to its gaseous phase, conduit means connecting the outlet of said chamber to the inlet of said cooling unit, conduit means connecting the outlet of said unit to the inlet of said chamber, whereby said substance in its gaseous phase, circulates from said chamber to said cooling unit and back to said chamber, and a by-pass conduit around said cooling unit, said by-pass conduit having a pressure regulating valve therein, whereby gas is by-passed through said by-pass conduit when the pressure of gas in said conduit leading from said chamber to said cooling unit increases above a predetermined amount.



2,097,521

HEATING DEVICE

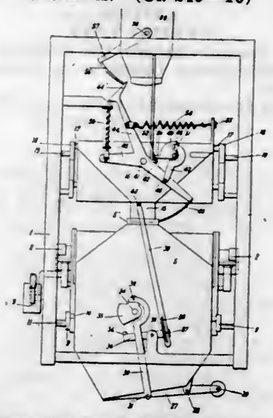
Anna M. Haas, Chicago, Ill.

Application March 22, 1934, Serial No. 716,791

1 Claim. (Cl. 219—21)

In combination with a base plate, a post integral therewith and upstanding therefrom, a socket at the upper end of said post, a heating body of elliptical form constructed with a ball shaped extension at the end, and a plug secured to the underside of said heating body for removable attachment to said post, said heating body having the heating element adjacent to its upper wall and screened from the lower wall.

2,097,522



MEANS FOR SIMULTANEOUSLY DETERMINING THE VOLUME, THE WEIGHT, AND THE DENSITY OF GRANULAR AND OTHER MATERIALS

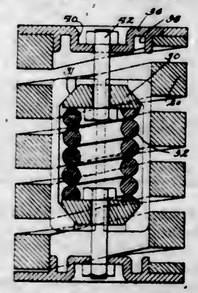
Alfred Hanique, Paris, France

Application December 20, 1935, Serial No. 55,442

In France January 3, 1935

5 Claims. (Cl. 249—16)

1. An apparatus for determining simultaneously the volume, weight and density of granular materials comprising a supply hopper for the material, a movable compensating hopper mounted below the supply hopper, a measuring skip mounted below said compensating hopper, said compensating hopper receiving material from the supply hopper, means for mounting said compensating hopper, counterbalance means for said compensating hopper and for the measuring skip, said means permitting the measuring skip, after it has been completely filled, to move independently from the compensating hopper and means for weighing the contents of the skip.

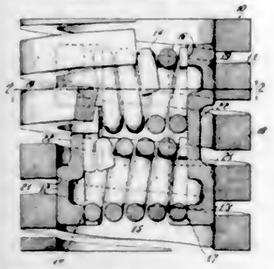


2,097,523

SNUBBER

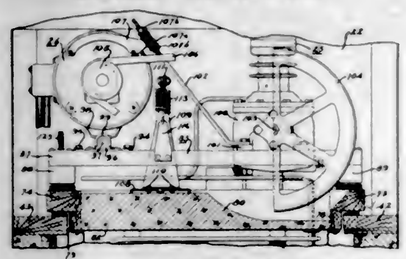
William C. Hedgcock, Wilmette, and David M. Light, Evanston, Ill., assignors, by mesne assignments, to Cardwell-Westinghouse Company, a corporation of Delaware

Application November 10, 1933, Serial No. 697,380



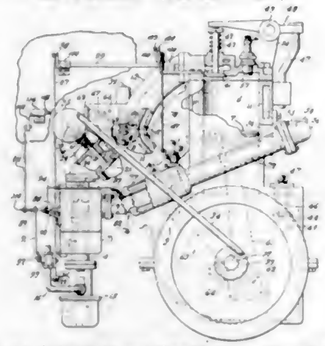
11 Claims. (Cl. 267—9)

1. In a cushioning device, the combination of a spring having a central opening, friction shoes disposed in said opening and having sliding cooperation with said spring, said shoes having end wedging portions, wedging members having friction surfaces contacting said wedging portions,



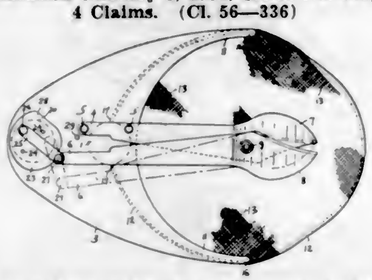
resilient means interposed between said wedging members urging said members toward said wedging portions, abutment means engaging the ends of said spring, and means connected to said abutments and said wedging members for maintaining said shoes, wedging members and resilient means in position with respect to said spring.

2,097,524
SPRING UNIT
Donald F. Sproul, Chicago, Ill., assignor to Cardwell-Westinghouse Company, a corporation of Delaware
Application December 29, 1933, Serial No. 704,427
9 Claims. (Cl. 267—9)



1. In a spring shock absorbing unit, a load supporting spiral spring, each turn having interior friction surfaces, friction shoes engaging said surfaces, the intermediate portions of said shoes being spaced from the interior surface of said spring and resilient means extending between said shoes and exerting a constant outward pressure thereon, said shoes engaging the intermediate portions only of said spiral spring at a plurality of points spaced apart.

2,097,525
REFRIGERATING APPARATUS
Harry B. Hull, Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, a corporation of Delaware
Original application April 13, 1927, Serial No. 183,480. Divided and this application January 18, 1932, Serial No. 587,301
3 Claims. (Cl. 74—242.15)

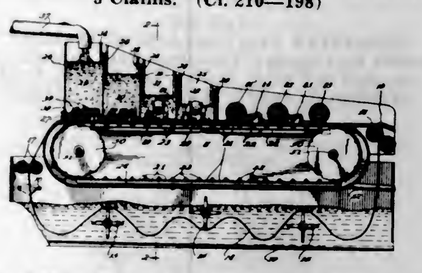


2. In combination, a horizontal base, a driving device and a driven device mounted upon and above the base, one of said devices being provided with rockable mounting between it and the base, pulley and belt driving means connecting the driving and the driven devices, said one device being rockable upon the rockable mounting about an axis parallel to the axis of rotation of one of the pulleys of the pulley and belt driving means and a brace connected at one end to the base and extending to a portion above the rockable mounting of said rockably mounted device for holding said device in a position to maintain the belt driving means taut, said brace being a substantially straight member, and a resilient adjustable connection connecting said brace and said rockably mounted device.

2,097,526
CHARGE FORMING MECHANISM
Pietro Maniscalco, Toledo, Ohio
Application August 28, 1936, Serial No. 98,295
15 Claims. (Cl. 123—127)

1. In an internal combustion engine having a combustion cylinder and an intake manifold operatively connected therewith and provided with means for conducting fuel mixture thereto, a control valve in said means, a gasoline supply pipe connected with said means, a fuel oil supply pipe connected with said manifold and having oil vaporizing means interposed therein adjacent said manifold, a control valve in said pipe, a lever on each valve, operating means connected with said levers, whereby said valves can be opened and closed together manually, a second valve in said fuel oil pipe and a valve in said gasoline pipe, and means connected with the two last said valves for opening one and closing the other simultaneously.

2,097,527
FRUIT PICKER
George E. Melown, Youngstown, Ohio
Application January 8, 1937, Serial No. 119,646
4 Claims. (Cl. 56—336)

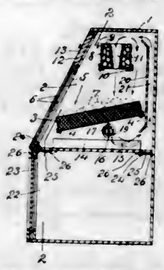


1. In a fruit picker, a support member having a frame member secured thereon, outwardly extended curved support arms on said frame member, a pair of shears supported upon said frame member, blades on said shears being curved and having their extreme outer ends pointing downwardly, means for manipulating said shears, said means comprising a manipulating member the upper end of which extends through an opening

in said frame member, a plate secured to the upper end of said manipulating member, a link attached at one end near the edge of said plate and in a pivoted manner, and the other end attached to the movable arm of said shears, a metal frame held by said outwardly extended curved support arms directly underneath said pair of shears and attached at a lower portion to said support member, a net receptacle carried by said metal frame and forming into a receiving bag at its lower end, a control cord secured on said support member and looped about the neck of said net receptacle.

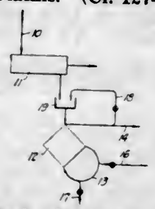
2,097,528
METHOD OF MAKING RUBBER ARTICLES
Harold A. Morton, Akron, Ohio, assignor to American Anode, Inc., Akron, Ohio, a corporation of Delaware
No Drawing. Application October 27, 1934, Serial No. 750,383
15 Claims. (Cl. 18—58)

1. The method which comprises providing a form having an exposed surface carrying a latex coagulant, reducing the effectiveness of the coagulant in a determinately restricted portion of the surface, then applying latex to the form to deposit thereon latex rubber, and drying the deposited rubber.



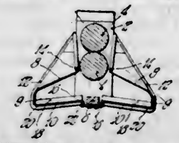
2,097,529
FILTER
Carl H. Nordell, Chicago, Ill., assignor to Advance Engineering Company, Chicago, Ill., a corporation of Illinois
Application December 20, 1934, Serial No. 758,376
3 Claims. (Cl. 210—198)

1. A filter having a filtering position and comprising a continuous web of fabric, a movable conveyor for moving said fabric past said filtering position, means for supplying liquid to be filtered in said position to the fabric, and means in said position for agitating said liquid and the cake deposited therefrom upon the filter fabric.



2,097,530
REFRIGERATOR FOOD DISPLAY CASE
Louis W. C. Peddicord, Topeka, Kans., assignor of one-half to Richard R. Houdek, Topeka, Kans.
Application October 3, 1936, Serial No. 103,891
5 Claims. (Cl. 62—89.5)

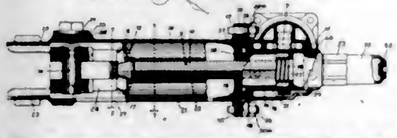
1. In combination with a refrigerator food display case having a chamber provided at the front with an observation window movable to and from a closed position for insertion or removal of food, and having above said window a doorway and a door therefor, and a food support in said chamber at the rear of said window, refrigerating means in said chamber above said support and at the rear of and accessible to through said doorway, air conducting means leading from below said support to a point higher than said refrigerating element, and means for forcing air from



below said support upwardly through said conducting means and then downwardly past and in contact with said refrigerating element and into contact with food on said support.

2,097,531
PROCESS APPLICABLE TO STARCH MANUFACTURE
Albert Peltzer, Palo Alto, Calif., assignor to Merco Centrifugal Separator Co. Ltd., San Francisco, Calif., a corporation of California
Application June 20, 1934, Serial No. 731,415
9 Claims. (Cl. 127—69)

2. In a method of treating liquid materials containing lighter and heavier solid components suspended in a carrier liquid, effecting removal of a substantial amount of the carrier liquid, then diluting the remainder of the material with a liquid material containing only the lighter components, subjecting the diluted material to separating forces to effect a separation between lighter and heavier solid components, the lighter components being delivered in an overflow and the heavier components being delivered in an underflow, and utilizing a part of the overflow as the diluting medium in the second-mentioned step.

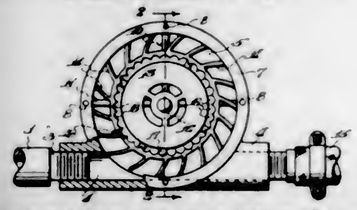


2,097,532
WRINGER
Julian L. Perkins, West Springfield, Mass.
Application July 21, 1936, Serial No. 91,679
2 Claims. (Cl. 68—32)

1. The combination with a wringer frame with rolls journalled therein of a unitary drain board hinged to said frame, the said drain board including an upper drip board declining outwardly from said rolls, a trough therebelow and a frame connecting the drip board and trough together

having upper and lower longitudinal members, and hinge connections between the lower longitudinal member and wringer frame.

2,097,533
SLACK ADJUSTER FOR AIR BRAKES
John E. Redford, St. Louis, Mo.
Application June 1, 1936, Serial No. 82,692
14 Claims. (Cl. 188—203)

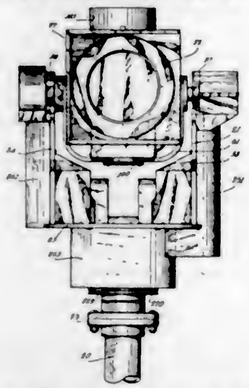


1. In a device of the class described, a casing, a cross-head mounted in said casing for reciprocation, and operatively connected with the brake actuating devices of a car, a shaft in said casing connected with said cross-head, fluid actuated means for imparting movement to said shaft, and a cushion spring on the end of said cross-head for impact with the end of said casing.

2,097,534
MECHANICAL POWER TRANSMISSION
Allen M. Rossman, Wilmette, Ill., assignor to Rossman Engineering Company, Chicago, Ill., a corporation of Illinois
Application October 28, 1933, Serial No. 695,626
18 Claims. (Cl. 74—245)

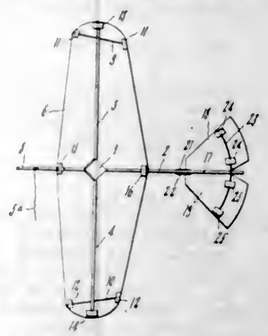
2. In a laminated belt, an assembly of unit strips laid one on another, each strip being displaced longitudinally with respect to its adjacent strip, and means, disposed beside said assembly, for joining said strips to form a predetermined number of continuous endless strands.

2,097,535
LIQUID FLOW INDICATOR
Lena M. Rugel and Paul F. Rugel, Dallas, Tex.
Application July 11, 1935, Serial No. 30,862
1 Claim. (Cl. 116—117)



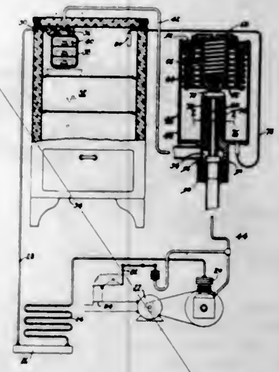
In a liquid flow indicating device, the combination comprising a liquid passage, a circular housing having transparent sides, arranged to be interposed between the point of liquid supply and the point of discharge and having communication with said passage, a wheel whose rotary axis is offset relative to said passage and having spaced, arcuate vanes on its periphery in spaced relationship and rotatably disposed in said housing whereby said vanes will successively enter said passage to be actuated by the liquid conveyed through said passage to visibly indicate the flow of liquid from the supply, an annular flange from which said vanes extend, having in its inner periphery a multiplicity of successive depressions, and a spherical element arranged to be received in one of said depressions upon cessation of rotation of said wheel.

2,097,536
RETRIEVER FOR FISH LURES
Carl I. Shirk, Modesto, Calif.
Application October 31, 1936, Serial No. 108,565
1 Claim. (Cl. 43—30)



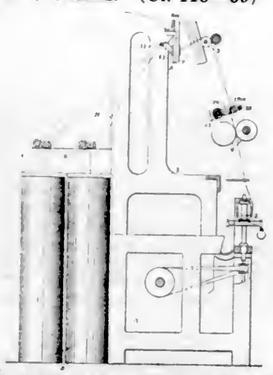
A retriever for fish lures comprising a tubular body adapted to encircle the line attached to a snagged lure and a drop line secured to said body adjacent the top thereof; the bore of the body being frusto-conical in form.

2,097,537
REMOTELY CONTROLLED SPOTLIGHT
Robert Earl Snyder, Pasadena, Calif., assignor of one-half to Fred L. Harter, Los Angeles, Calif.
Application June 7, 1933, Serial No. 674,642
13 Claims. (Cl. 240—3)



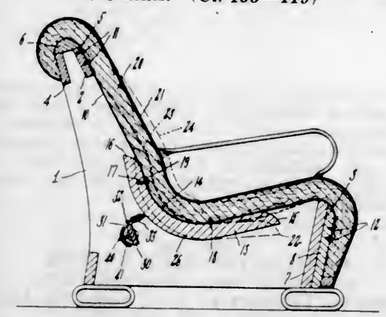
1. A remotely controlled projector of radiant energy or the like comprising a standard, a lantern mounted upon the standard for rotation about horizontal and vertical axes, remotely controlled means for causing the lantern to rotate about either or both axes, said means including friction drives enabling the lantern to be manually turned or to stop upon fouling without danger of injury, and friction brake mans for stopping rotation of the lantern and holding the lantern stationary, said friction drive means being located between the brake means and the lantern so that the lantern can be turned manually while the brake means is applied by causing the friction drive means to slip.

2,097,538
KITE
George M. Taylor, Wakefield, Mass., assignor to Paul K. Guillow, Wakefield, Mass.
Application February 21, 1936, Serial No. 65,010
12 Claims. (Cl. 244—154)



1. A kite having lateral wings and a guiding tail vane structure longitudinally displaced from the wings and in which the forward portion of the wings is tilted up relatively to the rear portion thereof in the fore-and-aft dimension of the kite at an angle sufficient to cause the wind to exert a retarding as well as a lifting action on the kite when in tethered flight.

2,097,539
REFRIGERATING APPARATUS
Edward J. Tomlinson, Dayton, Ohio, assignor to General Motors Corporation, Dayton, Ohio, a corporation of Delaware
Application May 31, 1935, Serial No. 24,260
7 Claims. (Cl. 62—4)

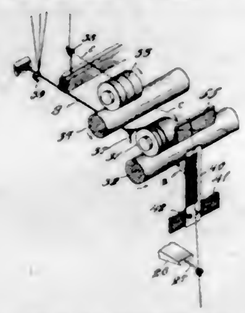


1. Refrigerating apparatus including a refrigerant evaporating means for cooling a medium and a refrigerant compressing and condensing means for supplying liquid refrigerant to and for withdrawing evaporated refrigerant from the evaporating means, and means responsive to the arithmetical sum of the influences of the temperature of the medium to be cooled and the pressure of the refrigerant within the evaporating means for controlling the withdrawal of refrigerant from the evaporating means.

2,097,540
TREATING COMPOSITE STRANDS
Homer D. Tracy, Ridgewood, N. J., assignor to The Linen Thread Co. Inc., New York, N. Y., a corporation of Delaware
Application January 21, 1937, Serial No. 121,399
7 Claims. (Cl. 118—39)

1. The method of converting a sliver into a spun product which consists in drawing the sliver to a state in which it is too weak continously to withstand the strain imposed thereon when it is pulled in an upward direction, depositing the thus-drawn sliver in a mass, pulling the thus-drawn sliver from such mass and spinning it and in so pulling the sliver directing it from said mass in an upwardly reaching course, and meanwhile continually twisting the portion of the sliver at any time in such course to a degree sufficient to prevent disruption of such portion.

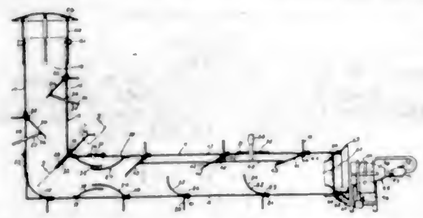
2,097,541
CHAIR OR SEAT
John Turner, Contoocook, N. H.
Application May 29, 1936, Serial No. 82,463
8 Claims. (Cl. 155—119)



6. A structure of the class described comprising a top back member and a front seat member, a flexible body supporting member secured at its ends to said back and seat members and depending therebetween to form seat and back portions, and means engaging said seat and back portions and transmitting pressure exerted on one of said portions from the occupant to pressure against the occupant at the other of said portions.

2,097,542
SELF-INFLATING LIFE BELT
Karl Viktor Gösta Wallin, Hedensberg, Sweden
Application February 7, 1935, Serial No. 5,358
Renewed August 27, 1937. In Sweden July 26, 1933
1 Claim. (Cl. 9—19)

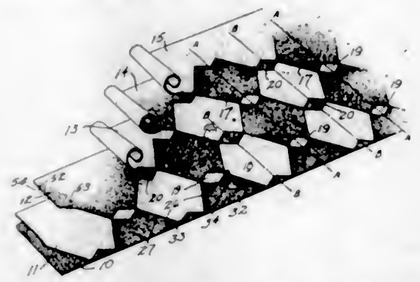
In an inflatable life saving device, the combination of a belt having an introduction valve, and a gas generating cartridge introduced into the belt through said valve, said cartridge comprising a breakable hermetically closed rubber tube to contain a supersaturated solution of sodium bicarbonate in water, a breakable phial to contain concentrated sulphuric acid arranged in said tube, and a perforated protecting tube enclosing said phial within the rubber tube to prevent the pieces of the phial when broken from passing into the belt through the broken rubber tube.



2,097,543
APPARATUS FOR MAKING BUNCH-YARN
Samuel Rushton Walsh, Valley Falls, R. I., assignor to H & B American Machine Company, a corporation of Maine
Application March 27, 1937, Serial No. 133,327
19 Claims. (Cl. 117—22)

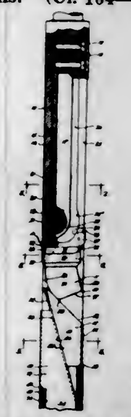
1. A yarn guide for twisting and like machines for making bunch yarn comprising a body having one edge slotted to provide a plurality of spaced openings disposed in a single row along said edge portion for selectively receiving and separately guiding one or more of the bunch-forming yarns.

2,097,544
RADIANT ORCHARD HEATER
Charles H. Ames, Whittier, Calif.
Application February 10, 1937, Serial No. 125,000
11 Claims. (Cl. 126—59.5)



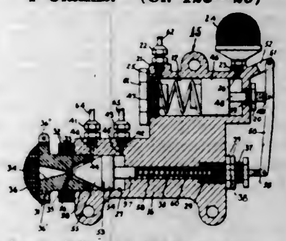
1. In an orchard heater, an elongated L-shaped body comprising a wall, fixed baffles secured about the exterior of said body, each of said baffles having an outwardly extending fin portion and having a base portion welded to the body, a plurality of baffles within said body, said baffles within the body including fin portions directed towards the center of the body and base portions secured to the interior of the body, a damper at the juncture of the two portions of the L, a Venturi member in said body, said Venturi member comprising a pair of tubular members inwardly directed and tapering with one member disposed within the other member, certain of said inner baffles on one wall being curved to direct heated products of combustion towards the opposite wall.

2,097,545
THE PROCESS OF PRODUCING DISTILLED ALCOHOLIC SPIRITS
Frederick S. Bowden and Richard B. Bowden, Kansas City, Kans., assignors to White Springs Distillery, Inc., a corporation of Missouri
No Drawing. Application June 4, 1934, Serial No. 728,954
2 Claims. (Cl. 99—40)



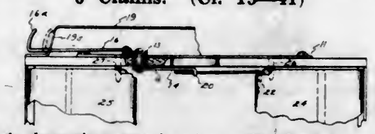
1. The process of producing distilled alcoholic spirits which comprises forming a mash of material suitable for the production of alcoholic spirits, fermenting said mash to form a solution of mash suitable for heating to produce vapors, adding activated carbon in proportion of one to three pounds of activated carbon to each one hundred gallons of the solution of mash immediately prior to distillation thereof, causing distillation of the solution of mash, and condensing the vapors of distillation.

2,097,546
ROOF COVERING AND ROOFING MEMBER
Harold D. Brown, Los Angeles, Calif.
Application July 15, 1929, Serial No. 378,304
21 Claims. (Cl. 108—7)



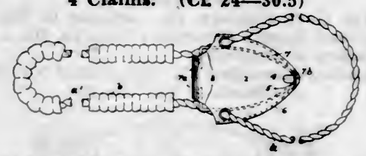
17. In a roof comprising a plurality of shingles each bounded along one side by an edge having a plurality of complementary primary tabs and recesses with a secondary recess formed at the end of each tab and a secondary tab formed at the end of each recess, said secondary tabs and recesses being complementary, a series of overlapping courses of said shingles laid with the ends of the primary tabs in registration with the ends of the primary recesses so that the tabs and recesses in one course are oppositely disposed from the complementary recesses and tabs respectively in an adjacent course.

2,097,547
WELL TOOL
Ora A. Brown, South Gate, Calif., assignor to Baash-Ross Tool Company, Los Angeles, Calif., a corporation of California
Application June 5, 1934, Serial No. 729,097
16 Claims. (Cl. 164—0.4)



1. In a well tool, a body, two members carried by the body and having slidably cooperating inclined surfaces, one member being toothed to grip the casing, a cutter carried by the body to engage said member and to swing into engagement with the casing upon movement of the body with respect to said member, and means for resisting movement of the other member whereby movement of the body results in cooperation of said surfaces to bring the toothed member into stationary engagement with the casing.

2,097,548
AUTOMATIC HUMIDIFIER
Harry J. McCombs Burdick, Anaheim, Calif.
Application September 3, 1935, Serial No. 38,958
4 Claims. (Cl. 123—25)

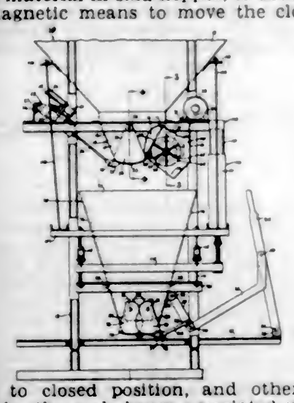


2. In a humidifier, a body having a chamber therein, said body having an aperture providing an air inlet, a valve in said chamber, fluid operated means to move said valve, said chamber having a water inlet at one end, said chamber having an outlet at the other end, said body having a frusto-conical recess therein communicating with said air inlet, said valve having a cylindrical body and a frusto-conical head conforming in shape to the recess in said plug, the end of said valve being plane and serving to close said air inlet when the valve is in one extreme position, the cylindrical portion of said valve serving to close said water inlet when the valve is in the other extreme position, said valve having an aperture extending therethrough, said aperture at one end being disposed at one side of said plane portion, said aperture at the other end terminating at the other end of the valve.

2,097,549
CARPET SWEEPER DUMPING MECHANISM
Norman W. Cummins, Louisville, Ky., assignor to Adler Manufacturing Co., Incorporated, Louisville, Ky., a corporation of Kentucky
Application December 29, 1933, Serial No. 704,497
6 Claims. (Cl. 15—41)

2. A dumping mechanism attached to a vertically disposed end member of a carpet sweeper housing, comprising a shaft pivotally mounted in a bushing associated with said end member, an arm keyed to the inside end of said shaft and circumferentially projecting beyond said bushing, said arm engaging the central portion of a spring cooperating to open and close a pair of dust pans, and means employed to actuate said mechanism, including another arm keyed to said shaft, said inside arm cooperating with the shaft and bushing to effectively protect said bushing against the egress of dust from said housing.

2,097,550
ROPE CLIP
John Faber, Jr., Haledon, N. J.
Application January 9, 1937, Serial No. 119,749
4 Claims. (Cl. 24—30.5)



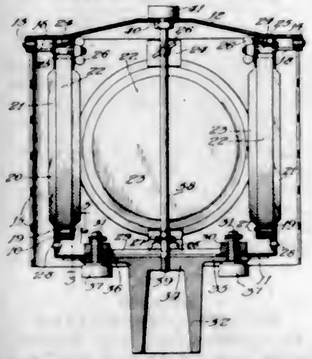
1. The combination, with a shell consisting of a length of stiff sheet material existing bent on substantially median transverse lines and having its terminals opposed to each other and converging toward their free ends, said terminals having substantially opposed apertures removed from said ends, and a bifurcated spring strip secured in the shell and having its bight confined between said ends of the shell and its extremities arranged to press against rope portions reeved through the apertures.

2,097,551
BATCHING APPARATUS
Leslie H. Garlinghouse, Los Angeles, Calif.
Application June 29, 1934, Serial No. 733,037
2 Claims. (Cl. 249—43)

1. In a batching apparatus, a hopper, a bin, said bin having a discharge aperture leading to said hopper, a closure for said aperture, a scale device, said hopper being the scale-pan of said scale device, pneumatic means for moving said closure, electro-magnetic means for actuating the moving means of said closure, a scale beam adapted to weigh a desired amount of material delivered from the bin, said bin having an auxiliary discharge aperture spaced from the first discharge aperture, said auxiliary aperture discharging into said hopper, a conveyor disposed in said auxiliary aperture, means operable upon movement of said closure to open position to simultaneously cause movement of the conveyor in the auxiliary aperture associated with the bin to convey material from the bin through said auxiliary discharge aperture into the hopper,

means controlled by the movement of the scale beam associated with said bin, caused by the weight of material in said hopper, to actuate said electro-magnetic means to move the closure of

said bin to closed position, and other means operated by the scale beam associated with said bin and effective after the closure of said bin is closed and said hopper has received an additional weight of material to stop said conveyor.



2,097,552

REFLECTOR TYPE SIGNAL FOR SWITCH STANDS

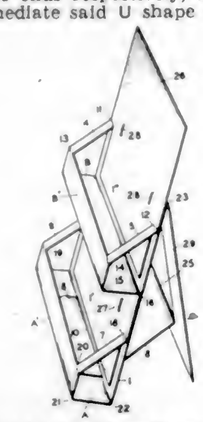
Godfrey Gort, Chicago, Ill., assignor to Western Railroad Supply Company, Chicago, Ill., a corporation of Delaware

Application November 27, 1935, Serial No. 51,867

5 Claims. (Cl. 88—78)

1. A reflector type signal comprising a plurality of side walls forming an open-top housing, each side wall having a reflector mounted therein, a top wall removably seated on the upper edge of said housing and extending beyond the side walls thereof, a grille connected to the edges of the top wall and suspended therefrom in spaced relation to said side walls and reflectors, whereby said top wall and grille may be removed as a unit for gaining access to said reflectors.

2,097,553



DISPLAY RACK

Raoul J. Gruenberg, San Francisco, Calif.

Application January 2, 1935, Serial No. 12

1 Claim. (Cl. 248—198)

A display rack formed from a continuous blank of sheet material having a U shape shelf-cut and a U shaped tab-cut directed in opposite directions within the margins of the blank adjacent its opposite ends respectively, and a transverse slot intermediate said U shape cuts; said blank

being folded back and forth upon itself in triple formation; two of said folded portions being fixed together, whereby a shelf is formed below said shelf-cut and a supporting easel is formed when said tab enters said slot.

2,097,554

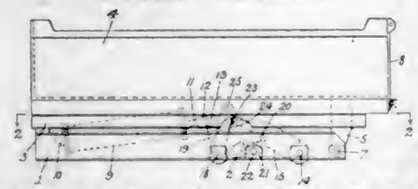
HEARING AID

Frank Lawrence Alloway, Kingsport, Tenn.

Application February 4, 1936, Serial No. 62,335

5 Claims. (Cl. 181—23)

1. A hearing device comprising a body for supportable insertion in the main outer passage of the ear, said body comprising a tube of a diameter to substantially snugly fit said passage, said tube having a relatively small inner end and an enlarged outwardly tapering outer end, said inner end being formed with an internal groove, a relatively small sound vibration diaphragm closing said small end and having its edges seated in said groove, said enlarged outer end being formed with an internal groove, a relatively large sound vibration diaphragm closing said outer end and having its edges seated in said groove.



2,097,555

TIPPING MECHANISM

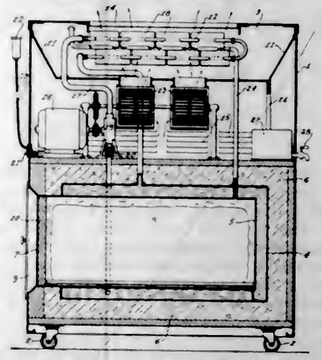
William C. Anthony, Streator, Ill., assignor to Anthony Company, Streator, Ill., a corporation of Illinois

Application August 12, 1936, Serial No. 95,687

13 Claims. (Cl. 298—22)

1. In combination a load carrying and dumping assembly, including, a support and a member

mounted on said support to be tilted, and means for tilting said member, comprising a leverage mechanism, said leverage mechanism including a lever pivoted on said assembly and carrying at one end an auxiliary lever, said auxiliary lever having two free end portions, a power source movably mounted within said assembly and means for connecting it to one of said free portions of said auxiliary lever, and a fulcrum member supported on said assembly, the other free portion of said auxiliary lever provided with a fulcrum face adapted to contact said fulcrum member.



2,097,556

AIR CONDITIONING APPARATUS

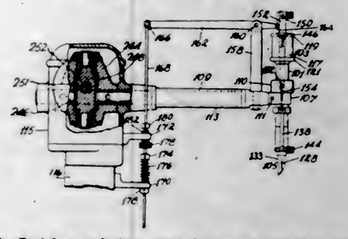
Ralph F. Bixby and John H. Meyer, St. Louis, Mo.; said Meyer assignor to said Bixby

Application November 5, 1934, Serial No. 751,610

7 Claims. (Cl. 62—91.5)

1. An air conditioning apparatus comprising a receptacle for a heat exchange agent, a container for a low temperature refrigerant positioned in intimate thermal contact with said agent, a casing forming an air treating compartment through which air may be circulated, a coil positioned in said compartment in the path of circulation of said air, means for circulating said agent through said coil and a secondary coil positioned similarly to said first coil and means for passing through said secondary coil the gases resulting from evaporation of said refrigerant.

2,097,557



FLUID-APPLYING MACHINE

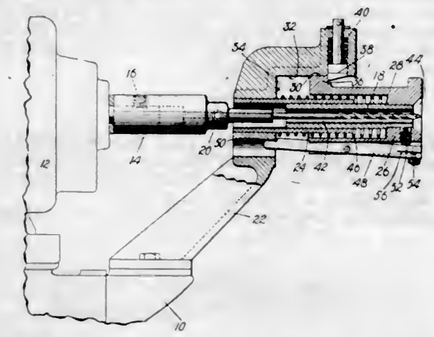
John Henry Brown and Thomas Baggott Clarke, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey

Application December 16, 1935, Serial No. 54,607

In Great Britain December 28, 1934

10 Claims. (Cl. 12—31)

1. A fluid-applying machine comprising a support, a tube carried thereby and provided at its delivery-end with a slot and with a constricted passage leading into the slot at one extremity and having about the opposite extremity a valve-seat, a valve movable through the tube and co-operating with the seat, and a peripherally-grooved roll rotatable in the slot.



2,097,558

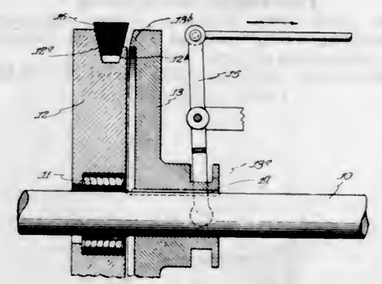
MACHINE FOR OPERATING UPON THE HEEL-PORTIONS OF SHOES

Francis L. Brandt, Wakefield, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey

Application December 30, 1935, Serial No. 56,733

23 Claims. (Cl. 144—93)

6. In a machine for operating upon the heel-portions of shoes, a rotatable tool, a member movable along the tool by engagement with the work, and means movable upon the member for locking said member against movement.



2,097,559

CLUTCH PULLEY

Robert L. Brownlee, Chicago, Ill.

Application January 22, 1937, Serial No. 121,896

5 Claims. (Cl. 74—230.24)

1. A clutch comprising a driving pulley, a shaft freely mounting said pulley, a driven member laterally spaced from said pulley and slidably keyed to said shaft for movement towards and away from said pulley, a peripheral groove having diverging walls formed on said pulley, one wall of said groove being lower than the other wall, a belt carried in said groove by said walls thereof, and said driven means being formed to provide means for engaging said belt above the top of said lower wall to frictionally connect said driving and driven members when the latter is slid along said shaft into engagement with said driving member.

2,097,560

LEAD AND LEAD ALLOYS

William Thomas Butcher, Ilford, England, assignor to Goodlass Wall & Lead Industries Limited, London, England

No Drawing. Application December 12, 1936, Serial No. 115,629. In Great Britain September 12, 1935

14 Claims. (Cl. 75—166)

1. A process of alloying metals with lead, which comprises the steps of treating a molten tin-containing lead alloy with a flux, consisting of a mixture of a lead halide and a reducible compound of a metal selected from the group consisting of arsenic, antimony, and copper, said compound being an oxide of said metal or a compound adapted to form an oxide of said metal in situ, thereby effecting oxidation of the tin and replacement thereof in the alloy by the said metal, and removing the tin oxide so formed by separating the flux from the alloy.

2,097,561

FEEDING MECHANISM FOR ROCK DRILLS

John C. Curtis, Garfield Heights, Ohio, assignor to The Cleveland Rock Drill Company, Cleveland, Ohio, a corporation of Ohio

Application November 12, 1934, Serial No. 752,662

16 Claims. (Cl. 121—9)

1. In a rock drill, a support, a tube slidably guided thereon, a drilling motor slidably guided on said tube, a feeding mechanism for said drilling motor including said slidable tube, a stationary element within the latter, means for effecting the slidable movement of said tube relative to said element, and means receiving motion from the slidable movement of said tube for effecting the slidable movement of said drilling motor relative to said tube.

2,097,562

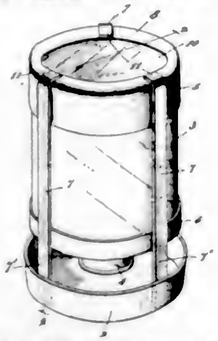
PORTABLE POLE STEP

Lester Scott Day, Hamden, Conn., assignor to American Telephone and Telegraph Company, a corporation of New York

Application April 24, 1936, Serial No. 76,289

1 Claim. (Cl. 228—46)

A step adapted to be detachably connected to a pole or the like including a tread surface and a pole-engaging channel member having slotted side portions, and a chain comprising associated links disposed at right angles to each other, said chain having one end permanently fixed to one side portion and looped about the pole and having its free end held in adjustable engagement with the other side portion by the insertion of a link therethrough and held in position by the next succeeding link.



2,097,563

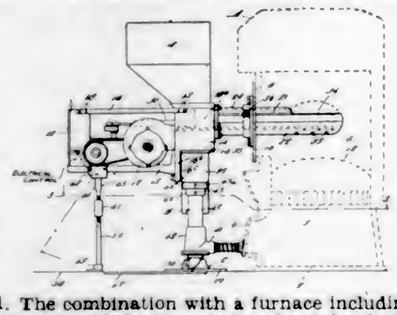
CHICKEN FOUNTAIN

Delbert B. Dreese, Larned, Kans.

Application February 11, 1936, Serial No. 63,411

1 Claim. (Cl. 119—77)

In a drinking fountain, a bottle serving as a water container and having a neck, and a casing about the bottle consisting of bands fitting snugly about upper and lower portions of the bottle, the lower band having a portion extending below the bottle and bent to form a flange engaged under the bottom of the bottle in flat contacting engagement therewith, the upper band having a portion extending above the bottle and bent to form a flange overlying the top of the bottle in flat contacting engagement therewith and strips extending longitudinally of the bottle in spaced relation to each other circumferentially thereof and firmly secured against outer surfaces of the bands to retain the bands in close fitting engagement with the bottle, said strips having their upper end portions projecting beyond the upper band and constituting legs adapted to support the bottle when inverted in an elevated position over a water pan with the neck of the bottle extending downwardly into the pan and terminating in spaced relation to the bottom of the pan, lower end portions of said strips being bent inwardly and secured across the under face of the flange of the lower band.



2,097,564

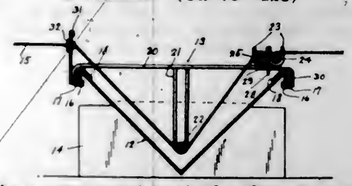
OVERFEED STOKER

Joseph J. Durand, Minneapolis, Minn.

Application July 16, 1935, Serial No. 31,661

5 Claims. (Cl. 110—101)

1. The combination with a furnace including a fire box provided with a grate, of a stoker including a bowl having an air chamber and a coal pocket, a spout secured to the bowl and extending into the fire box above the grate, said spout having a coal chute registering with the coal pocket and a conductor registering with the air chamber at one end and with the fire box at the other end to feed air over the grate, a hollow pedestal arranged to support the stoker and equipped with a passage communicating with said air chamber, a flexible air conductor communicating at one end with the passage in the pedestal and at the other end with the furnace under the grate, and bushing fittings between the ends of the flexible conductor and the pedestal and the furnace respectively.



2,097,565

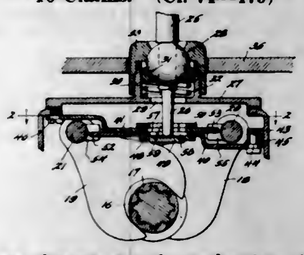
THREAD GUIDE AND TENSIONING MEANS FOR KNITTING MACHINES

William P. Ford, Decatur, Ala.

Application October 24, 1936, Serial No. 107,488

3 Claims. (Cl. 66—125)

1. As a component part of a thread guide tensioning unit of the class described, a frame, a pair of spaced parallel freely removable and turnable glass rods mounted on said frame to permit passage thereover of a thread, a glass ring disposed between said rods and hung on the threads, and a relatively fixed guard finger extending thru said ring to limit the upward movement of the ring and to prevent the ring from dropping down in the manner and for the purposes described.



2,097,566

CHANGE SPEED GEARING

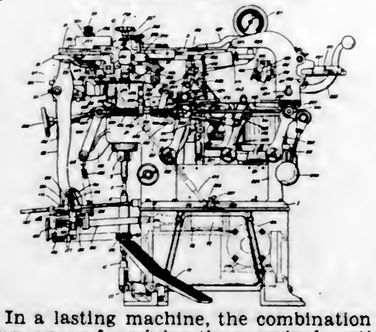
Aubrey E. Hummer, Washington, D. C., assignor to Packard Motor Car Company, Detroit, Mich., a corporation of Michigan

Application May 28, 1934, Serial No. 728,024

16 Claims. (Cl. 74—473)

1. In a change speed mechanism including gearing and a housing therefor, in combination, shifter members, a pair of levers arranged in overlapping relation for a portion of their lengths and having fixed pivots at their oppositely projecting ends, the other ends of said levers respectively operatively engaging said shifter members, a shift lever intersecting said overlapping levers, cooperating means on said levers whereby said shift lever may selectively engage and actuate either one of said levers, said means comprising oppositely extending, substantially T-shaped slots formed in said overlapping levers, the upright arms of said T-shaped slots adapted to be in substantial registry when the levers are in unshifted or neutral positions.

2,097,567



LASTING MACHINE

Frank Bycroft Keall, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey

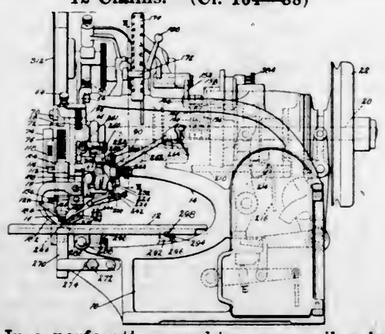
Application June 23, 1936, Serial No. 86,828

In Great Britain August 13, 1935

23 Claims. (Cl. 12—14)

1. In a lasting machine, the combination with wiping means for wiping the marginal portion of upper materials into lasted position, of a member movable by the operator to operate said wiping means, and power-operated mechanism arranged to become effective after the wiping means has been forced inwardly against the upper by the operator to supplement the force applied to said means by the operator.

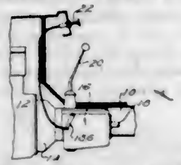
2,097,568



PERFORATING MACHINE

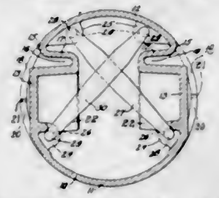
Frank Bycroft Keall and Lawrence Mawbey, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey

Application March 4, 1936, Serial No. 66,989



In Great Britain March 23, 1935

12 Claims. (Cl. 164—88)



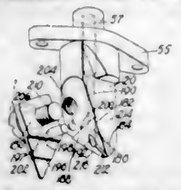
1. In a perforating machine, an anvil, a backing strip adapted to be advanced across the face of the anvil, means for sustaining the backing strip comprising a pair of reels, an arm pivotally mounted upon the frame of the machine, and upon which the reels are mounted, intermittently operated mechanism for advancing the strip across the face of the anvil, a gear for driving one of the reels, each of the reels having a pinion adapted to engage the gear, and means for locating a selected reel with its pinion in engagement with the gear.

2,097,569
AUTOMATIC TRANSMISSION
Ano E. Kilpela, Detroit, Mich., assignor, by mesne assignments, to Borg-Warner Corporation, a corporation of Illinois
Application November 4, 1933, Serial No. 696,632
19 Claims. (Cl. 74—336)

1. In a device of the class described, the combination of aligned driving and driven shafts, clutch elements carried by each of said shafts, respectively, and rotating at different rates of speed and adapted to be connected to said driven shaft for driving the same, a clutch member slidably splined to said driven shaft and adapted for selectively connecting the same to each of said clutch elements, means carried by said clutch member operable responsive to centrifugal force resulting from rotation thereof for connecting the same to said driving shaft clutch element, said clutch member normally being in a position where said means are ineffective, means affording a one-way driving connection between said shafts whenever said clutch member is in a position where said centrifugal force responsive means may be effective for connecting said driven shaft to said driving shaft clutch element, and shifting means for moving said clutch member into and out of the position where said centrifugal force responsive means may be effective without disconnecting said clutch member from said driven shaft and without regard to the speed of rotation of said clutch member.

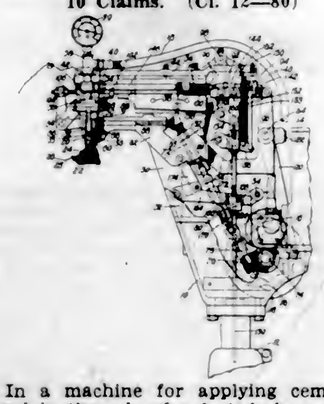
2,097,570
PISTON FOR INTERNAL COMBUSTION MOTORS
Elmer C. Long, Grosse Pointe Park, Mich.
Application May 21, 1934, Serial No. 726,743
9 Claims. (Cl. 309—13)

1. A piston comprising a head, a skirt having a resiliently flexible thrust side and a solid thrust side, and a pair of transverse members crossing each other intermediate their ends, each being secured at one end to the flexible thrust side and at their other ends to the solid thrust side of the skirt.



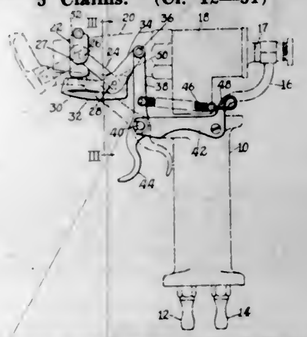
2,097,571
PIPETTE
James J. Moran, Drexel Hill, Pa., assignor to Kimble Glass Company, Vineland, N. J., a corporation of Illinois
Application August 26, 1935, Serial No. 37,907
1 Claim. (Cl. 23—292)

A cushioning member for use on pipettes of the type having a body portion tapered at one end thereof and a reduced stem connected to said tapered end comprising a washer formed of yieldable material adapted to embrace said stem and said tapered end at the juncture thereof, said



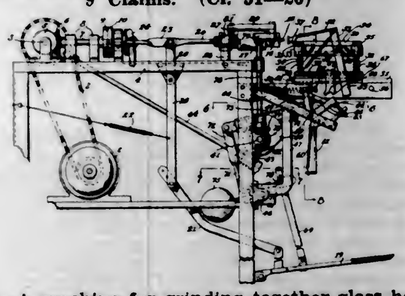
washer having an inner substantially conical surface to fit said tapered end and having an outer substantially conical surface with a plurality of flutes thereon, said conical surfaces converging in the same direction.

2,097,572
NOZZLE FOR SHOE CHANNEL CEMENTING MACHINES
Carl A. Newhall, Peabody, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application September 28, 1935, Serial No. 42,659
In Great Britain September 25, 1935
11 Claims. (Cl. 91—43)



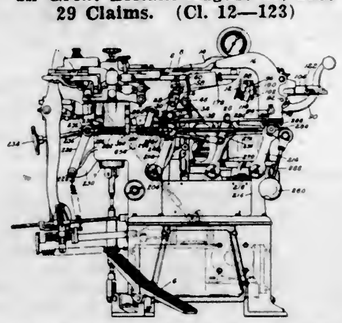
1. In a shoe channel cementing machine, an extruding nozzle having an acutely tapered end portion and provided with elongated passages extending from the apex back along opposed sides of said end portion of the nozzle whereby cement may be extruded through one passage directly upon the base of the channel and through the other passage directly upon the channel flap.

2,097,573
CHANNEL CEMENTING MACHINE
Carl A. Newhall, Peabody, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Original application September 28, 1935, Serial No. 42,659. Divided and this application November 25, 1936, Serial No. 112,723. In Great Britain September 25, 1935
10 Claims. (Cl. 12—80)



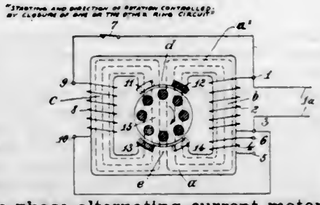
1. In a machine for applying cement to a channel in the sole of a lasted shoe, a tapered extruding nozzle adapted to be received in the channel and constructed and arranged to apply cement directly both to the flap and the bed thereof, means for forcing cement through said nozzle, and power-operated means for engaging the shoe for causing a relative traversing movement between the nozzle and a shoe thereby to apply cement along the linear extent of the channel.

2,097,574
SHOE-TREATING MACHINE
Fred Ricks and Frank Coleman Choice, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application February 16, 1937, Serial No. 126,010
In Great Britain March 13, 1936
5 Claims. (Cl. 12—51)



1. An apparatus for use in operating on shoes comprising a tubular member adapted to conduct a stream of hot gas and to direct it upon a shoe, and an ironing tool mounted thereon and having an inoperative position substantially in contact with the tubular member and an operative position remote from the tubular member and directly in the path of the stream of hot gas, whereby the tool is heated by conduction through the tubular member when in inoperative position and is heated directly by the stream of hot gas when in operative position.

2,097,575
GLASS STOPPER AND BOTTLE GRINDING MACHINE
James H. Roberts and Charles V. Achauer, Zanesville, Ohio, assignors to Hazel-Atlas Glass Company, Wheeling, W. Va., a corporation of West Virginia
Application August 26, 1936, Serial No. 98,000
9 Claims. (Cl. 51—26)



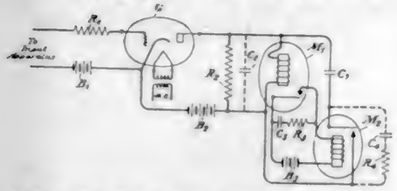
1. A machine for grinding together glass bottle necks and stoppers, including means for holding a stopper, means for holding a bottle, means for rotating one of the articles, means for periodically moving one of the articles into and out of grinding relation with the other article, and mechanism for automatically stopping such periodic movement when the stopper has reached a predetermined seating position in the bottle neck.

2,097,576
MACHINE FOR OPERATING ON SHOES
William Thomas Buckingham Roberts, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J., a corporation of New Jersey
Application June 23, 1936, Serial No. 86,838
In Great Britain August 13, 1935
29 Claims. (Cl. 12—123)

1. In a machine for operating on shoes, a shoe-positioning device for engaging the bottom of a shoe, a toe rest and a heel rest for engaging the shoe respectively at the top of the forepart and at the heel end to hold the shoe, and mechanism movable by the operator to force said toe rest and heel rest first yieldingly and then positively against the shoe after the shoe has been presented in contact with said shoe-positioning device.

2,097,577
SINGLE PHASE ALTERNATING CURRENT MOTOR
Sebastian Seitner, Alzey, Germany, assignor to firm: Markes & Co., Gesellschaft mit beschrankter Haftung, Ludenscheid, Germany
Application September 19, 1936, Serial No. 101,653
In Germany April 3, 1934
1 Claim. (Cl. 172—275)

Single phase alternating current motor of the split pole type with a short-circuited rotor, comprising, a stator having at least two yoke-sides and intermediate field poles, at least two pairs of short-circuitable rings on the poles for reversing the direction of rotation, at least two exciting windings for alterating current electrically in parallel and in opposing flux connection on different yoke-sides adjacent to the same stator pole, an additional secondary winding for supplying external consumers with reduced ten-



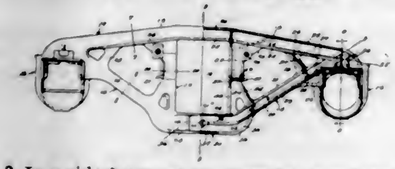
sion current on one yoke-side and means for separately disconnecting the exciting winding arranged on the other yoke-side to stop the rotor while maintaining the same reduced voltage at the secondary winding as during the running of the rotor.

2,097,578

APPARATUS FOR RECORDING STEEP WAVE FRONT VOLTAGES OF SHORT DURATION

Leland Kasson Swart, Mountain Lakes, and David William Bodle, Pequannock, N. J., assignors to American Telephone and Telegraph Company, a corporation of New York

Application November 5, 1935, Serial No. 48,378
7 Claims. (Cl. 175—320)



1. Apparatus for translating steep wave front voltages of short duration including a gas-filled tube to the input circuit of which said voltages are applied to ionize the gas within the tube, a source of potential, an inductive load connected to the output circuit of the tube in series with said source of potential, and a resistor conductively connected directly in shunt to the inductive load.

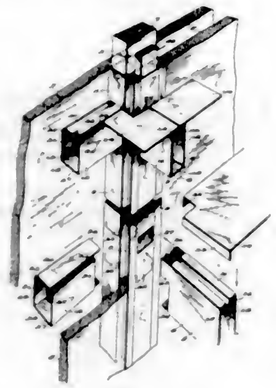
2,097,579

TRUCK SIDE FRAME

Thomas H. Symington, deceased, late of Baltimore, Md., by Edith R. Symington and Thomas R. Symington of Lutherville and Reisterstown, Md., executors, assignors, by mesne assignments, to The Symington-Gould Corporation, Rochester, N. Y., a corporation of Maryland

Application January 18, 1932, Serial No. 587,334
13 Claims. (Cl. 105—205)

3. In a side frame, a compression member channel shaped in cross section and open at the bottom, the compression member having sides terminating at their lower edges in inwardly extending flanges and having continuous external ribs in alinement with said flanges, the ribs and flanges extending continuously throughout the length of the frame, and the tension members having marginal flanges merging into said first named flanges above the journal boxes, and having their sides increasing in thickness toward the journal boxes.



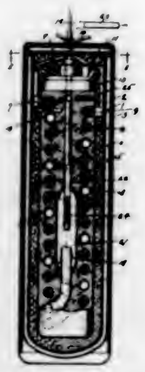
2,097,580

BUILDING CONSTRUCTION

Charles E. Tarbell, White Plains, N. Y.

Application June 5, 1936, Serial No. 83,753
7 Claims. (Cl. 189—36)

1. A metallic building structure including two angularly disposed hollow structural members, one of said members having an end portion disposed in abutting relation with the other of said members and being provided with laterally spaced portions projecting beyond said end portion into the interior of the latter, said last named mem-



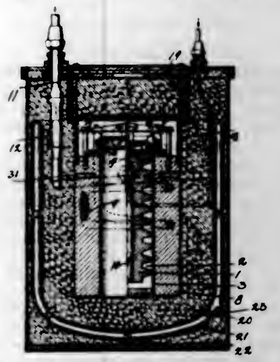
ber having means adapted to frictionally engage at least one of said laterally spaced portions, and means movable longitudinally of and within said last named member engageable with said laterally spaced portions for rigidly connecting said members.

2,097,581

ELECTRIC STEAM GENERATOR

Kurt Beyrodt, Hartford, Conn., assignor to Electric Steam Sterilizing Company, Inc., New York, N. Y., a corporation of Delaware

Application March 31, 1936, Serial No. 71,882
3 Claims. (Cl. 219—39)



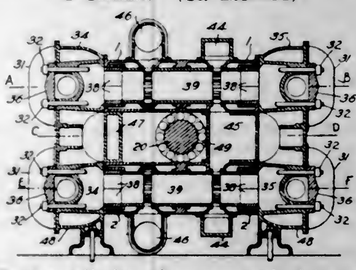
1. An electric steam generator comprising in combination a metal mass having a heating element and water evaporating tubing disposed helically thereof and embedded therein, said metal mass being provided internally adjacent its lower end with a chamber of larger cross section than said tubing, the said tubing adjacent its lower end being bent back upon itself and terminating in said chamber, an extension of said tubing extending upwardly from said chamber to the upper end of the apparatus to provide a steam outlet.

2,097,582

ELECTRIC STEAM GENERATOR

Kurt Beyrodt, Hartford, Conn., assignor to Electric Steam Sterilizing Company, Inc., New York, N. Y., a corporation of Delaware

Application March 31, 1936, Serial No. 71,883
11 Claims. (Cl. 219—39)



1. An electric steam generator comprising in combination a metal mass with a heater cast therein, said mass being provided with a central chamber, a metal shell fitting said chamber, and a second metal mass provided with a grooved periphery fitting within said shell, the said groove in conjunction with said shell providing evaporating surfaces for the generation of steam.

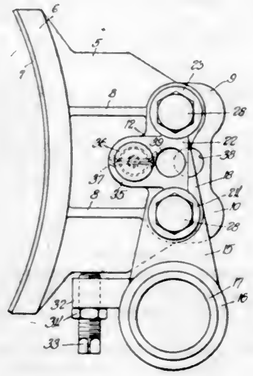
2,097,583

OPPOSED PISTON INTERNAL COMBUSTION ENGINE

John Lawrence Bogert, Brooklyn, N. Y.

Application November 8, 1934, Serial No. 752,095
4 Claims. (Cl. 123—51)

2. In the cylinder of an opposed piston engine in which two power-producing pistons reciprocate simultaneously in substantially opposite directions, counterboring both ends of said cylinder, fitting said counterbores with bushings divided longitudinally into halves, together with means for securing and releasing said bushings, substantially as represented and for the purpose set forth.



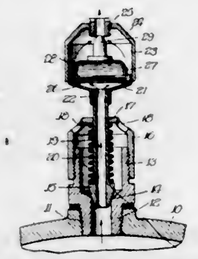
2,097,584

BRAKE SHOE CONSTRUCTION

Robert J. Burrows and Alfred O. Williams, Battle Creek, Mich., assignors to Clark Equipment Company, Buchanan, Mich., a corporation of Michigan

Application May 12, 1936, Serial No. 79,315
9 Claims. (Cl. 188—230)

3. In combination, a brake shoe having a pair of pin receiving openings therein, a brake head having a bifurcated arm portion receiving said shoe and having a pair of pin receiving openings spaced apart a distance less than the openings in said shoe, and pin means carried by said arm and adapted to extend through either of said



pair of openings to support said shoe for pivotal movement on said arm, said arm having means normally urged into frictional engagement with the lateral surface of said shoe to hold said shoe in position with respect to said arm while accommodating slight pivotal movement thereof.

2,097,585

VALVE FOR PRESSURE COOKERS, STERILIZERS AND THE LIKE

Robert H. Carson, Chicago, Ill., assignor to Burpee Can Sealer Company, Chicago, Ill., a corporation of Illinois

Application February 13, 1936, Serial No. 63,709
5 Claims. (Cl. 277—20)

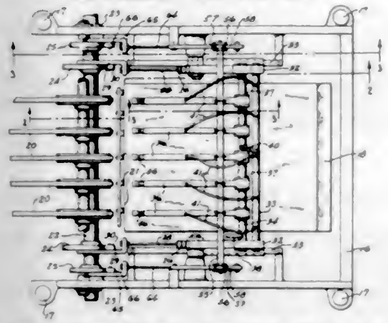
1. In a valve of the type described, the combination of an externally threaded valve casing open at one end and having on its other end a nipple and a valve seat at the inner end of the bore of the nipple, an internally threaded cap screwed onto said casing, said cap having a hole in its end wall and a vent opening, an annular valve cooperating with said seat, said valve having a hollow stem extending through the hole of said cap, a thrust spring between said cap and valve urging the latter to closed position, a housing mounted on the outer end of said stem and communicating interiorly with the latter, said housing having an air vent opening, a valve in said housing, and a heat-energized member in said housing for moving said last-named valve to close said air vent opening.

2,097,586

PRODUCTION OF POLYMERIZED UNSATURATED COMPOUNDS

John William Croom Crawford, Ardrossan, Scotland, assignor to Imperial Chemical Industries, Limited, a corporation of Great Britain

No Drawing. Application February 25, 1935, Serial No. 8,218. In Great Britain March 2, 1934
10 Claims. (Cl. 260—2)



1. Process for the manufacture of products of enhanced transparency to ultra-violet light by the polymerization of a compound selected from the group consisting of mono-olefin compounds containing the vinyl groups CH_2:CH— and mono-olefin compounds containing the alpha-substituted vinyl group which consists in using as polymerization catalysts peroxides of aliphatic dibasic acids.

2,097,587

SHEET FEEDING DEVICE

Lester V. Dearing, Milwaukee, Wis., assignor to Automatic Unit Corporation, a corporation of Wisconsin

Application July 23, 1934, Serial No. 736,500
14 Claims. (Cl. 271—26)

1. In a sheet feeding device, a shaft, a plurality of feeder arms loosely mounted on said shaft for movement into engagement with sheet material, suction feet carried by said arms in which a suction is established, a common elevating means for said arms, and means for independently connecting each arm to said elevating means, said means being constructed to permit the arms to fall by gravity to contact the sheet at different elevations when the elevating means is lowered.

2,097,588

TYPEWRITING MACHINE

William A. Dobson, Wethersfield, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y., a corporation of Delaware

Application November 22, 1932, Serial No. 643,811
6 Claims. (Cl. 197—147)

2. A typewriter-platen having a wear-resisting jacket which is compounded of rubber, carbon-black, whiting, sulphur and zinc, and having a density of about 87 to 90, and filled by a weighted soft-rubber cylinder compounded of rubber, magnesia, whiting, palm-oil, sulphur and paraffin, and having a density of 55 to 60, the platen being substantially of the following proportions: diameter of the platen 1¼ inches; thickness of the wearing jacket $\frac{3}{32}$ of an inch; outside diameter of the soft-rubber cylinder $1\frac{1}{16}$ of an inch, and central perforation of the same about ⅜ of an inch in diameter; and a metal core.

2,097,589

TREATMENT OF TEXTILE MATERIALS

Henry Dreyfus, London, England

No Drawing. Application August 24, 1935, Serial No. 37,781. In Great Britain August 30, 1934
8 Claims. (Cl. 91—68)

1. In a process for the manufacture of textile materials impregnated with an insoluble metal compound, the step which comprises improving the fastness of said metal compound without substantially impairing the properties of the textile materials by applying to the textile materials impregnated therewith a solution in a volatile organic solvent of a substance which forms a film on the materials which is substantially insoluble in aqueous scouring liquids, the film-forming substance being applied in a quantity less than 5% of the weight of the textile materials treated.

2,097,590

MANUFACTURE OF VINYL COMPOUNDS

Henry Dreyfus, London, England

No Drawing. Original application March 24, 1932, Serial No. 601,060. Divided and this application June 17, 1933, Serial No. 676,334. In Great Britain March 30, 1931
10 Claims. (Cl. 260—2)

3. Process for the production of vinyl compounds, which comprises the interaction of a vinyl halide with a saturated organic compound containing at least two acid groups, so as to obtain products containing acid groups.

7. Process for the production of vinyl compounds, which comprises the interaction of a vinyl halide with an acid salt of succinic acid.

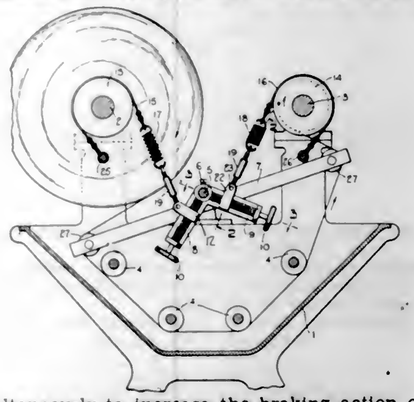
2,097,591

METHOD OF TREATING GREEN COFFEE BERRIES

Sam Everett Finley, Atlanta, Ga., assignor of one-third to Robert D. Kneale, Atlanta, Ga.

No Drawing. Application June 20, 1936, Serial No. 86,347
2 Claims. (Cl. 99—68)

1. The herein described method which comprises grinding green coffee berries and thereafter cascading the resulting ground particles separated and free from static contact with one another and unobstructedly through a gaseous medium heated to a temperature to roast the particles, whereby they are individually enveloped in such medium and uniformly roasted thereby.



2,097,592

DYE JIG

Bradford C. Gibbs, Cumberland, Md., assignor to Celanese Corporation of America, a corporation of Delaware

Application February 14, 1935, Serial No. 6,419
2 Claims. (Cl. 242—75)

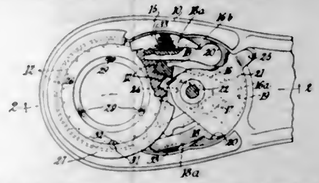
1. In a device for treating fabrics wherein the fabric during treatment is unwound from one roll and wound upon another roll, a combination with a brake operatively connected to each of said rolls, of a shaft, a member on said shaft, operable by an unrolled portion of the fabric, adapted to decrease the braking action on one roll and simultaneously to increase the braking action on the other roll, and means on said shaft and movable with said member for initially adjusting the tension exerted on said rolls by said brakes.

2,097,593

APPARATUS FOR THE MANUFACTURE OF SHEET MATERIAL

Edward Kinsella, Spondon, near Derby, England, assignor to Celanese Corporation of America, a corporation of Delaware

Application January 20, 1934, Serial No. 707,465
In Great Britain January 24, 1933
4 Claims. (Cl. 18—15)



4. An endless band for the manufacture of artificial films, foils and like materials consisting of two firmly united layers, one layer consisting of cold rolled nickel and capable of being flexed repeatedly without deterioration and the other consisting of a plating of nickel which is very hard and capable of taking a high polish.

2,097,594

REVERSIBLE RATCHET WRENCH

Willard C. Kress, Kenmore, N. Y., assignor to J. H. Williams & Co., Buffalo, N. Y., a corporation of New York

Application May 18, 1936, Serial No. 80,386
5 Claims. (Cl. 81—62)

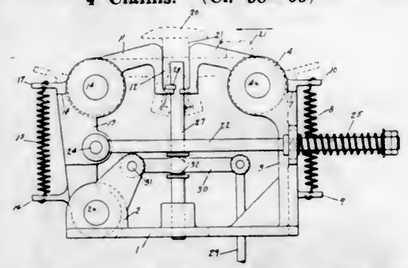
2. A ratchet wrench comprising a body portion, a ratchet wheel mounted thereon, a plurality of coacting pawls pivoted on said body portion and adapted to move, substantially in unison, into engagement with the ratchet wheel, a spring coacting with the outer side of one of said pawls and the latter coacting with another of said pawls whereby a plurality of pawls receive the tension of the said spring and are thereby urged into a position where they may engage said ratchet wheel.

2,097,595

INSULATION MATERIAL

James A. Malcolm, Chicago, Ill., assignor to Daniel C. Luse, Chicago, Ill.

Application July 15, 1936, Serial No. 90,714
1 Claim. (Cl. 154—44)



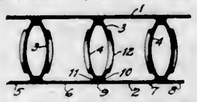
An insulating material in the form of a pad adaptable for the thermal insulation of wall or like structures and composed of a homogeneous mass of relatively short length wool fibers not susceptible to weaving, said fibers being distributed and needled throughout the pad from one outer surface of the pad to the other to interconnect and interlace the fibers together to give the pad self-supporting sheet-like form, said fibers being sufficiently short in length to render the pad relatively soft and fluffy to provide innumerable dead air cells within the pad from one outer surface portion of the pad to the other to make the pad as constituted of said short length fibers effective as an insulator against heat and cold for a wall construction.

2,097,596

SHOCK ABSORBING LATCHING DEVICE

George F. McDougall, Portland, Oreg., assignor to Oregon Textile Machines, Inc., Portland, Oreg., a corporation of Oregon

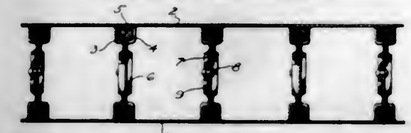
Application March 9, 1937, Serial No. 129,846
4 Claims. (Cl. 38—63)



1. A latching device comprising a base, one fixed and one pivoted standard normal to the base, two opposing jaws pivotally mounted one on each standard to define a latching space between the jaws, springs and jackknife joints to limit the position of the jaws and resilient shock absorbing means positioned to cushion an impact against the pivoted standard.

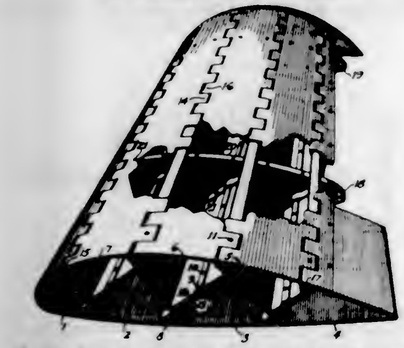
2,097,597

CELLULAR STRUCTURE



John Pavlecka, Detroit, Mich.

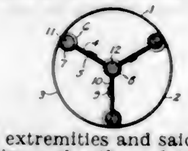
Application August 19, 1935, Serial No. 36,761
26 Claims. (Cl. 189—34)



1. A cellular structure comprising, tubular cells of sheet material having side walls forming jointly wedge-shaped gaps therebetween, tying means joining said cells through said side walls thereof, and linear wedges inserted in said gaps, retained therein by said walls and constrained against dislocation by the clinching action of said walls due to said tying means.

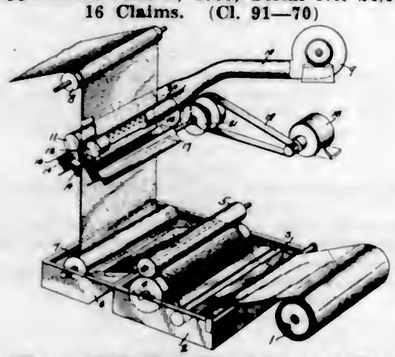
2,097,598
CELLULAR STRUCTURE
John Pavlecka, Detroit, Mich.
Application January 13, 1933, Serial No. 651,494
Renewed March 2, 1936
7 Claims. (Cl. 189—34)

1. A structure comprising, a series of tubular multi-lateral cells having side webs and chord webs meeting in a number of apices, said cells providing the exterior surfaces of said structure with said chord webs and abutting one on each other along said side webs thereby forming walls of double thickness in the interior of said structure, each cell having its apices profile grooved and transversely serrated, the serrated apex portions of each cell being intermeshed with the full apex portions of the associated cell, and linear members interlocking said intermeshed apex portions of said cells.



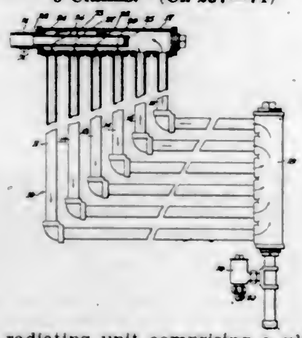
2,097,599
CELLULAR STRUCTURE
John Pavlecka, Detroit, Mich.
Application December 31, 1934, Serial No. 759,816
Renewed July 20, 1937
17 Claims. (Cl. 244—124)

1. A structure comprising, a series of individual tubular cells of sheet material extending lengthwise of the structure, each of said cells having its own chord web and two sides meeting in three apices, two of said apices at said chord web being transversely serrated and the third apex being continuous, said cells being intermeshed in said serrated apices thereof whereby said chord webs provide a portion of the exterior surface of the structure, a number of struts, certain of said struts interlocking each two intermeshed apices of said cells and others of said struts being disposed in said continuous apices of said cells, a panel or panels of sheet material providing the remaining portion of the exterior surface of the structure, said panel or panels being secured detachably to said struts in said continuous apices of said cells.



2,097,600
COLUMN STRUCTURE
John Pavlecka, Detroit, Mich.
Application December 31, 1934, Serial No. 759,815
22 Claims. (Cl. 189—38)

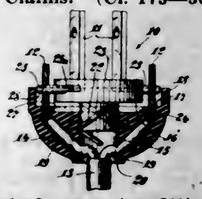
1. A column structure comprising, a closed exterior shell and an interior spar, both of sheet material, said spar having a number of webs meeting in pairs at a number of extremities, and



between said extremities and said shell each pair of webs forming a sheath, and linear rigid struts inserted in said sheaths as stress members.

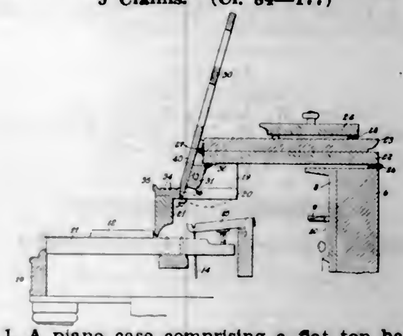
2,097,601
METHOD AND APPARATUS FOR COATING PAPER AND THE LIKE
Adolph Potdevin, Garden City, N. Y., assignor to Potdevin Machine Company, Brooklyn, N. Y., a corporation of New York
Application June 1, 1935, Serial No. 24,474
16 Claims. (Cl. 91—70)

1. The method of coating paper and the like, which method comprises continuously moving a web of the material through a bath of coating material, advancing the web to a bath of cooling fluid to cool the coating and then moving the web between air streams directed alternately first against one side and then against the other side to vibrate the web to remove excess cooling fluid and dry the coated web.



2,097,602
RADIATOR
Karl W. Rohlin, Merchantville, N. J., assignor to Warren Webster & Company, Camden, N. J., a corporation of New Jersey
Application March 6, 1936, Serial No. 67,440
5 Claims. (Cl. 237—74)

1. A radiating unit comprising a plurality of tubes, a supply header interconnecting said tubes

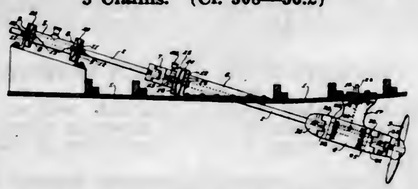


at one end of the unit, means within said header for directing jets of steam respectively into certain of said tubes, at least one of said jets being larger than the others, whereby when the steam supply is but a fraction of that required for heating the whole unit, the remote portions of tubes having larger jets will be supplied with more steam than tubes with smaller jets, means at the other end of the unit interconnecting each of the tubes having jets with at least one of the remaining tube or tubes, whereby said remaining tube or tubes provide return passages for permitting air or steam to circulate back toward or into said header.

2,097,603
ELECTRICAL CONNECTER CAP
John H. Ruth, Brooklyn, N. Y.
Application August 8, 1936, Serial No. 94,885
3 Claims. (Cl. 173—361)

2. An electrical connecter fitting including a shell member having a chamber having a seating means at the base thereof and angularly spaced passages having their inner ends at the seating means, a one piece plug member having spaced electrical contact prongs fixed thereon, said members having a thread axially interengaging the members for adjustable relative axial and angular motion between the members with the plug member positioned in the said chamber, the plug member affording free spaces adapted to confront said passages, the contact prongs having inner contact portions confronting the seating means at the inner ends of said passages, whereby relative axial and angular movement between the members causes the contact portions to move about the axis of said members to bend over and clamp the bared ends of conductor wires threaded through said passages into said spaces, the said thread serving to hold the members axially tight to maintain the said clamped condition of the wire ends.

2,097,604
PIANO CASE CONSTRUCTION
Joseph Sauerland, West New York, N. J., assignor to Hardman, Peck and Company, New York, N. Y., a corporation of New York
Application September 18, 1936, Serial No. 101,377
5 Claims. (Cl. 84—177)

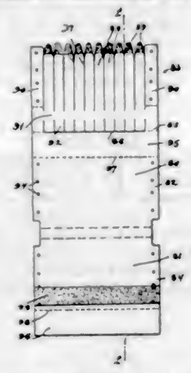


1. A piano case comprising a flat top having front and back sections so hinged that the front section folds over onto the back section to expose the keys, a music rack hinged to the underside of the back section, a transversely extending member extending from above the keys to the underside of the top and having an aperture in which said rack is free to swing, said rack being so mounted that when raised its lower edge abuts said member.

2,097,605
APPARATUS FOR THE FINE DISPERSION OF GASES IN LIQUIDS
Julius Schierenbeck, Heidelberg, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany
Application September 25, 1935, Serial No. 42,009
In Germany October 6, 1934
4 Claims. (Cl. 261—121)

1. Apparatus for preparing fine dispersions of gases in liquids comprising a pipe for the passage therethrough of a gas, a pipe surrounding said first mentioned pipe for the passage of a liquid therethrough, a deflecting plate screening the mouth of the first mentioned pipe and a deflecting plate screening the mouth of the second mentioned pipe.

2,097,606
MOUNTING FOR PROPELLER SHAFTS
Walter R. Smittle, St. Louis, Mo.
Application March 12, 1934, Serial No. 715,103
5 Claims. (Cl. 308—36.2)



1. A supporting bearing for a propeller shaft comprising an outboard bearing for said shaft, a supporting hanger for said bearing attachable to a boat and having a cylindrical face, an aligning element having a cylindrical face matching that of said hanger and having a flat face shiftably engageable with a support, and means operable from inside the boat for securing said parts in adjusted relation.

2,097,607
POCKET WITH PULL-MATCHES
Henry Spira, New York, N. Y.
Application December 14, 1934, Serial No. 757,501
2 Claims. (Cl. 206—29)

1. A pocket with pull-matches comprising two walls, an igniting surface within the pocket; one of the walls provided with a flap at its top; the flap folded into the interior of the pocket, a transverse incision along the fold leaving lateral tabs of the flap connected with the respective wall, and a plurality of match strips formed by

longitudinal incisions in the flap from the edge opposite the fold to the transverse incision; the

longitudinal incisions interrupted for a short length near the transverse incision.

2,097,608

CONCENTRATION OF GOLD BEARING MATERIALS

Stanley Tucker, London, England, assignor to Minerals Separation North American Corporation, New York, N. Y., a corporation of Maryland

No Drawing. Application January 24, 1935, Serial No. 3,267. In Great Britain January 30, 1934

11 Claims. (Cl. 209—166)

1. A process for the concentration of a gold-bearing material consisting in forming a pulp of finely-divided particles of the gold-bearing material with water in the presence of a mercurial agent and a sulphidizing agent, so that the surfaces of the gold particles in the pulp are modified by said agents and said gold particles made amenable to concentration depending upon their surface properties, and concentrating said gold particles from the material by flotation.

2,097,609

CONCENTRATION OF GOLD BEARING MATERIALS

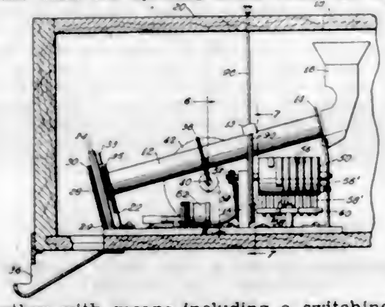
Stanley Tucker, London, England, assignor to Minerals Separation North American Corporation, New York, N. Y., a corporation of Maryland

No Drawing. Original application January 24, 1935, Serial No. 3,267. Divided and this application May 22, 1937, Serial No. 144,314. In Great Britain January 30, 1934

9 Claims. (Cl. 209—166)

1. A process for the concentration of a gold-bearing material consisting in forming a pulp of finely-divided particles of the gold-bearing material with water in the presence of a mercurial agent and an organic sulphur derivative of carbonic acid, so that the surfaces of the gold particles in the pulp are modified by said mercurial agent and organic sulphur derivative of carbonic acid and said gold particles made amenable to concentration depending upon their surface properties, and concentrating said gold particles from the material by flotation.

2,097,610



COIN OR TOKEN DISPENSER

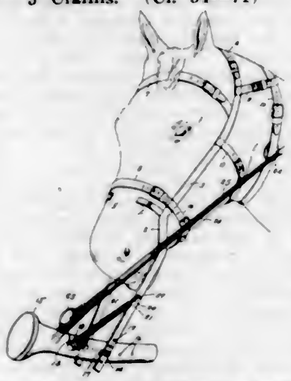
Irven H. Wilsey, Chicago, Ill.

Application October 21, 1936, Serial No. 106,719

7 Claims. (Cl. 312—67)

4. A coin dispensing device including an inclined coin storage tube supported for rotation about its longitudinal axis, electrical means for rotating said tube, means including a reciprocable ejecting slide positioned at the lower extremity of the tube for ejecting coins from the latter,

together with means including a switching device operable by a member on said tube to energize said electrical driving means during a predetermined number of revolutions of said tube.



2,097,611

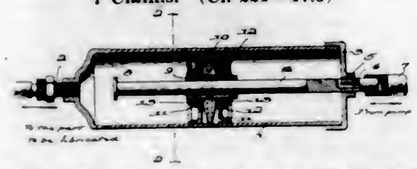
SCHOOLING DEVICE

Willoughby W. Adams, Mount Vernon, Ill.

Application April 2, 1937, Serial No. 134,607

5 Claims. (Cl. 54—71)

5. A schooling device including a bridle having rigid side members extending below the mouth of the animal to which the bridle is applied, a striker adjustably and pivotally mounted between the members, yielding means for holding the striker normally pressed away from the nose of the animal, a guiding element on the bridle, and a pulling device slidably mounted in said element and connected to the striker.



2,097,612

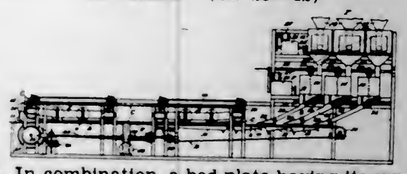
GREASE GUN

Albert W. Arnold, Miami, Fla.

Application July 27, 1935, Serial No. 33,589

7 Claims. (Cl. 221—47.3)

7. A lubricating device comprising a cylinder, a guide rod having one end fixed in one end of the cylinder and extending lengthwise therein with an abutment on the opposite end of said rod, said rod having a duct in the fixed end opening into the cylinder for supplying fluid under pressure thereto, a piston slidably mounted on the guide rod and including a single disk having opposite conical faces with packing cups secured at their inner edges on opposite sides of the disk in front of and having the major portions thereof normally spaced from said faces, said cups being turned in opposite directions and being respectively pressed against said faces upon the application of pressure.



2,097,613

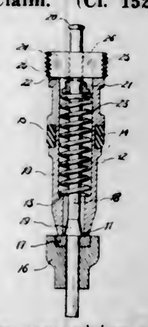
PROCESS AND APPARATUS FOR MAKING AND COLORING CEMENT FIBER AND THE LIKE PRODUCTS

Clements Batcheller, Portsmouth, N. H., assignor to Bemis Industries, Incorporated, Boston, Mass., a corporation of Delaware

Application July 28, 1931, Serial No. 553,818

31 Claims. (Cl. 25—42)

1. In combination, a bed plate having its upper surface longitudinally corrugated, an endless carrier belt adapted to travel over said surface and capable of assuming the contour thereof, means for forming a strip of plastic material on said belt as it passes over said bed plate, a second endless belt above said carrier belt and corrugated rollers within said second belt adapted to press said belt against the material on said carrier belt.



2,097,614

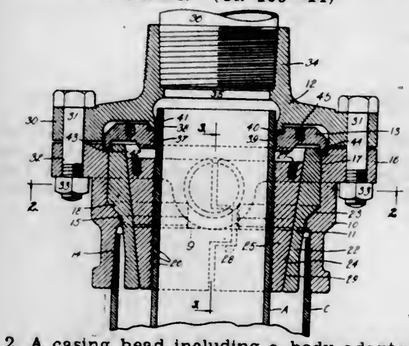
VALVE INSIDES

Adelbert E. Bronson, Cleveland, Ohio, assignor to The Dill Manufacturing Company, Cleveland, Ohio, a corporation of Ohio

Application December 8, 1931, Serial No. 579,719

1 Claim. (Cl. 152—12)

A valve insides comprising a barrel having a longitudinal bore therethrough, a valve pin extending through the barrel and having secured thereto adjacent its inner end a valve proper, and a member freely rotatable on said valve pin outwardly of the outer end of the barrel and rotatable relative to said barrel, said member being in the form of a bar having its opposite ends laterally flanged and curved on arcs of the same circle and provided with threads, said member forming the means by which the valve insides may be screwed into a valve stem.



2,097,615

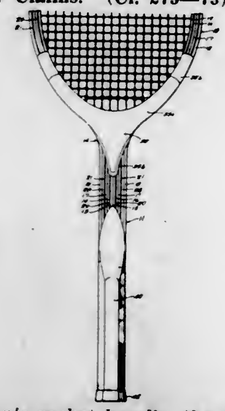
CASING HEAD

Erwin Burns, Los Angeles, and Harry P. Wickersham, Huntington Park, Calif.

Application August 7, 1935, Serial No. 35,105

7 Claims. (Cl. 166—14)

2. A casing head including a body adapted to be applied to the casing of a well, the body having an opening registering with and forming a continuation of the opening in the casing, a spider arranged in the body opening, slips in the spider for carrying an inner casing, an upper section secured to the body, packing carried by the body, a member surrounding the inner casing and bearing on the packing, and packing on the member sealing about the inner casing engaged and held under pressure by the upper section whereby the first mentioned packing is held under pressure by the member.



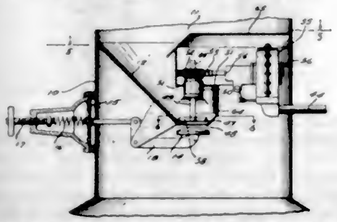
2,097,616

RACKET

Theophilus A. Davis, Los Angeles, Calif.

Application March 30, 1936, Serial No. 71,553

7 Claims. (Cl. 273—73)



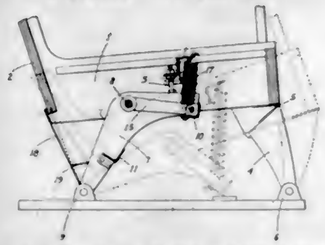
1. In a tennis racket handle, the combination of two outside substantially flat flexible edge members of relatively heavy wood extending parallel to one another the length of the handle, relatively heavy wood material between said edge members extending from the racket throat end of the handle to a point about midway of the length of the handle, a relatively light wood filler block between and abutting the inner surfaces of said edge members and extending from a point near the lower end of said wood material to the butt end of the handle, the grain of said filler block

running at right angles to the flexible edge members, the thickness of said block measured in the direction of the grain being less than the distance between the flexible edge members at the upper end of the handle, and said flexible edge members being flexed inwardly at the upper end of said filler block and being glued against its adjacent end grain surfaces.

2,097,617
CARBIDE AGITATOR FOR ACETYLENE GENERATORS

Maurice P. De Motte, Indianapolis, Ind., assignor, by mesne assignments, to Union Carbide and Carbon Corporation, a corporation of New York

Application November 23, 1932, Serial No. 644,058
8 Claims. (Cl. 48—53.3)

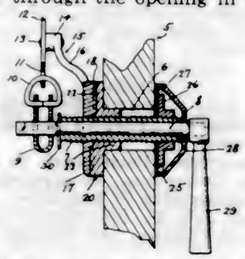


1. In an acetylene generator; a carbide hopper having a carbide feed outlet; a valve cooperating with said outlet for controlling the rate of said feed; a sleeve within said outlet through which said carbide passes for agitating carbide therein; and means for moving said sleeve.

2,097,618
CHAIR

Benjamin H. Drake, Stockton, Calif.

Application February 21, 1936, Serial No. 65,080
4 Claims. (Cl. 155—116)



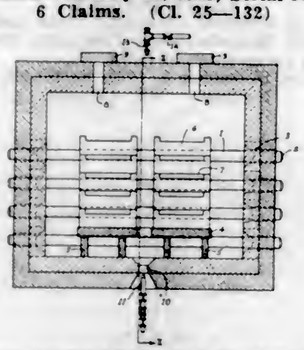
4. A chair including a seat frame, spaced front legs pivoted at their upper ends to the forward portion of the seat frame and pivoted at their lower ends to the floor, a shaft journaled on said seat frame and extending from one side of the seat frame to the other side thereof intermediate the front and back of the frame, hand controlled means to rotate the shaft, spaced rear legs pivoted at their lower ends to the floor, said legs extending upward and surrounding the shaft, and means on the shaft and engaging said rear legs to swing the legs about their floor pivots with rotation of the shaft relative to the seat frame.

2,097,619
TOILET TANK LEVER MOUNTING

Leon Aaron Grimes, Rocky Mount, N. C.

Application January 4, 1937, Serial No. 119,046
2 Claims. (Cl. 4—67)

1. In combination, a vertical wall having a squared opening extending horizontally therethrough, a plate contacting a portion of the wall and having a square reduced extension on one face fitting in the opening, a second plate resting on the first plate, said plates having their contacting faces ribbed to prevent one plate slipping on the other and said plates having threaded openings therein, the opening in the first plate passing through the extension, an exteriorly threaded tube passing through said openings and also passing through the opening in the wall, a

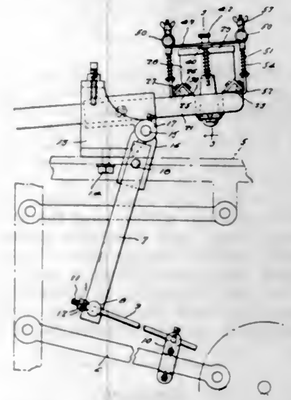


washer on the tube engaging that face of the wall which is opposite the face engaged by the first plate, a nut on the tube engaging the washer, an upwardly and outwardly extending arm on the second plate, a lever pivoted to the arm, a shaft passing through the tube with its ends projecting beyond the ends of the tube, a connection between the shaft and the lever for moving the lever by rocking movement of the shaft and a handle connected with the shaft.

2,097,620
METHOD AND APPARATUS FOR FIRING CERAMIC WARE

Earl J. Harris, Niagara Falls, N. Y., assignor, by mesne assignments, to The Carborundum Company, Niagara Falls, N. Y., a corporation of Delaware

Application February 15, 1935, Serial No. 6,708
6 Claims. (Cl. 25—132)



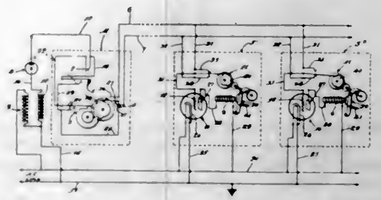
1. In an electrically heated furnace, a silicon carbide heating resistor and a gaseous jet for causing circulation of the gases within the furnace, the jet being so positioned as to tend to cause circulation in a direction opposite to that normally caused by convection.

2,097,621
INK FOUNTAIN

Harvey G. Harwood and Birney G. Albee, Oshkosh, Wis.

Application January 13, 1937, Serial No. 120,443
1 Claim. (Cl. 101—340)

In combination with a platen printing press, a rockable structure, connecting means between the rockable structure and a movable part of the press, a removable ink receptacle supported by the rockable structure for supplying ink to the usual form roller of the press, said ink receptacle consisting of a rectangular frame-like structure, a pair of channeled members disposed transversely on the rockable structure and adapted for supporting the receptacle, said frame-like structure being supported by the lower portion of the receptacle and defining the outlet for the re-

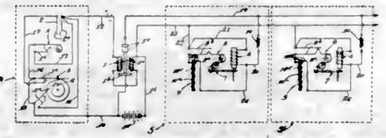


ceptacle, a roller mounted in the said frame-like structure, a closure for the top of the receptacle, a bridge piece disposed across the closure and having openings in the ends thereof, vertically disposed hook members extending through the openings in the bridge member, said hook members having their lower ends hookedly engaged with the said channeled members, and securing means at the upper ends of the hook members bearing against the end portions of the said bridge member.

2,097,622
TIME CONTROLLED SYSTEM

Edward B. Jackson, Downers Grove, Ill., assignor to Stromberg Electric Company, Chicago, Ill., a corporation of Delaware

Application September 15, 1934, Serial No. 744,240
8 Claims. (Cl. 58—24)

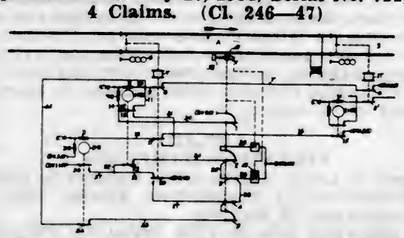


3. In a master apparatus for use in a corrective time controlled system, two control circuits extending to secondary apparatus, means for applying a control potential to one of said circuits at regular intervals at a relatively slow rate, means for intermittently applying said control potential to said circuit at a much greater rate during one of said first mentioned intervals, and means for thereafter exercising a like control over said second circuit for a like period of time.

2,097,623
SYNCHRONIZING SYSTEM

Edward B. Jackson, Downers Grove, Ill., assignor to Stromberg Electric Company, Chicago, Ill., a corporation of Delaware

Application October 11, 1934, Serial No. 747,851
14 Claims. (Cl. 58—24)

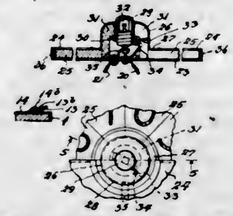


5. In a secondary apparatus for use in a corrective time controlled system, an impulse magnet for advancing said apparatus, an operating circuit therefor, means operative only in one particular position of said apparatus for completing a shunt circuit for said magnet, and means responsive only to the receipt of an impulse of abnormal duration for opening said shunt circuit.

2,097,624
AUTOMATIC TRAIN STOP SYSTEM FOR RAILROADS

Thomas Kittredge, Rutherford, N. J., and Herbert D. Brooks, Oceanside, N. Y., assignors to General Railway Signal Company, Rochester, N. Y.

Application February 17, 1934, Serial No. 711,700
4 Claims. (Cl. 246—47)



1. In an automatic stop system for railroads, in combination, an electrically controlled stop mechanism located a short distance beyond the entrance to a block having the usual track relay, a home relay and a distant relay, a clearing circuit for said stop mechanism including a front contact of the home relay and a back contact of the distant relay, and circuit means controlled by said track relay for picking up the distant relay and home relay in succession, and then dropping the distant relay to establish said clearing circuit.

2,097,625
ILLUMINATED SIGN AND PUSH BUTTON UNIT

Charles L. Langlotz, New York, N. Y.

Application April 9, 1936, Serial No. 73,575
12 Claims. (Cl. 40—130)

1. In a push button appliance of the class described, in combination, a base member, a push

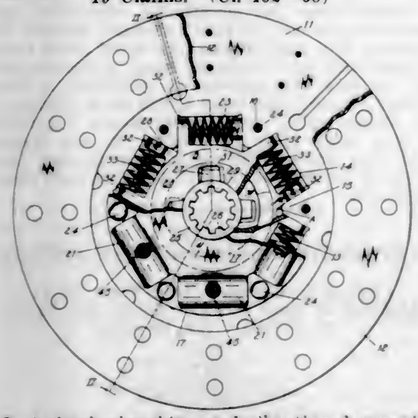
button movable thereon of translucent substance, a light having its rays directed through the said substance of said button, instrumentalities for supplying electric current to the said light, and a switch member through which the button passes, cooperating with said instrumentalities, and means for movably mounting the switch member on said base member so that the light may be put out or lighted at will.

2,097,626

BOOK LEAF SECURING MEANS

Geno Lesti, Cleveland, Ohio; Angelo Lesti and Nancy Lesti, guardians of said Geno Lesti, minor, assignors to National Blank Book Company, Holyoke, Mass., a corporation of Massachusetts

Application December 26, 1934, Serial No. 759,143
1 Claim. (Cl. 129—1)



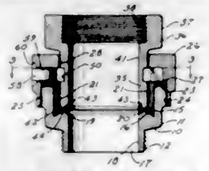
In a loose leaf binder of the character described provided with a cover including a back panel member; a book-like body within the cover which comprises toggle actuated loose leaf mechanism, a housing for said toggle mechanism, side and bottom wall members forming with the bottom of said toggle housing a tubular member, the bottom wall of said tubular member being secured to said back panel member and supporting and reenforcing the latter, closure walls for the ends of said tubular member to form with the latter a closed chamber, at least one of the said walls of the so formed chamber being movable to provide access to the chamber.

2,097,627

VIBRATION DAMPENER

Robert P. Lewis, Toledo, Ohio, assignor to Spicer Manufacturing Corporation, Toledo, Ohio, a corporation of Virginia

Application July 26, 1933, Serial No. 682,331
19 Claims. (Cl. 192—68)



3. A shock absorbing and vibration dampening mechanism comprising a force transmitting element; members mounted for movement relative to each other and to said element; lugs on said members, the lugs of each member being arranged to form complemental pairs with the lugs of an adjacent member; and springs mounted between said complemental pairs of lugs, said element being provided with recesses to receive said springs and associated lugs.

2,097,628

COUPLING

Frederick Charles Liebhardt, San Marino, Calif.

Application August 2, 1935, Serial No. 34,416
8 Claims. (Cl. 285—173)

1. In a coupling including a male member and a female member adapted to form when united a fluid passage through said coupling, locking and unlocking means comprising an annular groove in said male member, a pair of arcuate elements circumferentially disposed within said female member and adapted to contract into said groove when said male member is inserted in operative position within said female member, and a cylindrical cam rotatable about an axis substantially parallel to the axis of said coupling and adapted to cooperate with a pair of contiguous ends of said elements to spread apart said contiguous ends and expand said elements out of said groove to permit withdrawal of said male member.

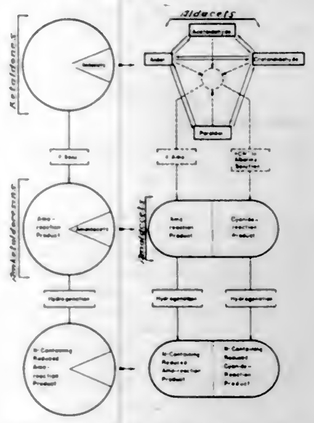
2,097,629

PUMP

George A. Lowrey, Pelly, Tex., assignor to Hall and Lowrey, Incorporated, Goose Creek, Tex., a corporation of Texas

Application March 24, 1934, Serial No. 717,251
1 Claim. (Cl. 103—225)

In a pump having a working barrel, a traveling valve mechanism in the barrel comprising an elongated tubular body having an approximately uniform liquid passageway therethrough, a sucker rod to which the body is attached and by which the body may be reciprocated, an upwardly opening valve in the upper end of the body controlling the flow of liquid upwardly through the body, guide means for controlling said valve comprising a plunger, the upper end of said plunger being reduced, in diameter, and the lower end of which is formed to fit over said valve, a channel across said lower end, a coil spring about said plunger, a cylinder in the upper end of the traveling valve in which the upper end of the plunger works, a stop on said plunger,



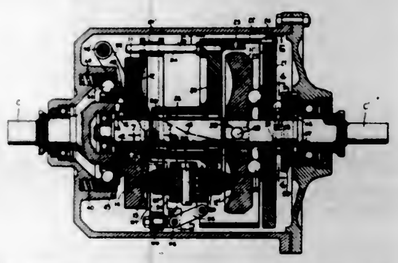
limiting the upward movement thereof a plurality of inlets at the lower end of said passageway forming a vane having spiralled walls and forming the only obstruction in the passageway.

2,097,630

PLATING OF CADMIUM

George Lutz, Rocky River, Ohio, assignor, by mesne assignments, to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware

Application October 17, 1935, Serial No. 45,426
17 Claims. (Cl. 204—1)



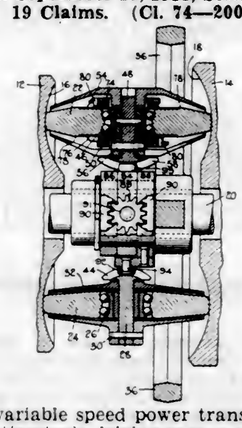
1. A cyanide-cadmium plating composition containing a hydrogenated amketaldoresin, the extent of hydrogenation being of the magnitude of the hydrogenation obtainable by the addition of zinc dust to the amketaldoresin in alkaline solution, an amketaldoresin being, as herein set forth, a pre-reacted compound prepared by reacting a ketaldone with an amo in alkaline solution.

2,097,631

POWER TRANSMISSION MECHANISM

Alain Madlé, New York, N. Y., assignor to Erban Operating Corporation, New York, N. Y., a corporation of New York

Application December 9, 1932, Serial No. 646,458
18 Claims. (Cl. 74—200)



1. A transmission comprising torque-transmitting members, races associated with said members so as to transmit torques passing through said members, a system of rollers in adhesive rolling contact with said races so as to transmit torques therebetween, and a mounting for said races whereby they are made automatically self-aligning about a common center.

2,097,632

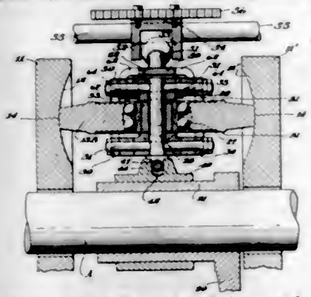
POWER TRANSMISSION MECHANISM

Alain Madlé, Bristol, Conn., assignor to Erban Operating Corporation, New York, N. Y., a corporation of New York

Application September 19, 1933, Serial No. 690,073
19 Claims. (Cl. 74—200)

1. In a variable speed power transmission system, a rotating toric driving race, a rotating toric driven race, rolling bodies in adhesive contact with said races and adapted to transmit power therebetween, two of said rolling bodies being each rotatable on a support mounted within a frame so as to be tiltable about an axis parallel to the line joining the points of contact between said races and rolling bodies and spaced outwardly from said line in relation to the rolling bodies, and each of said frames being mounted for tilting about an axis in the plane of the roller it carries and said axis being perpendicular to the first-mentioned axis, and whereby when said roller support tilts about its axis, said rollers are caused to shift their plane of rotation and by their motion along the race surfaces to tilt about said second axis, a pair of elements each mounted to pivot about the axis of said races and each in slidable engagement with the support of one of said rolling bodies, a member engaging the said elements associated with the respective rolling bodies and adapted to cause both to move in unison about said first-mentioned axis without destroying their freedom to move oppositely to each other; and said member being in slidable engagement with the supporting shaft of a master roller, whereby movements of the master roller shaft will be transmitted to said member and to said elements to cause said rolling bodies to move in unison without affecting their freedom to move oppositely about said first-mentioned axis.

2,097,633



TRANSMISSION MECHANISM

Alain Madlé, Bristol, Conn., assignor to Erban Operating Corporation, New York, N. Y., a corporation of New York

Original application November 3, 1933, Serial No. 696,455. Divided and this application March 13, 1936, Serial No. 68,684
11 Claims. (Cl. 74—200)

1. In a power transmission system having a pair of coaxial, toric races, one of which is the driving member, and the other the driven member, and a system of rolling bodies between said races and in adhesive contact therewith, whereby power is transmitted between said races; a mounting for each of said rollers comprising a

pivoted frame adapted to tilt about an axis perpendicular to the line passing through the contact points between the roller and the races and lying in the plane of rotation of the roller for varying the speed ratio of the transmission, and means for mounting said roller within said frame for rotation therein and for angling about an axis angularly related to the axis of tilting, a pair

of elements pivotally carried by each of said frames, said elements being positioned on opposite sides of the axis of rotation of the roller, each element comprising, at each side of its pivot point, a contact portion adapted to engage the roller, whereby said elements will be adapted, by contacting with the surface of the roller, to maintain the roller in a central position in relation to the frame.

2,097,634

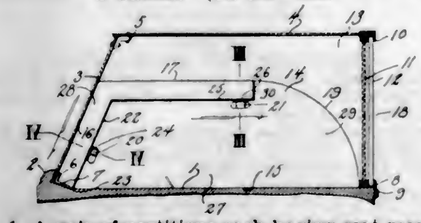
METHOD FOR THE PRODUCTION OF POROUS SILICA GEL

Jacques Malan and George Gordon Hannington Malan, Somerset West, Union of South Africa, assignors to Imperial Chemical Industries Limited, a corporation of Great Britain

No Drawing. Application March 11, 1935, Serial No. 10,586. In Great Britain March 28, 1934

13 Claims. (Cl. 23—182)

1. A process of preparing a silica gel which includes the steps of forming a silicic acid hydrogel having particles of precipitated sulphur uniformly dispersed therein, drying the said gel and heating the same to a temperature sufficient to remove the sulphur.



2,097,635

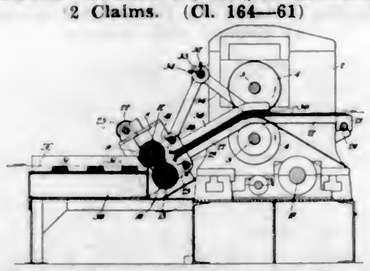
MULTIPLE COMPARTMENT MERCHANDISE DISPLAY

Louis H. Mayo, Toledo, Ohio, assignor to The Toledo Show Case Company, Toledo, Ohio, a corporation of Ohio

Application October 2, 1936, Serial No. 103,837

2 Claims. (Cl. 312—118)

1. A pair of partitions each having seat means inward from two of its diverging edges, and a spacer for the partitions having complementary projections below one portion and at the rear of the other portion of the spacer for registering with the seat means to locate the spacer inset from the partition edges and providing an upward and horizontal clearance with the spacer as a support between the partitions, abutting each partition throughout the common extent therewith.



2,097,636

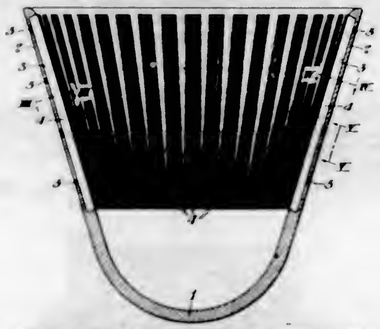
CUTTING DEVICE

Carl E. Moore, Gary, Ind., assignor to American Sheet and Tin Plate Company, a corporation of New Jersey

Application December 30, 1935, Serial No. 56,800

2 Claims. (Cl. 164—61)

1. Apparatus for cutting a moving sheet comprising sheet feeding means, at least one rotary shear, and a guide in advance of said shear, said guide being spaced from said shear and constructed and arranged to impart a longitudinally extending arc to said sheet at its point of contact with said shear, the radius of said arc being substantially that of the radius of the most adjacent cutting element of said rotary shear.



2,097,637

WALL SUBJECTED TO HIGH TEMPERATURES

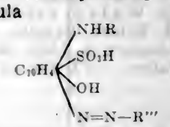
Alfred Osolin, Shaker Heights, Ohio

Application November 13, 1936, Serial No. 110,770

5 Claims. (Cl. 266—39)

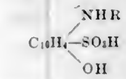
1. A wall subjected to high temperatures, that is characterized by including a plurality of relatively thin metal pieces arranged with their edges toward the high temperature and provided with mounting means permitting their individual movement to at least some degree.

2,097,638



AZO COMPOUNDS AND THEIR PRODUCTION

James P. Penny, Buffalo, N. Y., assignor to National Aniline & Chemical Company, Inc., New York, N. Y., a corporation of New York



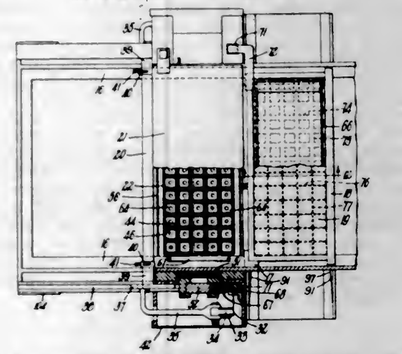
No Drawing. Application March 13, 1933, Serial No. 660,465

10 Claims. (Cl. 260—92)

1. A composition of matter comprising an azo coloring matter corresponding in the free state with the formula

in which R represents a radical of the group consisting of aryl and aralkyl radicals, and R''' represents a radical comprising the xylyl-group, the radicals R and R''' being free from an acid salt-forming group, which azo coloring matter is obtainable by coupling a diazo xylene compound free from an acid salt-forming group, in an alkaline medium, with an amino naphthol sulfonic acid corresponding in the free state with the formula

in which R represents a radical of the group consisting of aryl and aralkyl radicals, said radical being free from an acid salt-forming group.



2,097,639

MACHINE FOR CUTTING COMB HONEY

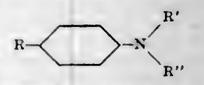
Arnold Perreton, Durham, N. H.

Application December 30, 1935, Serial No. 56,647

20 Claims. (Cl. 107—21)

1. A machine for cutting comb honey comprising, in combination, a frame, means to feed a piece of comb honey into cutting position upon said frame, a heating medium, a knife exposed to said heating medium, means to raise said knife to cut said comb honey, and means to engage the comb honey between incisions therein while the knife is being withdrawn downwardly therefrom and thereby prevent movement of the comb honey in unison with the knife.

2,097,640



QUATERNARY AMMONIUM COMPOUNDS

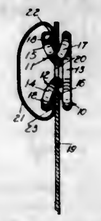
Henry Alfred Piggott, Blackley, Manchester, England, assignor to Imperial Chemical Industries Limited, a corporation of Great Britain

No Drawing. Application March 23, 1934, Serial No. 717,113. In Great Britain March 27, 1933

18 Claims. (Cl. 260—99.12)

1. A process for producing complex nitrogen-containing compounds which comprises reacting a compound having the following general formula:

wherein R represents a straight chain aliphatic hydrocarbon radical of from 10 to 18 carbon atoms which is connected to the phenylene nucleus by means of a grouping selected from the class consisting of ether, amino and ketone groupings, R' represents a lower alkyl group, and R'' represents a member of the class consisting of hydrogen and lower alkyls, with an inorganic ester containing a group selected from the class consisting of alkyl and aralkyl groups having not more than 7 carbon atoms.



2,097,641

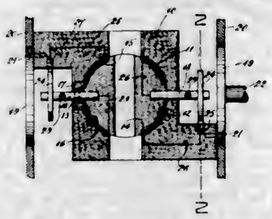
SPRING FASTENER

Bion C. Place, Detroit, Mich., assignor of one-half to George E. Gagnier, Detroit, Mich.

Application April 8, 1933, Serial No. 665,201

9 Claims. (Cl. 85—5)

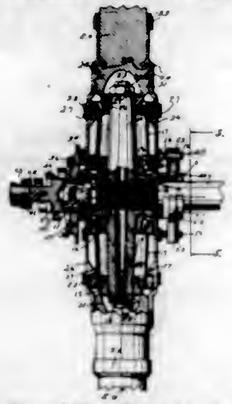
7. A spring fastener complete in itself and of the turn-engagement type for securing superposed members consisting of a flat head formed from the mid-portion of a strip of spring metal and a pair of holding elements projecting away from said head and formed from the ends of said strip, each of said holding elements including a resilient portion providing shoulders approximately parallel to the plane of the head, each of said portions being slightly inclined with respect to said plane from one lateral edge of each portion toward the opposite lateral edge whereby upon rotation of said fastener relative to said members with said members between said head and shoulders the members will be progressively wedged into firm contact with each other.



2,097,642

ELECTRICAL CONNECTER

John P. Putnam, Boston, Mass., assignor to The Reece Button-Hole Machine Company, Boston, Mass., a corporation of Maine

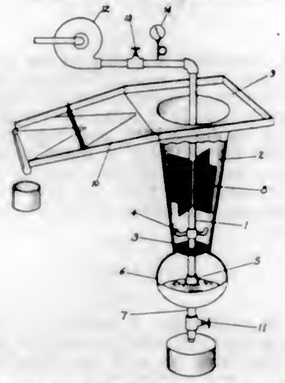


Application February 12, 1936, Serial No. 63,526

3 Claims. (Cl. 173—81)

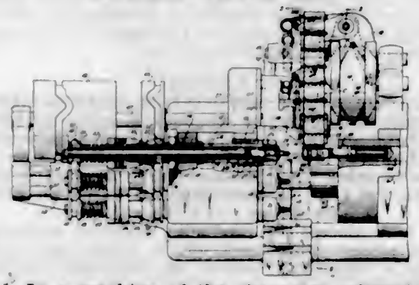
1. As an article of manufacture, a means for electrically connecting two relatively-movable current-carrying members consisting of a flat spiral of conducting material having two sets of oppositely-directed serially-connected convolutions, one set surrounding the other and one terminal of said spiral being the inner end of the inner set of convolutions and the other terminal being the outer end of the outer set of convolutions.

2,097,643
ADJUSTABLE PITCH PROPELLER
Frank Raggio, San Francisco, Calif.
Application April 21, 1931, Serial No. 531,696
Renewed April 22, 1935
9 Claims. (Cl. 170—162)



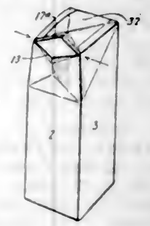
1. A propeller of the character described comprising a hub, radial spindles extended from the hub, a socket on each spindle extended beyond the outer end of the latter, means rotatably secured on each spindle on which the socket is journaled so as to be held against displacement radially to the hub; a propeller blade in each socket abutting the end of the spindle, each socket being split and having internal engaging elements formed therein, the inner end of each blade being formed to complement and engage said elements, means to fixedly clamp the sockets over said rotatable means and over the ends of the respective blades; means on the hub common to all the sockets to convey the turning movement of one socket to the other, but in an opposite direction.

2,097,644
DIE
Harvey W. Riddle, Worcester, Mass., assignor to The American Steel and Wire Company of New Jersey, a corporation of New Jersey
Application November 18, 1935, Serial No. 50,462
1 Claim. (Cl. 117—50)



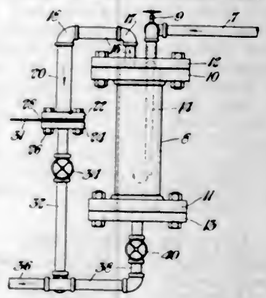
A rotary die for metal cable or rope stranding machine, said die having a bore constructed and arranged to provide a forming chamber at the entering end and the remainder of said bore comprising a twisting and compacting chamber or zone, said bore being provided with a plurality of grooves in the walls thereof, said grooves equaling in number the outer strands of the cable or rope to be formed and having a spiral contour conforming to the spiral lay of the finished rope or cable to be formed by said die, said grooves and said bore flaring outwardly to provide said forming chamber, said forming chamber being adapted to receive the individual strands going to make up the cable or rope and guide them into said twisting and compacting chamber and said twisting and compacting chamber having a maximum diameter of not more than the finished cable, said die being adapted to be rotated to twist said strands around a core.

2,097,645
SEA WATER FILTER
John H. Ritter, Seattle, Wash.
Application January 4, 1935, Serial No. 373
3 Claims. (Cl. 209—183)



1. In apparatus for recovering mineral values from water which contains such mineral values, a mercury receptacle; mercury in said receptacle; an upright tubular water overflow column connected with said mercury receptacle; a water feed pipe extending into said mercury receptacle; means supplying water which contains mineral values under pressure to said water feed pipe; a water spray nozzle on said water feed pipe positioned to deliver a spray of water which contains mineral values into the mercury in said mercury receptacle; nozzle jet means connected with said feed pipe and positioned to jet water into said tubular column in a generally tangential direction imparting a spiralling motion to the water flowing upwardly through said tubular column; and relatively fixed vertical screens provided in said tubular column above said nozzle jet means in the path of the spirally moving water, whereby floured mercury in said water will be collected by said screens as the water passes repeatedly through the screens.

2,097,646
METALWORKING MACHINE
Harry W. Rupple, Shaker Heights, Ohio, assignor to The Cleveland Automatic Machine Company, Cleveland, Ohio, a corporation of Ohio
Application November 2, 1934, Serial No. 751,213
13 Claims. (Cl. 29—38)

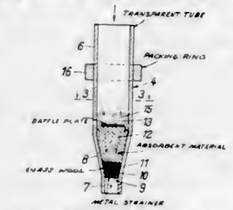


1. In a machine of the character referred to the combination of a rotatable spindle, an arbor on said spindle adapted to support a work blank, an endless conveyor supported adjacent the spindle adapted to support a plurality of work blanks, means for periodically moving said conveyor to present a work blank in axial alignment with said arbor, a member slidably supported in axial alignment with the spindle, means for reciprocating said member in predetermined timed relation to the movement of said conveyor whereby a work blank is transferred from said conveyor to said arbor, and means for ejecting work blanks from said arbor.

2,097,647
CLOSURE FOR PAPER CONTAINERS
Audrey K. Scott, Toledo, Ohio
Application September 21, 1936, Serial No. 101,689
7 Claims. (Cl. 229—17)

1. A closed container for fluid substances having at its top portion opposed inwardly compressible side parts and also having intermediate top and side parts normally in container-closing position and outwardly movable by an inward compressing of said opposed parts to open the container and form a pouring spout.

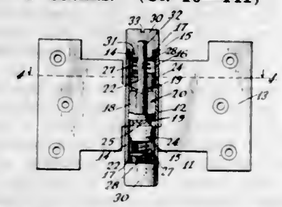
2,097,648
CONTINUOUS BLOW-OFF FOR STEAM BOILERS
Harry Frederick Shaw, Clairton, Pa.
Application July 30, 1936, Serial No. 93,475
2 Claims. (Cl. 122—382)



1. Blow-off means for steam boilers comprising a chamber, means adapted to feed a continuous stream of water to said chamber from a point near the bottom of a mud drum which is connected to a boiler, means adapted to introduce said water stream into said chamber near its bottom, overflow means in the top of said chamber whereby water flows from said chamber when it is full, discharge means for said overflow water, readily removable means connecting said overflow means and said discharge means and a plate having a circular portion provided with an orifice therethrough adapted to fit between said removable means and align said orifice with said overflow and said discharge means, said plate being provided with a handle portion for facilitating the proper positioning of said orifice.

2,097,649
METHOD OF AND MATERIAL FOR TREATING BOILER WATER
Thorvald A. Solberg, United States Navy
No Drawing. Application December 31, 1935, Serial No. 56,999
12 Claims. (Cl. 87—27)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. A method of treating boiler water which comprises maintaining in said water, by the addition of starch alone, a starch in a proportion substantially not less than seven ounces of starch for each pound of calcium in said water.



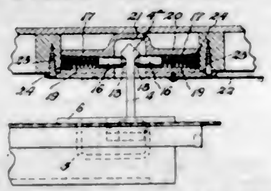
11. A composition for treating boiler water consisting of substantially 75 per cent trisodium phosphate, 20 per cent soda ash, and 5 per cent starch.

2,097,650
DEVICE FOR DETECTING THE PRESENCE OF FOREIGN GASES OR SUSPENSIONS IN AIR OR GASEOUS MEDIUM
Gerhard Karl Emil Heinrich Stampe, Lubeck, Germany, assignor to Otto Heinrich Drager, Lubeck, Germany
Application July 8, 1935, Serial No. 30,372
In Germany July 14, 1934
6 Claims. (Cl. 23—254)

6. A device for use in detecting gas comprising a tubular container capable of having gas flow therethrough, at least one transparent section in said container, a layer of material for adsorbing the gas to be detected disposed within said container adjacent to said transparent section, baffle means so placed as to force the flow of a gaseous medium containing the gas to be detected toward and through a portion at the periphery of the adsorbing layer adjoining and visible through said transparent section.

2,097,651
RATCHET HINGE
Peder O. Stangeland, Los Angeles, Calif., assignor of one-half to Myer C. Cohen, Los Angeles, Calif.
Refiled for abandoned application Serial No. 243,058, December 28, 1927. This application December 7, 1936, Serial No. 114,658
5 Claims. (Cl. 16—141)

1. A hinge comprising in combination a first leaf having a first hub with a ratchet fixed therein, a second leaf having a second hub adjacent thereto with a ratchet slidable but non-rotatably

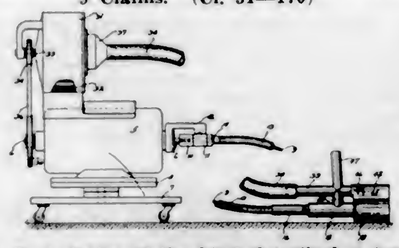


mounted therein, a spring bearing on the slidable ratchet, a washer bearing on the spring, a pintle extending through said ratchets, spring and washer, a nut threadedly secured to a hub of one of the leaves, said nut having a socket, the end of the said pintle fitting in said socket.

2,097,652
BALL AND CUP GAME
Willy Vater, Leipzig, Germany
Application December 10, 1936, Serial No. 115,062
In Germany December 27, 1935
4 Claims. (Cl. 273—96)

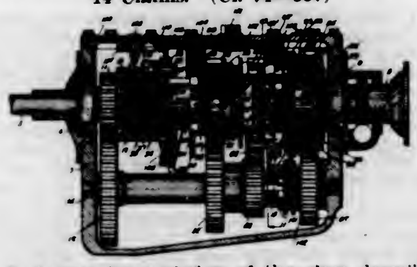
1. A ball cup for ball and cup games in which a ball is thrown from a cup, said cup being open at its upper and lower ends, and being provided with a U-shaped handle of spring material within the cup and extending downwardly therefrom, one leg of said handle being secured at its upper end to said cup and the other leg having its upper end free within the cup, both of said legs being shaped at a point adjacent the lower end of said cup to define a ball clamp, said handle being arranged to be squeezed in the hand of a user to release a ball as the ball is being thrown from the cup.

2,097,653
DOOR HOLDER
Roy E. Williams, Edgerton, Wis., assignor to Highway Trailer Company, Edgerton, Wis., a corporation
Application June 19, 1936, Serial No. 86,183
1 Claim. (Cl. 292—16)



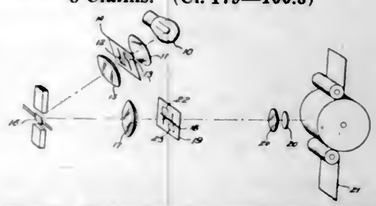
In a door holder of the class described, in combination, a latch casing adapted to be set into a door so that its outer portion is flush with the outer surface of the door, a latch member pivotally mounted in said casing and movable to a position in which it lies substantially within the casing and flush with the outer portion thereof, and also movable into position at right angles to that above mentioned, in which it projects from the casing and is operative as a holding member under such conditions, said latch casing being provided with a hand hole, the space of which extends to a point adjacent the inner side of the latch member, so that the fingers of the hand may be introduced into said hole to force the latch member outwardly to its operative projecting position, said latch member having an enlarged head, and catch means adapted to be secured to a support for cooperation with said latch member.

2,097,654
POLISHING ARTICLE
Charles E. Wooddell, Niagara Falls, N. Y., assignor, by mesne assignments, to The Carborundum Company, Niagara Falls, N. Y., a corporation of Delaware
No Drawing. Application March 19, 1934, Serial No. 716,327. In Germany November 2, 1932
6 Claims. (Cl. 51—280)



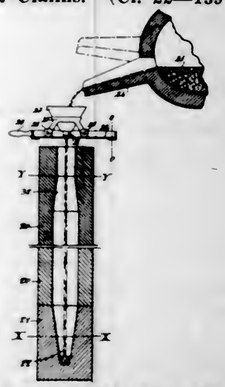
1. A method of making a polishing article which comprises forming a dry mix consisting essentially of an intimate mixture of finely divided polishing powder and a finely powdered normally solid fusible resin and compacting the mixture under pressure and without application of heat throughout the mixture, reducing the pressure on the compacted mixture to not more than that required to maintain the desired shape, heating the mixture under the reduced pressure to soften the resin particles to cause them to adhere to the adjacent particles of powder and to agglomerate and harden the mixture.

2,097,655
SURFACE GRINDER
Artudo De Marchi and David A. Sandin, St. Paul, Minn.
Application January 16, 1937, Serial No. 120,922
9 Claims. (Cl. 51—170)



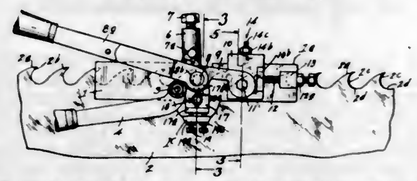
1. In a device of the kind described, a truck, a motor mounted on said truck for horizontal swivelling movements, an extended flexible transmission shaft driven from said motor, a grinding wheel connected to and driven from the extended end of said flexible shaft, a suction fan mounted on said motor for oscillatory movements therewith, means driving the rotor of said fan from the rotor of said motor, a suction tube associated with the extended end of said transmission shaft and connected to the intake of said fan, by a flexible air tube, and a nozzle head swivelled to the end of said suction tube and closely associated with said grinding wheel.

2,097,656
AUTO TRANSMISSION
Ernesto Diaz Diaz, Habana, Cuba
Application February 27, 1935, Serial No. 8,461
14 Claims. (Cl. 74—337)



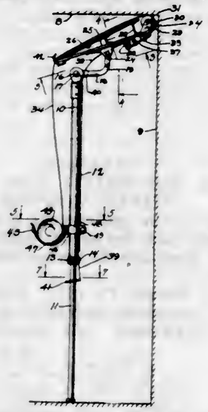
1. A gear transmission of the class described comprising a power shaft, a driven shaft, a plurality of gears loosely mounted on said driven shaft, a supplemental shaft having connection with said power shaft, a plurality of gears fixedly mounted on said supplemental shaft in constant mesh with said gears on the driven shaft, a drive wheel splined on said driven shaft, a claw clutch normally connecting one of said gears on the driven shaft with said drive wheel and means for connecting said other gears on the driven shaft with said drive wheel including over-running clutches operable upon variation in the speed between said power and driven shaft.

2,097,657
PHOTOGRAPHIC RECORDING OF SOUND
Glenn L. Dimmick, Audubon, N. J., assignor to Radio Corporation of America, a corporation of Delaware
Application July 23, 1935, Serial No. 32,734
8 Claims. (Cl. 179—100.3)



1. In an apparatus for producing a photographic sound record having relatively small exposed areas, the combination of means forming a light slit, means for producing at said slit a light image triangularly-shaped and extended at its vertex to ensure continuous illumination of said slit, and means for vibrating said image transversely of said slit in accordance with the sound to be recorded.

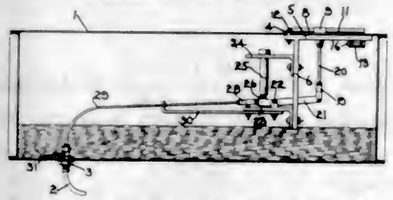
2,097,658
APPARATUS TO BE USED IN CASTING METAL
William F. Eppensteiner, Rahway, N. J., assignor to The American Metal Company, Limited, New York, N. Y., a corporation of New York
Application September 22, 1934, Serial No. 745,062
2 Claims. (Cl. 22—139)



1. An open top, vertical mold, of a form adapted for use in the casting of copper wire bars, comprising copper castings united to form a matrix several diameters in length, with inwardly flaring upper and lower portions, the mold comprising sections separable along a dividing plane disposed transversely with respect to its longitudinal axis and lying between the parts thereof which enclose the inwardly flaring portions of the matrix, the portions of the matrix of reduced cross-sectional dimensions being of lengths greater than the desired lengths of the tapered end portions of the wire bar to be cast, whereby the part cast in the upper end of the mold and the part cast in the bottom of the reduced portion of the matrix in which the initial pool of metal is formed at the commencement of the pouring of a casting, may be cropped off and leave a bar having tapered portions at its opposite ends.

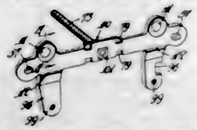
2,097,659
SAW SWAGE
Arthur M. Ferrari and George M. Hoffman, Algoma, Oreg.
Application January 15, 1936, Serial No. 59,268
8 Claims. (Cl. 76—54)

1. In a saw swage provided with a head, a die mounted for rotatable movement therein and an anvil arranged in operative relation therewith, a handle for rotating said die and means for securing said head to a saw blade, said die having a swaging portion arranged eccentrically to the axis of rotation of said die and devices for moving said die while rotating in said head along a curved path non-coincident with the path described by the swaging portion of the die.



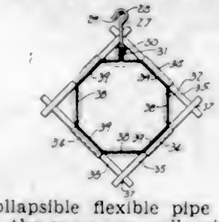
2,097,660
PAPERHANGING MACHINE
Arthur E. Gordon, West Portal, Colo.
Application May 17, 1937, Serial No. 142,996
9 Claims. (Cl. 216—7)

1. In a paper hanging machine, in combination, a handle, a table supported thereon for pivotal movement about an axis substantially perpendicular to the handle, spring means for normally holding the table in a predetermined rotary position relative to the pivot while permitting rotation about the pivot in either direction, means at one end of the table for guiding the paper, means



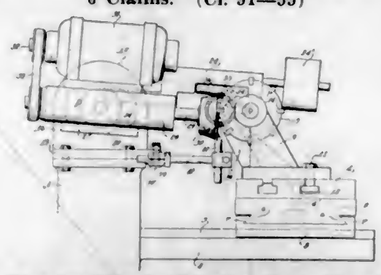
at the other end of the table for releasably securing the end of a strip of paper thereto, means at the last mentioned end for pressing the paper against a surface and means for releasing the strip securing means.

2,097,661
GASOLINE TANK LOCK
David F. Hammond, Grand Rapids, Mich.
Application May 25, 1936, Serial No. 81,660
5 Claims. (Cl. 137—21)



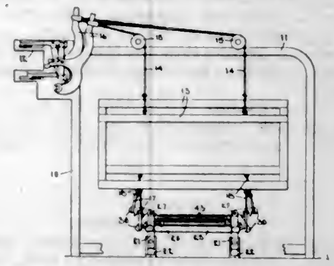
1. In combination with a gasoline supply tank having a gasoline outlet at its bottom and a filler opening at its top, a mounting plate secured on the inside of the tank adjacent the said filler opening therein, a depending portion extending from one side of the mounting plate, a bracket mounted at the lower end of the said depending portion and extending laterally therefrom, a supporting bar mounted upon the said laterally extending bracket and likewise extending laterally toward the said gasoline outlet, means at the end of the said supporting bar to form a journal, a relatively long rod having valve means thereon immediately above the said outlet, said rod extending through the said journal to a position above the said bracket, pivot means mounted upon the said bracket, an operating bar mounted upon said pivot means, means connecting the adjacent ends of the operating bar and the relatively long valve operating rod, a vertical positioned rod extending through the said mounting plate, means pivotally connecting the lower end of the vertical rod onto the free end of the operating bar, spring means to move the several associated elements so that the outlet valve is normally open, and means located exteriorly of said gasoline supply tank adjacent the said inlet opening and movable to a position against the upper end of the vertically movable operating rod whereby the same may be moved downwardly against the action of said spring means to cause closing of the said valve means.

2,097,662
UNIVERSAL MOUNTING FOR WINDSHIELD WIPER MOTORS
Earle V. Hennecke and David Kuskin, Flushing, N. Y., assignors, by direct and mesne assignments, to Franklin J. Foster, New York, N. Y., as trustee
Application August 23, 1933, Serial No. 686,394
Renewed March 29, 1937
5 Claims. (Cl. 15—255)



2. The combination with a windshield wiper motor having a pair of spaced internally threaded members adapted to receive mounting parts, of adaptor means for securing said motor upon a car adjacent the windshield thereof, said adaptor means including a bar, means engageable with the threaded members and bar for holding the bar and motor together, means associated with the bar for anchorage on or adjacent the windshield frame, the intermediate part of said bar having portions punched out to afford notches in one face of the bar and projections on another face of the bar to a correspondingly notched spacer plate adapted for nesting with the notches or projections of the bar and space the motor at the desired distance from the windshield.

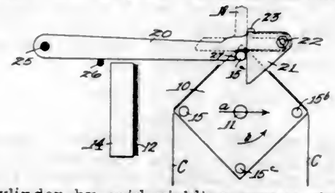
2,097,663
NONCOLLAPSING FLEXIBLE PIPE
Henry J. Hersey, Jr., Seattle, Wash., and Daniel B. Mikesell, Warsaw, Ind.
Application June 25, 1936, Serial No. 87,246
7 Claims. (Cl. 138—54)



1. A collapsible flexible pipe and means for rendering the same non-collapsing, including in combination, a pipe made of flexible material, a plurality of rigid frames spaced apart from one another along the length of the pipe, each frame consisting of a plurality of rigid members encircling the girth of the flexible pipe, and a group of girth loops for each frame suitably attached to the pipe, each of the said loops being relatively short and adapted to slip over the respective rigid members of the corresponding frame independently of one another while the pipe is inflated, for the purpose of preventing the collapsing of the flexible pipe when deflated.

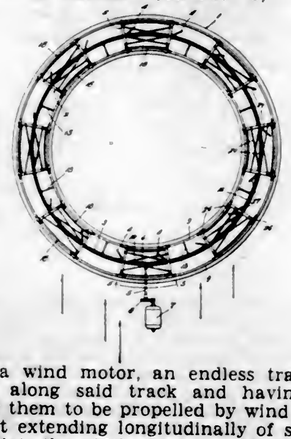
2,097,664
GRINDING MACHINE FOR REAMERS AND LIKE TOOLS
Albert C. Hoeh, Royal Oak, Mich.
Application October 26, 1931, Serial No. 571,080
6 Claims. (Cl. 51—55)

1. In a machine for grinding the cutting faces of cutting tools of the reamer type, wherein the cutting face is formed with a cutting edge and its clearance face, a driven grinding wheel of the cup-shaped type and mounted to cause its grinding face to be operative on a plane extending normal to the wheel axis, a work support adapted to present the work to the grinding face with the length dimension of the face to be ground extending substantially in correspondence with or parallel to a diameter of the wheel grinding face, with the support movable in the direction of length of the work face, and means for supporting the grinding wheel to swing about an axis extending parallel to and positioned remote from said grinding face diameter to permit swinging of the grinding face in a direction normal to such diameter, whereby the grinding face will traverse the work face transversely of the length of such work face to concurrently grind a zone of the contour and its clearance face with the clearance face complemental to the edge contour, the clearance angle of the zone being dependent upon the position of the wheel within its range of swinging movement, said wheel supporting means including control mechanism operative to cause controlled swinging movement of the wheel within the range of its swinging movement, whereby the edge contour and the clearance angle will be varied relative to the tool axis in the direction of length of the face with the variation in the direction of the tool radius.



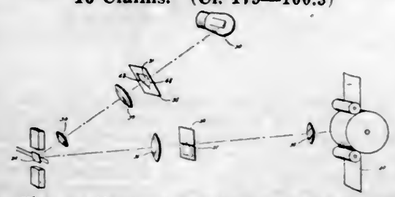
2,097,665
SPRING STAND FOR DOBBY LOOMS
Elbridge R. Holmes, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a corporation of Massachusetts
Application June 2, 1936, Serial No. 83,089
3 Claims. (Cl. 139—89)

1. In a loom having a harness frame, a connector depending therefrom, a pivotal support, a lever on the pivotal support normally extending downwardly therefrom, a link having two spaced sections lying on opposite sides of the lever and connected to the latter at a point below the pivotal support, a hook pivoted to the link and lying between the sections and extending substantially horizontally, and a spring disposed horizontally and attached to the hook, the link to be held substantially horizontal by the spring as the lever swings upwardly about the pivotal support and the sections arranged to engage parts of the lever removed from said point and thereafter swinging about the pivotal support with the lever but without angular motion relatively to the lever, thereby stretching the spring, the hook moving pivotally with respect to the link and maintaining normal position relatively to the spring, the sections aligning the lever and hook and engaging the lever at points spaced in the direction of the axis of the lever.



2,097,666
JACQUARD FEEDING MECHANISM
Elbridge R. Holmes, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a corporation of Massachusetts
Application December 21, 1936, Serial No. 116,973
5 Claims. (Cl. 139—329)

1. In a Jacquard mechanism, a pattern card cylinder, yielding means to hold said cylinder in operative position, means to give said cylinder periodical angular advance movements, said latter means having an associated device effective to prevent free angular advance movement of



said cylinder by said yielding means during a major part of each advance movement.

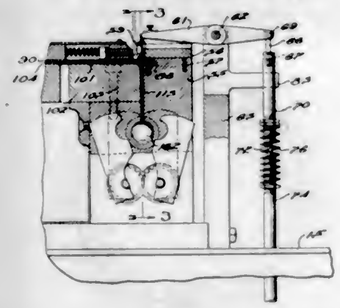
2,097,667
WIND MOTOR
Claude R. Johnson, Hugoton, Kans.
Application December 14, 1936, Serial No. 115,865
5 Claims. (Cl. 170—6)

1. In a wind motor, an endless track, units movable along said track and having means adapting them to be propelled by wind pressure, a support extending longitudinally of said track intermediate the width thereof and having a portion formed with a cut-out, a sprocket chain slidable along said support and connected with said unit and moving with the unit, and a shaft for transmitting rotary motion to a generator rotatably mounted and extending transversely of the track under said support, and a sprocket wheel carried by said shaft with a portion extending through the cut-out and engaging the sprocket chain and adapted to cause rotary motion to be transmitted to the shaft from the sprocket chain when the units and the sprocket chain are in motion.

2,097,668
PHOTOGRAPHIC RECORDING OF SOUND
Edward W. Kellogg, Moorestown, N. J., assignor to Radio Corporation of America, a corporation of Delaware
Application September 14, 1935, Serial No. 40,557
16 Claims. (Cl. 179—100.3)

1. The method of producing variable width photographic sound records having portions

wherein the unexposed area is relatively narrow, which includes conforming a light beam to a shape adapted to prevent fogging of said narrow areas, modulating said beam in accordance with the sound to be recorded, and applying said modulated beam to said record.



2,097,669

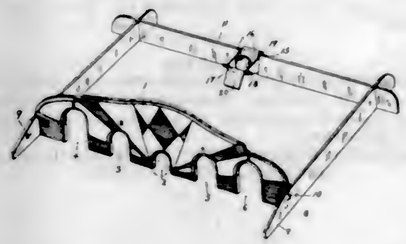
ROLLER BEARING ASSEMBLING MACHINE

Frank Ketcham, Dearborn, and George E. Dunn, Detroit, Mich., assignors to Universal Products Co., Inc., a corporation of Delaware

Original application March 30, 1933, Serial No. 663,444. Divided and this application September 30, 1935, Serial No. 42,766

14 Claims. (Cl. 198—218)

1. In a roller bearing assembling machine, means for supplying rollers, a duct communicating with said means for receiving rollers discharged therefrom, the duct having a longitudinally extending slot therethrough, a pair of pusher fingers extending into the slot for ejecting rollers from the duct, independent arms for actuating the pusher fingers, a link pivotally connecting the arms, and an actuating rod connecting the link intermediate the point of connection of the arms.



2,097,670

MARBLE GAME

Frederick H. King, Detroit, Mich.

Application January 12, 1935, Serial No. 1,453

8 Claims. (Cl. 273—127)

5. A marble target comprising a marble receiver pivoted for upward actuation to dislodge a marble therefrom, an arm downwardly projecting from such receiver for effecting marble-releasing actuation of the receiver, and a member pivotally mounting the receiver and comprising portions laterally adjacent to the receiver to assist in normally retaining a marble thereupon.

2,097,671

METHOD OF MAKING A POROUS BEARING MATERIAL

Roland P. Koehring, Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a corporation of Delaware

No Drawing. Application December 23, 1933, Serial No. 703,835

5 Claims. (Cl. 75—22)

1. The method of making a rigid porous bearing structure from metal powders, comprising: intimately mixing zinc stearate powder with the metal powders to form a substantially homogeneous mix, compressing the mix into a briquette in a mold under pressure, removing the compressing pressure and then subjecting the formed briquette to a temperature which will decompose and substantially drive off the zinc stearate in gaseous form leaving voids in the briquette, and then continuing the heating for a time and at a temperature which will cause the metal particles to sinter together and form a rigid porous structure.

2,097,672

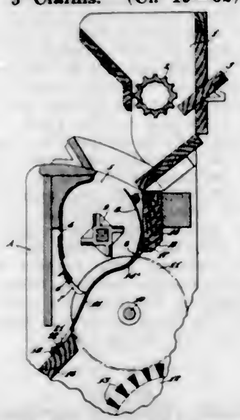
ANTHRAQUINONE DERIVATIVES

Frank Lodge, Blackley, Manchester, England, assignor to Imperial Chemical Industries Limited, a corporation of Great Britain

No Drawing. Application September 4, 1934, Serial No. 742,581. In Great Britain September 6, 1933

4 Claims. (Cl. 260—60)

1. As a new composition of matter a 1-alkylamino-4-arylamino-2-anthraquinonesulfonic acid.



2,097,673

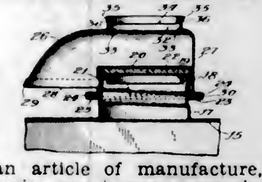
TEXTILE MACHINE

Robert W. McLean, Bridgewater, Mass., assignor to Carver Cotton Gin Company, East Bridgewater, Mass., a corporation of Massachusetts

Application December 31, 1935, Serial No. 56,845

5 Claims. (Cl. 19—62)

5. A grate-fall comprising a unitary structure including parallel top and bottom rail members, a plurality of spaced, parallel independent bars, the upper and lower ends of each bar abutting the top and bottom rail members, respectively, each bar being locally hardened adjacent to the ginning point and having a recess in its upper face adjacent to the ginning point, welding metal permanently and rigidly uniting each bar at its upper and lower ends, respectively, to the respective rail members, and a guard plate overlapping the junction of the bars with the upper rail and having its lower edge seated in the recesses of the several bars, said lower edge of the guard plate extending uninterruptedly from one bar to the next closely adjacent to the ginning point.



2,097,674

COMBINED CAP AND SPOUT FOR LIQUID DISPENSING CONTAINERS

Olof G. Nilson, Chicago, Ill.

Application May 27, 1936, Serial No. 82,099

20 Claims. (Cl. 221—23)

1. As an article of manufacture, a closure cap, a pouring spout, means securing them together against separation for relative rotation, and means for selectively securing them to the discharge nozzle of a dispensing container.

2,097,675

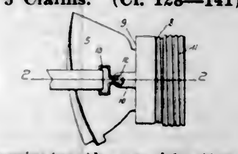
COLORING ACETATE ARTIFICIAL SILK

Cecil Shaw, Grangemouth, Scotland, assignor to Imperial Chemical Industries Limited, a corporation of Great Britain

No Drawing. Application October 28, 1936, Serial No. 108,100. In Great Britain October 30, 1935

4 Claims. (Cl. 8—5)

1. The process for coloring materials comprising cellulose acetate which comprises applying thereto an aqueous dispersion of a Bz-1-alkoxybenzanthrone in which the alkoxy group contains from 2 to 5 carbon atoms.



2,097,676

HEAD BAND ATTACHMENT FOR RESPIRATORS

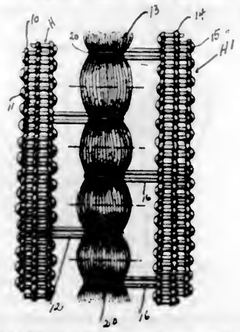
Harry F. Shindel, Reading, and Allen D. Brandt, Wyomissing, Pa., assignors to Willson Products, Inc., Reading, Pa., a corporation of Pennsylvania

Application June 4, 1935, Serial No. 24,834

5 Claims. (Cl. 128—141)

1. In a respirator the combination with a face mask of flexible material having an air inlet provided with a surrounding flange, of a flanged mask extension and head-band attaching means jointly secured to the mask by clamping engagement of the flanges.

2,097,677



METHOD OF MAKING ORNAMENTAL MATERIAL

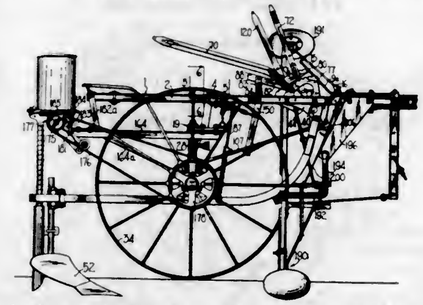
Max Sokoloff, Brooklyn, N. Y., assignor to Hy-Art Novelty Co. Inc., New York, N. Y., a corporation of New York

Application July 12, 1937, Serial No. 153,169

9 Claims. (Cl. 66—170)

1. In a method of making ball fringe or the like, those steps which consist in forming a header strip, connecting a warp rope to said header strip at spaced intervals during said formation

and cutting said warp rope intermediate said connections whereby sections of said warp rope will be suspended from said header strip.



2,097,678

CULTIVATOR AND PLANTER

Carl G. Strandlund, Moline, Ill., assignor to Deere & Company, Moline, Ill., a corporation of Illinois

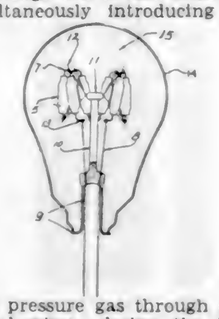
Application November 3, 1933, Serial No. 696,481

23 Claims. (Cl. 111—60)

1. An agricultural implement comprising, in combination, a main frame, supporting means therefor, a tool beam movably connected with the main frame, means for raising and lowering said beam, seed selecting mechanism pivotally connected with said frame separately from said beam and extending to a point in the path of movement of the latter, and means interconnecting the seed selecting mechanism with the tool beam for raising the seed selecting mechanism out of the way of the tool beam when the latter is raised.

2,097,679

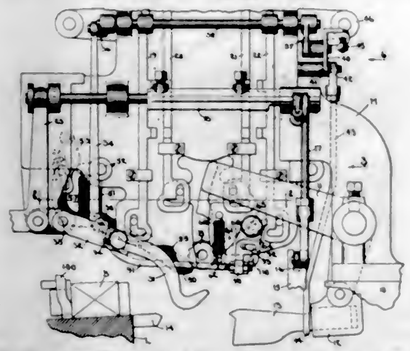
ELECTRIC INCANDESCENT HIGH PRESSURE GAS LAMP



Harold Swanson, Cleveland, Ohio

Application September 18, 1934, Serial No. 744,598

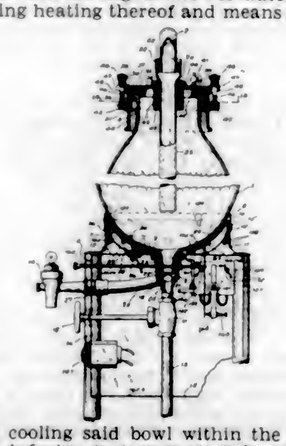
6 Claims. (Cl. 176—16)



6. In an electric incandescent filament lamp, the method of making a high pressure gas filled lamp, comprising, making a thick wall pressure restraint glass bulb, making electric leads of two hollow metal wires having fluid pressure openings, making an electric incandescent lamp filament, securing said filament to said hollow metal wires, hermetically sealing said hollow metal wires through the wall of said bulb with

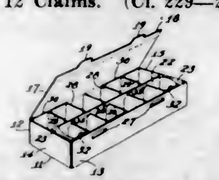
said openings and said filament within said bulb, exhausting the air from the interior of said bulb through one of said hollow metal wires while simultaneously introducing a predeter-

mined high pressure gas through other of said hollow metal wires, closing the hollow metal wires near the external ends air tight to retain said high pressure gas within said bulb.



2,097,680
BOBBIN RELEASE FOR WEFT REPLENISHING LOOMS
Walter H. Wakefield, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a corporation of Massachusetts
Application June 1, 1936, Serial No. 82,830
12 Claims. (Cl. 139—232)

1. In a weft replenishing loom, a lay movable back and forth therein, rear bobbin supports having downwardly and forwardly inclined surfaces to assist in supporting a bobbin in transfer position over the lay when the latter is forward, front yieldable supports for the bobbin in transfer position, and means movable by a force derived from the lay to move the front supports forwardly to release an untransferred bobbin, the latter thereupon rolling downwardly and forwardly along the rear supports along a path extending forwardly with respect to the lay.

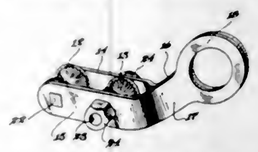


2,097,681
COFFEE MAKER
Frank E. Wolcott, West Hartford, Conn., assignor, by mesne assignments, to The Silex Company, a corporation of Connecticut (1936)
Application October 7, 1931, Serial No. 567,453
Renewed April 13, 1936
84 Claims. (Cl. 219—43)

6. The combination with a vacuum type coffee maker having operatively inter-connected water and coffee bowls, of heating means for said water bowl for effecting transfer of liquid therein for infusion in said coffee bowl, infusion controlling mechanism controlling the temperature of said water bowl and having means for automatically interrupting heating thereof and means for auto-

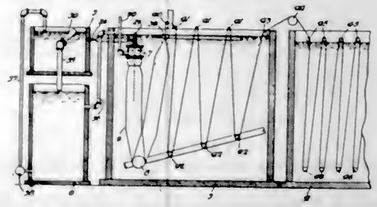
matically cooling said bowl within the limits of a normal infusion to terminate infusion in said coffee bowl and effect the return of the liquid coffee to said water bowl, and water supply and brewed coffee discharge connections for said water bowl.

2,097,682
CONTAINER
Gustav E. Andersen, Stavanger, Norway
Application September 7, 1935, Serial No. 39,649
In Norway April 18, 1931
12 Claims. (Cl. 229—29)



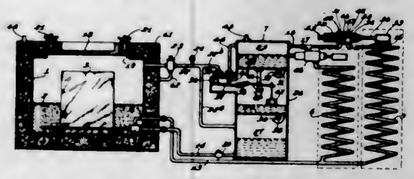
1. A container formed with a plurality of cells therein and comprising a base, integral front, back and ends on the base, a transverse partition connected integrally at one side of each end of the container by a spacer substantially two cells long, a transverse partition connected integrally with the other side of each end of the container by a spacer substantially one cell long, a centrally positioned transverse partition formed integrally with the front of the container, a longitudinally extending partition formed integrally with the front of the container, and a lid formed integrally with the back of the container and having a front flap folding over the front of the container and formed with tabs adapted when the container is closed to be received in slots cut in the container front.

2,097,683
GRIPPING DEVICE FOR TUBES OF HEAT-EXCHANGE APPARATUS
Robert Armstrong, Ridgefield, N. J.
Application July 31, 1936, Serial No. 93,621
5 Claims. (Cl. 294—92)



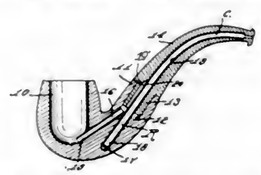
1. A gripping device for externally engaging a tube of a heat-exchange apparatus, comprising a pair of jaws shaped and spaced to permit passage between them of the tube to be gripped, and a jaw

carrier provided with a portion adapted to receive a pulling force applied in a direction substantially



parallel to but offset from the axis of the gripped tube, each jaw consisting of a member having substantially the shape of a hyperboloid.

2,097,684
PROCESS AND APPARATUS FOR MAKING SAUSAGE CASINGS AND THE LIKE
Ralph L. Atkinson, Boston, Mass.
Application May 1, 1933, Serial No. 668,712
Renewed August 4, 1934
4 Claims. (Cl. 18—15)

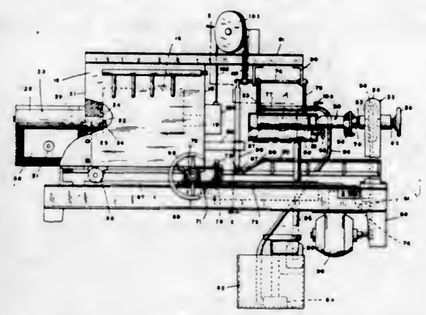


1. In a forming head of the class described, a main body for receiving the material from which tubing is to be formed by extrusion, said body having an exterior die member, a mandrel concentric and cooperating with the die member to form an annular die opening therewith, a skirt on said mandrel having a lower portion of enlarged diameter as compared to the die opening, a sleeve supporting said mandrel and communicating with the interior thereof, means for supplying the sleeve with coagulant, the skirt of the mandrel being formed with upper and lower passages permitting the circulation of coagulant from the interior of the skirt through the latter and into a chamber formed between the skirt and the newly formed tubing, said skirt also being formed with lower openings permitting the coagulant to escape from said chamber to the interior of the skirt.

2,097,685
REFRIGERATING SYSTEM
William J. Bolton, Pittsburgh, Pa.
Application April 28, 1933, Serial No. 668,399
19 Claims. (Cl. 62—91.5)

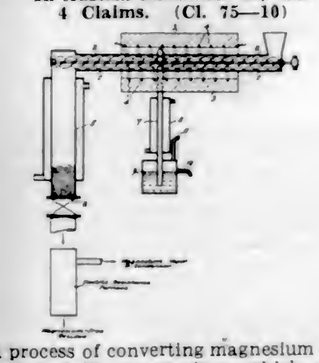
14. A method of refrigerating which comprises bringing a quantity of solid CO_2 ice in contact with a light petroleum and bringing said petroleum in heat exchange relation with a region or object to be refrigerated.

2,097,686
SMOKING PIPE
Charles C. Cohee, Indianapolis, Ind.
Application April 5, 1937, Serial No. 135,010
3 Claims. (Cl. 131—12)



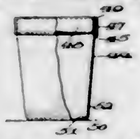
1. A smoking pipe comprising a bowl and separable bored stem, a metal tube mounted in the bore of the stem and having a closed inner end and a perforation through its top side intermediate its open end and its inner closed end with a substantial length of said closed end lying within a blind pocket formed in the main body of the pipe, a comparatively short nicotine pocket surrounding said tube between the bowl and said perforation, the upper region of said nicotine pocket communicating respectively with the bowl and the said perforation.

2,097,687
SURFACE ANESTHETIC
David Curtis, New York, N. Y.
No Drawing. Application September 24, 1935, Serial No. 41,872
4 Claims. (Cl. 167—52)



1. As a new compound, the acetyl salicylic acid salt of ethyl aminobenzoate, having the formula of $C_6H_4.NH_2COO.C_2H_5—C_6H_4O(CH_3CO).COOH$.

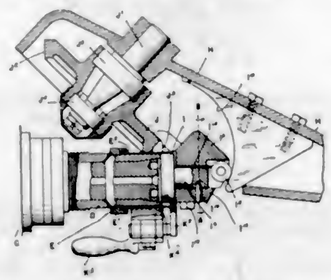
2,097,688
APPARATUS FOR LINING TUBULAR MEMBERS
Charles W. Eggenweiler and William J. Fiegel, Detroit, Mich., assignors to Bohn Aluminum and Brass Corporation, Detroit, Mich., a corporation of Michigan
Application December 17, 1934, Serial No. 757,926
19 Claims. (Cl. 22—65)



1. In apparatus for casting a lining within a tubular member, means for rotating said member, a heating chamber movable axially of the member toward and away from said member and having an opening through the wall adjacent the member of sufficient dimension to receive the member upon movement of the chamber in a direction toward said member, and means for heating the interior of the chamber to a predetermined temperature.

2,097,689
CONVERSION OF MAGNESIUM DUST INTO COMPACT METALLIC MAGNESIUM
Konrad Erdmann, Radenthein, Austria, and Fritz Hansgirg, Konan, Korea, assignors to American Magnesium Metals Corporation, Pittsburgh, Pa., a corporation of Delaware
Application November 5, 1935, Serial No. 48,435
In Austria November 13, 1934
4 Claims. (Cl. 75—10)

1. A process of converting magnesium dust into compact metallic magnesium, which comprises mixing magnesium dust with current conducting substance indifferent to magnesium metal, which at temperatures at which lively vaporization of magnesium takes place is still unmelted and which has low vapor tension at such temperatures, while concurrently further adding magnesium oxide, impasting the mixture thus obtained with the addition of hydrocarbon oil, after which this paste is heated to distil off the hydrocarbon oil, and agglomerated to compacted bodies; then interposing the pieces thus obtained as resistor between the poles in an electric furnace to drive out the magnesium in the form of vapor, and condensing the vapor evolved to a liquid deposit.

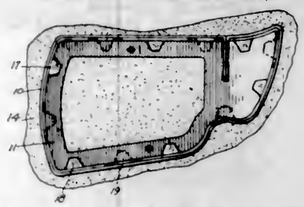


2,097,690
TRANSPARENT CONTAINER
Enoch T. Ferngren, Jackson Heights, N. Y., assignor, by mesne assignments, to Plax Corporation, Hartford, Conn., a corporation of Delaware
Application August 20, 1932, Serial No. 629,696
Renewed April 5, 1937
9 Claims. (Cl. 229—3.5)

1. A seamless, transparent drinking cup of a waterproof material formed with a folded-over border wall at its open end to produce a rounded edge thereon, and having a recessed annular groove covered by the folded portion, and a reinforcing band in the groove.

2,097,691
METHOD AND MACHINE FOR FORMING FLANGED BEARING SHELLS
William J. Fiegel, Detroit, Mich., assignor to Bohn Aluminum & Brass Corporation, Detroit, Mich., a corporation of Michigan
Application March 23, 1936, Serial No. 70,445
20 Claims. (Cl. 153—29)

1. The method of forming flanged bearing shells comprising, holding a portion of a cylindrical blank from distortion leaving a projecting free portion, engaging the projecting free portion of said blank with a roller, relatively rotating said blank and roller, simultaneously swinging said roller about an axis substantially tangent to said blank at a point intermediate the held and free portions thereof, and positively flowing the metal in a direction axial with respect to the original blank and radial with respect to the formed flange to compensate for the changed peripheral length and to maintain substantial uniformity in thickness.

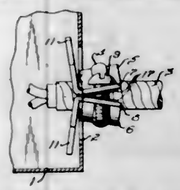


2,097,692
METHOD AND MACHINE FOR FORMING BEARING SHELLS
William J. Fiegel, Detroit, Mich., assignor to Bohn Aluminum & Brass Corporation, Detroit, Mich., a corporation of Michigan
Application March 23, 1936, Serial No. 70,446
13 Claims. (Cl. 153—40)

1. In a method of forming arcuate bearing shells, the steps of clamping a preformed arcuate portion of a strip to a mandrel, rotating said mandrel to wind thereon an additional arcuate portion, severing a segment including the preformed portion and a part of the subsequently formed portion, releasing the clamp to disengage the severed segment, reversely rotating said mandrel to its original position and repeating the operations to form successive shells.

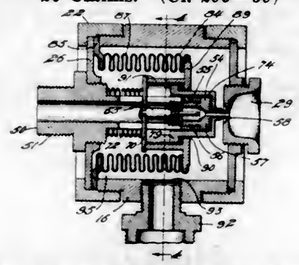
13. The combination with a rotary mandrel, of a gear on said mandrel, a rack in mesh with said gear, a reciprocatory plunger for actuating said rack to effect a corresponding oscillation of said mandrel through less than one revolution, a lost motion connection between said rack and plunger for effecting an interval of rest between phases of the oscillation, and means for adjusting the amount of said lost motion for varying the arc of oscillation.

2,097,693
COMBINED DIE AND PATTERN
Fred L. Foster, Lynn, Mass.
Application October 16, 1934, Serial No. 748,464
1 Claim. (Cl. 164—29)



In a double edge die in combination with a pattern of the shoe type, a supporting member secured to the inside surface of the die, lugs formed in the supporting member which alternately support both sides of the pattern.

2,097,694
INSULATING CELLULOSIC MEDIUM
Frederick W. Hochstetter, Pittsburgh, Pa.
Application November 15, 1934, Serial No. 753,206
15 Claims. (Cl. 154—28)



5. A method of making a cellulosic medium for insulating purposes comprising treating cellulosic material to make it heat-resistant, dehydrating the same and carbonizing either or both surfaces thereof by subjecting the same to sufficient heat for a sufficient time.

2,097,695
CABLE CLAMP
Ralph H. Kingdon, Detroit, Mich., assignor to Square D Company, Detroit, Mich., a corporation of Michigan
Application February 23, 1935, Serial No. 7,776
3 Claims. (Cl. 247—25)

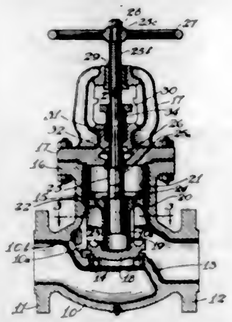
1. A cable clamp for securing a conductor within an opening in a box wall, which opening is appreciably wider than the conductor, comprising a body portion of a size approximating the conductor size and formed of separable sections embracing the conductor and adapted to be positioned on one side of the box wall, flanges at one end of the body sections having portions extending beyond the edges of the opening and adapted to be positioned on the opposite side of the box wall to close the opening therein, cooperating pairs of ears on opposite sides of said sections extending beyond the edges of the opening at said one side of the box wall, and screw means cooperating with said ears for drawing the sections together about the conductor, said clamp being maintained in position by the engagement of the box wall between the flange portions and the edges of the ears.

2,097,696
SELF CLEANING ATOMIZER
Walter Macdonald, North Providence, R. I.
Application June 26, 1936, Serial No. 87,370
20 Claims. (Cl. 299—59)

3. In an atomizer of the type set forth, a casing adapted to receive air under pressure and including a nozzle provided with a central orifice, a liquid conducting pipe disposed axially of the casing, a jet for the liquid mounted upon the pipe and extending into and in spaced relation to the orifice, an element slidable along the pipe and movable thereon in a direction away from the orifice by air pressure and movable towards the orifice by resilient means, a cleaning member carried by said element slidable in the jet and normally closing the same, and a cleaning member slidably mounted upon the jet in the path of the element and constructed and arranged to enter the space between the orifice of the nozzle and jet.

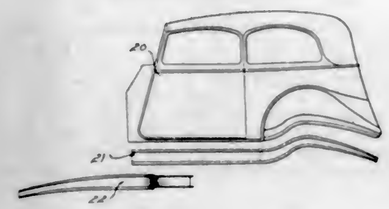
16. In an atomizer of the type set forth, a casing adapted to receive air under pressure, a nozzle associated with said casing provided with a central orifice, a jet for the discharge of liquid mounted in the casing and annularly spaced relative to the orifice, whereby an annular opening is provided about said jet for the discharge of air, and means mounted in said casing and movable into said annular opening to the point of discharge of the jet for cleaning said annular opening.

2,097,697
WALL STRUCTURE
Herbert E. Marks, Sewickley, Pa.
Application July 5, 1935, Serial No. 29,816
8 Claims. (Cl. 72—46)



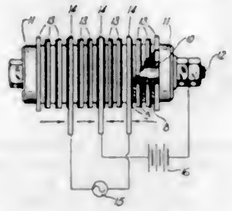
5. A portable wall panel comprising a pair of upright metal channel members having their webs rigidly connected together, said webs being corrugated transversely to form openings between them, a wall-board disposed against the side flanges of the channels at each side of the channels, and nails driven through said boards and frictionally engaging said channels in said openings for connecting the boards to the channels.

2,097,698
VALVE
Walter W. Mohr, Hammond, Ind., assignor to The Edward Valve & Manufacturing Co., Inc., East Chicago, Ind., a corporation of Indiana
Application November 20, 1933, Serial No. 698,771
6 Claims. (Cl. 251—44)



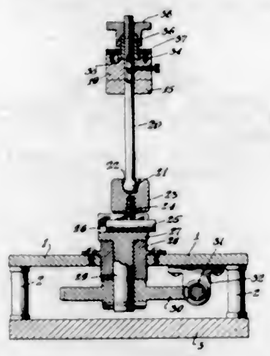
4. In a valve construction, the combination of a valve body having inlet and outlet openings and a third opening for receiving valve disk

controlling devices, said body having an apertured partition extending across the interior of said body between said inlet and said outlet openings, an annular valve seat mounted in the aperture in said partition, a valve disk cooperating with said seat and movable therefrom towards said third opening to control fluid flow through said valve seat, there being a free and substantially unobstructed clearance space around said valve seat between said seat and said third opening and extending to said parti-



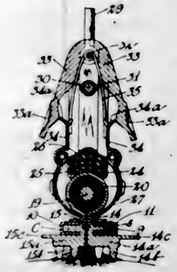
tion and to the inner surface of the wall of said valve body, and guiding ribs integral with said valve body and extending radially inwardly therefrom towards the axis of said valve seat and also extending substantially parallel with the axis of said valve seat towards said third opening, said ribs having substantially parallel inner edges for engaging and guiding said valve disk, said ribs having apertures therethrough permitting the free flow of fluid therethrough, whereby fluid flow through said valve seat is not materially checked by said ribs.

2,097,699
METHOD OF CONSTRUCTING VEHICLE BODIES
Amos E. Northup, Pleasant Ridge, and Charles H. Widman, Detroit, Mich., assignors to The Murray Corporation of America, a corporation of Delaware
Application June 2, 1933, Serial No. 673,932
11 Claims. (Cl. 296—28)



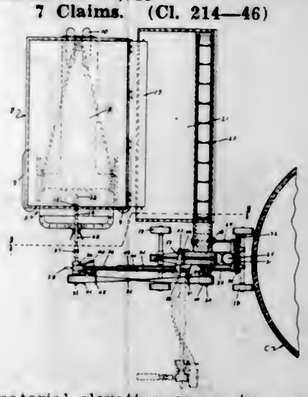
1. In a motor vehicle, a chassis frame having outwardly presenting channel sections as a separate element of the vehicle, a plurality of panel elements secured together to form a body and directly attached to the chassis frame to form box sections with the outwardly presented channel sections thereof, and means on the inner faces of said frame for providing a support for the driving means for the vehicle.

2,097,700
RECTIFIER AND METHOD FOR PRODUCING THE SAME
Carl E. Peters, St. Louis, Mo., assignor to B-L Electric Manufacturing Company, St. Louis, Mo., a corporation of Missouri
Application November 30, 1936, Serial No. 113,413
11 Claims. (Cl. 175—366)



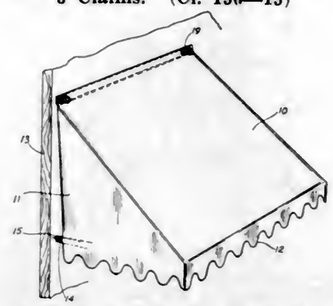
8. The method of making dry contact rectifiers which comprises forming a phosphorus coating on a copper sulfide element, placing an electropositive metal element in pressure engagement with said phosphorus coated element and passing current through the elements to cause electro-thermic reaction between the said materials.

2,097,701
MACHINE FOR CONDITIONING FALSE TEETH
Henry P. Pfeiffer, East Orange, N. J.
Application November 11, 1935, Serial No. 49,225
4 Claims. (Cl. 32—32)



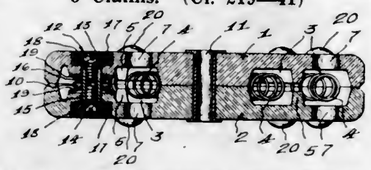
1. A machine for conditioning false teeth comprising a table, means thereon to fixedly support a set of false teeth, bearing means carried by said table at one end thereof, an arm loosely journalled at one end in said bearing means, said arm supporting a companion set of false teeth in occlusive, gravity pressure relation to said fixedly supported set, a revoluble member, having a horizontal groove, mounted on said table, means to rotate said member, an axially adjustable, cylindrical member carrying a centered upstanding screw, a nut-like block having a cup-shaped depression in its upper surface, and a pole having a ball-like end revolubly fitting said depression, said pole, according to the degree of axial adjustment of said cylindrical member, communicating movement through an ellipsis to said pole and thence to said arm and the set of teeth carried thereby.

2,097,702
PERMANENT WAVE APPARATUS AND METHOD
Paul C. Rilling, Minneapolis, Minn., assignor to Rilling-Arnao Company, Minneapolis, Minn., a corporation of Minnesota
Application June 14, 1935, Serial No. 26,601
7 Claims. (Cl. 132—36)



1. The method of waving hair upon a human head which consists in dividing off from the head of hair a flat lock, initially gripping said lock with a flat clamp adjacent the scalp and in so doing exerting only sufficient gripping force to retain the clamp to the lock of hair and maintain the arrangement of individual hairs in said lock, re-arranging and distributing the individual hairs uniformly while the same are initially gripped, then securing said clam to tightly grip the re-arranged hairs, winding said lock from its end to a point near said clamp upon a rod and treating the wound hair with heat and hair-softening moisture.

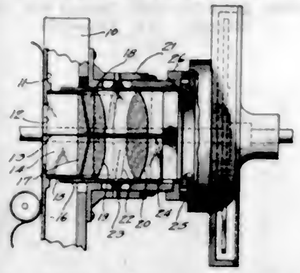
2,097,703
COMBINATION TRACTOR-ELEVATOR AND POWER TRANSMISSION
Adolph Ronning, Minneapolis, Minn.
Original application June 10, 1935, Serial No. 25,833. Divided and this application April 2, 1936, Serial No. 72,313
7 Claims. (Cl. 214—46)



2. A material elevating apparatus comprising a stationary hopper adapted to receive material discharged thereinto from the receptacle of a power vehicle driven to a position laterally adjacent thereto, an elevating device, means for conveying material from the hopper into said elevating device, and power transmission means, having a coupling for detachable connection with a power take-off shaft extending rearwardly from the power vehicle, for operating the elevating device and conveying means, said transmission means being swingable with respect to the elevating apparatus proper and to a position entirely clear of the vehicle as the latter is driven into unloading position at the side of the hopper.

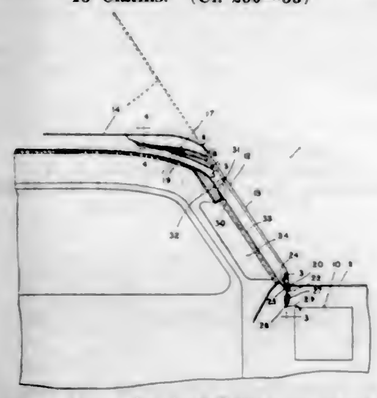
2,097,704
AWNING
Isidore P. Smith, Perrysburg, Ohio, assignor to The Hettrick Manufacturing Company, Toledo, Ohio, a corporation of Ohio
Application June 16, 1937, Serial No. 148,440
3 Claims. (Cl. 156—15)

1. In an awning having a downwardly and outwardly inclined fabric portion, means to hold the lower end of the fabric portion in the desired position, means providing a horizontal pocket in the upper portion of said fabric portion, said pocket terminating at its opposite ends short of the side edges of the fabric portion, a horizontally elongate grommet in the fabric portion between each side edge thereof and the adjacent end of said pocket, a removable header bar in said pocket having end portions projecting beyond the ends thereof and disposed in rear of said grommets, said bar having horizontally elongate openings substantially registering with said grommets respectively, and a headed fastener extending through each pair of bar and grommet openings respectively, thereby to support the upper end portion of the awning, and to prevent relative sliding movement between the header bar and the pocketed upper portion of the fabric portion.



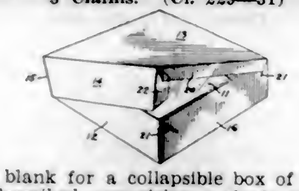
2,097,705
ELECTRIC WATER HEATER
Everett Stuck, Fayetteville, N. Y.
Application June 2, 1936, Serial No. 83,082
3 Claims. (Cl. 219—41)

1. A water heater comprising opposing perforated, discoidal plates lying flatwise on each other, and formed with a tortuous passage between them including inner and outer concentric portions, a heating element in said passage, binding devices extending transversely through the rims of the plates, the plates being also formed with a feed wire passage between them, opening through the edge thereof adjacent said devices, the wires and opposite ends of the heating element being connected to the binding devices,



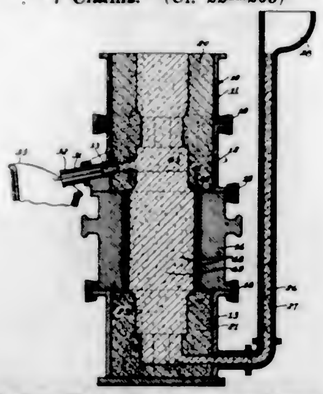
said binding devices also serving to clamp the plates together at the rims thereof, and means located centrally of the discoidal plates for securing the plates together.

2,097,706
METHOD OF AND APPARATUS FOR MULTI-COLOR PHOTOGRAPHY
Richard Thomas, Los Angeles, Calif.
Application January 21, 1935, Serial No. 2,807
7 Claims. (Cl. 88—16.4)



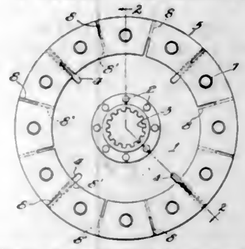
2. In a motion picture apparatus including four closely adjacent lens systems optically related to four separate but adjacent image areas, and means for advancing film intermittently, the combination of: a rotatable holder in operative relation with respect to said lens systems, said holder including three color filters adapted to filter light passing through three of said lens systems and an obturating element adapted to restrain light from one lens system, and means for partially rotating said holder during periods of intermittent motion of the film.

2,097,707
ANTENNA FOR MOTOR VEHICLES
Carl M. Tichenor, Detroit, Mich.
Application September 21, 1936, Serial No. 101,848
13 Claims. (Cl. 250—33)



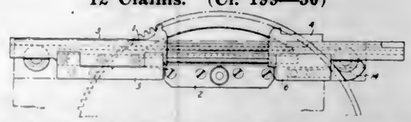
1. An antenna for installation on motor vehicles, comprising a flexible metallic rod attachable to a part of the vehicle to extend in a general vertical direction and possessing sufficient flexibility to permit bending the rod to the extent required to locate a substantial length of the free end portion of the rod in a general horizontal direction, and means for holding the rod under tension in a position wherein it extends in said general horizontal direction.

2,097,708
COLLAPSIBLE CONTAINER
Gustave A. Trost, San Francisco, Calif., assignor to Fleishhacker Paper Box Company, San Francisco, Calif., a corporation of California
Application September 14, 1936, Serial No. 100,692
3 Claims. (Cl. 229—31)



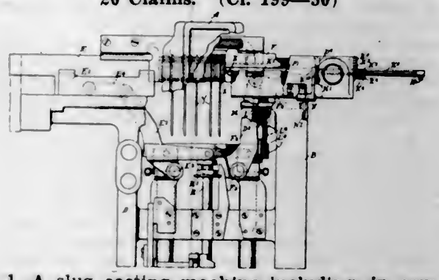
1. A blank for a collapsible box of the character described comprising a single rectangular blank having longitudinally and transversely extending score lines forming the top and bottom areas of a box and cover, an infolded and secured flap at the box forming end of said blank, diagonal scored lines extending outwardly from the corners of the box bottom defining a corner fold disposed beneath said flap when the sides of the blank are folded thereunder, a notched and diagonally scored portion in the sides of said blank between the bottom and top forming areas thereof adapted to interfold and form corners of the connecting ends of the box and cover, a closure flap upon the cover forming area adapted to be inserted in slots formed in the first formed end of said box, and a tab extending outwardly at the end of each side adjacent said closure flap adapted to be inserted in the fold formed by the diagonal scored lines terminating beneath the infolded and secured flap first above described to lock the cover forming area over the box forming area when the box is closed.

2,097,709
METHOD OF MAKING ROLLS
Harry E. Walters, Pittsburgh, Pa., assignor to United Engineering & Foundry Company, Pittsburgh, Pa., a corporation of Pennsylvania
Application September 30, 1935, Serial No. 42,800
7 Claims. (Cl. 22—205)



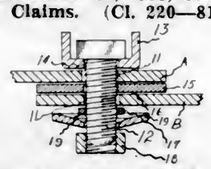
6. That method of casting a roll with a large central portion and reduced bearing necks which comprises casting the central portion of the roll, chilling the roll surface, and while the metal radially inside of the chilled surface metal is still molten displacing the molten metal by a core forming molten metal, and removing the displaced metal from the mold directly as it leaves the central portion of the roll.

2,097,710
FLEXIBLE CLUTCH FACING
Albert Whitelaw, Passaic, and David J. Bonawit, Glen Park, N. J., assignors to Raybestos-Manhattan, Inc., Passaic, N. J., a corporation of New Jersey
Application January 22, 1935, Serial No. 2,938
3 Claims. (Cl. 192—107)



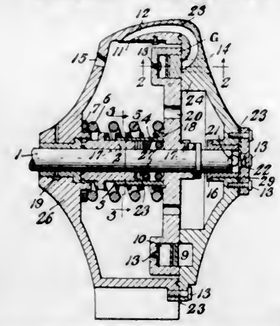
1. A facing adapted to be secured to a driven clutch plate of a clutch of the disc type, comprising an annular facing, having a plurality of elongated apertures radially disposed about said facing to impart resiliency to the facing, said apertures extending from substantially the internal and outer peripheries of said annular facing to substantially the mean circumference thereof.

2,097,711
MATRIX COMPOSING AND LINE CASTING MACHINE
Christian Augustus Albrecht, Berlin, Germany, assignor to Mergenthaler Linotype Company, Brooklyn, N. Y., a company of New York
Application August 7, 1936, Serial No. 94,752
In Germany May 12, 1936
12 Claims. (Cl. 199—50)



1. A method of forming a typographical slug from a line of matrices presented to a mould slot of sub-normal depth, in which the body of the slug is cast, wherein the effective depth of the slot at the part thereof to which the matrices are presented is increased automatically in accordance with the length of the matrix line.

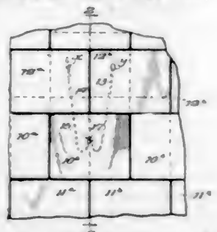
2,097,712
SLUG CASTING MACHINE
Raymond Archer, Seattle, Wash., assignor to Mergenthaler Linotype Company, a corporation of New York
Application July 30, 1936, Serial No. 93,357
20 Claims. (Cl. 199—50)



1. A slug casting machine including, in combination, a pair of line clamping jaws, one movable toward the other in quadding, means for effecting such quadding movement of the jaw, means acting independently of the line for arresting the jaw in a predetermined quadding position, and devices distinct from the jaw moving means for locking the jaw against outward movement in said predetermined quadding position during justification of the line.

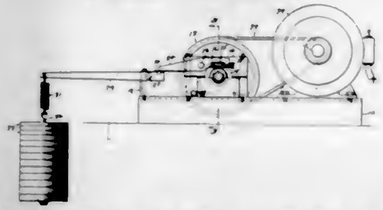
2,097,713
BOLTED JOINT
Arthur W. Ashley, Houston, Tex.
Application December 14, 1935, Serial No. 54,365
3 Claims. (Cl. 220—81)

1. A bolted joint for a plurality of metallic plates having their edge portions overlapping and provided with registering openings in said overlapping portions, including, non-rotatably mounted threaded bolts adapted to be passed through said openings, a nut on the threaded portion of each bolt beyond one of said plates, a yieldable packing ring surrounding each bolt and opposed to the outer side of said plate, and dished deformable means surrounding each bolt between said plate and the nut, said dished deformable means covering said packing ring and extending peripherally therebeyond whereby to engage said plate and shield said packing ring from pressure until the nut is tightened and the overlapping plate portions are drawn together, after which time said dished deformable means is flattened by further tightening of the nut and said packing ring is pressed and crowded into the opening about the bolt to seal said opening.



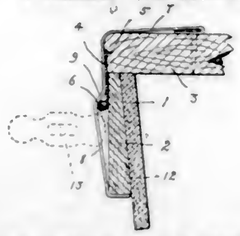
2,097,714
ROTARY COMPRESSOR OR PUMP
Calvin M. Ayre, Arlington, Va.
Application February 12, 1937, Serial No. 125,378
5 Claims. (Cl. 103—141)

1. A compressor of the class described comprising a housing formed of two bell-shaped members bolted and sealed together, with intake and discharge ports therein, a continuous annular groove on the inner side of the end wall of one housing member forming a working chamber, one segment of said groove being formed as and providing a cam having opposite inclines and forming a cut-off or divider block between the intake and discharge ports, a shaft journaled in



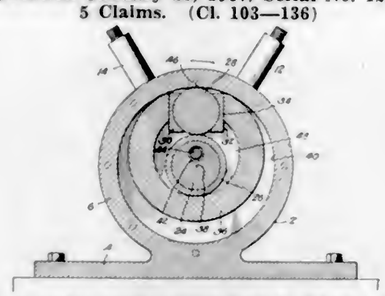
the housing, a disk keyed to the shaft for rotation therewith and having a gas-tight contact with the grooved housing member, means for maintaining said contact between the disk and the grooved housing member, pockets in the outer rim of the disk opening into said working chamber, piston blades pivoted at their central point within said pockets for sliding in said annular groove working chamber and over said cam in the housing member, said blades being made in the shape of a segment cut from a sphere by two arcs concentric with an axis of the sphere and passing through the sphere as their centers slide along said axis, said blades being pivoted in said pockets of the disk in such a manner as to ride partly within the disk pockets while rotating in the plane of the disk.

2,097,715
SLATE SUPPORTING CLIP
Henry G. Bartsch, Washington, D. C.
Application January 30, 1937, Serial No. 123,291
15 Claims. (Cl. 108—33)



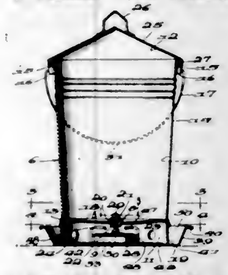
1. A standardized clip for the support of slate shingles of the conventional type provided with a spaced pair of nail-receptive apertures, comprising: a body portion adapted to flatly underlie the under surface of the shingle with which it is to be associated, means at the upper end of said body portion disposable through said shingle apertures to secure said clip to the shingle, and means at the lower end of said body portion adapted to lie flatly upon the top surface of shingles of the subjacent course when lapped by the first-mentioned shingle, said last-mentioned means being engageable with a headed stud preset in the sub-roof with its head in slightly spaced relation with respect to said top surface of said subjacent shingles.

2,097,716
OIL TESTING MACHINE
Cyril C. Benz, Long Beach, Calif.
Application July 1, 1935, Serial No. 29,317
1 Claim. (Cl. 265—10)



An oil testing machine comprising a base, bearing assemblies fixed on the base, a drive shaft fixed in said assemblies and adapted to be rotated therein, a bearing ring fixed to one end of said shaft, a cylindrical member pivotally mounted on said base and having its longitudinal axis at right angles to the longitudinal axis of said shaft whereby a point contact is made between the peripheries of said cylindrical member and said bearing ring, means to supply a lubricant to be tested to said point contact, and means to resiliently maintain said point contact.

2,097,717
COVER FASTENER
Peter L. Berke, Duluth, Minn.
Application November 19, 1936, Serial No. 111,675
5 Claims. (Cl. 217—70)

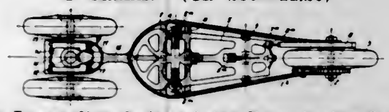


1. The combination with a receptacle having an encircling hoop about the upper open end thereof and a cover having a beaded hoop thereabouts for overlapping engagement with the first mentioned hoop, of a metal strip fastener for said cover characterized by being offset intermediate of its ends for overlapping engagement with the bead of said cover hoop.

2,097,718
ROTARY PUMP
James Lorin Bilderbeck, Newberry, Fla.
Application January 28, 1937, Serial No. 122,837
5 Claims. (Cl. 103—136)

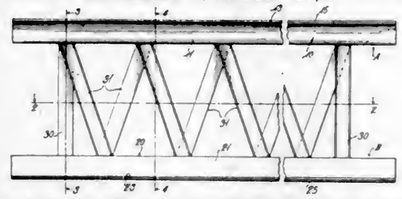
1. A rotary pump comprising a casing having a cylindrical inner surface forming a chamber therein, an inlet to said chamber and an outlet therefrom, a central shaft member mounted in said chamber concentric to said cylindrical surface, a hollow cylindrical rotor member mounted within said chamber enclosing said central shaft member and mounted eccentrically with respect to said central shaft member, said hollow member having an outwardly extending opening therein, a vane member comprising a cylinder and a split housing therefor carried by said hollow member in said opening, said cylinder being of a diameter so as to ride on said central shaft member and to contact with the cylindrical inner surface of said casing, said split housing comprising two sections, each of said sections having a cylindrical inner surface engaging said cylinder and an outer surface engaging the adjacent surface of said opening, said housing sections being of a height so as to expose a portion of said cylinder above and below the housing sections and a drive shaft operatively connected to said hollow member.

2,097,719
FLOAT CONTROLLED DRINKING FOUNTAIN
Howard S. Brembeck, North Manchester, Ind., assignor to The Cyclone Manufacturing Co., Urbana, Ind.
Application August 29, 1936, Serial No. 98,582
4 Claims. (Cl. 119—80)



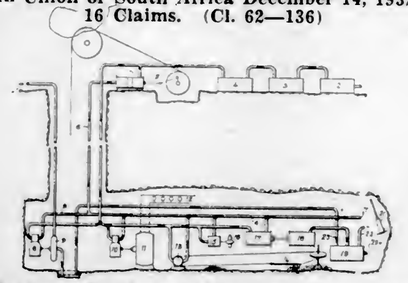
1. In a drinking fountain, a float for arranging in a drinking pan and free of connection to and for opening and closing a water discharge controlling valve adapted to be arranged in a water supply leading to the pan, and an inverted upstanding yoke-shaped element of skeleton form adapted to be positioned within the pan, said element of skeleton form having each of its sides and its top formed of a pair of spaced sections, the sections of one side being so spaced to engage opposite sides of the float, the sections of the other side being closely related and engaging another side of the float and the sections of the top being arranged over the float, one of the sides of said body being formed at its lower end with a lateral extension and means coacting with said extension for connecting said element to the pan, said sides arresting the horizontal shift of the float and providing a guide for the latter, and said top limiting the upward movement of the float.

2,097,720
TREATMENT OF OLIVE OIL TO PREVENT STEARIN COMING DOWN AT LOW TEMPERATURES
William Clayton, Sydney Back, James Frederick Morse, and Robert Ian Johnson, London, England, assignors to Crosse & Blackwell Limited, London, England, a British company
No Drawing. Application January 15, 1937, Serial No. 120,823. In Great Britain January 18, 1936
6 Claims. (Cl. 87—12)



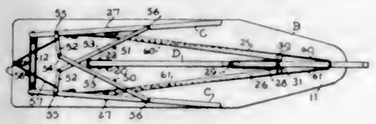
1. Process of treating olive oil containing stearin which consists in adding a small proportion of a polymerized oxidized mono-unsaturated disaturated glyceride.

2,097,721
ROLLER SKATE
Raphael Cledina, Liege, Belgium
Application June 9, 1934, Serial No. 729,888
In Belgium June 17, 1933
4 Claims. (Cl. 280—11.20)



3. In a roller skate, a laterally swinging frame, a rod connected to said frame having a forked end projecting upwardly, a toothed segment carried by said forked end, a second toothed segment engaged with the first toothed segment, a vertical pin carrying said second toothed segment and carried by the wheel axle, a bearing member receiving said vertical pin and comprising a rod on which the frame may swing whereby the skate may be steered, a longitudinally tiltable plate secured to the boot of the skater and resting upon said frame, means actuated by said plate for braking the skate, and means to prevent the skate from running backwards.

2,097,722
JOIST
Edwin D. Coddington, Milwaukee, Wis., assignor to Reynolds Corporation, New York, N. Y., a corporation of Delaware
Application September 3, 1935, Serial No. 39,027
2 Claims. (Cl. 189—37)



1. A composite joist comprising a pair of tubular chords each constituting a casing of nail-penetrable sheet metal having flat upper and lower faces and a nailable cementitious core enclosed by the casing and a web supporting said chords in spaced relation, said web comprising a series of diagonally disposed channel sections, alternate channel sections being reversely inclined and the ends only of contiguous channel sections being overlapped and united back to back and bonded along their terminal edges to the opposed flat faces of the chords.

2,097,723
CONDITIONING MINE AIR
Sydney Edward Thacker Ewing and Arthur Lindsey Egan, Johannesburg, Transvaal, Union of South Africa
Application August 3, 1933, Serial No. 683,528
In Union of South Africa December 14, 1932
16 Claims. (Cl. 62—136)
